EDUCATIONAL RESOURCES

INFORMATION CENTER

Resources in Education (RIE) is processed for printing by Computer Sciences Corporation, under contract with the U.S. Department of Education, Office of Educational Research and Improvement (OERI), and is published monthly by the U.S. Government Printing Office (GPO) with printing funds approved by the Office of Management and Budget. The contents of RIE do not necessarily reflect official OERI policy.

RIE is available on subscription (12 issues/year), or as individual issues, from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Inquiries regarding prices should be directed to the Superintendent of Documents.

Introduction

RESOURCES IN EDUCATION (RIE) — A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
Office of Educational Research and Improvement (OERI)
U.S. Department of Education
Washington, D.C. 20208-5720

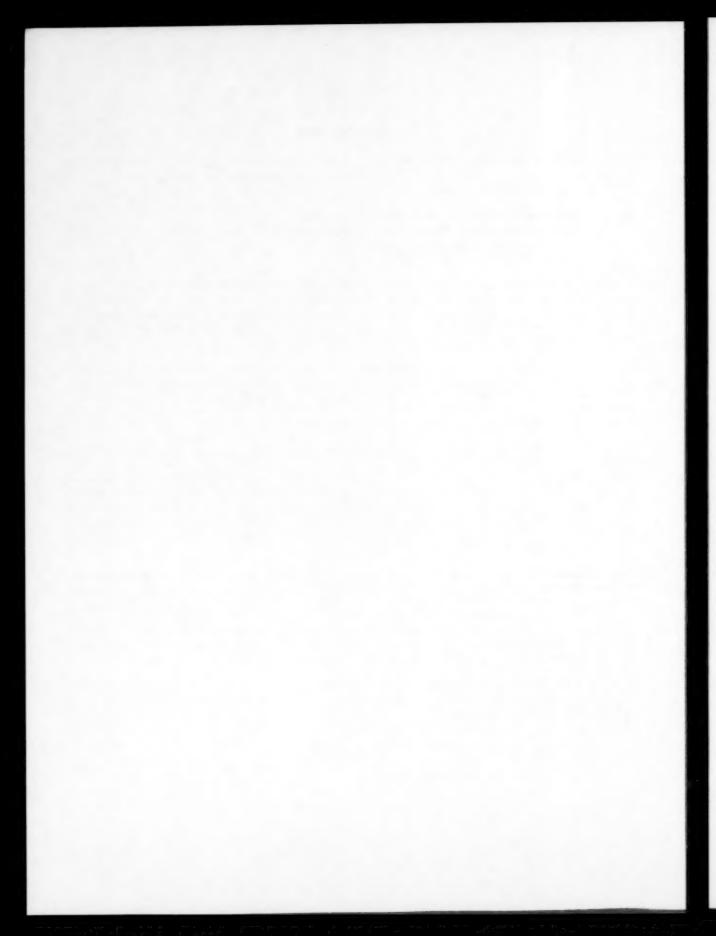

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

Organization of Journal: Resources in Education is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with the prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents" in the most recent issue of RIE.

How to Submit Documents to ERIC: If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 1301 Piccard Drive, Suite 300, Rockville, MD 20850-4305. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE).

How To Order RIE: The U.S. Government Printing Office (GPO) prints RIE and functions as subscription agent. Detailed subscription information appears on the page in the back of RIE entitled "How to Order Resources in Education."

ERIC Clearinghouse Publications

This page highlights publications announced in this issue of *Resources in Education* which were created by the ERIC Clearinghouses and which have been selected as having special significance for educators. For each brief citation appearing here, there is a full abstract appearing under the same ED number in the pages of the issue.

In addition to collecting the literature of education for announcement in *Resources in Education* and *Current Index to Journals in Education*, the ERIC Clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, digests, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time for staying abreast of new developments in education is limited.

ERIC publications are published either by the ERIC Clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Original copies are usually available directly from the responsible Clearinghouse or from the source listed in the citation. In addition, the publications announced in *Resources in Education* are contained in all ERIC microfiche collections, and are available in reproduced paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS), 7420 Fullerton Road, Suite 110, Springfield, Virginia 22153-2852 Telephone: 1-800-443-ERIC (3742).

DOCUMENT SECTION

SAMPLE DOCUMENT RESUME

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

Originally designed to serve 400 employees, the
Mott Community College (MCC) Workplace Literacy Project provided instruction in basic workplace
skills to 566 employees from 20 companies. The
cost was 2 percent lower than projected. All participants were assessed and counseled on the besis of
the assessment tests. Individualized training plans
were developed for each employee. A written evaluation was administered to each participant at the
midpoint of each training sequence. Adjustments to
the delivery of the curriculum were made in response to the data: delivering handout materials in
a workbook format instead of distributing on a
class-by-class basis, additional classroom materials,
more site-specific curriculum materials, and more
in-depth information on topics. Changes made as a
result of the final course evaluation included combining closely related curricula into one training sequence and moving classes from worksite to MCC
or the reverse. Local, statewide, and mational dissemination activities included articles and speeches
at conferences. Appendixes include examples of dissemination products, an evaluation of the project,
t-tests for paired samples, employer survey and fraquencies, midpoint and final evaluation forms, and
weighted data from evaluations of courses, instructors, and materials. Six separately published curricutors, and materials. Six separately published curricutors, and materials.

This handbook provides a broad overview of the stages and activities to be undertaken to establish workplace learning (WPL) programs. It is designed to lead WPL service providers and employers through the process of developing a WPL program. Each chapter begins by stating the purpose and the outcomes expected upon completion. Throughout the manual are found graphic displays of check lists (a list of tasks that should be completed toward setting up a program) and exhibits (capsulized summaries of concepts and issues). Chapter 1 summaries five basic steps in deciding whether to offer a WPL program. Chapter 2 discusses marketing and public relations. Chapter 3 leads the reader through three steps in meeting with employers: understanding the provider client relationship, building a good relationship, and negotiating a needs analysis agreement. Chapter 4 discusses how to conduct a work-place literacy needs analysis (LNA). Chapter 7 on program evaluation covers the following: components of an evaluation strategy, evaluation issues, data collection methods and sources, an evaluation plan, data analysis and interpretation, and use of findings. Appendixes contain checklists, sample materials and forms, glossary, a list of 21 annotated references, and index. (YLB)

Identifiers—*Oregon
Approximately 4,000 randomly selected Oregon

employers were surveyed regarding their training practices and work organization. More than 43% of employers surveyed responded. Among the key survey findings were the following: most Oregon employers initially recruit locally; applicants for jobs in high performance organizations are often rejected because of inadequate math/calculation skills; only 17% of Oregon's work force is employed by firms providing at least half of their employees with at least 20 hours of training annually; only 60% of Oregon employers providing on-the-job training actually designate trainers for trainees and fewer than 40% provide training for trainers; although few firms actually participate in education initiatives, 21% desire to participate; public sector employers are most likely to track/budget for training investment; only 3% of firms surveyed can be considered high performance; and employers with high performance characteristics note more skill deficiencies than does the private sector as a whole. The following were identified as areas on which state policymakers should concentrate: improve high school deucation, expand life skills training in high school, provide school-to-work transition, and improve professional/technical (vocational) training in high school. (Appended are the following: overview of study methodology, The survey instrument, and 21 tables/figures. Contains 62 references.) (MN)

In 1992, questionnaires regarding the training and work organization practices were mailed to a random sample of 4,000 Oregon employers, and focus groups were held with 100 Oregon managers/employers. The main findings from the completed questionnaires (43% response rate) were as follows: most Oregon employers do not plan for training in treat it as an investment; manageria/administrative and professional/technical employees receive the most and greatest variety of training; most training is provided by in-house training departments, external training vendors/consultants, or industry/trade/professional groups; public job training programs, apprenticeship programs, and labor unions are among the least frequently used training providers; and most of the 3% of Oregon employers who have implemented high performance practices have encountered significant employee skill deficiencies in so doing. The following were identified as challenges facing Oregon: engage employers in promoting competitiveness through high performance work organization; cultivate public-private partnerships; develop policies encouraging/sustaining a high-skill/high-wage conomy; continue to forms/improvements in public education and training; and continue to measure progress toward achieving training and high performance benchmarks. (Appended are the following: mail survey instrument and results, focus group protocol, and rating sale benchmarks. Con

This report explores various ways to increase the relevance of education for health care professionals as a strategy for improving the quality of health care and increasing access to services. Noting that the health work force can account for up to 70 percent of the health budget, the report concentrates on innovations in education that can make learning easier and more efficient while also producing graduates equipped with the knowledge and skills most relevant to high priority health problems. Particular attention is given to factors that are known to influence the success of two kinds of innovations: those dealing with the learning process and those dealing with the relevance of education to community needs and practices. The report also challenges educational institutions to expand their sphere of influence to include advice and guidance on the development of health policy and services and provides examples of innovative approaches. The report is organized in five main sections that cover the following topics: (1) the need for a fresh look at the education of health professionals; (3) creating links with new partners in the community; (4) strategies for change applied to health systems and to educational institutions; and (5) organizational and practical issues. Recommendations are made to educational institutions, member nations of the World Health Organization (WHO), and to WHO as an organization. Contains 24 references and 10 suggestions for further reading. (KC)

A study examined the link between on-the-job training (OIT) and job performance in a randomly selected sample of 50 skilled maintenance craftersons employed by the city of Chicago. The sample was identified from the training sheets signed by 160 employees who participated in OJT in a 1-month period. The majority of the employees agreed with current trends and ideas found in re-

search concerning OJT. Employees overwhelmingly agreed that the subject matter of their OJT program was logically organized and that the instructor presented the subject matter well, was organized and prepared, stressed safety rules, and related the subject matter of the OJT to the employees work. When asked about written materials and training facilities, 92% of the employees responded positively. The employees agreed that the OJT made them better able to do the following: assist an injured employee, use fire extinguishing equipment, understand a train operator's viewpoint, and recognize various safety zones and warnings. The employees' overwhelmingly positive responses about the content and relevance of their OJT was concluded to be evidence in support of the hypothesis that employees receiving OJT experience increased job satisfaction, work knowledge, responsibility, and productivity. (The employee questionnaire is included.) Contains 13 references. (MN)

This report describes the programs provided by the Illinois Department of Public Aid and the initiatives that the department of Public Aid and the initiatives that the department has begun to help welfare recipients find work and get off welfare roils. Programs described include the following: (1) AFDC (Aid for Families with Dependent Children) Job Opportunities and Basic Skills program (JOBS), which includes Project Chance; (2) Opportunities that serves clients through 10 community colleges; (3) the Youth Services Program that serves young parents in two Chicago locations; and (4) the Food Stamp Employment and Training program that targets Transitional Assistance clients and clients volunteering for Earnfare. Some highlights of the report are the following: (1) a narrative of the phase-in of the STEP-UP initiative operated with the Chicago Housing Authority, which allowed more than 100 clients to earn wages of \$11.35 per hour while gaining valuable experience in the construction industry; (3) a description of the Earnfare Program, which had 1,000 participants the first year and was put together by the department in only 5days; and (4) a description of Fresh Start, five separate reforms designed to eliminate federal barriers that prevent families from moving toward self-sufficiency. The report contains more than 30 tables and graphs. Fourteen appendixes present information on the following: statutory report requirements; terms; AFDC/JOBS program background; exempt and nonexempt status in education and training components; demographic data on AFDC participants; earned income disregard for Earnfare participants remain eligible for assistance; AFDC/JOBS employment statistics, demographic data on Earnfare participants; grant changes of Earnfare participants, remained income disregard for Earnfare participants, transitional assist

Identifiers—Nebraska (Omaha)
Developed for women in Omaha who are preparing to reenter the labor market or further their education, this guide provides information on where to go, to whom to talk, what support services are available, and what actions these women can take. The guide is organized by the following three broad categories: getting ready, education and training, and employment. Topics overed in the first section include career planning and counseling, libraries, child care, and money. In the education and training section, education, the basics, choices, and financial aid are outlined. The following topics are contained in the employment section: Occupational Outlook Handbook, where to look, resumes and interviews, nontraditional work, being your own boss, job alternatives, and job rights. At the beginning of esch section is a brief description of how to use the resources in the section, as well as a detailed table of contents. Resources listed in these three sections include the following: schools, colleges, apprenticeship programs, agencies, offices, laws, government publications, and businesses. A final resource section of the guide lists 10 books and 5 other publications. (KC)

Identifiers—Family Owned Business, "Great Britain:

A study examined the interrelationships between sexuality, family, and the labor market in Great Britain. First, a range of analyses of women's role in the labor market, including analyses from feminist and sociological perspectives, were reviewed to determine how sexual as opposed to gender relations operate in the labor market. Next, the role of women as unpaid and paid workers in family businesses was examined. Finally, the gendered structure and dynamics of work in a British hotel and leisure park were examined in a 6-month field study focusing on the relationship between sexuality and the gendered organization of employment relations. The study's main conclusions were as follows: (1) far from existing only outside the domain of employment, both family and sexual work relations can relations within the labor market; (2) in the hotel and catering industries, work relations are frequently organized by the patriarchal relations of the family; (3) to gain access to employment, most women have no choice but to occupy resistions of uncerty organized by the patriarchal relations on use hmilty; (3) to gain access to employment, most somen have no choice but to occupy positions of sexual subjects; and (4) sexual exploitation in the workplace is the outcome of work relations that

operate only for women. (Contains 218 references and 11 figures/tables.) (MN)

This practicum report describes the research conducted in preparation for developing a career student guide to acquaint students attending Henry County High School (HCHS) in McDonough, Georgia, with the school's new tech prep program. Chapters 1 and 2 contain background information about HCHS' tech prep program and a review of literature review, interview representatives of other tech prep programs, and formulate the criteria used in developing the career student guide. Chapters 4 and 5 discuss the key findings and implications of the literature review and interviews. Appended are lists of programs contacted for the study, the guide development criteria, and the career student guide, which includes the following: overview of the tech prep program; high school graduation requirements; tech prep requirements; HCHS program clusters; community/technical school clusters; tech prep options and process; and 4-year course sequences for the business management, mechanical, and health/human services tech prep programs; and information about DeKalb Technical Institute, which is the postsecondary institution involved in HCHS's tech prep program. This document contains 25 units to consider for use in a tech prep competency profile for the occupation of electromechanical technician. All the units listed will not necessarily apply to every situa-

use in a tech prep competency profile for the occupation of electromechanical technician. All the units listed will not necessarily apply to every situation or tech prep consortium, nor will all the competencies within each unit be appropriate. Several units appear within each specific occupation and would need to only appear once if the user is compiling a cluster of occupations. The first three units are divided into subunits. These units (communications literacy, mathematics literacy, and science literacy) list the competencies for each subunit. The remaining units are divided into competencies, followed by a listing of competency builders. These units are as follows: technology literacy, employability skills professionalism, teamwork, quality assurance, technical recording and reporting, computer literacy, workplace safety, supervision, basic electronics, troubleshooting and repair, industrial electricity, electrical test and measurement equipment, drafting technology, computer-assisted drafting and design (CADD) fundamentals, intermediate CADD, equipment installation, mechanical power transmission, electromechanical technology, hydraulics and pneumatics, industrial manufacturing technology, and programmable logic controllers. Transfer of Training
This book is designed to familiarize trainers with
the implications of culture on the learning and development process and provide them with practical
techniques for taking different cultural values into
account when planning and delivering training. The
book consists of 18 chapters organized into 4 parts
as follows: culture and training (risks of ignoring
cultural insues, what culture is, and the trainer's role
in multicultural education); learners from different
cultural groups (organizational culture and national
differences); culture and the learning event (advertising literature, application forms, joining instructions, briefings/briefing notes, precourse work,
precourse questionnaires, icebreakers, training sessions, and rules and rule breaking); and the way
forward (the cultural dimension, transfer of learning, and final preparations for delivering multicultural training). Twelve tables/diagrams, 16
activities for trainers, and 5 activities for learners
are included. Appended is a checklist for trainers to
use in assessing their ability to manage the implicacitons of culture for the learning and development
process. An annotated bibliography lists 10 references/resources. (MN)

*Bivaluation Methods, *Evaluation Utilization,
*Management Development, *Program Evaluation
This book offers a comprehensive guide to evaluation as applied to management development. Part I
(Chapters 1-2) discusses the following: what management is; the role of training, development, and
education of managers; the purposes of evaluation
(proving, improving, learning, controlling); and approaches to evaluation. Part II (Chapters 3-6) concentrates on the details of evaluation designs and
design choice. Chapter 3 deals with choosing the
evaluation focus for data collection and starts with
a general framework to assist that choice. Chapter 4 discusses three data collection media-observations, records, and informants—and associated issues
to do with selection and sampling. Chapter 5 reviews some main data collection methods. Chapter 6 focuses on interpreting and using evaluations and
extends the discussion to political aspects of evaluation utilization. Part III (Chapters 7-10) concentrates on the different settings in which evaluation
may take place. It examines the kinds of questions
and problems that typically occur in different settings and the methods or approaches usually
adopted in tackling them. Chapters 7-10 consider
evaluation at a particular level (methods; courses,
programs, and systems; and policy) and chapter 11
looks to the future. Within each level, the book discusses how the practicular level (methods; courses,
programs, and systems; and policy) and chapter 11
looks to the setting. The three settings to be consideered are educational, training, and development.
Appendixes include 158 references and index.

Trainers
This handbook introduces a new training model that reflects the complexity of organizational life, changes in the human resources (HR) function, and the need to involve line management. Part I outlines the new context in which training must be delivered.

It discusses the changing organizational requirements for training and the changing position of the training function within HR, reviews some models of the training function, and considers how an improved model could be developed. In part II, attention shifts to more practical issues—what the training manager should be doing to promote training in the organization. Needs identification is considered at both the macro and micro levels. At the higher level, the requirement to develop training within the context of the business pian and the need to capture HR benefits beyond narrow skills enhancement are discussed. Instruments that increase the effectiveness of needs identification, performance appraisal, and evaluation are introduced. Part III discusses the role of the training function and the place of the training function should be expressed as the management of the organization's training culture. The final section of the book considers skills required to achieve this objective. Appendixes present key features of the United Kingdom training environment-national trends, government policy, and competency-based qualifications. An index is provided. (YLB)

The Type—Books (010)

Document Not Available from EDRS,
Descriptors—Adult Education, Brainstorming, Cooperative Learning, Cost Effectiveness, Decision Making, Group Discussion, "Group Dynamics, Information Seeking, Organizational Development, Problems, "Problem Solving This book presents a logical problem-solving process and contains many tools and techniques to help groups identify, analyze, and solve problems successfully. It is meant to be used by anyone engaged in this activity whether they be facilitators, leaders, or members of problem-solving groups, or managers who have an interest in the problem-solving process.

Part I introduces the concepts and methods involved. The advantages of the group approach are discussed. Part II examines in detail each of the eight key problems-solving techniques. It covers the following: the problem-solving process, brainstorming, defining problems clearly, analyzing problems, collecting data, interpretting data, finding solutions, and cost-benefit analysis. Part III explains how to present proposed solutions, how to evaluate results, and how to ensure that the group process runs smoothly. It addresses the skills of working together effectively and explores some of the more likely types of problems that could be encountered and the recommended methods of dealing with them. An index is provided. (YLB)

This book highlights some ways in which the changes that have affected the British economy and education system have also affected young people's career preparation. It is based on data from the 1970 birth cohort at the stage when members were 16 years old. Chapter 2 examines changes in the relationship between social class and educational outcomes at age 16. Chapter 3 explores ways in which young people's attitudes toward school are structured and assesses the extent of stitude change since the previous cohort. Chapter 4 provides an overview of career programs in schools and looks at some ways in which programs have changed over recent years. Chapter 5 studies ways in which young people's occupational aspirations are structured. It assesses the relative contributions of academic performance, school stitudes, family, and labor market characteristics on occupational aspirations. Chapter 6 examines young people's expectations about their likely routes into the labor market, the stage they expect to leave full-time education, and ways in which these expectations are structured by factors such as academic attainment and local opportunity structures. It explores reasons young people gave for wanting to leave education, difficulties they expect to encounter in the search for work, and their impressions about the relationachip between education and jobs. Chapter 7 summarizes findings and highlights policy implications. Appendizes describe response rates and weighting. The book includes 45 tables and figures, a 42-item bibliography, and an index. These 15 papers originate from a conference that brought together researchers and trade unionists from a number of countries to examine the potential for a more democratic, active, and participative form of collaboration or "research as engagement."
The first half contains chapters that explore, theoretically, the nature of research within a collaborative framework. In the second half, trade union members and researchers use concrete examples to

discuss either their experience of working collaboratively or to review the links between both sides in specific areas. The papers are as follows: "Research as Engagement" (Forrester, Thorne); "Trade Unions and Social Research: The Casualties and Victims of Social Research: The Casualties and Victims of Social Research: [Pryer); "Research as Engagement: Trade Unions in the 1990s" (Waddington, Whitston); "Notes towards the Development of a Liberstory Research Project" (Gottfried); "The Unions and Research on Working Life in Sweden: What Can We Do Together?" (Danvind, Mortvilk); "The Canadian Experience: Establishing and Strengthening Links between Trade Unions and Researchers' (Kumar); "Unions and Technological Change: Labor Research Strategies and Structures in the USA and Canada" (Haddad); "The Research Circle: A Way of Cooperating" (Holmstrand); "Developing Workers' Research Skills: Collaborative Research and Trade Unions Educations" (Somerton, Vulliamy); "A Programme for Collaboration between Trade Unions and University in Workplace Development" (Jarnegren); "Research as Engagement: Political Questions in Collective Research with the Rank and File" (Grossman); "Working with Researchers: Stress at Work" (McDonald); "Developing Research Initiatives in a Local Economy" (Sivorn, Watson); "Action Research with Homeworkers in West Yorkshire" (Tate); and "New Technology and Trade Union Activities: Experiences from Two Projects" (Winterton). A list of contributors with addresses precedes the papers. An index concludes the book. (YLB)

This implementation guide contains information based on experiences that occurred during the development and implementation of the Rhode Island
Tech Prep Model. It is intended to assist educators in addressing challenges and obstacles faced by the program early in the planning process. It begins with a rationale for tech prep. Rhode Island statistics are followed by a description of tech prep. Other sections discuss the neglected majority of students as the impetus for the Rhode Island Tech Prep program and the plan that was developed and carried out. A suggested sequence of events that will foster the development and implementation of a tech prep program is in the form of a schedule/worksheet. Recommendations for the recruitment of new schools are made. The next section focuses on how tech prep works, including curriculum reform, programs to be developed, and student profile. Tech prep program; suggested sequelopment of a successful program; suggestions for marketing a tech prep program; suggested sequelopment of a successful program; suggestions for marketing a tech prep program future plans for tech prep in Rhode Island for specific technical programs, business/office administration

This program guide for educators outlines how the tech prep program has evolved in Rhode Island, the type of students most likely to benefit from the program, and how the program works. It begins with tech prep success stories, tech prep associate degree activity timeline, and director of Community College of Rhode Island (CCR) Tech Prep administration/staff and participating high schools. A rationale for the program includes tech prep's history in Rhode Island. The "Introduction to the Tech Prep Associate Degree Program" addresses the following: articulation, tech prep student profile, curriculum overview, tech prep astudent profile, curriculum overview, tech prep activities, application process, and suggested competency guidelines for English and mathematics at the secondary level. The final three sections focus on the three tech prep programs at CCRI: technical programs, business/of-fice administration, and allied (dental health. Each section provides information on course selection, the participating programs at CCRI, acceptance policy, and courses of study. Appendixes include sample placement test questions for both English and mathematics, sample student agreement, and sample acceptance certificate. (YLB)

Identifiers—"Rhode Island Tech Prep Associate Degree Program is a statewide partnership between the Community College of Rhode Island, 70 percent of the high schools in the state, and the business community. It targets students enrolled in unfocused general education programs in high schools and involves them in an applied course of study in mathematics, science, and communications. Tech prep provides students with an opportunity to enroll in courses at the secondary level that are occupationally related and taught in a "bands-on" cooperative learning setting. These curricula provide students with a better foundation of basic proficiency skills so they are better prepared to pursue a postsecondary training program and career in a technical, business, or health field. During the 1992-93 academic year, 1,256 students from 23 of the 41 comprehensive high schools and 8 vocational-technical career centers in Rhode Island were enrolled in tech prep at the secondary level. Tech prep high school students have participated in career development activities at the college. The program director has made presentations and many educators have come to Rhode Island to observe the program. The program has received a demonstration grant this year from the U.S. Department of Education to design a program evaluation and to develop promotional materials for national dissemination. (Fourteen graphs represent data collected on secondary and postsecondary students participating in the program.) (YLB)

This guide provides educators with information about developing partnerships with businesses. It begins with a rationale for forging education-business relationships and highlights benefits to all parties—educators, businesses, and students. The Rhode Island Tech Prep Associate Degree Program is cited as an example of how to create win-win situations. The program is described, with emphasis on the role of the Community College of Rhode Island. The following section outlines ways in which businesses can contribute, including curriculum revision, mentoring programs, classroom presentations, participation in career days, and work site tours for students and educators. These ways in which businesses benefit are described: employee training, tutoring in English as a Second Language, and "workplace ready" employees. A checklist for developing a business-education partnership program that may be used as the foundation of a school-to-work transition program is provided. The next section lists keys for success of school-to-work partnerships: clear, shared vision; educators' adoption of a private sector industry perspective; recognition that much time is required; climates of negotiation and cooperation; development around a single school or school system; inclusion of employers of all sizes and types; open, honest, and frequent communication; and commitment. The final section focuses on business-education partnerships as a growing component of the Rhode Island Tech Prep Program. (YLB)

School-to-work transition (SWT) programs are comprehensive programs to prepare young people for high-skill, high-wage careers and teach them the basic skills needed to pursue postsecondary education/lifelong learning. Interest in SWT programs has been stimulated by several factors, including declining U.S. competitiveness in the global market, the changing nature of the workplace, and passage of the School-to-Work Opportunities Act of 1994. Current Congressional efforts to streamline government may well result in a sharp reduction of the federal role in SWT efforts; however, SWT programs can serve a broad cruss-action of students and provide access to college and other postsecondary options provided the extra resources and employer support/commitment needed to initiate/implement SWT programs are obtained. Among the issues surrounding SWT programs are whether business/industry has the resources to provide the required work-based learning experience and whether programs force youth to make career choices too early and place too much emphasis on preparing youth for occupations. (Included in this trend analysis are an annotated bibliography of 18 print resources and a sist of 6 organizations concerned with SWT programs.) (MN)

Trend Analysis

Qualifications, *Job Development, *Secretaries, Trend Analysis

As many organizations restructure, the role of support staff is also changing. Secretaries are under increased workloads and are assuming duties previously performed by management, such as budgeting, project coordination, and public relations. According to Professional Secretaries International, only 31% of its members bore the title "secretary" in 1993 compared to 46% in 1979. Technology has been a driving force behind many of the changes affecting secretarial/support staff positions. One researcher has concluded that technology is being used merely to automate traditional secretarial tasks rather than to expand secretaries' roles; however, other researchers have found few secretarial/support staff who feel that technology has reduced their opportunities or degraded their positions. Recent technological and organizational changes have, in fact, been credited with helping to increase the prestige and salaries of many support staff. Secretaries are not always compensated or promoted for assuming additional responsibilities, however. The increasing responsibilities being assumed by support staff are necessitating higher education and training, but formal training for technology and managerial/supervisory duties is somewhat lacking. (Included in this trend analysis are an annotated bibliography of

23 print resources and a list of 3 organizations con-cerned with secretarial occupations and recent de-velopments affecting them.) (MN)

Statistical data gathered by the National Center for Education Statistics were analyzed to identify correlations between race/ethnicity, age, and prose literacy among adults in 1992. According to the analysis, prose literacy was highest among those adults with the highest levels of educational attainment, and adults aged 19-54 had higher average literacy scores than did individuals aged 55 and older. Other key findings of the analysis were as follows: (1) Blacks and Hispanics with high school diplomas or General Educational Development (GED) certificates had literacy levels similar to those of Whites who had completed only 9-12 years of education and who lacked a high school diplomar/GED certificate; (2) Hispanics achieved lower scores than Blacks or Whites on the prose, document, and quantitative literacy scales; (3) on the quantitative literacy scale, the difference between blacks and whites (63 points) was larger than that between white high school and college graduates (50 points); and (4) more than one-fifth of adults scored at the lowest level on the prose literacy scale, which menns that they were unable to match/integrate multiple pieces of information when irrelevant (distracting) information was present or when background knowledge/inference drawing was required. Why Motivation Is Important in Safety Training,
Pub Date—19 Jan 95

Note—159.
Pub Type— Opinion Papers (120)

EDRS Price - MP91/PC91 Plus Postage.

Descriptors—Adult Education, Attitude Change,
Behavior Modification, Change Strategies, Educational Strategies, *Learning Motivation, *Motivation Techniques, *Occupational Safety and
Health, *Safety Education, Theory Practice Relationship, *Training Methods, *Vocational Education, Mork Attitudes

The changing face of the workplace and composition of the work force have necessitated new approaches to workplace safety that focus on motivating trainees to learn and practice safe workplace behaviors. Unfortunately, most knowledge regarding work motivation is theoretical and not directly usable by safety training professionals. The motions of intrinsic and extrinsic motivation can help safety training professionals understand industrial/corporate problems such as the decline in the work ethic and can help them prepare workers for future workplaces, which are anticipated to include more teamwork and less supervision. Research on intrinsic motivation has established the effectiveness of using goals, incentives, and feedback as reinforcers of intrinsic motivations is increased through both physiological and psychological design/redesign of jobs to include motivators. Among the various intrinsic characteristics attributed to the job that have been developed and that should be considered when safety training is an issue are the following: achievement, activity, suthority, creativity, importance, independence, interest, knowledge of results, personal growth and development, promotion opportunity, recognition, responsibility, service to others, utilization, and variety. Identifiers—Educational Marketing, *England (Shefffleld), *Market Research
A case study approach was used to analyze the commercial training markets for further education (FE) colleges in Sheffleld, England. The following aspects of training supply and demand in Sheffleld were examined: regional employment market (occupational structure and economic outlook); size, value, and segmentation of the training market competitive position of the region's FE training sector; and strategic capability of the FE sector. It was concluded that Sheffleld's political and social environments are such that FE colleges are likely to experience continuing pressure to compete successfully in the training market. Medium and large companies were determined to offer the best market opportunities for FE colleges. The process model developed for analyzing commercial training market information;

develop generalized models of training behavior; analyze/segment market; analyze training industry structure and competitive position; identify strengths/wesknesses; select markets, objectives, and strategies; and conduct surveys of key market segments. Contains 38 references and 16 figures. Appended is a comparison on 4 data categories: standard industrial classification; training in Britain industry groupings; training in Britain summary groupings; and training provision. (MN)

ary Education, Technical Education, "Vocational Education are Holication, Technical Education, Technical Education, Technical Education, Education Identifiers—Nigeria, Thailand
A study examined ways of reducing the costs of technical and vocational education in developing countries. The major study activities were as follows: an extensive literature search; interviews with individuals experienced in designing and delivering vocational programs for developing countries; field investigations in Thailand and Nigeria; and an extensive literature analysis of project documents and field manuals of major agencies concerned with international development, including the World Bank and International Labour Office. The following issues were examined: underpinning aspects of primary and secondary education; innovative curriculum strategies; substitute training technologies; use of employer, community, and trainee perceptions in analyzing needs and setting goals; donor agency strategies for assessing system needs and agrecing on intervention strategies; assessing the capacity of existing training institutions; using facilities and equipment more extensively; obtaining recurrent support for workshops, training centers, and manitenance infrastructures; and improving links with local industry. Two series of recommendations were developed. The first consisted of strategies for improving the ratio between measuring inputs and outputs, and the second concerned increasing vocational education's effectiveness by improving the quality of its outputs and focusing more closely on the central purposes of vocational training were developed. This document contains eight papers in which the
principals of eight U.S. and British postsecondary
institutions describe the franchising negotiations
and arrangements into which their schools have entered. Franchising arrangements at a wide variety of
postsecondary institutions are discussed, including

community colleges, polytechnics, further education (FE) colleges, and schools in a local education authority (LEA) that offer courses funded by Business and Technology Education Council (BTEC) swards. Equally as diverse are the types of franchising arrangements described, including the establishment of a university center at a community college in the absence of a university in the immediate vicinity and an "up-and-down" arrangement in which one FE college developed franchising arrangements both with a polytechnic and with local schools. After a foreword by Susan Leather, the following papers are included: "Franchising Higher Education: The Rochester Community College Experience of Building a University Centre" (Geraldine Evans); "Negotiating Franchising Arrangements" (Raymond Smith); "BTEC in Schools: The Issues Involved" (Brinan Cue); "BTEC in Schools: An LEA Scheme" (Barbara Molog); "BTEC in Schools: The Relationship between Schools and FE" (Robert Hughes); "Franchising Higher Education Activity at Polytechnic South West" (Ian Turnbridge); "Higher Education Franchising at Somerset College of Arts and Technology" (Richard Dimbleby); and "Franchising: Some Issues and Concerns" (Susan Leather). The book contains 11 chapters grouped into 3 parts. Part 1, which is devoted to meeting the demand for employee expertise, consists of a chapter explaining how the need for effective and efficient development of employee expertise has prompted extensive interest in structured OJT and a chapter presenting a system view of structured OJT and those features that distinguish it from training approaches. Included in part 2 are seven chapters about the following aspects of designing, delivering, and evaluating structured OJT: conducting a task analysis in preparation for developing structured OJT modules; selecting, training, and managing structured OJT trainers; preparing structured OJT modules; preparation for developing structured OJT modules; p

ing to deliver structured OJT; delivering manage-rial, technical, and awareness training; and evaluat-ing and troubleshooting structured OJT programs. Part 3, which concentrates on using structured OJT, includes a chapter on managing the change process and issues in using structured OJT and a chapter on developing a culture of expertise. Some chapters include checklists, summary lists, and/or illustrative examples. Contains an 86-item bibliography and a subject index. (MN)

This book, which is designed to be used either as a tool for improving one-on-one on-the-job training (OJT) conducted by supervisors or as a reference guide for performance specialists and instructional designers, explains how to establish and operate a comprehensive OJT program. The following topics are covered in the book's 11 chapters: reaping the benefits of OJT; building the right foundation for OJT from identifying goals to establishing an action plan; ensuring sound management and consistent results; preparing trainers and learners; determining when OJT is appropriate; analyzing work, worker, and the workplace to fit OJT to the job; preparing a training plan and developing the correct sequence of activities; conducting an OJT session; evaluating posttraining job performance; reviewing aids and alternatives to OJT to ensure the correct mix of performance interventions; and considering six factors important to the success of comprehensive OJT programs. Numerous materials, including checklists, sample forms, and charts, are included throughout the book. Workshop outlines for training oJT trainers and learners and a 40-item bibliography of selected readings on OJT are appended. Also included are 27 figures/tables, a glossary, and a subject index. Contains 251 references. (MN)

This packet contains four sets of newsletters. Some of the topics covered in the Spring 1993 edition include the following: the rhetoric of crisis discredited, ethics in business-education partnerships, teaching about editorials, the politics of workplace literacy, women and literacy programs in Canada, and a list of resources on native literacy for Canadian literacy, teaching editorials, computer software for adults, and access to technology. In the Fall 1993 issue, the newsletter covers these topics: teamwork, partnerships, and quality in workplaces, in literacy, programs, and in schools; systems that

work against literacy; how teamwork cuts both ways in the classroom; art and literacy in the classroom; total quality in community programs; and literacy and minority women. The final issue of the volume, Winter 1994, examines the following: new technologies in education as they relate to teacher education; layers of language, student writing on the family, numeracy and mathematical literacy, the Canada-wide mathematics test, and a list of resources on numeracy. All four of the issues contain news of conferences and meetings and all include "Media Pocus," a supplement that includes reviews and articles about media and education. (KC)

JurisLIT was a literacy training effort operated jointly by the Sacramento County Probation Department, the Sacramento County Office of Education, the Los Rios Community College District, and the Superior and Municipal Courts of Sacramento County from March 1990 to March 1994. The prothe Superior and Municipal Courts of Sacramento County from March 1990 to March 1994. The program required selected probationers aged 18-30 to participate in literacy training programs. Later, high school requirements and General Educational Development (GED) programs were added and, in some cases, some individuals enrolled in colleges or trade schools. Its greatest accomplishment was the collaborative relationship that was established. The number of offenders who learned to read and write, received high school diplomas or GED certificates, and obtained employment indicated success. However, the number of participants who violated their probation and the lack of any statistically significant reduction in recidivism demonstrated that the program did not meet all its objectives. A job development program was established that performed assessment of the probationers' interests, job skills, educational level, and motivation for success. Emphasis was placed on gaining employment skills in job workshops. As part of the program, library resources for correctional facilities were assessed, and educational programs for offenders were identified. Evaluation findings indicated no short-term effects of participation in literacy training on recidivism. (YLB)

Identifiers—"Carl D Perkins Voc and Appl Techn Educ Act 1990
A study examined implementation of the accountability and program provisions of the Carl D. Perkins Vocational and Applied Technology Education Act of 1990 (Perkins II) in four unamed states that were "early adopters" of the Perkins II measures and standards. In each state, staff in the state agencies administering secondary and postsecondary vocational education were interviewed along with

administrators and instructors from secondary and postsecondary vocational institutions in two geographically separated regions. The interviews established that, although substantial progress has been made in implementing measures and standards, much work remains to be done to make the systems function as envisioned in Perkins II. Two sets of factors were identified as contributing to variations in states' responses to performance measures and standards. The first set were within the sphere of influence of federal policy, whereas the second set flowed from state/local contexts and are thus less directly subject to federal policy intervention. The following recommendations were directed toward federal policymakers: clarify the interrelationships among Perkins II mandates and coordination of Perkins II initiatives, create models for outcome-based program improvement, provide focused rerkins it initiatives, create modes for our-come-based program improvement, provide focused technical assistance regarding choices and re-sources, and address common measurement prob-lems. (Appended are the state and local interview guides.) (MN)

State Agencies, *State Programs, Trend Analysis,
*Vocational Education
Research coordinating units (RCUs) were created
by Congress in 1968 through passage of the Vocational Education Act Amendments. RCUs were state-level agencies for coordinating research and
development projects for occupational and vocational education. After RCUs were disbanded in
1984 under the Perkins Act, many of their former
research and coordination functions were distributed to other bodies. A study examined states' responses to dissolution of RCUs and subsequent
redistribution of research projects at the state level.
Letters requesting information about state responses to RCU dissolution were mailed to each
state department of education. Responses describing current state-sponsored research on vocational
education were received from officials in 25 states.
Nearly all of the respondents reported using request-for-proposal announcements, contracts, and
grants to conduct research. In many states, research
efforts were internal and assigned to individuals
with expertise or interest in areas in need of research. The lack of an external, grassroots-driven
research base was evident in many states, research
albody to monitor state departments of education
and provide a framework for the methodology and
foundations to be used in studying vocational education and its relevance to local needs. (MN)

Programs, Intergenerational Programs, Job Training, *Literacy Education, Program Effectiveness, *Public Policy, Secondary Education, State Programs, *Welfare Services Identifiers—Californis, Pamily Literacy, New Jersey, Ohio, *Welfare Reform This document explores selected issues related to connecting welfare reform initiatives and the literacy movement and provides basic information about literacy is defined, and similarities and differences between adult basic education, adult secondary education, and English-as-a-Second-Language programs are explained. Literacy levels among various segments of the U.S. population and the relationship of literacy to labor market success are discussed. Examined in an overview of federal literacy policy are eight major literacy, welfare, and job training programs and the legislation authorizing them. Discussed next are client characteristics, funding/costs, sponsors, instructors, instructor training, and effectiveness. The functional context approach to literacy education and programs integrating literacy and job skills are highlighted. Seven two-generation and family literacy programs are described, and lessons learned from eight field demonstrations are summarized. The challenges of connecting the adult education and welfare systems and promising programs in three states are identified. Appended are the following: descriptions of efforts to integrate literacy education into welfare reform programs in California, New Jersey, and Ohio; descriptions of major national literacy organizations; and data on funding and earnings impacts of literacy education. Contains 77 references. (MN)

The School to Employment Program (STEP) operated during 1992-93 as an employment-oriented
program served economically disadvantaged,
out-of-school youth between the ages of 16-21, with
special emphasis on 18- and 19-year-olds. Program
participants were provided an opportunity to enpage in work experience or on-the-job training, to
improve academic skills, and to receive counseling
and referral to supportive services. During the program year, 738 young people participated in the
program at 18 sites throughout New York State.
Data showed that participants obtained an average
posttest reading grade equivalent of 10.2 in comparison to an average pretest creating grade level of 8.2,
or a 2.0 grade-level gain. In math, participants
schieved an average gain of 1.5 grade levels with an
average pretest score at the 7.8 grade level and a
posttest grade level of 9.3. In all but two programs,
participants demonstrated mastery of all three subested of the STEP programs, 30 percent or more
of the participants obtained unsubsidized employment and one-fifth of all participants obtained their
general equivalency diploma. The majority of respondents to an employer survey saw an improvement in the participants obtained their
question and one-fifth of all participants obtained their

ondary Education, Technical Education, "Vocational Education Identifiers—Australia, Egypt, Germany, Italy, Kenya, Nigeria, South Korea

An international consultation meeting was organized to identify major issues and priorities in the formulation of technical and vocational education (TVE) policies and strategies and to propose guidelines and format of future regional case studies. Participants submitted country reports focusing on issues considered essential to the development of TVE in their countries: Australia, Egypt, Germany, Italy, the Republic of Korea, Kenya, and Nigeria. These reports identified such issues as the following: the role of general education in providing the foundation for a multi-skilled, flexible, and adaptable work force; adapting education to the production needs of the economy; a too-academically oriented educational system; inadequate technical curricula; shortage of qualified technical teachers and workshops; training for entrepreneurship; and lack of funds for purchasing effective teaching/learning materials. These issues pertaining to the role of TVE in the educational system and the process of socio-conomic development were discussed: linkage between TVE and the world of work; TVE as integral element of general education and a lifelong process. tween TVE and the world of work; TVE as integral element of general education and a lifelong process; making TVE more attractive; inculcation of entrepreneurial skills, efforts to improve the participation of women and other special groups in TVE; teacher training; and the economics of TVE. A format for case studies was developed, and issues that should be included were recommended. (A list of participants is appended.) (YLB)

This publication reports on a workshop to review
and analyze existing practices in the design, implementation, and evaluation of curriculum in technical and vocational education (TVE). In the main
working document, "Curriculum Development in
TVE" (Tom Saluja), are the following; definition of
curriculum development; description of how to
measure the effectiveness of curriculum and models
of curriculum development; and outline of the
stages of curriculum development, implementation,
and evaluation. Summaries of presentations describe experiences of countries in curriculum development, implementation, assessment, evaluation,
and validation. These country papers are included:
Czech Republic, Denmark, Germany, Greece, Japan, Mexico, Tanzania, and Uganda. A synthesis of
country papers focuses on the following areas: education system, TVE system, responsibility for curriculum development, quality assurance, system of
implementation, role of various bodies, constraints,
and future trends. Eight major issues with proposed
solutions are identified: national socioeconomic development and technological advances; relevance of
curricula and competency-based vocational education; feedback from implementation and evaluation;
quality of teachers/instructors; attitude of students
to TVE; financial resources for curriculum development and delivery; legislation related to TVE curricula; and national institutional capacity in
curriculum development. Future strategies and recommendations are listed. A participant list is appended. (YLB)

Identifiers—*Nongovernmental Organizations
During 9 years of operation, the Collective Consultation has provided a structure within which nongovernmental organizations (NGOs) exchange information and experience related to literacy more effectively. The bureau known as "the working group" is responsible for implementation of decisions taken during the Collective Consultation, for their follow-up, and for preparation, in collaboration with the UNESCO Secretariat, of the agenda of the Collective Consultations and the ad hoc working groups. Because it was set up to improve the level of knowledge about the literacy problem and to heighten public awareness of the subject, the Collective Consultation is naturally a forum for information, exchange, and research. From 1984-92, two periods can be clearly distinguished for the Collective Consultation. A preparatory period from 1984-88 is distinguished by no criteria or guidelines, proposals for only 27 small-scale projects, and no joint projects. The year 1989 marks a turning point in the development of the Collective Consultation due to a change of persons involved, a change of projects, and more practical and clearly defined recommendations. The scope of the Collective Consultation has been broadened to include basic education for adults and children. (Appendixes induced to the collective consultation of the collective Consultation has been broadened to include basic education for adults and children. (Appendixes in

clude the following: a table of NGOs illustrating years of participation, a list of projects implemented to further the UNESCO proposal on literacy, a chart showing projects proposed from 1989-92, and minutes of two meetings.) (YLB)

Benjamin Franklin helped to promote the concept of iffelong learning and adult education and perhaps planted a few seeds for a new freedom when he developed the Junto in 1727. The Junto, which met for purposes of inquiry, debate, and personal improvement, lasted for nearly dy years and eventually became the American Philosophical Society. The Franklin Institute was dedicated to ideals by which Franklin lived-those of promoting useful knowledge, invention, and discovery. The institute and other similar organizations such as the Lowell Institute, Lyceum Movement, Chautauqua, and the University of Chicago's Estension Programs continued to promote education for adults and youth. The Junto is one way to overcome the sense of helplessness experienced by many individuals in today's political "argeness." People can start groups within their communities, neighborhoods, places of employment, and churches for the purposes of self-directed learning in civic and other matters as well as self-improvement (The narrative is followed by 16 quotations; a list of 18 writings that can provide historical reference and understanding of U.S. political "argeness," People can start groups within their communities, neighborhoods, places of employment, and churches for the purposes of self-directed learning in civic and other matters as well as self-improvement (The narrative is followed by 16 quotations; a list of 18 writings that ca

This training manual provides U.S. Probation Officers with a useful guide in understanding the dynamics of human immunodeficiency virus (HIV) and acquired immune deficiency syndrome (AIDS). It also gives advice on making this information specific and appropriate to the offenders with whom they work on their caseloads. The manual contains ix core training modules that include brief training notes and quizzes. Each module builds a base for the next. Module I involves an overview of HIV/AIDS. Discussion focuses on perceptions, myths, and facts Discussion focuses on perceptions, myths, and facts about HIV/AIDS. Module II looks at a major factor about HIV/AIDS. Module II looks at a major factor for HIV infection: sexually transmitted diseases. Module III examines the connection between drug use and HIV infection. Module IV covers testing issues regarding the HIV antibody test. Module V deals with personalizing risk for HIV/AIDS infection. Officers are asked to look at their personal attitudes and beliefs about HIV disease before passing judgment on individuals with AIDS. This training includes issues regarding gender, sexuality, and safer sex alternatives. Module VI includes discussions about two antidiscrimination laws that protect

persons challenged with HIV/AIDS: the Americans with Disabilities Act and the Rehabilitation Act. This module also focuses on disclosure laws and confidentiality issues that pertain to officers' court responsibilities. Special Topics covers additional HIV/AIDS related issues. A quiz answer key for 6 quizzes (one for each Module) and a list of 20 suggested readings are appended. (YLB)

As schools attempt to foster smoother transitions for youth into the workplace, differing realities must be considered. A school-to-work opportunities system cannot be restricted to those occupations meeting an elusive definition of "high wage." Three possible workplace learning opportunities are as follows: the high-skill, high-wage workplace; the community-building workplace; and the capacity-building workplace. Each offers the potential for work-based learning where young people would be able to develop skills that are needed to work in high performance workplaces and that meet the requirements of broad clusters of related occupations. At present, there are at least eight strategies for connecting school-based learning (SBL) to work-based learning (WBL), including job hadowing, internable, youth apprenticeship, school-based enterprise, and cooperative education. Explicit in the current federal legislation is the integration of SBL and WBL-a double integration model that integrates academic and vocational SBL with WBL. Barriers to double integration include the following: lack of continued, meaningful, and expanded business involvement; resistance to new methods of education by school-based educators; uneasy relationships between secondary and post-secondary institutions; and a lack of an identifiable credential. (A list of recommendations or best practice in combining SBL and WBL is included. Contains 29 references. (YLB)

Identifiers—Authentic Assessment
The first of four issues in this volume consists of
four review articles. "Tech Prep Quality" reviews a
guide to total quality management and tech prep.
"Specific, Ocean to Ocean" reviews a publication
that identifies 10 preliminary plans for implementing tech prep. "...No Single Option" is about a
monograph that evaluates tech prep and other current initiatives in terms of their value to the middle
50 percent of students. "Tech Prep Nat Sat Tele-

con" reports on a satellite teleconference that explored leadership, marketing, and business involvement in tech prep. Issue 2 begins with "Authentic Assessment," a review of authentic assessment practices. "Collecting Alternative Approaches to Assessment" focuses on alternative systems of assessment that address reform directives and new approaches to vocational education. "Let Me Get This Straight" looks at study results of local institutions who are trying to understand what Perkins accountability mannaizes two National Center for Research in Vocational Education (NCRVE) reports—one that develops a model of accountability and another that proposes policy alternatives in response to federal legislation. Issue 3 contains four articles. "An Annual Report on School-to-Work Programs" reviews an NCRVE report of the research conducted on successful education-to-work transition approaches. "Dive Right In!" explores work-based learning for medical unit secretaries. "Special Populations and More" reviews publications addressing two school-to-work connecting activities areas-special populations and gender equity. "Revising Educational Assessment" reviews two items about accountability and assessment. Issue 4 begins with "The Right Instrument," a review of the buddes to two tools to assess leadership performance. "Administrative Breakwater" reviews a professional development simulation. "In Cases..." focuses on a collection of case studies for leadership development curriculum. "A Source of Resources" assesses a publication that provides dealed information about leadership development resources. (YLB)

Identifiers—"North Carolina
During fiscal year (FY) 1993, North Carolina's
Division of Vocational Rehabilitation Services expended \$76.2 million to provide vocational rehabilitation (VR) services to 59,821 North Carolinians.
These VR services were delivered by 378 caseload-carrying counselors and their required administrative support in 32 unit offices. Of 13,781
persons whose program participation was terminated in FY1993, 8,448 were rehabilitated (a 61.3%
program effectiveness rate for the year). At 12
months after closure, the percentage of former VR
clients whose families received public assistance
had decreased and the percentage of former VR
clients in paid employment increased significantly.
Participants spent an average of 18.5 months in the
total VR process (from eligibility determination
through plan completion). The overall program
cost-benefit was calculated at 1:1.04. An overwhelming majority of VR services cilents reported
general satisfaction with VR services and VR counselor performance. (Appendixes constituting approximately 50% of this report contain the
following: target population standard, summary of
sources/expenditure of funds, six program evaluation standards, data for 8,448 rehabilitated clients,
sample satisfaction and benefits retention questionnaires, characteristics of populations from which
survey samples were drawn, and basis of comparison of consumer earnings with general population
carnings. Twenty-three tables/figures are included.

Collectively, Pakistanis, Indians, and Bangladeshis form the largest ethnic minority group (4,129) in Edinburgh, Scotland (43% according to 1991 Census figures). Current local provision of education for adult members of the three communities was reviewed. Needs and preferences in terms of educational content, approach, and location were identified by consulting with key communities and by representatives of the following: a community-based Engish-as-a-Second-Language program, a racial equality council, an education center serving children, a resource center serving the educational needs of ethnic minority women, and selected women's groups and religious centers. The respondents' views regarding language in which instruction is desired, levels of instruction desired, preferred study instruction times and places, fees, and certification were synthesized into recommendations for further curriculum development. It was recommended that courses/classes on the following topics be developed/offered: mother tongue language classes in Urdu, Punjabi, Hindi, Bengali, and Gujarati; religious/cultural studies, Indian studies, and/or Islamic studies; basic computing; spoken and idiomatic English; and Indian languages for non-Indian people. (Appended are lists of the agencies, community groups/organizations, and individuals consulted.) (MN)

Certification, Two Year Colleges, "Vocational Education
Too many four-year colleges and universities have failed to develop policies for recognizing knowledge gained outside four-year college programs. Several universities are, however, beginning to respond to the needs of adult learners with years of experiential learning (EL), especially that acquired through work experience or on-the-job training. One such institution is Wayland Baptist University, which since 1976 has offered a bachelor of science in occupational education that provides up to 12 semester hours of credit for EL. Institutions desiring to offer bachelor degree programs that are articulated with community college programs must begin by developing an articulation plan that has been carefully designed to meet accrediting agency criteria. This requires adherence to the following criteria: decisions regarding the awarding of credit must be made by qualified faculty; sources of credit must be made by qualified faculty; sources of credit must be made by qualified faculty; sources of credit must be made by qualified faculty; sources of credit must be made by qualified faculty; sources of credit must be made by qualified faculty; sources of credit must be made by qualified faculty; sources of credit must be sufficiently documented to ensure that credits are academically comparable to credit earned by traditional means; credit is awarded only for documented EL that ties the experience to the academic field; steps must be taken to ensure that credit for EL does not duplicate credit already awarded or courses required for the degree; and the institution must clearly show the validity of awarding credits and the evaluation criteria by which judgments are made. ness Relationship Identifiers—School to Work Opportunities Act 1994

This document contains nine papers exploring the achool-to-work transition and the role of career education in smoothing that transition. The following papers are included in the first section, which sets the context for the role of career education: "The School-to-Work Opportunities Act and Career Education" (Pat Nellor Wickwire); "Strategies for Collaborative Efforts" (Susan Imel); "The Role of Career Planning in School-to-Work Transition" (Harry N. Drier). Two papers in the second section review general approaches to the transition: "Youth Apprenticeship" (Peter Joyce, Sandra Byrne); and "Career Academies" (Valerie Harris). The final section provides some program examples: "Elementary and Middle School Career Education" (Linda Gadd); "High School Career Education" (Linda Gadd); "High School Career Education" (Ramel Poparam" (Pamela Collier); "Career Resource Centers" (Sara Walkenshaw and Jim Crain); and "Career Guidance" (Rebecca Dedmond). An annotated resource section lists 39 resources on school-to-work transitions, and the final section of the document contains 36 references. (KC) mces. (KC)

With the United States experiencing a changing work force and changing economic conditions, training is perceived to be a necessary component of business operations. Research findings conclude that women in business value relationships and human resources more highly than men do. In the context of these two conditions, a pilot study was conducted to determine if a common set of attitudes about training can be found among women business owners. The population for the study was women business cowners who are members of the National Association of Women Business Owners in Houston, Texas. Questionnaires were developed and mailed to 136 chapter members, with usable responses received from 42 (31 percent). Most of the women who responded were owners of very small businesses, and the majority had been in business less than 10 years. The study found that women owners of smaller, younger companies are more likely to see training as part of their strategic planning; they are more supportive of long-term employee development and training that teaches emret and training that teaches emret and the second companies are more likely to see training as part of their strategic planning; they are more supportive of long-term employee development and training that teaches emret and the second companies are more likely to see training as part of their strategic planning; they are more supportive of long-term employee development and training that teaches em-

ployees how to learn. Owners of companies older than 20 years were least likely to agree that their training programs have been extremely successful. The study did not determine whether the training attitudes found are gender related. (Contains 10 ref-

A study of the type and extent of formal vocational assessments being conducted by educators within secondary schools in Wisconsin showed that 77 percent assessed occupational interests, 63 percent assessed vocational aptitudes, and 59 percent administered learning style preference surveys. A number of standardized tests were used for these assessments. The study shound that the Career Occupational Preference Survey (COPS) and the Career Ability Placement Survey (COPS) are widely used by personnel who work with students with special needs. Educators who used these tests used the data gathered for developing individual education plans, placing students into programs, the use of alternative assessment approaches such as the "MACIC" model is suggested. The five essential steps of this model are as follows: (1) Make a prediction; (2) Assess entry-level skills and learner outcomes; (3) Guide student acquisition of discrepant skills; (4) Instruct student on generalization strategies; and (5) Coordinate maintenance checks following program placement. Using such a curriculum-based assessment method can help educators to provide meaningful curriculum and instructional modifications can increase the chances for students with special needs to complete their courses of study and enter the world of work with the skills and motivation needed to be successful. This compendium, which is designed to provide readers with a variety of career planning (CP) program ideas, contains abstracts summarizing 10 elementary, middle, and high school CP programs identified as exemplary by a national review team. Explained in chapter 1 are the primary objectives of the Planning for Life program, which is jointly sponsored by the U.S. Army Recruiting Command and the National Consortium of State Career Guidance Supervisors, and the process of identifying the exemplary programs. Chapter 2 lists seven essential elements of CP: clarity of purpose, commitment, comprehensiveness, collaboration, coherence, coordination, and competency. Presented in chapter 3 are abstracts of the CP programs in the following cities: Ashtabula, Ohio; Goose Creek, South Carolina; Harrah, Oklahoma; Lawrence, Michigan; Le-

Mars, Iowa; Omaha, Nebraska; Roy, Utah; Summerville, South Carolina; and Trambull, Connecticut. Each abstract contains some or all of the following: grade level; overview (primary focus); essential CP program elements incorporated into the program; unique program features; and list of commercial, noncommercial, and local materials used. Appended are a matrix of program features and lists of the following: contact persons for state/nationally recognized programs, state career guidance supervisors, and U.S. Army Recruiting Command key addresses. An application packet for the Planning for Life Awards program is included. (MN)

Native Americans

Identifiers—American Indian Philosophy, "Learning Style Inventory (Kolb), "Medicine Wheel, Native Americans
The Medicine Wheel is a Native American legend in which a circle contains countless points each of which represents a different, yet valid, perspective on the nature of reality. According to the Medicine Wheel legend, the north offers the gift of wisdom, the east offers illumination, the south offers innocence, and the west offers introspection. In the Medicine Wheel legend, the various learning styles and types of intelligence are valued equally. The Medicine Wheel metaphor suggests several possibilities for linking individual learning styles, modifying teaching and training practices, and creating different ways of interpreting adult learning. The Kolb Learning Style Inventory (KLSI) also represents the basic types of learners (converger, accommodator, diverger, assimilator) and learning styles (abstract conceptualization, active experimentation, concrete experience, and reflective observation) in four-pole schemes. A good case can be made for integrating the KLSI and the four major metaphorical perspectives of the Medicine Wheel into a model that adult educators and other practitioners can use to acknowledge the equal validity of different learning styles and devise strategies to integrate them. (Contains 57 ferferences.) (MN) styles and devise strategies to integrate them. (Contains 55 references.) (MN)

Industrial Education, "Trade and Industrial Teachers:
A study examined trade and industrial (T&I) educators' views regarding the curricular content of technology education (TE). Demographic data sheets and questionnaires were mailed to a random anmple of 430 of the 5,665 members of the T&I Division of the American Vocational Association. Of the 156 questionnaires returned from 42 states (response rate 36.3%), 123 were usable for data analysis purposes. All of the responding teachers taught at the secondary level, and their mean level of T&I teaching experience was 16.9 years. The responses were subjected to a computer statistical analysis. The six highest rated statements (dependantisty) punctuality, ability to follow directions, pride in workmanship, conscientiousness/honesty, cooperation, asfety consciousness) were all affective domain competencies. The highest rated cognitive domain statement was a student's ability to mea-

sure, followed by identification of common hand tools. The next highest ranked competency was a TE completer's ability to use common hand tools. Knowledge of economic factors, hydraulics/pneumatics, high-tech applications, and the invention process and ability to perform desktop publishing ranked lowest. The respondents thus ranked traditional competencies higher than more contemporary TE skills/knowledge. (Contains 27 references.) (MN)

Questionnaires were sent to all 26 institutions listed in the 1992 "Industrial Teacher Education Directory" as offering undergraduate degrees in vocational deucation, vocational teacher education, ovcational education deucation. Seventeen institutions responded (a 65.4% response rate). Not a single common course was required by all 17 institutions. Oaly 5 of the 20 courses mentioned on the questionnaire were required by more than 50% of the responding institutions: 14 (82.4%) required a special populations course, 13 (76.5%) required a curriculum development course, 11 (64.7%) required a special populations course, 9 (52.9%) required a measurement and evaluation course end of ferings and U.S. Department of Education-recommended T&I teacher education competencies revealed that the programs surveyed are failing to address the area of program planning, development, and evaluation. It was recommended that vocational T&I teachers continue to examine closely the full range of courses taken by aspiring T&I teachers to ensure that changing secondary school curriculum needs are being met. (A list of the 17 responding institutions is appended.) (MN)

A study determined predictor of youth leadership life skills development among 400 1992-93 Puture Farmers of America

A study determined predictors of youth leadership life skills development, the was youth leadership life skills development; the main independent variable was participation in FFA leadership activities. Control variables were achievement expectancy, self-esteem, years in FFA, age, ethnicity, gender, and place of residence. The Youth Leadership Life Skills Development Scale (YLLSDS) was used to measure the dependent variable. Mailed questionnaires collected data from March-June 1993. Findings indicated that achievement expectancy had a positive relationship with youth leadership life skills development, explaining nearly 14% of the variance in YLLSDS scores.

tion in FFA leadership activities, and gender-ex-plained significant amounts of the variance in scores. Recommendations were made for a focus on satisfying FFA members' achievement motives when developing FFA leadership activities, encour-agement of youth to join FFA and participate, and further research. Government policy went further by specifying skills important to economic performance and advocating their introduction into schools and training programs. Surprisingly little empirical research examined the importance of specific skills and their relationship with performance. A study examined self-reported skill needs across a range of job settings. Eight public utilities agreed to cooperate in the study, which examined workers across 15 jobs in each company. The companies identified benchmark jobs, common to all the companies and easily identifiable in the outside labor market. Skill issues were assessed by plant managers, workers, and their supervisors. Managers and supervisors were chosen at random.

Each supervisor reported a series of performance measures for each employee. Employees were surveyed and rated about skill issues, work organization, and job attitudes. The response rate was 100 percent from supervisors and 85 percent from employees. Results suggested that basic skills associated with academic learning were especially important to performance in the workplace. These skills were perceived as more important for improving performance by both employees and supervisors, whereas the perceived need to improve these skills was associated with more positive attitudes and behaviors. Descriptors—Adult Basic Education, *Adult Literacy, Citizen Participation, Citizenship Responsibility, *Demography, Educational Background, *Individual Characteristics, Literacy Education, *Voter Registration, *Voting, Young Adults A study explored the contribution of selected literacy, demographic, and sociopolitical variables on registering to vote and on voting, using as a database a subset of the respondents to the Young Adult Literacy Survey, administered in 1985 to a stratified national sample of 21- through 25-year-olds. Three sets of independent variables were explored: demographic characteristics, political participation, and ilteracy practices and proficiencies. When a bivariate probit regression model with sample selection was applied to these data, only the amount of hard news read and years of education were significant predictors of voting, given registration. For registration, these variables, plus ethnicity/race, television viewing, and the degree to which one keeps up with governmental affairs were all significant predictors. The conclusion was that increased education and increased attention to hard news reading within school and adult education curricula could lead to increased propensities to vote. Appendixes include five data tables. Contaction curricula could lead to increased propensities to vote. Appendixes include five data tables. Identifiers—*Canada, *Proxy Measurement
"Proxy" measures have been developed and applied that extend the usefulness of direct assessments of adult basic skills. Three categories of users of data on adult literacy are as follows: (1) government authorities who need objective data to inform the decision-making process; (2) program delivery institutions who require an assessment tool to diagnose individual student needs, information to guide their own program and product development, and information to justify government funding, and (3) individuals who require information to define their RIE JUN 1998

own need for remedial training and to marshal societal awareness and maintain the political will to justify continuing investment. Prevailing approaches to measurement have been criticized for several reasons: a common definition of literacy is not feasible or desirable and the estimates derived from statistics are useless due to measurement error. The Canadian experience offers insight into the implications of direct assessments for proxy measures in three areas: correction factors for estimates of educational attainment-based proxy measures, identification of new proxy measures that could be collected, and proxy skills for small areas. The availability of new and improved proxy measures can then affect the design and output of the direct assessments themproxy skills for small areas. The availability of new and improved proxy measures can then affect the design and output of the direct assessments them-selves. Direct assessments could be administered at greater intervals; the basic objectives should be re-considered; and more informed multivariate analy-sis is needed. Appendixes include three data tables. Contains 27 references. (YLB)

Making. Demography, "Evaluation Utilization, Goal Orientation, Research Utilization, Statistical Analysis
This report explores background data collected as part of recent large-scale literacy surveys because these data may contribute to an understanding of the variables associated with demonstrated proficiency. The first section review various approaches to large-scale assessments of literacy. This review sets the context for exploring variation in literacy performance as revealed in three databases established using the profile approach. These data derive from the Department of Labor Workplace Literacy Assessment and state assessments conducted by Mississippi and Oregon. Analyses using these databases are presented that identify and evaluate demographic and background characteristics associated with literacy proficiency in diverse populations. The evidence provided indicates that measured literacy skills can be predicted relatively well for large heterogeneous populations by using a small set of background variables that are likely to be readily available from census-type information. Estimates from census-like variables are likely to be less useful with homogeneous populations or when subgroup performance is of interest. The final section discusses further considerations-cost-information trade-offs and the use of direct measures in indicator systems for less well-defined and measured entities such as the ability to participate fully in an increasingly technological society. Appendixes include aworkplace literacy background and activity questionnaire, a scheme for the coding of background and attitude variables used in regression analyses, 2 data tables, and 1 figure. Statewide Franning, Student Records, Vocational Education, Workshops Identifiers—*Carl D Perkins Voc and Appl Techn Educ Act 1990, Wisconsin This report describes the process, participants, and recommendations for change evolving from a workshop centered on a review of Wisconsin Department of Public Instruction (DPI) practices relating to the federal Carl Perkins Act. A workshop summary discusses the background, process, and outcomes of the workshop. Highlights are provided from the three groups that deliberated on three broad topical areas: application guidelines, related issues, and the Vocational Education Enrollment Reporting System (VEERS). Other contents include the workshop invitation, workshop agenda and participant list, and breakout team directiona, topical issues, and roster. Lists of suggestions for reakout team recommendations follow. The recommendations for the applications guidelines identify 30 specific suggestions for potential changes to the guidelines themselves as well as identification of various issues related to them (e.g., putting the application information on Wisenet, etc.). The related issues recommendations focus on these three issues: Local Vocational Education Coordinators requirement, consortium fiscal practices, and DPI consultant role. The VEERS recommendations relate to four major areas: clarification of definitions, descriptions, and ideas; technical assistance needs; communication between DPI, fiscal agents, and local education authorities; and multiple requests for related data. The report concludes with the workshop evaluation form and summary of evaluation form comments. (YLB)

Tech prep and youth apprenticeship options were provided to all people and groups. Services provided to single parents, displaced homemakers, and single pregnant women were in most demand by category. Teen single parent projects funded in fiscal year 1994 included the following: half-credit vocational courses, "Teen Pregnancy Prevention" road shows, preemployment training leading to supervised on-the-job training at a community-based training site, nontraditional career experiences, career planning curriculum, and coordination of service with the regular school program. Wisconsin's secondary equity efforts were concentrated in these areas: regional staff developcoordination of service with the regular school program. Wisconsin's secondary equity efforts were concentrated in these areas: regional staff development/technical assistance, statewide equity leadership, and demonstration/development/research projects promoting nontraditional career options. Academic remediation and expanded remedial vocational institutions. Other accomplishments included services provided to special populations, state leadership and professional development, the community/vocational education program, and consumer and homemaking education in depressed areas of the state. Tech prep continued to be led by a grassroots organization called the Tech Prep Leadership Group. (Appendixes include descriptions of exemplary activities and a table of Tech Prep Performance Measures.) (YLB)

The experiences of 11 innovative public policy education projects funded by the W. K. Kellogg Foundation between 1988 and 1992 are reviewed. If presents results of a cluster evaluation that used a case study approach to examine effective public policy education and the role of coalitions. The report begins with project descriptions that include a summary of the issues would be decided, audience, and coalition membership. Projects are as follows: the Global Food Web, Iowa Public Policy Education Project, Agriculture and Food Policy in an Interdependent World, Restructuring the Upper Midwest, Northeast Network Project, Fartners in Natural Resource Policy, Groundwater Public Policy Education Project, Policy Options and Strategies for Total Community Adjustment, Communicating America's Farm Policy, Trade and Development Program, and Food Forum Education Project. Findings are resented in the forms of 21 lessons. Each lesson is accompanied by a discussion of the evidence supporting it and its implications; many are further illustrated by vignettes drawn from individual projects. Three longer case studies of individual projects are included. The report concludes with reflections on projects' experiences in light of continuing developments in the practice of public policy ducation in these areas: coalition building, implementation of education about public issues. Appended is a description of the methodology. Contains 30 references. (YLB)

Identifiers—*Aid to Families with Dependent Children, *Job Opportunities and Basic Skills Program, Weifare to Work Programs
This document is comprised of two separate publications, a report concerning the current AFDC program and related testimony. The report discusses a study that assessed the progress the Job Opportunities and Basic Skills (JOBS) program had made in
serving an increasingly larger portion of the Aid to
Families with Dependent Children (AFDC) case-

load, thus ensuring that participants got work and left AFDC. Results indicated JOBS made progress in serving those at risk of long welfare stays, but some AFDC recipients who needed help to avoid long-term dependence had not been widely served. For example, in a 1992 review of 16 states, only 24 percent of teen parents had been enrolled in JOBS. State administrators reported a reluctance to serve AFDC recipients who had barriers to employment, such as learning disabilities, emotional problems, or substance abuse, and were difficult or more coutly to serve. Programs were generally not well focused on recipients employment as the ultimate goal and had generally not forged the strong links with local employers important to helping AFDC recipients find employment. The JOBS performance measurement system provided little incentive for moving clients into jobs, since it held states accountable for the number and type of AFDC recipients participating in JOBS activities, not for the number who got jobs. The second publication, testimony before the Senate Committee on Labor and Human Resources, focuses on five key points about JOBS: (1) what it is intended to do; (2) AFDC recipients being served; (3) what is known about its participants gaining employment; (4) is the programs sufficiently focused on employment; (4) is the program sufficiently focused on employment; (4) is the program sufficiently focused on employment; comments from the Department of Health and Human Services; and abstracts of 17 related products.) Identifiers—"Focus Groups Approach

The National Alliance of Business (NAB) reported recently on the National Workforce Assistance Collaborative that works with community colleges and other educational institutions to build their capacity to develop the work force of the 21st century. NAB had conducted a series of focus groups with participants from business, industry, education, government, and social services agencies to identify critical needs, important stakeholders, and promising delivery systems. Community colleges were already using the focus group process to enhance service to constituents and manage institutional change. This process drew upon important elements of already existing relationships. Focus group studied ideas in a collective context. The hallmark of focus groups was explicit use of interpersonal interaction to produce data and insights that would be less accessible without the interaction. The strengths of focus group analysis included the following: the results are understandable and immediate; participants enjoy the opportunity to participate; the interaction created a favorable immediate; participants enjoy the opportunity to participate; the interaction created a favorable im-

pression that the sponsors cared enough to listen; the process provided a richness of data at a reason-able cost; and the format allowed the moderator to probe. (Attachments include a chart illustrating probe. (Attachments include a chart illustrating characteristics of today's and tomorrow's work-place; a structure for the focus group process; ground rules; sample agenda form; checklist for focus group interviews; a diagnostic profile; and outline of focus group analysis.) The Skills Standards Projects have provided further emphasis on the need for benchmarking U.S. vocational-technical education (VTE) against international competition. Benchmarking is an ongoing systematic process designed to identify, as quantitatively as possible, those practices that produce world class performance. Metrics are those things that are to be measured in a performance system. Each must have a measurement process designed to determine objectively the status of both the benchmarker and that which is benchmarked on that metric. Types of metrics include the following: an exam, number of hours to produce a program completer, operating budget per student, placement rate of students in directly related jobs, and employer satisfaction with the quality of the completer. For benchmarking to have utility in VTE, the metrics chosen must keep the process relatively easy and yield results useful for program improvement. For a VTE benchmarking model to be of benefit to practitioners, it must review elements found in a high quality VTE programs and the product of those programs, there are numerous elements to be considered. They can be identified within two categories: those elements of process not benchmark in VTE is the need to improve the quality of the product. (YLB)

Metadoa Courses, "Preservice Teacher Education, "Teacher Education Curriculum, Teacher Education Programs

A study of marketing education teacher preparation programs was conducted in order to provide baseline data. Fifty-three marketing education programs were identified and a survey instrument was mailed to their administrators. Forty-one of the administrators (77 percent) provided usable responses. The study found that traditional teacher education preparation programs continue to reflect credit requirements that meet general education, occupational specialization, and professional education components. Recent educational reform efforts have focused on the expectations of higher education to increase the standards and to change the preparation and requirements of licensure for teachers. The majority of degrees offered by institutions that offer teacher education in marketing are bachelor's degrees in marketing education. Preservice

marketing education programs require an average of 127 credit hours to complete the degree. In the study, teacher educators identified a variety of courses required for curriculum or teaching methodology. Opportunities for students to enroll in courses other than classroom or independent study were limited. Based on the findings of the study, recommendations were made for further research to identify curriculum changes that are essential to updating marketing education programs, to determine the feasibility of an internahip option, and to deliver alternate delivery modes for students to use to complete degrees other than on campus. Identifiers—Workplace Literacy
Project TIME (Training Initiative for Manufacturing Employees) was an 18-month National Workplace Literacy Program conducted by Lord Fairfax Community College in conjunction with an automotive parts plant and Triplett Technical and Business Institute in Virginia. Project TIME had three primary objectives: to help employees obtain the basic literacy skills required in a sophisticated manufacturing facility, to enhance their potential for continued employment and/or career advancement, and to increase their productivity. A job/task analysis and literacy sudit were conducted to identify the plant employees' training needs. The project curriculum that was developed included courses in the following: calculator math, creating/understanding graphs, algebra I, on-the-job communication, technical reading and writing, decision making and goal setting, career development, computer-assisted writing and math, English skills for the workplace, and team building. During the project's 4 semesters, a total of 202 individuals participated in 1,260 hours of instruction. After completing the Project TIME courses, participants exhibited significant skill gains on posttests and improved job performance. (Appendixes constituting approximately 75% of this final evaluation report include nine learning activities from the course in communicating on the job and a program brochure. A final project performance report is also included.) (MN)

ment:
Identifiers—*Competitiveness
Small and mid-sized businesses must change their
production and service delivery methods if they are
to remain competitive in a global economy. According to businesspersons, service providers, and employees who participated in 18 focus groups in 10

cities throughout the United States, businesses are being forced to change their ways of doing business by many factors, including the following: economic downturns, increased competition, customer demands, developments in technology, new regulations, labor shortages, and an increasingly diverse work force. The focus group participants noted three levers for changing how goods and services are produced and/or delivered: technology, work processes, and people. The following actions can increase the likelihood that change efforts will be successful: start with a strategic plan; build support among all key stakeholders; be creative in seeking information/assistance; involve all employees in the among all key stakeholders; be creative in seeking information/assistance; involve all employees in the change process; train workers in every aspect of company operation; keep employees informed about all changes; and follow through on all commitments. The following are ways of gaining employee involvement: hold meetings with all workers before starting the change effort, solicit employees' views, have an open-door policy or use other mechanisms to encourage communication between employees and management, and report both the good and bad news. General research and smeedotal reports have confirmed that both technical and basic skills training offer many benefits to companies of all sizes. Company training can improve employee performance, firm productivity, product quality, and company profitability. Training supports "high-performance" work practices such as the following: total quality management, self-managed work teams, flexible production lines, elimination of quality inspectors, statistical process control, and just-in-time inventory. According to research examining the experience of numerous U.S. companies, training improves employee performance by improving the following: reading, writing, math, communication, and problem-solving skills; motivation; willingness to take responsibility; shility to work independently; shility to work in teams; confidence; company loyalty; self-esteem; and job satisfaction. Combined training and restructuring efforts have been shown to increase firm profitability and thereby boost employee compensation and keep workers employed. Before launching training programs, businesses should take the following steps: assess their current situation; determine whether more comprehensive changes, such as work restructuring, are needed; and ascertain how training would fit in within larger organizational restructuring efforts. Assistance in developing/delivering training community colleges, manufacturing extension centers, business/trade associations, unions, and consulting firms. (MN)

Two studies examined why many adults choose not to attend adult basic education (ABE) classes and ways of improving retention in ABE. In the first study, 17 adults from the Pittsburgh area who had recently quit attending ABE classes (termed "reluctant learners") and 20 adults who had persisted in ABE were interviewed. It was recommended that teachers and counselors make ABE programs more attractive to reluctant learners in the following ways: saking about students' past and previous school experience, providing individual or small group instruction for identified reluctant learners, making the ABE curriculum scademically challenging, and offering tutoring and computer-assisted instruction. In the second study, 20 predominantly African-American adults who had dropped out of school an average of 17 years earlier were interviewed to identify the personal and situational barriers and other factors preventing their participation in ABE. The following actions were recommended to encourage nonparticipants to attend ABE: base course design and marketing on needs assessments from potential learners and incorporate an "unlearning" component to overcome previous negative associations with schooling, include cultural swareness in teacher training, use local instructors, and test alternate programs through demonstration projects. (MN) projects. (MN)

Identifiers—*Ohio, *Ohio Adult Literacy Survey
The Ohio State Literacy Survey, which assessed
Ohio adults' literacy akills according to their performance on tasks reflecting the materials/demandencountered in daily life, was administered to a sample of 1,568 persons aged 16 years or older who were randomly selected from Ohio's approximately
8.3 million adults. Each participant received proficiency scores (0-500) on scales assessing prose, document, and quantitative literacy. The literacy levels of those surveyed (for all three scales) were as follows: Level 1 (0-225), 16%-18%; Level 2 (226-275),
27%-31%; Level 3 (276-325), 32%-34%; Level 4 (326-375), 17%-19%; and Level 5 (376-500),
28-4%. Older respondents were more likely than younger respondents to demonstrate poor literacy skills. The average scores of 19- to 24-year-olds were comparable to those of adults aged 35-44 years. African-American adults were more likely than white adults to perform in the two lowest levels and less likely to attain the two highest levels. Literacy scores were correlated with years of education, employment, economic status, and level of civic responsibility (as indicated by being a registered voter). The average prose, document, and quantitative proficiencies of Ohio respondents were nearly identical to those of adults living in the Midwest and higher than those of adults living in the Midwest and higher than those of adults living in the Midwest and higher than those of adults living in the Midwest and higher than those of adults autionwide. Training, "Labor Needs, "Labor Supply, Needs Assessment, "Occupational Information, Post-secondary Education, Secondary Education, Staff Development, Student Certification Identifiers—France, Germany, Italy, Netherlands, Portugal, United Kingdom A 1993 study compared trends in the structure of qualifications for occupations related to the installation, management, and maintenance of computer networks in Germany, France, Italy, the Netherlands, Portugal, and the United Kingdom. Staff involved in networks required specialized new skills related to feasibility and design, installation, management, help for users and assistance, and monitoring and maintenance. Initial training was essential only when staff had not participated in setting up and installing the network. Specific, supplementary, continuing training almost always followed. The very diversified and changing nature of techniques related to computer networks made informal experience particularly important. Differences in the recognition of qualifications probably related to such factors as the certification and the degree of sophistication of the certification system. The tasks identified in the six countries were generally the same although the scope of such activities varied. In all countries, there was a more or less formal recognition of the tasks of network manager and network maintenance. Three conclusions were reached: the computer network sector was one of the most dynamic in the European economy; interfaces and high quality specialists were needed; and there as a gap between company needs and skills taught by training organizations. Vocational Qualifications (England), Northern Ireland, Wales
A project examined how General National Vocational Qualifications (GNVQs) are evolving and how far their development is in line with the objectives originally set out for them by the government. Information was collected from institutions in England, Wales, and Northern Ireland, which began offering GNVQs in 1993-94. The survey examined the five subject areas generally available to centers: art and design, business, health and social care, leisure and tourism, and manufacturing. Data were collected on Intermediate and Advanced GNVQs. Detailed responses were obtained from 156 centers and 1,103 students. Findings indicated major differences between schools, further education (FB) colleges, and sixth-form colleges in the sort of GNVQ programs offered. The most popular area of study was business. Centers chose to offer GNVQs because the government was perceived to be phasing was business. Centers chose to offer GNVQs because the government was perceived to be phasing out older awards. The rapid growth of GNVQ enrollments reflected a major change in young people's educational aspirations rather than any characteristics of the awards themselves. Very large numbers of GNVQ students aspired to higher education. The actual qualifications of the current Advanced GNVQ cohort differed substantially from those given by centers as their official entry criteria. Approaches to core skills teaching were extremely variable. GNVQs seemed to be evolving very much as an educational rather than vocational award. (Twenty-seven resources for further reading are listed.) (YLB)

grams, Social Development, Student Motivation, Teacher Motivation, "Womens Education Identifiers—"Indonesia Indonesia seems to be succeeding in its fight against illiteracy due to the choice of Bahasa Indonesia, a simple language, as the national language and as a unifying force. A literacy campaign is based on Package A, a group of 100 booklets. The main effort is to form groups that meet regularly and are atuaght by volunteer tutors. Many Package A booklets teach money-making skills, since women feel they can not join learning groups because they need that time to earn extra money. To put these skills into practice, a group can borrow money to use aworking capital or to buy equipment. The structure to fight illiteracy is in place, and the political commitment and international support are there. Obstacles are older learners, lack of printed material, and holding students' attention. The whole literacy campaign hinges first on the tutors and second on the penilits, field staff who supervise them. Incentives to motivate tutors include letting teachers earn credits toward promotion, competitions, and loans. Help with basic needs is provided to the poorest before attention is turned to learning. An effective way to break the continuous circle of neglect in which girls are trapped is to spend money on women's education, which is relatively inexpensive compared with other development investments and has the potential to transform society. More local libraries are planned to provide a plentiful supply of reading material to prevent people from slipping

The Rochester (New York) School-to-Work
Transition Initiative introduces career opportunities and choices to students from prekindergarten through 12th grade and beyond by preparing them for the workplace. The initiative helps students identify their interests and a career direction and enables them to pursue the education and technical training needed to succeed in the world of work. Key features of the initiative include the following:

(1) a curriculum that develops academic and work skills based on standards defined by schools and employers; (2) consistent delivery of career development information; (3) structured work-based experiences that provide all students with career information and work skills; (4) a coordinated support network that is linked to schools and relies on parents, employers, and social service agencies to assist youth; (5) a choice of direction that youth would like to take by 10th grade; and (6) the develoment of industry, or trade-focused technical training linked to the labor market for all 11th and 12th graders choosing that path. Among the initiative's accomplishments are the following: a model and implementation plan for school-to-work transition; defined school leaving outcomes and curriculum linking school to work; more then 350 partnerships between schools and employers; tech prep programs initiated between two high schools and a community college; and youth advocates who work closely with at-risk students. Major projects and activities planned for the 1994-95 school year include development and training for teachers and administrators. (The report includes a list of the 22 products developed by the project, a chart of activities, a list of definitions, and a flowchart describing the framework of the School-to-Work Transition Initiative.) A study was conducted to assess the perceptions of extension directors, administrators, and staff development personnel regarding the importance of selected training topics and to determine the extent to which these topics are included in current training programs for extension personnel. A descriptive survey using a five-point Likert-type scale asking respondents to rate the importance of selected topics in orientation, inservice, and preretirement training was developed and mailed to all 148 extension directors, administrators, and staff development personnel in the United States. Usable responses were obtained from 85 percent of the subjects (126). In the area of orientation training, "extension communication and teaching methods" was rated the most important inservice topic, and 86 percent indicated that this topic was covered in the training, "Coalition building" was rated the most important topic and was included in 62 percent of the training. The study concluded that the training programs and to make adjustments as determined by personnel are not necessarily the ones perceived most important topic and was included in 62 percent of the training. The study concluded that the training topics included in training programs for extension personnel are not necessarily the ones perceived most important topic and each topics and topics included in training programs for extensio

Descriptors—"Employment Opportunities, "Employment Patterns, "Employment Projections,

Employment Statistics, *Patures (of Society), Labor Needs, *Occupational Surveys
The trent toward continued job growth will gain strength in the second quarter of 1995, according to a survey of more than 15,000 U.S. businesses. Hiring increases were predicted by 30 percent of the firms, whereas 7 percent expect their work force to decrease. The net hiring strength of 23 is the highest level seen since the third quarter of 1989 and compares to a net hiring strength of 20 in the survey a year ago. On an industry besis, the durable goods manufacturing sector leads the national results with 38 percent of the respondents planning to increase their work force and 7 percent expecting decreases. The resulting net hiring strength is one of the highest on record for this industry and is unsurpassed since 1984. The wholesale and retail trades sector also projects a near-record outlook, with 34 percent of those surveyed expecting to expand employment whereas 6 percent are cutting back. The strongest geographic projection is for the Midwest; the Northeast and the West are less optimistic. (The report includes charts and graphs of employment outlooks by industry, antionally since 1980, and by region by industry.) (KC)

agement, Trend Analysis, "Work Environment Identifiers—"High Performance Work Organizations Organizations are being urged to become "high performance work organizations" (HPWOs) and vocational teachers have begun considering how best to prepare workers for them. Little consensus exists as to what HPWOs are. Several common characteristics of HPWOs have been identified, and two distinct models of HPWOs have been identified, and two distinct models of HPWOs are emerging in the United States. The lean production model relies on centralized coordination, top-down total quality management, and reengineering. The team production model calls for empowered workers making decisions and producing innovations. Estimates of the number of HPWOs vary widely from one study to the next. Perhaps one-fourth to one-third of U.S. firms have made some type of high performance changes. Another point of controversy is whether HPWOs are effective. Different studies have demonstrated different effects of HPWO practices on productivity, pay, and workers themselves. A few statements can safely be made about HPWOs, however. A growing minority of firms appears to be following the HPWO path. No one best way of becoming an HPWO is emerging, however, because not all high performance techniques apply to all types of work. Despite the various controversies surrounding HPWOs, the consensus is that workers should be prepared for them. (Contains 14 references.) (MN)

Year Colleges, "Vocational Education
Although development and implementation of tech prep education programs have been in progress since the Carl D. Perkins Act Amendments of 1990, several misconceptions about tech prep still exist. One such myth is that tech prep is an integration of academic and vocational education. In truth, although integration of academic and vocational education offers one strategy for developing students' academic and vocational competence, tech prep requires a new approach that gives consideration to the existence of different learning styles and the contextual learning as a way of enabling students to transfer knowledge from academic content to vocational applications and from school to the work-place. A second myth is that tech prep is an articulation agreement between high schools and colleges. Although articulation agreements between secondary and postsecondary schools are necessary to facilitate students' smooth transitions between education and business is also crucial to facilitate transition from school to work in technical occupations. A third myth is that tech prep is a 2 + 2 program than cannot include formal apprenticeship training. Several successful examples of community colleges providing the essential components of traditional apprenticeships may be cited to refute this myth. Contains 5 references. (MN)

Descriptors—'Employment Patterns, 'Enrollment Trends, Higher Education, Home Economics Education, 'Home Economics Teachers, National Surveys, 'Preservice Teacher Education, Secondary Education, "Teacher Supply and Demand, Trend Analysis

A study examined the supply of and demand for home economics teacher educators identified through the American Vocational Association's 1993 national directory of the home economics division teacher educators. Demand data were obtained from state supervisors of vocational education (or their designees). Follow-up contacts resulted in a response rate of 51.0% for supply data and a response rate of 51.0% for demand data. Enrollment data provided by the teacher educators indicated a total of 2,168 students enrolled in home economics deducation programs in 1992-93. The identified majors of the 551 graduates from these programs reported in 1992-93 were as follows: teaching, 367; extension, 7; combination teaching and extension, 34; and other, 143. The number of home economics education graduates in 1993-94 (pullified to teach was anticipated to be 440, which meant a decline of 21 in just 1 year. As of 1992-93. 15,235 persons were working as home economics teachers. As of September 1993, an additional 125 teachers were needed to fill open positions, emergency certification was neithed by 73 persons, and 45 departments would not operate because of a lack of qualified teachers. Identifiers—North Dakota, *Workplace Literacy With funding from a National Workplace Literacy grant, Little Hoop Community College in Fort Totten, North Dakota, conducted a combined literacy.

acy and career counseling program for members of the Devils Lake Sioux Tribe. During the project period, 86 participants completed individual educa-tion plans appropriate to their personal work objec-tives and an additional 183 individuals received tion pians appropriate to their personal work objectives and an additional 183 individuals received diagnostic services for proficiency levels directly related to their employer's target level of applied communications. Of 286 individuals given basic skills instruction during the grant period, 201 completed their educational goals for an overall completion rate of 70%. In addition, 72 program participants received career counseling or advisement from the project counselor, and 22 individuals obtained a General Educational Development certificate. All 286 project participants received support services from at least one element of the literacy project, and 32 referrals were made for services outside the project's support to 14 different federal, state, county, tribal, or community agencies. Because of a local employment surge that drew 28% of the career assessment and job search skills training component's completion rate was only 23%. (MN)

"School Business Relationship, Tables (Data) Identifiers—"Alabama (Southwest), "Workplace Literacy The Southwest Alabama Cooperative Literacy The Southwest Alabama Cooperative Literacy Project was a workplace literacy program involving the University of South Alabama and seven manufacturing plants in the LeMoyne Industrial Complex in southwestern Alabama. The project's primary objective was to increase job productivity by teaching both conventional and functional literacy skills in reading and mathematics. During the project, 26 employees participated in 1 or more sessions of reading classes, and 35 employees took 1 or more sessions of math classes. Of the 39 participants who completed one or more sessions in reading, math, or both, 27 were black males, 2 were black females, and 10 were white males. All were between the ages of 35 and 60. The participants held diverse positions at their respective plants, such as:—welder, storeroom worker, pulp handler, operator, millwright, loader, and foreman. Fifteen of the 24 participants who completed the reading sessions and 21 of the 27 participants who completed the math sessions scored 80% or higher on their end-of-session competency tests. Follow-up evaluations of the participants' job productivity were slated for the coming months. Information about the project was disseminated through various conferences and publications. (Also included are the project's final performance report and nine tables summarizing the characteristics of participants in the various project classes.) (MN)

The Casco Bay Partnership for Workplace Education, as described in the Final Performance Report, was a collaborative workplace literacy project involving the University of Southern Maine and three area businesses (American Tool, Barber Foods, and Hanasford Brothers). During an 18-month period, 36 tutors provided instruction to 641 participants at the 3 worksites. From its inception, the project activities were guided by the themes of teamwork and self-directed learning. At each level of the project operation, all program components were designed in a shared decision-making process. All instructional and organizational strategies used during the project were designed to help project participants take charge of their own learning. Other project activities included presentation of a 30-hour training program for tutors, development of a "motivation survey," and publication of a quarterly newsletter and student-authored publication. All goals stated in the project grant application were met or exceeded. Also included is a Final Evalusion Report in which the themes of teamwork and self-directed learning were described and translated into practice. Appendices in the final performance report include: program recruitment strategies, job profiles, sample pretests/posttests, career planning and workshop descriptions/agendas, project newsletter, sample student publication, and various survey instruments and forms. The final evaluation report contains 14 references. (MN)

This document is the facilitator's edition of a curriculum designed to be presented as a four-session workshop for customer service and credit department employees of a manufacturing company. It was developed by educators from the Emily Griffith Opportunity School. The workshop is designed around a basic communication model incorporating the three components of listening, discussing, and acting. It reviews communication skills that workshop participants may aircady have and offers strategies that may be used in more complicated situations. All of the materials and learning activities presented are applicable to both telephone and face-to-face communication are designed to be competed in 2 hours. The primary objectives of the four sessions are as follows: identify communication difficulties and introduce the basic communication model; define and practice "active" listening rechniques; identify and practice discussion/problem-solving strategies, including effective responses to criticism; and identify and practice techniques to conclude conversations, follow through on promised actions, and resolve conflict. Each section contains some or all of the following: objective, list of materials needed, detailed outline of procedures for facilitators to use in conducting activities, student handouts, and flipcharts. Developed for a workplace literacy program by educators from the Emily Griffith Opportunity School, this teacher's guide presents a 4-hour memo-writing workshop to introduce participants to the writing process. The guide is organized in two sections. The first section covers prewriting, free-writing, brainstorming, and clustering: the second section covers paragraphs, first drafts, memos, revision, editing, and final draft and evaluation. Sections include an objective, activities, and practice. (KC)

Descriptors—Adult Basic Education, *Adult Literacy, Adult Programs, *Educational Planning, *Literacy Education, *Program Administration, *Program Development, Program Implementation, *Strategic Planning In an era of rising public criticism of education and decreasing resources, strategic planning can be a major tool for educational administrators who wish to respond to the increasing challenges their adult literacy programs face. Strategic planning can be defined as a disciplined effort to produce fundamental decisions and actions that shape and guide what an organization is, what it does, and why it does it. The strategic planning process includes designing, implementing, and monitoring plans for improving organizational or program decision making. Although various writers specify different numbers of steps in a strategic planning model, they generally agree on the following core activities that must be addressed: (1) reaching initial agreement among all the planning committee members; (2) defining the program or organizational mandate and mission; (3) formulating program objectives; (4) conducting SWOT (Strengths, Weaknesses, Opportunities, and Threats) analysis; (5) developing strategies and anaction plan; (6) implementing the plan; and (7) monitoring and evaluating the outcomes of the implementation. Each of these activities has its own subprocess or substeps that need to be followed carefully. Strategic planning helps literacy program administrators to develop a clear vision of what their programs are about, who they serve, and in what ways. It also helps limit his vision with the activities that will implement it. Strategic planning also helps administrators collaborate and communicate with relevant agencies, develop realistic goals, and develop an implementation strategy. Strategic planning is

Dropouts, "School Holding Power, Student Attrition
Improving retention in adult literacy programs is
of great concern for both instructors and administrators. A learner-centered program is a must for
improving retention. In such a program, a support
system for learners should be readily accessible. Instruction should be based on students' goals, and
program staff should be available to help students as
their goals change. In addition, the issue of retention
should receive attention from all staff. Suggestions
for implementing a learner-centered program that
will improve student retention include the following: (1) work with students to build self-esteem by
helping them set reasonable goals that can be
reached in a short period of time; (2) build trust
between instructor and student and help the student
to conquer self-doubt through positive feedback; (3)
build on support that includes immediate and extended families; (4) talk with students about their
return to school and ask them about their previous
experiences; (5) counsel students on education and
career planning; and (6) create a learner-centered
program which includes an early-alert counseling
program. (KC)

Recently, several industrialized nations have engaged in extensive and expensive assessments of adult literacy using door-to-door surveys and tests of "functional" reading. A study examined the use of simple checklists of author's names, magazine titles, famous people's names, and vocabulary works used earlier by West, Stanovich and Miller (1993) to sample adults' declarative knowledge by telephone. Data were derived from telephone interviews with 538 randomly selected adults residing in the San Diego, California, metropolitan area, and by a survey mailed to a subsample of 280 of these adults who agreed to participate (about 50 percent of the surveys were returned). Analyses revealed strong relationships among checklist knowledge (r = .80) when assessed either by listening (telephone) or by reading (mailed surveys). A comparison of findings using the telephone methodology with that of the recent U.S. Department of Education's National Adult Literacy Survey (NALS) showed that all major relationships of literacy to education, age, gender, occupation, income, ethnicity, father's and mother's education that have been found in the NALS and other literacy surveys over the past 75 years were found with the telephone method. Given the much lower cost of telephone versus door the much lower cost of telephone versus door-to-door surveys (less than one-sixth the cos

Relationship, "Two Year Colleges, "Work Experience Programs
A study of the status of work-based learning in
U.S. two-year colleges sought to determine the agregate depth, scope, and quality of work-based
learning. A census design was used to ascertain the
scope of work-based learning, through a mailed survey of 1,036 U.S. two-year colleges (nearly 30 percent response rate). Results of the study indicate
that work-based learning experiences are occurring
at the colleges, although these experiences are from
limited curriculum and program areas. An average
of 18 percent of students in vocational education
were taking part in work-based learning at the time
of the survey in most of the responding institutions.
In addition, approximately one-quarter of the respondents estimated that a majority of students involved in customized or contract training were also lved in customized or contract tra

participating in work-based learning. More than 60 programs were identified in which work-based learning was a required component. Most of these programs were in the health and business fields, and nursing was the only program that almost always required work-based learning. Work-based learning was rarely required in manufacturing and high technology programs. The programs found a tendency for programs to gravitate toward particular work-based learning models such as the following professional and clinical, cooperative, school-based enterprise, and traditional adult or youth apprenicable. The research showed how some components of the programs related to the federal School-to-Work Opportunities (STWO) legislation, although few of the programs included all of the required components. The study also found that the colleges themselves assumed responsibility for most of the program components: curriculum, instruction, student selection, and selection of workplace mentors and coaches. Support for the programs was greatest among groups with the most to gain, such as business and industry representatives; less support was seen from parents and four-year colleges. The results also indicated that the programs greatest problems were lack of resources and lack of involvement from the business community. Recommendations were made for more fiscal resources, more incentives for businesses to join work-based learning partnerships, and clearer standards from the state and federal governments. (The report includes the questionnaire with aggregated responses listed. Contains 23 references.) (KC)

In the context of today's chemical context of today's che

Organizational Change, Skill Development, "Training Methods In the context of today's changing work world, analysis of training needs also must change. This book, designed for people in both industry and education who are directly or indirectly involved in helping people to learn in the workplace, encourages people to look beyond the common checklist approach to training needs analysis, which assumes that organizational life is clearly bounded and fairly static, and to adopt a more imaginative, holistic approach. The book examines changing working patterns and changing relationships between skills, linking these changes to a new approach to analyzing changing needs. The 10 chapters examine the following: patterns of new working practices; skills, knowledge, and abilities; developing a strategy; gathering and analyzing information; taking account of changing work practices; investigating more skills, perceptual and thinking skills, and knowledge and attitudes; and taking a wide view of investigative methods designed to identify learning needs. The book offers a wide range of investigative methods designed to identify learning needs and determine what kinds of support woulde appropriate. With each method, examples and case studies showing how it can be applied are provided. In addition, the book contains numerous self-diagnosis sections to encourage readers to relate the ideas and techniques to their own situations. The book contains 7 suggested readings and 31 references. (KC)

Identifiers—"Sudan
Most developing countries have been debt ridden
since the mid-1970s. This continuing debt burden
has resulted in increasing prices and inflistion, growing unemployment, and daily life difficulties. This
problem has been acute for the Sudan. Sudan received help from the International Monetary Fund
(IMF) in 1978 and negotiated new credit terms. By
1981, however, Sudan had defaulted on the agreement and its deficit had risen to about \$1.3 billion
and to \$7 billion by 1982. The result of the IMF/World Bank management of the Sudan economy
was deepening economic crisis precipitating declining social welfare. Various policies need to be put
into place in order to improve the situation. Policies
include the following: proper planning for training
that is linked to the use of appropriate technology;
use of training structures to their maximum capacities; and spreading of vocational training centers in
all states. The following are specifically recommended: (1) training activities in the industrial, agricultural, youth, transportation, and energy and
mining sectors; (2) women's training; (3) training
for persons with disabilities and street children; (4)
training of trainers; (5) the structure of the vocational training administration; (6) finance; (7) training at the state level; and (8) small-scale industries.
Since human resource development is crucial for
socioeconomic advancement of the country, more
efforts are needed to increase awareness of people
to the importance of having skilled personnel in the
Sudan to ensure the success of national development plans. (KC) ment plans. (KC)

tus, "State Surveys, Tables (Data), Well Being Identifiers—"Tennessee
In the first phase of a longitudinal study to gather information on quality-of-life outcomes of adult basic education (ABE) programs in Tennessee, adults entering literacy programs at eight sites in rural and urban Tennessee were interviewed using a baseline questionnaire covering socioeconomic, social, personal, and physical well-being. One year later, 133 literacy program participants were interviewed at eight ABE sites across Tennessee. The interviewees ranged in age from 17 to 72 with an average age of 34 years. More than half were women, more than half were black, and only a few had graduated from high school. Only one-third of the participants were employed when interviewed, and nearly all participants who were employed were in low- and semi-skilled jobs paying approximately 36 per hour. Participants' self-esteem levels ranged from low to high and were connected with aspects of their lives other than low literacy (i.e., employment, marriage/gender, and personal and community satisfaction). Most participants with children seemed fairly involved in their children's schooling. For a substantial minority of participants, health problems were a major barrier to pursuing goals, including persistence in ABE. (Appended are the following: 26-item bibliography, 10 tables summarizing demographic and outcomes data, survey instrument, and glosary.) (MN)

The Longitudinal Study of Adult Literacy Participants was designed to assess the long-term impacts of adult literacy programs on quality of life. During the second year, a follow-up interview was used to survey socioeconomic, personal, social, and health changes. Baseline data for Cohort 1 and Cohort 2 were compared in four major areas: demographic survey socioeconomic, personal, social, and health changes. Baseline data for Cohort 1 and Cohort 2 were compared in four major areas: demographic characteristics, employment comparisons, self-esteem, and marriage, family, and health issues. Results of follow-up interviews with Cohort 1 approximately 12-20 months after the initial interviews indicated the following: over half of the participants were no longer enrolled in the adult basic education (ABE) program; nearly all reported participation made a difference; almost half noted that the biggest change occurred in reading/writing/math improvement; new employment gain was 9 percent; all who gained a job left the program; the group of continued employed enjoyed highest self-esteem; the recently employed showed the highest gain in self-esteem; 61 percent felt better about their relationship with their children's progress in school and 53 percent felt better about their relationship with their children's progress in school and 53 percent felt better about their relationship with their children's progress in school and 53 percent felt better about their relationship with their fer areas: participants were more likely to report being healthy. ABE policy implications fell interacy; and participants were more likely to report being healthy. ABE policy implications fell interacy; (Appendixes include Baseline 1 vs. Baseline 2 frequencies, Cohort 1 follow-up frequencies, and follow-up questionnaire.) Contains nine references. (YLB)

This study explores a quantitative and qualitative contrast between Caucasian and Native American alcoholics on dimensions of spiritual development. Fifty self-reported, Caucasian alcoholics, and 37 self-reported, Caucasian alcoholics, and and non-alcoholics, were administered the Spiritual Well-Being Scale. Additionally, two separate focus group interviews were conducted with selected samples of Native American and Caucasian alcoholics. Quantitative results showed no significant differences between the culturally diverse groups. Important cultural themes, which integrate spirituality and recovery from alcoholism, are outlined. The study identified two limitations in conducting research on alcoholism and spirituality among culturally diverse groups: the difficulty in obtaining large sample sizes, and the large standard deviations for both groups, suggesting the heterogeneity of spiritual development of recovering alcoholics. Implications for further qualitative inquiry and psychotherspeutic practice are made. (RJM)

In an effort to reduce the current epidemic of gun violence among children and adolescents in the United States, this fact sheet presents various approaches to reducing access to and interest in carrying firearms. Suggested approaches to reducing access include: (1) urging parents to turn in their guns to police; (2) repealing anti-gun control legislation; (3) making illegal gun trafficking a priority for local law enforcement; (4) increasing fees for gun licenses; and (5) establishing confidential hotlines to report students carrying guns at school. Methods offered for reducing young peoples' desire to carry and use firearms include: (1) teaching parents and children to channel anger without resorting to violence; (2) teaching at-risk youth effective conflict resolution methods; (3) increasing availability of mental health services; (4) providing safe places for youth to congregate; and (5) reducing the glorification of violence in the media. Includes ways of assessing the true cost of gun violence. (RB)

lence, Fear, *Homicide, Safety, Sex Differences, Violence Identifiers—Firearma, *Guns, Weapons Many Americans, terrified of violent crime, attempt to protect themselves by owning guns. However, statistics provided in this brief fact sheet reveal that people who choose to have a gun easily available are in fact putting their families and friends into greater danger since far more homicides occur during domestic arguments than during robberies. Persons in an enraged or depressed state with access to a gun often forget the original intent of ownership, and a highly charged non-lethal situation can easily turn into a homicide. A chart on percentage of homicides in the United States in 1988, by weapon used and sex of victim is included. (RB)

Many gun manufacturers market guns to women
claiming a gun can provide protection. Statistics
provided in this fact sheet indicate gun ownership
may provide a false sense of security that can be
fatal, since the greatest threat to a woman comes
from the people and guns within her own home.
Contrary to "typical" scenarios created by advertisers, data show that Americans are over three times
more likely to be attacked at home by a person they
know than attacked at home by a stranger. A gun in
the home is 43 times more likely to till a family
member or friend than it is to kill in self-defense.
The impact of having a gun present in a battering
relationship is described. The document includes
two charts, the first on the relationship of female
homicide victims to assailants, and the second on
the sex of the victim and the offender in a homicide.

Whether or not a suicide attempt results in death depends in large part on the method chosen. If a teenager attempts suicide with a gun, his or her death is nearly guaranteed. This brief fact sheer presents data on firearms and suicide, the third leading cause of death for adolescents and young adults in the United States. Any number of societal or personal factors could be causing more American youths to attempt suicide, but the use of guns makes these attempts successful. Statistics are given for the lethality of different suicide methods, and a comparison of the youth firearm suicide rate in an American city and a Canadian city with strict gun control laws. Finally, the impact of drinking on suicides among teenagers with access to firearms is touched on. (RB)

This digest on counselor intentionality notes that the counseling profession has historically searched for characteristics and behaviors that contribute to successful helping relationships. It identifies one such characteristic, the counselor's level and degree of intentionality, as relating to the notion that successful counselors select their helping behaviors and choose specific strategies with a clear purpose and direction. A section on background begins with Rollo May's introduction of the concept of intentionality as a client characteristic in the late 1960s and goes on to trace the development of the concept through Ivey's (1994) description of counselor intentionality as a process of "acting with a sense of capability and deciding from a range of alternative actions." The next section focuses on the bipolarity of intentionality, noting that intentionality can be either constructive or destructive. The risks surroundies unintentionality are the discussed. of intentionality, noting that intentionality can be either constructive or destructive. The risks sur-rounding unintentionality are then discussed. A section on research of counselors' intentions notes that preliminary studies have concluded that some rela-tionships exist between counselors' intentions and helpful processes. The digest concludes with a brief summary of intentionality in the counseling process. (NP).

Identifiers—ERIC Digests

This digest considers the school counselor's role in helping students to acquire the basic skills they will need throughout their lives. A contemporary definition of basic skills includes not only the modern versions of the "three Rs" (reading, writing, and computing), but also encompasses a variety of attitudes, knowledge, and behaviors (learning to learn; verbal/nonverbal communication; adaptability; personal management; group effectiveness; influence; and the abilities to understand technology, apply scientific knowledge to work situations, and balance family and work). The most promising models for helping achool counselors take an active role in integrating these new basic skills across the curricula are comprehensive counseling and guidance programs. Four interactive components of comprehensive counseling and guidance programs. Four interactive components of comprehensive counseling and guidance programs. rour interactive components or comprehensive counseling and guidance programs are: (1) the guidance curriculum; (2) individual planning; (3) responsive services; and (4) system support. The need to integrate academic and vocational instruction is discussed and challenges to school counselors are presented. The digest concludes that, through comprehensive concludes that, through comprehensive concludes that through compresented. In engest concurres task unrough com-prehensive counseling and guidance programs, school counselors can help ensure that all students receive instruction in the basic skills through an integrated program of vocational and academic coursework; and that this coursework combined with a commitment to planning can be the key to students' lifelong success. In order to better understand the thoughts and aspirations of Indiana teenagers, this study surveyed 5,187 eighth-, tenth-, and twelfth-grade students, their parents and their school counselors. Samples were drawn from the state's major cities, suburbs, rural areas and the state as a whole. The report includes a variety of topics affecting students and their families: decisions about academic programs and course taking, the flow of information from schools to students to parents, and obstacles both students and their parents think they face in achieving the students' goals for the future. The final results or "chapters" are presented in eight separate reports, each one building on its predecessors to provide an increasingly detailed picture of the attitudes and behaviors of teenagers and the dimensions of opportunities likely to await them. The eight chapter examine: (1) students' and parents' aspirations and expectations for the future; (2) how

educational experiences relate to their aspirations and expectations; (3) information, supports and experiences needed; (4) obstacles and aids to post-secondary education; (5) employment pathways for a variety of students; (6) support from school counselors; (7) equality of opportunity (by race, gender and income) in Indians; and (8) policy implications and alternatives for increasing opportunity. -Alberta, Career Decisions

Identifiers—Alberta, Career Decisions
This guide provides a reference to educators interested in helping students make the link between school programs and career opportunities after high school. Presented in two parts, it focuses on ways of infusing career education into the high-school curriculum. This approach reduces the gap between career education (usually relegated to guidance counselors and other specialists) and education. The guide operates on three principles: (1) career development issues are significant to secondary school students; (2) teachers exert considerable influence over students' career development; and (3) reacurees for guidance and counseling services may dwindle, curtailing the career development help students need. The most important motive for the guide, however, is to show students that their education and their career development are inextricably

linked. By the end of the book, it is hoped that teachers will have acquired some strategies and tools that can be comfortably and effectively implemented within the classroom without increasing the workload. The facilitator's guide offers a daily schedule and suggestions so that teachers can bring this approach to life through examples, activities, discussions and practice sessions. (RJM)

Identifiers—*Advisers
Mentoring is important in developing successful
professionals in a variety of fields. The mentor offers
the protege a source of knowledge and support,
which, in turn, gives the mentor satisfaction. To find
a mentor, a person usually decides on a field of
interest, and once this is accomplished, the individual searches for someone with similar interests and
values. Mentors can employ several techniques to
aid their proteges. These include modeling, feedback, contingency management, instructing, questioning, cognitive structuring, and task structuring.
For students in graduate psychology programs, all
of these tools can help the student learn both research procedures and therapeutic techniques.
However, mentors must be aware of the potential
harm of a dual relationship when he or she also
serves as a student's teacher or supervisor. If the
mentor can keep the roles separate, then the mentoring relationship can continue. This problem of
duality can be especially difficult for females and
minority students in a field dominated by white
males. Still, mentoring remains a useful and valuable
relationship for helping graduate psychology students become independent professionals. Contains

Identifiers—"False Allegations
When accusations of child abuse result from false memories, all parties involved suffer. This paper examines some of the issues surrounding recovered memories of childhood abuse. The mechanisms that the mind may employ to deal with traumatic events, such as disassociation and repression, must be further explored through experimental research to determine if these mechanisms do indeed exist, and, if they do, how they operate. Memory itself is also of vital importance when examining this issue. Studies have shown that memory can be influenced by both internal and external factors, such as the susceptibility to hypaosis, suggestions made by the therapist, or the incorporation of another's story into one's own memory. Likewise, intensive therapies, such as recovered memory therapy, can permit the development of false memories due to influences coming from the therapist. The incredible progress over the past decade in raising society's awareness of child abuse could be jeopardized by false accusations of child abuse. Counselors can avoid adding to future cases of false accusations by establishing guidelines in treatment protocol. Contains 11 references.

Descriptors—Adolescents, Antisocial Behavior, At Riak Persons, Elementary Secondary Education, Emotional Response, Quality of Life, Social Influences, "Social Problems, "Social Theories, "Violence, "Youth, "Youth Problems
Identifiers—United States
This paper names and describes a common, growing, and dangerous psychological syndrome: Youth Violence Syndrome (YVS). YVS is characterized by at least nine behaviors: (1) hopelesaness; (2) a complete or great disregard for the laws followed by most Americans; (3) a short temper combined with a lack of empathy; (4) a desire for respect from others where such respect has not been earned; (5) an act or acts of violence against another person; (6) unemployment or employment in a minimum-or low-wage job; (7) an extremely high desire for expensive consumer goods; (8) acting-out to obtain expensive consumer goods; (8) acting-out to changing the social conditions that make someone susceptible to YVS. Although YVS appears to be an essentially psychological syndrome, psychotherapeutic techniques to ameliorate its effects on an individual are yet to be determined. Social interventions directed toward improving the quality of an individual are yet to be determined. Social interventions directed toward improving the quality of an individual's life will probably be more effective in changing and preventing YVS than any psychotherapy. A multifaceted approach to the problem of youth violence is necessary, one that includes real educational as well as economic opportunity. (RJM)

ary Education, "Emergency Programs, "Intervention, Psychotherapy, Stress Management, "Stress Variables Identifiers—"Disaster Planning, "Disasters, Posttraumatic Stress Disorder, Traumas Few images are as compelling as a child who has become the victim of a manmade or natural disaster. This book is designed to draw together data, theory, and observation that address children's psychological response to disaster. Characterized by its diversity in scope, nature, and quality, some of the material comes in the form of observations made by professionals at disaster sites. Therefore, clinical and anecdotal material is woven through many of the chapters, but is especially prominent in the chapters on intervention, which were written by professionals who worked with children following disasters. Likewise, attempts have been made to empirically and systematically document the immediate and long-term effects of various types of disasters on children. These studies are summarized and critically reviewed in such a manner as to allow the reader to access quickly the available knowledge about the impact of any given type of disaster on children. Efforts were made throughout the volume to present findings in a developmental context so that the potential interventionist can approach children with this perspective. Finally, fundamental areas of knowledge are presented which must be understood and incorporated into future work with children. (RJM)

Anorexia Nervosa, *Bulimia, Clinical Diagnosis, *Drug Therapy, Eating Disorders, *Biology, Higher Education, *Physiology, Secondary Education, *Therapy, Youth Identifiers—*Affective Disorders, Anorexia, Antidepressants, Tricyclic Antidepressants and universities. This paper reviews literature on the definition, etiology, and therapeutic approaches for bulimia. The literature points to potential physiological bases for the disorder since some researchers reported aimilarities between it and the physiological aspects of major affective disorders. Some of this research is supported by the relative efficacy of treatment models for both conditions with include antidepressants, especially the tricyclics. But much of the literature is flawed, with some researchers relying only on self-report data to determine compliance with medication. Improved methodology would allow use of validated paper-and-pencil measures with the examination of the bulimic's blood plasma level of the drug. Research using these techniques plus self-reports, clinical and behavioral observations, and chemical and urine analyses may help determine the efficacy of antidepressant, pychotherapeutic, or behavior management strategies on bulimic behavior. The research surveyed here suggests that when clinicians are either sasessing or treating bulimic clients, they should also investigate for any major affective disorder. Once the presence of other mental disorders is detected, clinicians can begin to design more effective treatment modalites for bulimia. Contains 43 references. (RJM)

The Life Attitudes Schedule: A Theoretically Derived Scale To Assess Adolescent Life-Enhancing, Life-Compromising, and Suicidal Behaviors.
Pub Date—[64]

Note—56p.
Pub Type— Reports - Research (143)

EDRS Price - MF01/PC33 Plus Postags.
Descriptors—Adolescents, At Risk Persons, "Attitude Measures, Evaluation Methods, High Risk Students, Satisfaction, Secondary Education, Self Injurious Behavior, "Student Attitudes, "Suicide, Well Being
Adolescent engagement in risk-taking and life-compromising behaviors has become a public health concern. This paper describes the development of three alternate forms of a new scale to measure suicidal and risk-taking behavior, the Life Attitudes Schedule (LAS). The LAS, which was developed and piloted on 1,539 high-school students and young adults, is based on a broad conceptualization of suicidal behavior. It is unique because it is derived from a broad theoretical perspective. The LAS measures four different content categories: (1) death-related; (2) health-related; (3) injury-related; and (4) self-related. Each content category includes an equal number of items designed to assess actions, thoughts, and feelings. The LAS was designed to measure a bipolar continuum of behavior; consequently, and epedings. The LAS was designed to evaluate the validity of the LAS: correlational analyses, construct and criterion validity analyses, and structural equation modeling to test several theoretical models underlying the LAS. The results indicate both that this instrument has excellent reliability and validity properties and provides validation of the construct of life-compromising and life-enhancing behaviors.

Six tables present sample items and statistical summaries. Contains 40 references. (Author/RJM)

Descriptors—Adolescents, Children, *Cousseling Effectiveness, Elementary Schools, Elementary Secondary Education, Faculty Workload, Public Schools, *School Counseliors, School Guidance, School Role, Secondary School Guidance, School Role, Secondary School Counseliors, School Guidance, School Role, Secondary Schools, *Social Attitudes, Student Personnel Services

In a time of financial difficulties for schools, few counselors use accountability practices practices which are necessary in order to nutify the expense of school counseling and guidance programs. This descriptive study examines opinions of adults about school counselors. Following a review of literature concerning the role of the counselor, a survey was created and administered to 40 participants. According to the results, counselors are seen in a positive light, although certain responses indicated some areas of concern. Of those surveyed, 42 percent agreed that school counselors spend most of their time handling student scheduling while 52 percent stated that the majority of the counselor's time is spent on paperwork. Twenty-five percent of the participants indicated that they had never seen their school counselor. While this survey produced results more positive than anticipated, there is still reason for concern. Tax-paying adults still believe that school counselors spend most of their efforts on paperwork and scheduling, leaving little time for students. Until school counselors let the adults of their communities know what they are doing, and what services they provide, people will continue to record negative views of counselors services. A copy of the survey appears in an appendix. (RJM)

This report presents verbatim, a hearing before
the Subcommittee on Children, Family, Drugs and
Alcoholism. The hearing featured a series of testimonies and stories on violence among young people
in the United States. It opened with remarks by
Subcommittee Chairman, Christopher Dodd. He
was followed by numerous statements on the nature
of violence in communities. These statements were
made by those who work with children and youth.
Included in these testimonies were accounts provided by children and young people, who spoke of
the state of violence in their neighborhoods. The
many reports also featured details on programs that
appeared to be effective in thwarting violence
among youth. A number of prepared testimonies by
government officials also appear in this report.

tionnaire
Past research has supported the idea that involvement in extracurricular activities has a positive impact on students' evaluation of their college lives. This study investigated whether involvement, as measured by time commitment to campus activities, had a differential impact on the students' adjustment to various aspects of college life, including their academic performance. Researchers administered a self-report measure of adjustment to 237 college students at a predominantly white, state uni-

versity. Results showed that males were the primary beneficiaries of involvement in terms of their overall adjustment to college, social adjustment, and attachment (sense of belongingness). These benefits were observed among male students with both moderate and high levels of involvement; no significant differences between the moderate and high involvement groups suggest that involvement at any level will contribute positively to social adjustment and commitment to attaining academic goals. Males reporting no involvement scored consistently lower on these dimensions. The almost exclusive advantages males enjoyed from involvement might be explained by females relying less on organized activities as a means of adjustment and relying more on personal support networks. No significant relationship was found between academic performance, as measured by grade point averages, and involvement for either gender. Contains 14 references. (RJM)

Identifiers—"Individualized Service Plans, Placement (Foster Care)

This paper reports on a practicum designed to teach foster-care caseworkers how to improve the specificity and clarity of item definition on Individual Service Plans (ISPs) for children in foster care. Most agencies require that within 30 days of accepting a child for foster care, agency caseworkers must complete an ISP which establishes goals for the child to meet with the help of his or her foster parents and foster-care agency caseworker. Goals are also set for the child's birth parents in order to prepare for the child's bentual return to the birth-family home. The caseworker must devise the goals in a timely manner, stipulating measurable outcomes, but in one agency noted in the paper, caseworkers set ISP goals that were unclear, difficult to measure, and lacking in behavioral specificity. After studying the problem, it was proposed that a two-part program be developed to try to remedy these difficulties. In part one, an Individual Service Plan Evaluation and Instruction instrument was developed. Then, for part two, an Individual Service Plan Tracking Sheet was used. Workers were trained to use both instruments. Although these measures demonstrated that ISP goals can be written more clearly in more measurable terms, the project's specific goals were not met. Identifiers—"Second Step vincenses 1 versus Program
This report describes a classroom intervention for improving the social skills of fourth-grade students in an urban school. Children in the school were exhibiting poor social skills, as evidenced by lapses in self-discipline and by incidences of inappropriate behavior as noted by teacher observation and anocdotal records. After examining the problem, it was concluded that the students lacked exposure to appropriate social skills, possessed low self-esteen, displayed little empathy for others, and needed exame its page 180 page 180

perience in problem solving. After reviewing the literature on these difficulties, an action plan was developed that incorporated two approaches: cooperative learning and the use of the Second Step Violence-Prevention Curriculum. Students were evaluated through a variety of methods, including social skills questionnaires, informal class assessments, and journal entries. The intervention began on the first day of school and the need for appropriate social skills was emphasized in all aspects of the school day. The social skills required for successful cooperative learning improved in varying degrees throughout the intervention. It was concluded that social skills must be purposely taught and integrated into the curriculum at all grade levels. Ten appendices provide examples of surveys, questionnaires, and other materials used for the intervention. Contains 22 references. (RJM)

Identifiers—Listening Strategies
Listening requires a great awareness of self, words, facial expressions, body language, tone of voice, and eye contact. This article examines the importance of these factors in the development of the therapeutic relationship. Among some of the characteristics of effective listening treated here are qualities within the client/therapist relationship, therapist responsibility and assumptions, which include self-knowledge and risk taking, and client responsibilities. In the client/therapist relationship, the elements of trust, empathy, and respect are essential; good listening skills can enhance these aspects of therapeutic interchange. The therapist must pay special attention to such things as self-knowledge, knowledge of non-verbal communication, development of trust, guiding clients through the counseling process, and confrontation skills. The therapist must also be able to resist the urge to force the client to change lest he or she miss hearing why the client's present condition exists. Likewise, the therapist should avoid assuming that he or she knows the feelings and thoughts of the client, and should refrain from predicting a client's response. Therapists should work to develop tactics for redefining client tesistance and encouraging clients to explore their pain. Listening involves more than just hearing, it also requires hearing, seeing, expressing, and feeling. (RJM)

In January of 1994 the Addictions Training Center at the University of Nevada, Reno surveyed the treatment staff and directors at 46 publicly supported addictions training centers located in the state of Nevada. Four hundred twenty-nine surveys were mailed, and 189 were returned. In addition to demographic information, respondents were surveyed on education and training, licensure, treatment setting, knowledge, ability, and interest in training in 47 areas. It was discovered that over 40% of respondents who identified themselves as counselors and therapists did not possess the baccalaureate degree. Thirty-one percent had obtained the master's degree or higher. Recommendations are made for the Addictions Training Center to offer programs in counseling skills for individuals, groups and families, and in treatment planning issues. (Author)

The purpose of this study was to investigate the attributes which college students use to describe a desired mate or relationship needs. The sample consisted of 108 students, of which 58 were females and 50 were males. The following independent variables were investigated: gender, age, relationship status, and family structure. The dependent variables were the scores from the following subscales: Attractiveness, Personality Traits, Affection/Communication, Sexual Fulfillment, Recreation/Social, Female Primary Love Needs, and Male Primary Love Needs. Four composite null hypotheses were tested at the .05 level. A three-way analysis of variance (general linear model) was employed for each composite null hypothesis. A total of 140 comparisons were made plus 140 recurring comparisons of the 140 comparisons, 40 were for main effects and 100 were for interactions. Of the forty comparisons for main effects, nine were statistically significant at the .05 level. Of the one-hundred comparisons for interactions, ten were statistically significant at the .05 level. Generalizations concerning the results are provided. The survey instrument is appended. Contains 17 references. (Author/BF)

The way in which professional counselors per-

ing, "Helping Relationship, Perspective Taking, Social Work
The way in which professional counselors perceive or conceptualize clients and their presenting issues constitutes an outward expression of the
counselors' philosophy, training and world view.
These perceptions and conceptualizations directly
or indirectly affect assessment, therapeutic methodology, and even client outcomes. This article presents a discussion of a professional orientation based
on client strengths. This orientation, borrowed
mostly from social work, has been suggested under
related ideas by counseling theorists at various
times in the past. The purpose of this article is to
summarize the strengths perspective, to describe its
philosophic underpinnings, and to illustrate its compatibility with counseling values. The strengths approach may serve to enhance the professional
counselors' opportunity to serve clients from the
perspective of a human growth and development
model. Contains 40 references. (BF)

Identifiers—"Focus Groups
One of the continuing problems and criticisms of
human service disciplines is that they often separate
research from clinical practice, as if the two had no
connection or commonality. This article describes
one way in which the two can be brought together
for the benefit and empowerment of clients. Specifically, the article presents a model for using focus
group research directly and immediately in subsequent group counseling, a model reminiscent of the
ideal that the counselor has an ethical responsibility
to understand the client's life as the mediating context of the therapy. Traditional wisdom in group
work recognizes the importance of group socialization as the basis for group cohesiveness, the vital
ingredient for therapeutic progress. Using a focus
group model may shorten this socialization process
and may give group members a more complete ungroup model may shorten this socialization process and may give group members a more complete understanding of the concerns they share with one another. The model may also serve to clarify the nature and purpose of the group in terms of therapeutic gains realized through individual involvement in the group. Counselors may use the focus group model to enhance growth and responsibility-taking among group members. Contains 27 references. (BF)

-•Guardianship

Identifiers—*Guardianship
Personal autonomy is a fundamental ideal in
American culture. When the autonomy of a person
with reduced capacity is restricted or limited by law
and a guardian is appointed, the issue becomes critical to our understanding of social justice. Preservation of autonomy remains a core social value even
while the legal system moves to erode personal autonomy as a response to diminished legal capacity.
This article attempts to make clear the seeming conflict between legal values and social values regarding autonomy. The aim of the article is to provide
professional guardians and officers of the court with
an understanding of autonomy that allows for reconciliation of these two perspectives. Contains 23
references. (Author)

Descriptors—"Conflict Resolution, "Counseling Techniques, Counselor Role, Educational Environment, Elementary Secondary Education, Intervention, Poer Relationship, Personal Autonomy, "School Counselors, "Social Development, "Socialization, Student Behavior Conflict resolution must be approached in a particular way by professional school counselors who seek to minimize conflict without discouraging growth and development in their students. This article schowledges the growing interest in conflict resolution among professional counselors and explains how resolution interventions may be tem-

pered by a concern for social development in children. Proactive suggestions are also offered for school counselors on how to assess and deal with conflict in school settings so that the counselor can help provide a safe school environment in which students can participate in experience. Much of what the counselor does to accomplish this task consists of monitoring, modeling, and in some instances, direct intervention into social relationships and encounters of the students. Thus the conflict resolution skills of the counselor fuels the momentum for developmental guidance activities that reinforce the human values of the school community. Conceptually, the professional school community conceptually, the professional school community efficient as a resource for children as they learn the limits of personal autonomy within the context of social expectations and roles. Such limits are defined at the point at which social cooperation becomes a learned competency and a legitimate expectation for the autonomous individual. Contains 25 references. (BF)

Hmong, "Hmong People, Laotians, "Teacher Education, "Values
This ethnographic study explored Hmong cultural and educational values. The interview data revealed some Hmong values similar to mainstream American values such as a respect for hard work; a concern about personal honor; and honesty. Some values, however, were in conflict with dominant American values such as: a strong clan-oriented society; a tradition of arranged marriages; a belief in education for some but not all males in a family and a belief in extremely limited education for females. With regard to educational issues, the first challenge for educators is that of language. While Hmong parents valued education, they did not want their children to lose either their language or their culture which they viewed as interconnected. Suggestions for classroom procedures to follow and to avoid are discussed as well as issues concerning home/school relationships. Sex education, after-school activities, conferences and parent organizations were unfamiliar concepts to Hmong parents. Contains 14 references. (BF)

Reviews, "Mental Health, "Needs Assessment,
"School Counseling, Student Characteristics,
"Student Needs, Theory Practice Relationship
This paper reports on the current state of elementary school student mental health needs assessment and makes recommendations for future school counseling research and practice. The review of the theoretical literature on needs assessment examines several studies by numerous researchers. With one exception, all instruments reviewed were generated solely from an adult perspective. The data produced tended to be more indicative of adults' conceptualization of children's needs. Many of the quantitative studies reviewed also exhibited this same limitation. These studies failed to employ rigorous sampling methodologies, which reduced the scope and definition of children's needs. Other intervening variables concerning needs assessment are also discussed. In order to aid school counselors in better serving their students, future studies should focus on children's attitudes, as opposed to adults percep-

tions of such, and take into account previously ne-glected factors such as differences in age or grade level of the children, gender, and cultural diversity. Contains 51 references. (BF)

For educators, a thorough understanding of adolescents' concepts of caring is critical. This paper reports on how early adolescents themselves view the concept of caring. A fundamental issue relating to caring is whether it is primarily innate or learned. This study, which involved observing and interviewing students, was conducted in two middle schools in a large urban area in a Midwestern state. One school was in the heart of the urban area and had about equal numbers of African-American and poor Caucasian students, a large percentage of them Appalachian. The other school was in a suburb and had a mixed population due to desegregation bussing. Participants were nominated by teachers as well as peers. In looking at students' definitions of caring, be results show several points to be emphasized. First, middle level students in grades 6, 7 and 8 have a complex understanding of what caring is and how it shows itself in their lives. Their understanding cannot be predicted by or correlated with gender, age, academic grade, or teacher or peer identification as caring or uncaring. The voices of these students appear to confirm the notion that altruism and caring are constructs of well-informed adolescents. Contains 17 references. (BF)

This paper investigated anxiety among the Palestinian children in the West Bank under the Israeli occupation since 1967. The violence has been both physical and verbal and has taken different formstrial, shooting, home raids and torture. In comparison with studies that have shown that a very small percentage of people develop fear or psychic disturbances as a result of passive or active participation in violent events, it was found in this study that some Palestinian children have actually developed in themselves a certain psychic immunity that wakes it possible for them to continue normal daily life with a healthy regularity. They have grown up stronger, and more life-affirming than before the inifiada. It was found that these youths received support and encouragement from parents and other family members. (Author/BF)

The first edition of this book was based on research conducted from 1984 to 1985. Twenty-nine couples participated in the study and ten of these couples were involved in a follow-up study conducted in 1987. Between 1990 and 1993 research was conducted on 93 stepfamilies, each with an adolescent stepchild, from across Australia. The final two chapters are based on this research. The aim of the book is to present a positive approach to stepfamilies the difficulties of living in a stepfamily are outlined and suggestions are provided on how families may tackle these problems. The chapters include: (1) "Understanding Stepfamilies"; (2) "The Couple"; (3) "Relationships with the Children"; (4) "Children and Stepfamilies"; (5) "Ghosts from the Past"; (6) "Developing a Positive Stepfamily"; (7) "The Role of a Stepparent"; and (8) "Understanding Adolescent Stepchildren." Descriptors—Behavior Theories, Cognitive Development, "Developmental Stages, Developmental Tasks, "Ethics, Integrity, "Moral Development, "Moral Values, Personahity Developments, Social Cognition, Socialization, Social Psychology The introductory chapter clarifies key terms and lays the background for different theories of moral development. Chapter 2 surveys competing models from various schools of thought on the initial origins of morality in childhood. The works discussed include those of Freud, Jung and Piaget. Chapter 3 includes: Erik H. Erikson's sociocultural synthesis, particularly the concept of identity crisis; Robert J. Havighurat's description of developmental tasks; Martin J. Packer's studies of hermeneutics and moral action; and Martin L. Hoffman's research on empsthy and social cognition. Chapter 4 covers the explicit body of data-based research that has focused on knowledge about how higher education affects or does not affect moral development. Chapter 5 presents a panoramic view, drawn from various sources, of lifelong patterns and detours (some presumably invariant, others presumably changeable) that stem from a growing body of research. The final chapter addresses certain issues pertinent to all moral development theories: pluralism and hondeterminism; and morality and immorality. (BF)

The program, which lasted 136 days, was designed to provide classroom or tutorial services in the area of language development for pupils served in Chapter 1 eligible facilities for the neglected or delinquent. The evaluation of the program was based on standardized achievement test information (grades 2-12). Data were collected for the period from September 14, 1992 through March 26, 1993. The Desired Outcome 1 stated that at least 30% of the pupils in the sample-those who were English-speaking, and had a valid pretest-postless some for Reading Comprehension—would gain at least 3.0 Normal Curve Equivalent (NCE) points for the instructional period. Norm-referenced tests were administered in grades 2-12 in a spring-to-spring cycle. Grade 2 pupils received the Metropolitan Achievement Tests (CAT, 1985). Of the 317 pupils served, the average days of enrollment per pupil were 15.1 and the average days of attendance per pupil were 11.0. Due to a high degree of pupil mobility, there were no pupils who had attended enough days for inclusion in the evaluation sample. Therefore no assessment could be made based on the program be continued, since it provides a needed service to pupils in exceptional circumstances. It is further recommended that alternatives to the present evaluation design be considered. Instruments used to collect data are appended. (BF)

This book profiles those unique institutions or departments that are committed to public service, social change and environmental stewardship.
Colleges in this guide engage in the major issues of today, especially environmental, women's, peace and ethnic studies. The programs are varied, such as marine biology, social work, outdoor education, teaching, public health, economics, natural resources, gerontology, forest engineering, and sustainable development. Interdisciplinary studies and opportunities for individually designed majors are also available. The chapters include: (1) "Preface" (Walter S. Carson, Global Tomorrow Coalition); (2) "Introduction" (Miriam Weinstein); (3) "Community Service: Experience for a Lifetime" (Nancy Rhodes, Campus Compact); (4) "Environmental Literacy" (Tom Kelly, Tufts Environmental Literacy Institute); (5) "Making a Difference in the World" (Howard Berry, Partnership for Service Learning); (6) "The Wesleyan Challenge" (Wesleyan University); (7) "College Report Card & How to Test Drive a College" (Martin Nemko); (8)

"Making a Difference Careers"; and (9) A list of colleges which "make a difference." Also included are a Graduation Piedge, Bibliography and Re-sources, State by State Index and College Response

It is never too early for parents to think about college for their children. This resource book was designed to help parents and educators work with students to ensure that their children have the option of going to college. The booklet provides tips on academic preparations and also offers ideas on how parents can plan for the costs of a college education. Although it was written primarily as a long-term academic preparations and also offers ideas on now parents can plan for the costs of a college education. Although it was written primarily as a long-term planning guide for parents, this guide should likewise assist guidance counselors and teachers. The book helps parents set high expectations for their children's future, know what college options are available, and plan college finances. The guide addresses these issues in severe chapters: (1) General Questions about College; (2) Preparing for College; (3) Choosing a College; (4) Financing a College Education; (5) Long-range Planning; (6) Important Terms; and (7) Other Sources of Information. Also included are exercises and checklists parents can see when discussing career plans, college inquiries, college preparation, and financial preparation with their children. Ten charts furnish quick references on finances, recommended high school courses, and other commonly-asked questions. Information about opportunities in each state, complete with addresses, phone, and fax numbers, appears in the back. (RJM)

This report profiles the Adult Career Counseling Center (ACCC) at Oakland University, Michigan. Conceived in 1982, the Center provides services for adults seeking career guidance. The ACCC supplies career information, counseling, advice in preparation and interviewing skills, and referral information, all at no charge. The ACCC employed computers for career development from the beginning and included in this guide is a description of the three computer-assisted career guidance systems currently in use: (1) DISCOVER for Colleges and Adults; (2) System of Interactive Guidance and Information Plus (SiGI PLUS); and (3) Michigan Occupational Information System (MOIS). Client demographics are furnished via charts and graphs and are broken down by gender. The center's performance was assessed through exit forms and case studies. Through public relations, in-service training, and coordination with other service centers, the ACCC sought to increase its visibility in the community. Included are research for which was conducted on site. The overview closes with plans for improving services at the ACCC. Two appendices summa-

rize information on a sister counseling center and grant-supported services for the ACCC. (RJM)

This report on the Peer Helper's program, assesses the effectiveness of the training and counseling of peer helpers, the training of peer helper facilitators, and its recruitment procedures. This program, introduced into 10 public schools in the 1992-93 school year, provides training to selected high school students to help them identify and address problem areas for at-risk students. Training of these "peer helper" students includes providing information about school-based services, as well as an introduction to some counseling techniques. SPARK, the high school component of the school system's drug and alcohol prevention program, supports the peer helper program and also trains counselors to work as peer facilitators. Evaluators judged the SPARK, the high school component of the school system's drug and alcohol prevention program, supports the peer helper program as highly successful in meeting program objectives. Peer helpers enjoyed the program, valued the learning experience, and appreciated the opportunity to share life stories with each other. In its first year, the program successfully incorporated the peer helpers into the SPARK students incursed and the peer helpers into the SPARK student support services network. However, quantitative data on the program's impact on the peer helpers, as well as the students they served, were not availabl

Alcoholism, a major health problem currently being addressed by other professions, has unique features, manifestations, and ramifications for psychologists. Salient aspects of alcoholism in psychology include etiological and motivational factors, characteristic behaviors, and specific risk factors in the work environment of psychologists. Alcoholism, conceptualized as a deeply embedded permanent addiction not resolvable by conscious, planned effort, constitutes a special dilemms for psychologists in that many psychologists strongly believe in the powers of the mind and in the capacity to comprehend and alter behavior. This paper reviews current efforts to deal with alcoholism in an effective and humane manner within the professions; these efforts are usually modeled after the self-help principles of Alcoholics Anonymous in combination with professional treatment. Included are present efforts in psychologists although interest in alcoholism within the professions runs high, specific programs and data regarding alcohol problems among psychologists remain limited. The literature reviewed focuses on of twe areas: (1) Defining, diagnosing, and identifying alcoholism; (2) Alcoholism among professionals; (4) Treatment of alcoholism professionals; (3) Alcoholism among psychologists. "Citations of particular relevance to educators

cover: (1) alcohol impaired university professors; (2) problem drinking among first-year medical stu-dents; (3) alcohol use among nurse educators; uubstance abuse among medical trainees. (RJM)

The program implementation and cost data, along with the student substance use and program exposure data, of the Drug, Alcohol, and Tobacco Education (DATE) Program are presented. The data came from a random sample of California public school districts. This evaluation concentrates on five components of the DATE Program: (1) Curriculum delivery; (2) Curriculum training; (3) Staff development; (4) Student identification and referral; and (5) Positive alternative activities. To address these components, the following questions were asked: What are schools doing to prevent the use of alcohol, tobacco, and other drugs (ATOD)? What ATOD prevention education destinations are the correct outcomes related to ATOD prevention education? What effects have ATOD prevention education? What effects have ATOD prevention education yielded in the past two years? What were the effects of the loss of funds, as well as the threat of diminished funding, on ATOD prevention education? Results indicated that student ATOD use mostly remained constant over two years. These tion? Results indicated that student ALOB use mostly remained constant over two years. These stable or constant ATOD-use rates seemingly indi-cate the inefficacy of the DATE Program, but, the evaluation concludes, the context in which this sta-bility occurred renders this stability an impressive accomplishment. This module arose in part from a state law which prohibits sex discrimination in public school education. Its purpose is to increase awareness and knowledge of women's contributions to U.S. history. The module was developed so that elementary school personnel could readily adapt its information for elementary grade students. It reviews lessons plans developed by classroom teachers and encourages that these plans be adapted for use by teachers in their individual classes. The module states seven learning objectives: (1) Participants will become acquainted with each other and with the trainer; (2) Participants will be exposed to six American women who have played important roles in our political process; (3) Participants will try to identify 48 notable Americans by matching a person's name to bibliographic information; (4) Participants will become familiar with the breadth and depth of women's participation in American history; (5) Participants will be given resource material on women in America and interesting events in Women's history; (6) Participants will have an opportunity to view women in history lesson plans, develop their own lesson plans, and share newly written plans; and (7) Participants

will be given an opportunity to evaluate the work-shop. It is hoped that the module will help correct sexual bias in instructional materials. (RJM)

Identifiers—"National Institute on Aging, Research Priorities
The rapid growth of the older population heightens the urgency for training in aging research. This publication outlines the opportunities for extramural research training and career development that exist within the National Institute on Aging (NIA). The NIA supports research and research training primarily through the award of grants and fellowships. Congress encourages the Institute's support of a wide range of research, including studies on Alzheimer's disease, long-term care, frailty, osteoporosis, nutrition, and rural health. Several NIA programs are aimed specifically at encouraging minorities to participate in aging research. Grants are awarded to nonprofit and for-profit organizations, universities, hospitals, research foundations, and agencies. Extramural research activities are developed by four NIA programs: (1) Behavioral and Social Research; (2) Biology of Aging; (3) Geriatrics; and (4) Neuroscience, and Neuropsychology of Aging. Each research grant application is subjected to peer review at two levels. Three review cycles are held each year. Awards for regular research grants, from initial review to start date, take approximately 10 months-decisions on individual predoctoral and postdoctoral fellowships can be made in 6 months. This booklet specifies the steps in applying for research grants and gives a synopsis of current extramural training opportunities, career development awards, and special programs. (RJM)

In recent decades, the incidence of eating disorders has sharply increased. This paper reviews literature published between 1969 through 1992 which addresses personality characteristics of individuals personality characteristics of individuals. ature published between 1969 through 1992 which addresses personality characteristics of individuals with anorexia nervosa, restrictor subtype, utilizing the Minnesota Multiphasic Personality Inventory (MMPI-I). The current literature and research in the area of MMPI-I use and personality characteristics in anorexia nervosa is reviewed first, followed by a discussion of treatment approaches based on the MMPI-I findings on anorexic restrictors. The study's findings were inconsistent, but a general caricature for this population was presented. A chronic picture of immature, passive-aggressive individuals was exhibited along with depression, and social alienation, poor personality integration, clear thought disorders (such as body-image distortions), obsessionality, anxiety, low ego strength, and limited awareness of psychological problems. Researchers were also interested in treatment outcomes and several studies were interested in attempting to identify personality characteristics that may indicate a better prognosis for individuals with anorexia nervosa, restrictor subtype. Restrictor anorexics who acknowledged a greater need for attention and affection may fare better than individuals with other types of eating disorders due to the former's ability to address these specific needs in treatment. Suggestions for future research are presented. (ВЛМ)

This booklet describes the juvenile justice system and offers suggestions for the system's future. The disparate legal context of juvenile justice in the United States reflects Americans' ambivalent feelings toward this branch of justice. What is needed, it is argued, is a developmental perspective where society expects young people to make mistakes and then addresses these actions without exacting full adult court penalties. Profiles of delinquency cases and the characteristics of juvenile delinquents and their backgrounds are examined. Denoting trends in adolescent crime is difficult since only about one-third of all crimes are reported to the police; juvenile arrests, therefore, reflect a tiny fraction of overall delinquent behavior. Arrest records do indicate that minority adolescents comprise a disproportionate share of those incarcerated Likewise, actions toward female offenders appears unequal with 61 percent of females not incarcerated for delinquent behavior. The situation is further confused by the lack of any standardized measure for recidivism. Once they are detained, juveniles need to have specific problems addressed. Their health care, environmental forces, and other factors require concerted remedies. The federal government can help reform juvenile justice by viewing it as an adolescent health care system, where juvenile' mental and physical health are systematically addressed. (RJM)

cesses, Psychological Patterna, Psychological Studies
Identifiers—*Emotions, Emotion Theory, Feeling of Knowing, "Knowledge Feeling, emotion, and passion are the "stuff" of everyday experience. This guidebook helps the reader understand emotions in a two-step approach. First, common assumptions about emotion are examined in order to arrive at a deeper understanding of current approaches to emotion, especially as these exist in the fields of psychology and counseling. Second, a new framework for working with emotional experience is presented. These ideas are developed in five chapters. Chapter One provides a historical overview of psychological perceptions of emotion. In the past, emotion has been classified as a neurophysiological response, as psychic energy, or as caused by antecedent events, among other theories. In the second chapter, "feeling as a way of knowing" is explored. Distinctions are drawn between feeling and emotion and a diagnostic tool provides readers a method to identify ways they

structure experience. Case studies and moral issues are also presented. In the third chapter the reader discovers some of the etymological connections to emotions. This chapter features an emotions vocabulary list, a vocabulary exercise, and strategies on using words. Chapter four presents a six-step strategy for discerning meaning in emotional experiences, while the last chapter describes ways to create a shared understanding of feeling and emotions. (RJM)

Identifiers—"BNI Screen, "Dementia, Senile Dementia
Assessing higher cerebral functions in patients with known or suspected dementia requires sampling numerous abilities quickly and accurately. This paper reports on the performance of 20 patients with probable dementia of the Alzheimer's type (DAT) on the BNI Screen for Higher Cerebral Functions (BNI Screen). These patients performances were compared to the results of 20 age-matched normal control subjects. The performance of the Alzheimer's patients was consistently impaired when correlated to control subjects, as measured by both the BNI Screen total and the subtest scores. The BNI Screen total and the subtest scores. The BNI Screen total score matched significantly with the Mini Mental State Examination (MMSE) score in Alzheimer's patients, but the correlation accounted for only about 30 percent of the variance. In a brief and reliable manner, the BNI Screen appears to sample higher cerebral functions not captured by the MMSE. It also offers useful qualitative and quantitative information in assessing Alzheimer's patients. It provides both a single total score and subtest scores, the latter of which evaluate language function, visuospatial functions, facial affect perception, and the ability to generate affect in one's tone of voice. Memory and awareness scores are likewise furnished. The data provide potential clinical guidelines in assessing older individuals suspected of Alzheimer's disease. (RJM)

ticipation
This report presents findings on children's living
arrangements as taken from the Survey of Income
and Program Participation (SIPP). The SIPP is
unique in that it records how each person is related
to everyone else in the household. Detailed information on parent-child relationships is provided, allowing identification of biological, step, foster, and
adoptive ties. Similar dats are collected for siblings.
With this additional information, it is possible to
examine family structure in more detail than was
possible in previous Bureau of the Ceasus reports.
The statistics contained herein are based on national-level estimates of children under 18 and their
living situations, for the period June through September, 1991. The report's findings pertain to all

children, regardless of their marital or parental sta-tus. Included in these findings was the fact that 73 percent of children under age 18 lived with two parents, 24 percent lived with one parent, and 3 percent lived with neither parent. Black children were 2.5 times more likely to live in a one-parent family than were White children. The report exam-ines both traditional nuclear families and nontradi-tional families, and includes data on children in blended families, adopted children, extended fami-lies, and other arrangements. Five figures and 12 tables summarize the data. Appendixes include an overview of the SIPP program, definitions and ex-planations of terms, and source and accuracy of esti-mates. (RJM)

An 18-year old's freshman year in college is not only a test of his or her intellect, but also a test in social skills, adaptability to new living situations, and other conditions. This study examined the link of emotions to compulsive eating and its use as a coping mechanism for female college students. It explores the stresses of the transition from high school to college and how a breakdown in coping skills can lead to the development of an esting disorder. Twenty-nine resident freshmen females, averaging 18.5 years of age, responded to the survey. Results showed that 76 percent of the respondents had experienced a binge. Their average weight gain over a seven-month period was 4.34 pounds. Fithy-nine percent had changed their reating patterns since moving on campus. "Sesame Street
Television programming has long been recognized
as an effective method of educating children. This
paper investigated the degree of exposure an educational children's program, Sesame Street, gave to
female and male characters and the extent to which
these characters were stereotypically portrayed.
Children's Television Workshop produces 110 episodes of Sesame Street each year. A random sample
of 15 episodes was selected from the pool of episodes aired between November 1992 and May
1993. Teams of observers viewed each episode and
recorded the number of characters appearing within
each segment. For each character, they recorded
gender, whether the character played a primary or
secondary role, the presence of stereotypical attributes, and the character's portrayal in a stereotypical role. Results revealed that male characters

appeared twice as often as female characters. Furthermore, there was a significantly greater tendency for males to appear in primary roles. Across both genders stereotypical attributes were portrayed five times more frequently than non-stereotypical attributes. The total number of characters portrayed in sereotypical roles was 10 times greater than characters portrayed in non-stereotypical roles. Such stereotypic gender roles may place unnecessary restrictions on a child's ability to investigate and absorb what the world has to offer. Six tables provide statistical summaries. Contains 37 references. (RJM)

The literature on human aggression is large and diverse. Some of it is theory-driven, but much of it dwells on solving social problems rather than on building general models and research programs and theoretical emphases in aggression research and presents theory convergences to see how these intersections may generate hypotheses for future research. The discussion here centers on two assumptions: (1) Aggression is not a scientific term; it is a lay term and is used to describe a number of functionally different behaviors, all having in common the infliction of harm upon another person; and (2) Affective aggression is a response to some event or change in the environment, or to the mental representation of such an event. Some of the variables involved in human aggression are discussed so as to elaborate the processes that may be involved. Many aggression sequences begin with impulsive aggression sequences of aggression theory models. Contains 35 references.) (RJM)

Identifiers—Narcissism
The study investigated the following: (1) the relationship of problem solving appraisal to narcissistic vulnerability, locus of control, and depression; (2) the differences in problem solving appraisal, locus of control, and depression in first-time and repeat of-fenders; and (3) the prediction of problem solving appraisal by narcissistic vulnerability, locus of control, and depression in delinquents. Delinquent male adolescents (N = 146) voluntarily completed a packet of instruments which included a revised measure of problem solving appraisal and depression. Results suggested a significant relation-ship between facets of problem solving appraisal and narcissistic vulnerability, locus of control, and depression in delinquent adolescents. These findings indicate that youth who appraise themselves as less confident and who have a tendency to avoid problem situations are more apt to experience depres-

sion, to possess an external locus of control, and to exhibit narcissistic vulnerability along the idealized sector. No significant differences in problem solving appraisal were detected between first-time and repeat offenders. Both groups appraised themselves as ineffective problem solvens. For repeat offenders, problem solving appraisal is predicted by peer-group dependence which would suggest that repeat offenders who appraise themselves as ineffective problem solvers tend to rely on their peers to sustain self-esteem. Increases in HIV infection among young heterosexual women has prompted a call for the development of new asfe sex interventions for this population. This study tested the effectiveness of an intervention conceptualized on the basis of the Health Belief Model and combined with Bandura's self-efficacy theory. Subjects (N = 82) were sexually active (more than one partner), female college students. Experimental subjects were exposed to four 1.5 hour group sessions incorporating vicarious learning, mastery learning, and modification of beines about vulnerability to HIV infection, partner risk assessment strategies, and the costs and benefits of condom use. Group two received four 1.5 hour group interventions, which incorporated traditional AIDS education strategies. Group three received no treatment. Subjects were tested prior to treatment, AIDS education strategies. Group three received no treatment, Subjects were tested prior to treatment, during the last session of the group treatment, and 60 days following the end of the group. The dependent variables examined included attitudes toward condoms, condom use, beliefs about vulnerability, efficacy for condom use, and efficacy for discussing sexual histories with potential partners. Experimental unified of the condomination of the co tal subjects demonstrated a greater awareness of the benefits of condom use and intention to use con-

doms when compared to group three. Other factors found to influence safer sex practices included self-defined monogamy status. (RJM) ED 378 517 CG 025 920 Lasser, Jon Gottlieb, Michael C. Gender Role Socialization in Jewish Men. Pub Date—Aug 94

There has been little empirical research on the gender role socialization of Jewish men. This paper explores Jewish male gender role socialization and provides a model by which gender and ethnicity may be studied. A description of the gender role socialization of Jewish men, with an emphasis on advantages and disadvantages of such socialization from a developmental perspective, is presented. advantages and disadvantages of such socialization from a developmental perspective, is presented. Special attention is given to messages received from parents in early childhood, peer interactions, and adult family life. Additionally, ways in which Jewish men compare themselves to other men are examined. It seems that the gender role socialization of Jewish men may cause diminished self-esteem in childhood and adolescence, with the rejection of Jewish cultural values as a possible outcome. Jewish boys are likely to admire the stereotypical American male, thereby discounting the image of the Jewish

man. Emulation and denigration of certain stereo-typical traits of other racial/ethnic minority men sometimes occurs. However, in mid-life, Jewish men may embrace the values that were once re-jected, finding a wealth of previously unexplored resources from early socialization. Rejection of the dominant culture's ideal man follows, leaving a strengthened Jewish identity. (RJM)

The "Set a Good Example Contest" has been in operation for 10 years. The contest is based on the idea that educating youth in common sense values and getting students to set good examples for their peers will solve many of the problems faced in today's society. This paper examines the effects of this program. Both teachers and students who took part in the "Set a Good Example Contest" were asked to complete questionnaires about the program. A total of 249 teachers and 1,321 student participated. The teachers' surveys targeted any changes teachers noted in their students' understanding of moral values, attitudes, and participation in activities. Teachers stated that students: became more aware of morality and its importance; were more cooperative; better understood the difference between right and wrong; and displayed a positive change in strudes. These improvements were also noted in the tive; better understood the difference between right and wrong; and displayed a positive change in atti-tudes. These improvements were also noted in the student surveys. Students reported learning the im-portance of manners, of treating others with respect, of taking responsibility for their actions, and of be-ing competent. The gains students recorded from this program were highly dependent on their partici-pation in it. Materials used in the program were rated favorably by teachers. Educator and student constitutionaries are amended. (R1M) naires are appended. (RJM)

Mentoring has a long and distinguished history
dating back to ancient times. This paper provides an
overview of the mentoring process, reviews the pertinent literature, and discusses the implications of
mentoring for new entrants into the field of psycholmentoring for new entrants into the field of psychology. Research suggests there are two types of mentors: formal and informal. Formal mentors facilitate a young adult's advancement and development, while informal mentors provide mentoring functions because they derive personal satisfaction from the mentoring relationship. These various functions mentors perform for their proteges may be classed into two broad categories: psychosocial and career. Psychosocial help includes efforts which enhance proteges' sense of competence, identity, and effectiveness in their professional roles. Career functions include those actions which enhance career advancement as a result of the mentor's experience, sponsorship, protection, and influence. Nevertheless, although numerous studies have evaluated the content, process, and outcome of mentoring relationships, little is known about their formulation. It is known that people with mentors become quickly socialized to an organization or profession, obtain high-visibility assignments, and stay abreast of fo-ture opportunities. It is concluded that potential mentors rely on proteges to initiate the relationship, and to nurture its continuance. Graduate students, in particular, should seek a mentor. Contains 24 references. This study examined research from 1980 to 1992 that addressed characteristics of high school dropouts. Data from 32 empirical studies were synthesized into an integrative review. A list of the most common characteristics of high school dropouts was generated and the major policy issues related to dropping out were identified and addressed. Four major categories of dropout characteristics were found: demographic, social and family, deviant behavior in society, and in-school. Some of the more common characteristics of dropouts included ethnicity, low socioeconomic status, coming from a single-parent family, a high rate of absenteeism, disciplinary problems, grade retention, low academic performance, and poor schievement test scores. The major policy issues related to the dropout problem included: the lack of a uniform definition of the term dropout; the insecuracy of statistics measuring local state, and national dropout rates: out problem included: the lack of a uniform defini-tion of the term dropout; the inaccuracy of statistics measuring local, state, and national dropout rates; the correlation between grade retention and drop-ping out; the dropout rate in special education; and the need for more research on how many dropouts return to school or receive their Graduate Equiva-lency Diploma. Further investigation is needed on the role of the family in a student's decision to drop out of high school, the impact of peer influence, and the dropout problem in special education. (RJM)

In recent years, sex abuse scandals have struck schools around the country. This report contends that the way to address sexual abuse is to face it head on and to develop a comprehensive program to attack every facet of the problem. It is the multi-faceted nature of child sexual abuse that dictates this comprehensive approach. It is recommended that efforts be made to prevent child abusers from entering the school system by screening all prospective employees. Likewise, regulations must clearly define prohibited conduct and be vigorously enforced. While these measure will prevent some sexual abuse from occurring, no screening or regulation can guarantee that employees will not sexually abuse students. It is therefore critical that the schools be fully prepared to deal with child sexual abuse thenever and wherever it occurs. Research has shown that the reaction to the child's first disclosure of sexual abuse is crucial, because there is often no aecond disclosure. The recommendations contained in this report would ensure that when a child discloses sexual abuse to any school employee, that employee would have been trained in the ap-

propriate response. A program that addresses the many difficult issues associated with child sexual abuse is advised. (RJM)

The United States is a violent nation. This report reviews current school, community, and mass media strategies, describes promising programs now in operation; and offers recommendations for how police and other criminal justice professionals can get involved. By introducing the basic concepts and strategies of violence prevention, the report encourages even more criminal justice professionals to join this effort. Four important methods public health specialists recommend for preventing youth violence are: (1) improve young people's perspective-taking skills-people are more likely to aggress if they see a provocation as deliberate; (2) have young people focus on the negative consequences of violence-in general, aggressive responses are inhibited when people are afraid to aggress or anticipate feelings of guilt; (3) teach young people how to negotiate nonviolent solutions to conflict-solutions that meet both disputants' needs, including the need to save face; and (4) instruct youngsters to look for signs that a conflict might spin out of control. Fights usually go through a predictable sequence of steps before escalating into violence. It is hoped that such efforts will help young people manage conflicts and allow them to channel their anger into constructive problem solving, rather than turn to violence as their first response. Descriptors—Elementary Secondary Education, "Integrated Activities, "Intelligence, Interdisciplinary Approach, Philosophy, Student Needs Identifiers—Educational Issues, Gardner (Howard), "Multiple Intelligences Within the context of school improvement and school reform, it is important to examine Howard Gardner's theory of multiple intelligences (MI theory). His work has far-reaching implications for curriculum development and classroom implementation. Gardner believes that the culture defines intelligence too narrowly. He sought to broaden the scope of human potential beyond the confines of the ability to answer items on tests of intelligence and an IQ score. He was disturbed by the almost exclusive use of linguistic and logical capacities in the construction of items on intelligence, aptitude, and achievement tests. The MI theory challenges the concept of intelligence as a single general capacity that everyone possesses in varying degrees. Cardner suggests that intelligence has more to do with the capacity for solving problems and fashioning products in a context-rich and naturalistic setting. He identified seven areas of intelligence; (3) spatial intelligence; (4) bodily-kinesthetic intelligence; (5) musical intelligence; (6) interpersonal intelligence; (6) interpersonal intelligence; (6) interpersonal intelligence; (7) intrapersonal intelligence; (6) interpersonal intelligence; (7) intrapersonal intelligence; (6)

gence. A number of school projects have grown out of the thinking of Gardner and other liberals like John Dewey, Rousseau, Maria Montessori, and Friedrich Froebel. Using the seven intelligences as their framework, teachers at Crow Island School in Winnetks, Illinois, assess their students using a portfolio approach. (Contains 19 references and an appendix listing Gardner's criteria.) (TB)

The preunise of this booklet is that reading should be taught from the beginning to all students with the techniques and materials and orders of presentation that have been found to be effective in remediation, such as the concept of controlled lists. It is "common sense" to teach words in such lists in phonic context, rather than the phonic isolation common to many commercially available word lists. The standard Language Experience Approach (LEA) can be modified to teach students systematically words in both phonic and sentence context. To put controlled lists into effective use, keep the number of new irregular or sight words to a minimum, give maximum exposure to "known" words, introduce "word families" one at a time, and gradually introduce sight words from grades 1-12. It is the least frequently used word families or phonic principles that need the most drilling. Frequency of appearance is a starting place to pick the sight words and word families to teach, and to determine in what order. (Contains 14 references.) (RS)

Recognition
Identifiers—*Highlighting (Text), *Underlining
Letting students as they read underline or highlight words they students do not know. This procedure also leaves a record of all the once unknown
words for students to re-read later. It is an added
advantage for teachers that it allows them to see
how far into a book students have read, and whether
the book is either too easy or too hard. The real
reason for having students underline or highlight
words is to help them discover that they can learn
words by themselves if they alert their "computer"
brains that there is something that needs to be
learned. Underlining or highlighting cues the computer brain that the word is a problem for the brain
to solve. Underlining or highlighting is an active
process that can help make reading an active rather
than a passive process. (RS) than a passive process. (RS)

The deliberate rewriting of lecture notes into forms suitable for study and review is the key to successful learning. Using the outline technique helps students to think in terms of what the main points are and what are examples or secondary points. The divided page technique allows students to quir themselves daily on the material they must learn. These techniques boil down to two elements: the quality of time spent studying and the frequency of studying. It is not how long students spend studying, it is how often and how well they study that counts. (R.5)

Descriptor—Class Activities, Elementary Education, "Reading Comprehension, "Schemata (Cognition), Student Reaction, Teacher Behavior, "Vocabulary Development Until researchers achieve a breakthrough on comprehending what comprehending is all about, teachers need help on how to help students comprehend what they are reading. According to schema theory, students must be able to pronounce almost all key words and have schemata previously instantisted (know the meanings of almost all key words) in order to comprehend a passage. A common solution is to pre-teach key words, which works well for good students who wait patiently, but does not work well for students who wait patiently, but does not work well for students who are impatient, cannot learn quickly, or who can forget what a words means quickly. What teachers should do is to stay three weeks ahead of their students; build daily occabulary exercises, drill on recognition, meaning, and spelling of key words; drill on related words; and drill on words that are being missed or might be missed. The result is student excitement that they already know the words in a story without having to sit through all the "pre-story" stuff. (RS)

Identifiers—Spelling Growth, Word Families
Intended to help students overcome their reading
and spelling difficulties, this booklet describes
teaching reading and spelling using the notion of
five types of English words and presents extensive

word lists to teach each type of word. The five types of words discussed in the booklet are "simple" (words that follow regular phonic patterns), "fancy" (words that follow phonic patterns frequently from foreign languages), "insame" (words that follow no phonic patterns), "tricky" (words that can "trick" a reader or speller), and "scrunched up" (words deliberately misspelled). The booklet begins with a discussion of teaching these words using the "word family" approach, language experience charts, "fancy" flash cards, and teaching the higher level insame words. The booklet next presents suggested order for diagnosis and remediation (word lists) for each of the five types of words, survey tests, and advice on administering the survey tests. The booklet also includes survey tests for each of the five types of words. The booklet concludes with a brief description of preliminary findings, research hypotheses, and research design for studies on the validity of these tests. Definitions of each type of words are attached. (RS)

S. Lortie (1975) posited that the major influence in shaping future teachers' conceptions of teaching is their previous years of experience as students. A study of students in preservice reading methods courses investigated the following questions: (1) What are preservice teachers' beliefs about teaching and learning? (2) What changes occur in preservice teachers' beliefs during their first literacy methods course? Participants were selected from two sections of a methods course a small southwestern university. A self-report questionnaire with open-ended questions was administered at three points during the semester. Of the 40 participants in the procession of a method course at a small southwestern university. A self-report questionnaires; they constituted the core of the study. Results showed preservice teachers onthing to think of teaching as being skills oriented. For instance, asked how they would teach reading, three said they would use objects from the environment; three would pust students in groups. Of these 10, 6 showed changes in their beliefs after the methods course. These changes, however, t

Past Start is a program designed to get primary
grade children off to a successful start in learning to
read through intensive and systematic parental involvement that is coordinated through the school
RIE JUN 1995

and is based upon proven and effective methods of parent-child interaction around reading. The program is simple to learn, easy to implement, efficient in the amount of time invested by parents, and cost-effective for schools or other educational agencies wishing to implement it. In Fast Start, parents in the amount of time invested by parents, and cost-effective for schools or other educational agencies wishing to implement it. In Fast Start, parents and children read a brief highly predictable and interesting text each day. The reading involves parents reading to children, neurological impress/paired reading, and moves toward children reading on their own. Repeated readings help build fluency, word recognition, and comprehension among children. After the text has been read, parents and children engage in word bank/word sort/sentence building activities using words from the current and previous texts. Preliminary studies of Past Start have demonstrated that it can have positive effects on primary students word recognition, fluency, and overall reading proficiency. (Contains 89 references.) Identifiers—"Emergent Literacy
Intended primarily for preservice elementary
classroom teachers, this book focuses on preparing
teachers for literacy education as it is practiced today, giving them the background knowledge, will,
and wisdom to find other and better ways. The book
is based on three assumptions: teachers must participate in examining and defining their philosophy and
goals, and in selecting the teaching methods that
will guide their efforts; teachers need to build familiarity with the research literature of the field, and
teachers must be prepared to work in a variety of
mossible service. will guide their efforts, teachers need to build familiarity with the research literature of the field, and teachers must be prepared to work in a variety of possible settings. Chapters in the book are: (1) Literacy and the Reading Process; (2) Literacy Providers: Principles and Beliefs of Influential Teachers; (3) Emergent Reading and Writing: Early Childhood to Primary Grades; (4) Reading Aloud, Listening, and Speaking; (5) Reading and Responding: Emergent Higher Order Literacy; (6) Word Recognition and Analysis; (7) Vocabulary for Reading, Listening, and Writing; (8) Improving Basic Comprehension; (9) Critical and Creative Reading, Writing, and Thinking; (10) Content Area Reading, Writing, Reasoning, and Study; (11) Literacy Provisions for Children with Special Needs; (12) Literacy Assessment; and (13) The Classroom and School Literacy Program. Appendixes contain a "picture potency formula," a teacher's primer on phonics, a vocabulary of "senses," and performance indicators. Contains approximately 1,500 references. (RS)

Descriptors—Critical Reading, Elementary Education, *Informal Reading Inventories, Junior High Schools, *Metacognition, Reading Comprehension, Reading Frocesses, *Student Evaluation, *Thinking Skills Identifiers—Alternative Assessment Focusing on better assessing the thinking, or meaning-making, aspects of reading process, this REF. JUN 1996

book presents the Informal Reading-Thinking Inventory (IR-TI) which offers options to enhance assessment beyond assessing students' listening level, oral reading of words, and basic comprehension. The inventory in the book offers a separate means of assessing student reading and thinking "beyond the lines" and an option to measure students' metacognition. The first part of the book is the manual for administering and interpreting the HR-TI, including a discussion of purposes and components, how the IR-TI was developed, preparation to use the IR-TI, administration of the word lists and passages, completion of the cumulative record form, and determination of reading and listening levels. The second part of the book presents teacher's recording forms for the word lists, and two different forms of the passages for each of the grade levels from one to nine, inclusive. The third part of the book presents materials for the student, including word lists, both passage forms, and rating cards. Contains 70 references. Appendixes present a 31-item list of noc-harge inventories and lists, and an informal writing inventory. (RS) an informal writing inventory. (RS)

Focusing on the middle grades (4-8), this book provides an integrative and thematic approach to curriculum development. The book provides mini-lessons organized around three interactive constructs: the purpose for communicating, the audience, and the organization of the content to be communicated. Separate chapters in the book on each of five expository purposes provide in-depth coverage of recording, instructing, explaining, informing, and persuading, Reading components examine authentic selections from newspapers, magazines, and books, while complementary writing sequences in the book guide writers from topic selection, through gathering and organizing information, to focused drafting and revising. Chapters in the book are: (1) Communication with a Purpose: A Rationale; (2) Keeping a Record for Oneself, (3) Instructing How-To; (4) Explaining People's Lives and Actions; (5) Informing about an Object or Event; (6) Fersuading Others about an Issue; and (7) The Curriculum Connection. Highlighting the important innovations embodied
in the 1992 National Assessment of Educational
Progress' (NAEP) Reading Report Card, this report
provides information on how the NAEP's largescale reading assessment is evolving in response to

changing perceptions of reading development and assessment procedures. Included in the report is an overview of the theoretical framework underlying the assessment, a description of and presentation of reading materials used in the assessment, a discussion of students' performance on constructed-response questions, and a presentation of example questions. Major findings discussed in the report include: (1) at grades 4, 8, and 12, students' average performance was highest on multiple choice questions, somewhat lower on short constructed-response questions, and lowest on extended-response questions, and the most evident for the short constructed-response questions than for multiple-choice questions, and the most evident for extended-response questions; and (3) when demonstrating comprehension of texts that they had selected from a compendium of seven short stories, eighth and twelfth graders demonstration relative success in answering the constructed-response questions. Also included in the report at results of students' performance in reading for different purposes. Finally, two special studies conducted in 1992 are highlighted in the report-a literary selection task and a comparison of oral and written responses to comprehension questions. Constans 31 tables and five figures of data. A procedural appendix is attached. (RS)

Conducted as part of the 1992 Integrated Reading
Performance Record (IRPR), a study investigated
the oral reading proficiency of a subgroup of students participating in the 1992 reading assessment
conducted by the National Assessment of Educational Progress (NAEP). Subjects, 1,136 fourth
graders, read aloud one passage and were audiotaped as they responded to a series of questions about habits and attitudes related to both instructional and recreational reading. Subjects also completed measures of fluency and comprehension.
Major findings were that (1) much can be learned
and documented about children's abilities by listening to them read aloud; (2) 55% of the subjects were
considered to be fluent, but only 13% could be described as consistently reading with appropriate
phrasing and with at least minimal expressiveness;
(3) oral reading fluency demonstrated a significant
relationship with reading comprehension; (4) fluent
reading appeared to be related to certain literacy
activities; (5) 57% of the students were at least 96%
socurate in their oral reading of the passage; (6) 61%
of the students read the passage at a rate of at least
100 words per minute; and (7) accuracy and rate
displayed some relationship to reading fluency.
(Contains 11 tables and two figures of data. Appendixes present the interview guide, and a description
of the procedures and methods of the IRPR.) (RS)

This concise report presents excerpts from the two full reports of the 1992 Integrated Reading Performance Record (IRPR), which examined the reading habits and oral reading of a subgroup of fourth graders who participated in the 1992 National Assessment of Educational Progress (NAEF) study. The report presents major findings of the two full reports, including: (1) much can be learned and documented about important aspects of reading development through literacy interviews and by listening to them read aloud; (2) 55% of the subjects were considered to be fluent, but only 13% could be described as consistently reading with appropriate phrasing and with at least minimal expressiveness; (3) oral reading fluency demonstrated a significant relationship with reading comprehension; (4) an overwhelming majority of students reported reading storybooks or magazines, but significantly fewer of them reported reading information books; and (5) fluent reading appeared to be related to certain literacy activities warranting consideration by schools and families as they seek to support the literacy development of children, including the importance of broad reading experiences, reading outside of school, responding to reading, oral reading experience supported through shared reading activities, making books available to students, and talking to students about their literacy experiences. Contains six figures

of data. (RS)

This report represents elements of 105 replies received from UNESCO Member States to the International Bureau of Education (IBE) questionnaire.
The report does not always reproduce the complete
answers given, and the extracts presented are usually presented in the language used in the relevant
answer. The report begins with a list of member
countries and a list of subjects covered in the questions of terms such as "illiterate" and "functional
illiterate"; (2) current trends in enrollment for primary education and adult education; (3) national
plans concerning basic education; (4) partners in the
literacy process (including educational establishments, involvement of the army, participation of
public and private organizations, and financing of
literacy activities); (5) program content and literacy
methods; and (6) international cooperation and the
role of UNESCO. (RS)

This report describes the role of analogies in science instruction and presents research on a model for teaching with analogies. This model is being developed from research studies of textbooks and exemplary teachers; it provides guidelines for the strategic use of analogies during science instruction to explain fundamentally important concepts in ways that are meaningful to students. The model shows how exemplary teachers and textbook authors construct effective analogies to help students build upon new knowledge learned from textbooks by activating, transferring, and applying relevant existing knowledge. Contains 10 references and 4 figures illustrating analogies used in science instruction. (Author)

Over a semester, two university-based researchers worked with 12 teachers in a single school (grades 1-5) to better understand the teachers' implementation of a transactional strategies instruction curriculum. The researchers and teachers used group discussions, classroom observations, and one-to-one conversations to jointly develop structured interviews with the teachers, in an effort to understand the teachers' strategies-instruction processes. The structured interviews confirmed a large repertoire of teaching practices observed by the researchers. Many of the teaching practices were intended to scaffold students' use of strategies. The formal and informal preliminary interactions, combined with the structured interview, provided a great deal of information about the teachers' perceptions of strategies instruction. The teachers perceived strategies instruction to be demanding, with many obstacles to its effective implementation, but they were committed to it because they believed it promoted the achievement of their students. This report presents the first phase of an ongoing longitudinal study that explores the contexts in which children of various sociocultural groupe experience literacy as they make the transition to formal schooling. Participants were the caregivers of pre-kindergarten children attending Baltimore pub-

lic schools that served neighborhoods varying in income level and ethnicity. Parents' spontaneous reports of children's everyday activities were collected over a one-week period. Parents were later questioned about children's participation in selected activities. The goal was to document the home experiences through which early literacy is nurtured and to explore the cultural themes informing the literate activities in the home. Families in all socio-cultural groups reported that their children had frequent opportunities to engage in activities with the potential to foster development in several domains conducive to literacy: orientation toward print (e.g., storybook reading), phonological awareness (e.g., singing), and narrative competence (e.g., mealtime conversation). Middle-income families showed greater endorsement of literacy as a source of entertainment. Lower-income families, in contrast, gave more attention to literacy as a skill to be deliberately cultivated. (Contains 63 references and 6 tables of data. The recording form for the second visit with the family, and the coding scheme for print-related experiences reported in the diaries are attached.) (Author/RS)

Descriptors—°Basal Reading, Elementary Education, "Material Development, Reading Research, "Teacher Attitudes, Teacher Behavior Identifiers—"Deskilling, Teacher Empowerment, Teacher Surveys, Teaching Research
A study evaluated the assertion that basal reading programs limit or control teachers' instructional decision making through a process referred to as "deskilling" by surveying elementary educators regarding their use of and opinions about basal reading programs. Responses from 553 of 1,000 randomly sampled international Reading Association members on descriptive, Likert, and open-ended items revealed little, if any, evidence of teacher deskilling, Rather, results indicated that most teachers: (1) are discriminating consumers in charge of their curricular and instructional decision making; (2) view basal reading programs as one instructional tool available to them as they plan literacy lessons; and (3) do not relinquish control to basal materials or any presumed power behind the materials or any presumed power behind the materials or empower teachers by providing them instructional suggestions to draw from, adapt, or extend as they craft lessons for their students. (Contains 35 references and 3 tables of data.) (Author/RS)

State distriction struction Identifiers—Maryland School Performance Assessment Program, *Performance Based Evaluation This study examines the systemic reform process that was initiated in Maryland in 1991. The Maryland School Performance Assessment Program (MSPAP) consists of learning outcomes, a frame-

work for performance assessment, guidelines for school decision making, and suggestions for staff development. One year following the initiation of the MSPAP, a semistructured interview was con-ducted with the district-level administrators respon-sible for reading and language arts in the state. They were asked about their perception of the Assess-ment objectives and about the influence of the pro-gram on district goals and policies for instructional change. Learning outcomes were accurately pergram on district goals and policies for instructional change. Learning outcomes were accurately perceived as requiring students to apply language to real-world problems and to construct meaning from a diversity of texts. The most frequently cited instructional innovations were the teaching of reading and language arts through subject matters of the curriculum and the use of trade books for reading instruction. The MSPAP was perceived by 24% of administrators as legitimating reforms already underway in their districts. Findings suggest that efforts toward reform should be linked to a sustained, change-oriented political process informed by actual data on the status of the reforms. (Contains 20 references and 1 table of data.) (Author/RS)

Identifiers—Maryland School Performance Assessment Program, "Performance Based Evaluation Three expert panels reviewed the 1991 Maryland School Performance Assessment (MSPAP) reading test. This was the first year of an assessment program designed to measure school progress toward, among other content areas, three reading outcomes: reading for literary experience, reading to become informed, and reading to perform a task. The MSPAP, given throughout the state, is a nontraditional, criterion-referenced performance assessment, which in 1991 required 9 hours of testing time over an 8-day period. The three panels, one consisting of experts with an instructional perspective, one with a curricular perspective, and one a psychometric perspective, independently addressed a variety of test quality issues after review of the test materials and a presentation by a test developer. Results indicate that a test such as the 1991 MSPAP is adequate to assess school progress in reading but may be confounded with writing and may not adequately measure progress in basic reading skills. Findings suggest that a test such as the MSPAP is useful for making curricular and instructional decisions, but that use of the test for making decisions about individual students was not supported. (Contains 24 references.) (Author)

To prepare preservice teachers to implement per-

To prepare preservice teachers to implement per symanoe-based assessment in their eventual class

rooms and to give them experience in developing their own academic portfolios, some teacher educators are moving toward the portfolio method for assessing their preservice teachers in methods courses. A study evaluated the nature of preservice teachers is poal-setting and self-assessment within the portfolio process through questionnaire data collected from 36 preservice teachers at three different points during a one-semester reading methods course. Within their portfolios students were to demonstrate competence in the following areas: (1) understanding of the history of elementary and secondary literacy instruction; (2) understanding of the history of elementary and secondary literacy instruction; (3) knowledge of the interrelationship between assessment and instruction; (4) ability to assess, plan, and reflect upon the instruction; and (5) knowledge of interesting and appealing trade books. Questionnaires collected early in the semester showed that students' thoughts about literacy goals varied greatly; 13% indicated that they had not thought about goals at all. By the middle of the semester, results showed that nearly all students had clarified and narrowed their goals. And results at the end of the semester showed that all but two were giving positive accounts of their experiences. Some students (33%) indicated that they did not have enough time to accomplish the goals they desired. Preservice teachers need to be required to think about ways to improve and expand their own literacy; further, a formalized goal-setting process appears to be important. (TB)

"Lemnie," labelled early in life with an IQ number
below 70, at age 25 and awaiting trial for murder
took on the challenge of learning to read a complex,
aophisticated language. He joined a class filled with
people who were curious about the way worked
worked and who used the handbook "Crashing the
Language Barrier: The English Language—The Way
It Really Is" as the tour book for their journey

through the English language. Lennie was intro-duced to concepts about language, not items to be memorized. He learned the sound/symbol relation-ship and its many variations, the principle of the digraph and syllables, the structure of the sentence, the principle of main idea and its development, and the role of language in people's lives. He contributed what he could to the group, and in return, the group respected his contributions and encouraged him. Lennie and the others in the group recognized the difference between learning to read and the act of reading itself. After 10 weeks, Lennie was able to read famous short stories together with the group. (RS)

Identifiers—Pocus Groups, *Reading Motivation
An exploratory study examined teachers' perceptions of students' motivation to read and the relationship between those perceptions and students'
reading achievement. Focus groups of third- and
fifth-grade teachers were convened and given an
initial questionnaire. A second questionnaire based
on those findings was developed and field-tested
with third- and fifth-grade teachers and students.
Questionnaire items clustered conceptually into five
categories: involvement, strategies in reading, social, written expression, and persistence. This intergroupings supported the notion that teachers posseas a highly integrated construct of students' motivation to read. Data on students' achievement were
also collected and analyzed. For students in grade 5,
those perceived by teachers to be highly motivated
to read also had high report-card grades in reading
and social studies, and students perceived by teachers to be low in motivation to read had low report-card grades in reading and social studies.
Across grades 3 and 5, the pattern was stronger:
those students perceived by teachers to be highly
motivated to read also had high report-card grades
in all school subjects; conversely, students perceived by teachers to be unmotivated to read had
low report-card grades in all school subjects. No
gender differences in students' perceived level of
reading motivation or level of achievement were
found. (Contains 31 references and 6 tables of data.
Appendixes present the initial and revised questionnaires, and data on response choices to the initial
questionnaire.) (RS)

This paper reports on the creation, growth, and continual development of a teacher-researcher community formed in conjunction with the University

of Georgia site of the National Reading Research Center (NRRC). The National Reading Research Center School Research Consortium (SRC) is a teacher-researcher community that includes approximately 35 elementary, middle, and high school teachers from the greater Athens, Georgia, area. The mission of the SRC is to conduct and report teacher-directed classroom-based inquiry that informs practice and enlightens theory for literacy professionals. The research questions that drive current and future studies come directly from the teacher-researchers. The first sets of research questions came from open-ended meetings with prospective SRC teacher researchers. These questions were then refined and honed as the teacher researchers wrote proposals for SRC funding. The research questions evolved further as the research questions that direct SRC studies, as well as vignettes of how teacher researchers' inquiry and research questions changed as the research process unfolded. Contains 24 references and 2 tables listing research questions. (RS)

Identifiers—Reading Motivation

A study investigated how students felt about the
"extra" reading activities and opportunities offered
to them through an after-school recreational reading program. Ten fifth-grade students who were
deemed most critically in need in terms of academic
progress were observed in the after-school reading
activities and were interviewed. Six themes
emerged from the data analysis: (1) "the disadvantaged student" (moving from school to school and
lack of opportunities to participate in activities unless provided by the school): (2) "rules and rewards"; (3) "meaningful reading" (where students
spoke of their reading difficulties); (4) "boring reading"; (5) "adult influences" both positive and negative; and (6) "reading aloud." Results also indicated
that the use of rewards to encourage students to
both attend the program and to read apparently
worked initially, and was still working for some students; and the students themselves questioned the
value of the program in serving their particular reading needs and wishes. (Contains nine references.
Appendixes present observation questions, inter-

view questions, and the interview form.) (RS)

Identifiers—Teacher Surveys
This third annual survey investigated teachers' attitudes about writing and reading. Subjects, 507 K-5
teachers and middle, junior high, and senior high
school teachers of math, science, social studies, and
English teaching in public or private schools, were
surveyed by telephone. Results indicated that: (1) a
majority of teachers considered reading to be the
single most important skill for students to learn,
followed by mathematics and writing; (2) writing is
the skill in which most teachers see the most room
for improvement among students; (3) although secondary school teachers were the most likely to place
a high priority on writing, they were the least likely
to give the development of writing skills high priority in their classes or to have their students write for
them every day; (4) the first principle in the teaching of writing is the interconnection between writing
and reading; (5) parents play a major role in the
development of their children's reading and math
skills, but little part in the development of their
writing skills, what teachers most wanted parents to
do was to read to their children's wanted parents to
the local public library. (Contains four tables and
three figures of data.) (RS)

This pamphlet describes the Cooperative Integrated Reading and Composition (CIRC) program, a comprehensive approach to reading and writing instruction for grades 2 through 8. The pamphlet addresses the three principal elements of the program: story-related activities, direct instruction in reading comprehension, and integrated writing/Isnguage arts. In all of the activities that comprise the program described in the paper, students work in heterogeneous learning teams, and the activities follow a regular cycle that involves teacher presentation, team practice, independent practice, per pre-assessment, additional practice, testing, and team recognition. The pamphlet also discusses implementing CIRC. Contains 15 references. A list of 27 basal series, 4 materials for teachers, and 90 novels are attached. (RS)

Mytting Assignments Identifiers—University of Minnesota, *Writing Contexts

Teacher educators have recently devoted much attention to fostering reflection in teacher preparation programs. A teacher is most likely to reflect when he or she is faced with a conflict or tension. A post-baccalaureste English education program at the University of Minnesota employs a number of different activities to encourage its preservice teachers to reflect on such conflicts and tensions. First, the program requires teachers to review an audio or video tape of an episode with a pupil or a peer. They write a narrative of the tape and then write a reflection based on that narrative. Second, the program requires teachers to keep a journal in which they reflect on reading and discussions in their methods classes. Third, university supervisors challenge teacher perceptions by writing their own assessments of teaching by saking teachers to write a school ethnography. In these activities, excerpts from preservice teacher journals show a broad or ange of styles in reflection. One student is reluctant to criticize herself; another perceive himself as up against a system; yet another observes tension between her own standards and her students. Some strategies for helping preservice teachers in their self-evaluations would include methods of identifying types of conflicts and tensions; methods of dening conflicts between different perspectives or needs; and methods of reflecting on institutional forces constituting teaching and learning. Identifiers—Content Area Teaching, Educational Issues
It is a misguided and wasteful effort to try to separate out the teaching of language arts from the teaching of social studies and to wage war over which subject is most deserving of children's time. Instead, there is real power to be gained from teaching from a combined language arts-social studies perspective that shares similar goals and values similar experiences. Such a perspective involves more than simply acknowledging that reading, writing, speaking and listening occur within the context of history or social science. It means allowing children to grapple with disciplinary concerns in an intellectually stimulating way, learning to use language in order to develop historical meaning. In recent years, three important points of confluence have developed between the two disciplines, each of which presents difficult pedagogical issues that may be documented through transcripts of actual clasaroom dialogues. First, both disciplines have recognized the importance of authenticity—providing students with experiences that match what practitioners do. Second, both disciplines believe in interpretive communities as a means of generating knowledge. The function of these groups is to allow students to refine their understandings and to build on the comments of others. Third, a major thrust in both of these disciplines is the cultivation of student responses; both are interested in developing empathetic responses in children. (Contains 14 references.) (TB)

The English major at Missouri Western State College has five separate emphases. The English education and English literature emphases are traditional majors with required courses in literature, language and composition. The other emphases are traditional majors with required courses in literature, language and composition. The other emphases are technical communications, public relations, and writing. Since the state recently started requiring public higher education institutions to institute major exit exams, instructors at Missouri state have had to devise testing methods for each of the five English major emphases. For the literature and English education emphases, the department has adopted a commercially available nationally-normed test for major assessment—the ETS English Literature Test. No standardized tests are available for the other emphases. For these, a portfolio system of assessment abeen adopted. Faculty agreed that each portfolio should include: (1) a professional resume; (2) a reflective essay of self-assessment; and (3) several writing pieces from major courses. For each of the emphases these requirements have been tailored slightly. For the technical communications portfolio, for instance, students must include three reviews of their work which are to be written at various points over their college career. The public relations and writing portfolios use a "course approach" in designating portfolios nea "course approach" in designating portfolios use a "course approach" in designating portfolios. Journal writing, Speech Communication, "Students Students Students Critical thinking involves a multitude of mental operations from recalling to analyzing to evaluating information and ideas. In order to foster critical thinking, students need to build bridges between concrete, everyday ideas and abstract, academic concepts. These bridges can be built through journal writing. In his book "Critical Thinking: What Every Person Needs to Survive in a Rapidly Changing World," R. Paul outlines 35 dimensions of critical thinking. Three of those dimensions that could be cultivated through journal writing are as follows: (1) because a journal is written in the first person it allows a person to explore thoughts underlying feelings and feelings underlying thoughts; (2) journals provide a space in which students can explore new ideas by placing them in new contexts; (3) through journal writing students can identify contradictions as they attempt to clarify or critique texts. More generally, journals can be used in any number of ways, depending on the instructor's orientation. Inside the classroom, journals can be used at the beginning of class to focus student attention on a topic. Students could also be asked to read their journal entries aloud. In-class journal writing forces student attention on a topic. Students could also be asked to read their journal entries aloud. In-class journal writing forces students to switch from a passive listening mode to one in which they must create and explore their own beliefs. At the end of class students can use journals to reflect on what they have learned. (Contains a strategy list of 35 dimensions of critical thought; also contains 15 references.) (TB)

If the basic idea behind multicultural education is to teach students to understand, appreciate, and accept people who are different, then educators may need to broaden the scope of who is included as a minority. They may need to include discussions about sexual orientation. A study involving seven female and four male adolescents—five of whom were gay—attempted to determine the extent to which the reading and discussion of young adult literature about homosexuality affects attitudes about sexual orientation. All 11 participants completed an entrance survey that asked questions pertaining to their feelings about homosexuality; then, they each read and responded to two young adult books about homosexuality; finally they met for a 90-minute discussion that was taped. Results showed that reading and discussing literature serves as a catalyst to changing attitudes both for homosexual writes of a character from "Reflections of a Rock Lobster," I think that Aaron's experience brought to light something I previously refused to believe—that I did have prejudices that were strong. However, I used to only think of prejudices as color and culture differences." Finally, discussion of issues related to homosexuality revealed a flaw in the study itself. It is difficult for students to ask sincere, probing questions about personal matters in a group setting. (Contains 11 references and a students survey on homosexuality.) (TB)

A recent article in the "Assemby for Computers in English (ACE) Newsletter! explains what most instructors of English already know-that students in most writing classes produce papers for which the primary purpose is the teacher. As the Internet becomes more widely available, students will have more socces to what Howard Rheingold calls the "living database." Michael Day suggests that students can monitor discussion groups and determine the purpose and audience for which the group exists and then post messages to these groups. This activity gives students the opportunity to write for real purposes and real audiences. One recent item found on the Empire Internet schoolhouse might be of special interest to teachers of writing. The exercise is called "The Doomed Train." Its purpose is to give students the experience by writing a paper and then a rebuttal to a student on the Internet who has an opposite view. There are any number of other opportunities whereby teachers can use Internet who has an opposite view. There are any number of other opportunities whereby teachers can use Internet who has an opposite view. There are any number of other opportunities whereby teachers can use Internet on e-mail to enhance the writing experiences of their students—word-processing is no longer the cutting edge in technology for the writing classroom. For instance, students can do research on the Internet. Also, creative writers can access CREWRT-L, a place where t

Identifiers—Orwell (George)
Traditionally, university-level general education
courses in English focus on the appreciation of literature. A fundamental premise of this approach is
that literate people enjoy reading because they can
talk about books with friends, which makes the that literate people enjoy reading because they can talk about books with friends, which makes the classroom a sort of modern-day coffee house. Contributing to this pedagogical philosophy is the conviction that the general education course provides students with their last chance to read important works. Despite the efforts of one instructor to give a political dimension to an introductory literature course, students remained passive spectators of literary art. Apparently, they were assured that they might comfortably remain observers of past cultures and non-participants in important debates. The poetical and political impulses established in the course were not congruent and actually instituted conflicting pedagogical sims: the poetical reinforced a passive, appreciative mode, while the political demanded engagement with provocative questions. Responses to an essay question showed passive responses to an essay question showed passive responses to an information of the homelessness investigated in George Orwell's "Down and Out in Paris and London." It is clear that the problems with those responses resulted from the course's own conflicted trajectory: what began as a course in intellectual spectatorship ended with a call for social action. There are, however, other more productive ways to unite the poetical and political; the two, for instance, can be contrasted in a study of British identity. (TB)

A study of 24 composition anthologies that reprinted E. B. White's "Once More to the Lake" reveals a number of disturbing assumptions among the editors of these anthologies. Four areas of examinations were concentrated on: (1) classifications of White's essay; (2) thematic categories; (3) suggestions for writing; (4) study apparatuses; and (5) context. Results were disparate; they revealed, for instance, that authors place unreasonable demands on students in the study apparatuses they write. Students must be able to read not only the author's but also the editor's mind. Generally, results showed that if there is some agreement about the reasons students should be assigned readings in a composition course, there is little consensus about what kind of reading White's essay is and what students ought to be gaining by reading it and using it as a stimulus. The attempt to teach critical reading may be valuable for readers; the attempt to apply literary approaches to non-fiction prose may be worthwhile for young literary scholars and critics; the attempt to provide a text for a course in the essay may be attractive; but none of these attempts succeeds very well at getting at the center of the composition course—the student's own writing. Most anthologies have precious little to say about the process of composition. (Contains six tables and 34 references.)

Books, Primary Education, Teacher Education,
"Undergraduate Students, "Visual Literacy
Identifiers—Response to Literature
While literacy is an important part of anyone's

education, it should be noted that visual literacy, being able to view, interpret and react to visuals, is just as important for today's population. College students are reluctant at first to take the time to really examine a picture book, whereas youngsters go over and over their favorite books to see if there is anything new or different in the illustrations that they have overlooked. Childhood may allow for more time to spare on the essentials; college students, on the other hand, have full schedules of diverse demands. However, once college students begin to really examine art work, they do come away more satisfied with their abilities to judge the quality of the art work presented. The hope is that these college students will bring that literacy to their future elementary school students. In responding to illustrations, there are a number of areas of concentration: (1) color; (2) borders; (3) style; and (4) viewing distance. The style with which "Cinderella" is illustrated has a dramatic effect on the reader's understanding of the text. If in Susan Jeffer's "Cinderella," the heroine is beautifully, as she is traditionally taken to be, she is less than attractive, even frumpy, in Barbara Kariin's version of the classic, published in 1989. Similarly, Don Wood, illustrator of "Heckety Peg" (1987), creates an aura of goodness and light whenever the mother of the story is shown. (Contains 23-item bibliography.) (TB)

Identifiers—Writing Development
A year-long departmental evaluation at one college English department revealed that most sections of both pre-college English and regular English 101 emphasized form over content, structure over ideas, surface features over global, and this, at the expense of meaningful intellectual growth. When freshmen are plied with basic grammar books and with a series of disconnected reactings, they are being deprived of the kind of learning that allows for abstraction and analytical thinking. Whether upper level literature courses or pre-college courses for developmental writers, the questions remains the same: How does an instructor provide a relevant context for composition with readings that serve as more than models of rhetorical modes, that have substance and coherence? The "role of social pressure and self-awareness" is the unifying theme that drove the selection of the reading in one thematically oriented course. It allowed for treatment of many "isma," such as racism, sexism, ageism, and challenged reductive thinking about them. Since most incoming freshmen are highly concerned with peer pressure and self-discovery, this thematic approach seemed to hold the most promise. At first readings served as a wehicle for subjective responses in journals; excerpts from these journals shows a level of personal engagement. Later such responses were fashioned into casays. (Contains list of course thematic readings, other course materials and 19 references.) (TB)

Learning disabled writers are unable to incorporate text structures to plan their writing; they stop writing before their point is stated; their writing includes redundancies, irrelevancies, and many mechanical and spelling problems. Studies indicate that learning disabled writers use simplistic and/or ineffective planning strategies while composing essays. Therefore, it makes sense to spend weeks on writing instruction before students write for a grade. During this time, teachers should provide checklists for good writing qualities, questions for peer review, and practice and examples of other student writing. Teachers should also provide students with something to which they can compare their work. Students must understand where their own weaknesses lie before they can incorporate any improvement strategy. Teachers should also model the writing process. But of course most important is that students write and write and write some more. Sometimes they find it helpful, though, to be reminded before they begin of what constitutes good writing. Other helpful strategies can come in the form of classroom management techniques, i.e., outlines of class lectures and study guides of topics to be covered. According to Vygotsky, the idea is to "make visible the normally invisible cognitive process" of writing so that learning disabled students can "see the actions and hear the inner dialogue that directs cognitive behavior." (Contains 11 references.) (TB)

Identifiers—"Asian American Literature, Lealey College MA
In teaching Asian American literature on the college level, the first consideration is to try to choose works that dispel the dominant stereotypes. One of these stereotypes is the "otherness" myth that Asian American culture is very exotic, distant, mysterious, as in "the mysterious and far East." In reality, Asian Americans are here, have been here, and from, say, the perspective of San Francisco, their roots are not so very far to the west across the Pacific. Closely linked to the myth of otherness is the myth of the exotic Asian woman, like Madame Butterfly, who can be loved and left without remorse by the dominant White male. Purthermore, the Asian American culture is huge and varied. To lump together all these cultures into one category is, of course, entirely inappropriate. In fact, there are many definitional issues worthy of investigation. Students need to learn the history of the various cultures, many of which have been in conflict with each other and many of which have been in conflict with each other and many of which have been in conflict with each other and sain American literature at Lesley College is because the instructors value voice and the power of stories to build understanding between people. In the search for authentic voices, Asian American literature is fertile ground. (Lists 24 literature selections and several useful sources.) (TB)

Based on a survey conducted in 1992 by the National Assessment of Educational Progress (NAEP), a study examined the types of writing students performed in school, the quality of their classroom writing, and the relationship between their classroom writing, and their performance on the NAEP writing assessment. A nationally representative subgroup of more than 3,000 fourth and eighth graders who participated in the 1992 NAEP writing assessment submitted three pieces of writing that represented their best writing efforts and reflected different kinds of writing (narrative, informative, persuasive). Students were asked to give special preference to pieces developed using writing process strategies such as pre-writing activities, consulting with others about writing, and revising successive drafts. Teachers completed a brief questionnaire and students wrote a letter explaining their selections. Each students and/or informative writing; (2) at fourth grade, most of the informative writing; (2) at fourth grade, most of the informative writing; (2) at fourth grade, most of the informative writing; (2) at fourth grade, most of the informative writing; (3) tudents who spent more time on writing performed better on their portfolio writing; and (6) generally, the correlation between assessment and portfolio ratings was low for narrative and informative writing for both grades. Contains 32 tables and 9 figures of data. A summary of state writing assessment programs, a 100-item annotated bibliography, a procedural appendix, administration materials, and examples of students' writing are attached.) (RS)

"Writing, one of the three r's, must receive major
emphasis in teaching-learning situations. Writing should permeate all curriculum areas. Both practical
and creative writing need adequate emphasis. The
student should be involved in selecting objectives,
learning opportunities, and appraisal procedures.

The writing teacher then becomes a guide, stimulator and resource person. Creative writing must place
adequate emphasis on the poetry facet of the curriculum. The teacher needs to read orally to learners
diverse kinds of poetry. Students should then have
adequate teamphasis on the poetry facet of the curriculum. The teacher needs to read orally to learners
diverse kinds of poetry. Students should then have
adequate chances to read these same kinds of poetry. Also, students need to experience that which is understood and comprehended. Rote learning
and memorization do not harmonize with creative
endeavors. Learners must make sense from what is
being studied. For example, if students are studying
the writing of tall tales, they must realize what encompasses this type of creative writing from other
kinds of prose. Further, to develop interest in writing, the teacher must use procedures in teaching
which cause students to attend and establish set.

The learner and the curriculum must become one
and not separate entities. Some possible exercises
are the following: (1) students brainstorm a superhuman person by viewing an illustration showing a
person at work; (2) students tell about a task that
seemed impossible to complete; (3) students explain
how in supernatural ways the task was completed.

Rural school pupils need to attain optimally in the
writing

Translation, Roman Civilization, Roman Mythology
Designed for students with little or no background in classical literature, this book introduces the Greek and Roman myths of creation, myths of the gods, Greek sagas and local legends, and presents contemporary theories about the myths. Drawing on Homer, Hesiod, Pindar, Vergil, and others, the book provides many translations and paraphrases of original passages and discusses analyses by Sigmund Freud, Carl Jung, Claude Levi-Strauss, and Vladimir Propp, which interpret the classics for contemporary students. This revised fourth edition features extensive translations from ancient authors, including a complete translation on mythe in classical music, musical comedy, and film, including a discography of musical works on compact disc and film titles available on videotape; an expanded art program with maps redrawn for extra clarity; a listing that offers the Greek spelling of names, and an updated, expanded bibliography. Measures, Teaching Research
Imprecise definitions and indeterminate effects of
schooling have plagued the field of writing and have
led to a persistent antagonism between the professional teacher and the professional assessor. Into
this historical situation entered portfolio can be
the 1980s. Can portfolio's be used in lieu of standardized tests and other forms of state and national
assessment? One impediment would be the apparent
discrepancy between the purposes of portfolios at
the classroom level (how teachers use them) and at
the district or state levels (how portfolios can be
used to measure learning). A study attempted to
document how different teachers used portfolios in
their literature classrooms, with an eye to exploring
implications for large-scale uses. Results took the
form of case-studies of four teachers in New York
and self-reports written by eight others in Connecticut. Analysis of the results focused on the metaphor implicit in many discussions of educational
assessment, that of the factory and assembly line,
but on the other hand they were not in agreement
as to what metaphor to use instead. A table shows
a broad range of terms describing the portfolioboth challenges to traditional classroom ways. (Contains 16 references.) (TB) challenges to tradition 16 references.) (TB)

Identifiers—Student Empowerment
The "Writing Buddies" program is designed to allow students from one grade level to write, edit, publish, share, and celebrate their success with peers from another grade level. Students also benefit from the strengths of two teachers and parent volunteers.
The role of the teacher is to provide the atmosphere conducive to writing, and to allow and encourage students to seek other means of support for their writing. Students also become more confortable with the computer as they type, edit, and publish their pieces. Teachers interested in setting up a Writing Buddies program need to find a colleague who is also excited about the writing process and is interested in combining classes to explore writing. Teachers should design a management system that works for them. The program developers found that the more they empowered the students and developed the program around students' ideas and needs, the smoother the program went leaving the students meet twice a week worked well. Parent volun-

teers worked in the computer area, allowing teachers to concentrate on conferencing with writers. Materials needed include at least one computer per teacher and a laminating machine to reinforce the covers of the books published. To make the program more memorable, each year the developers hold a celebration for the Writing Buddies involving videos, pizza, and the sharing of writing. (RS)

Identifiers—Community Newspapers, Technology Integration
By publishing a quarterly school and community newspaper, sixth, seventh, and eighth graders get involved in the writing of many types of articles, proofreading, communication skills, interviewing skills, investigative reporting, photography, artistic and graphic design, and computer technology. As the students work together on each issue of the school paper, they develop enthusiasm, commitment, responsibility, respect for each other, community awareness and appreciation, and the importance of working together for a common goal. Students meet with the editor about 4 weeks prior to publication to discuss newsworthy events and issues. Students work on their chosen areas for the paper in their free time. Frequent meetings keep the process moving. Articles are proofread and the layout committee designs the pages. Materials needed include a computer, a laser printer, a deaktop publishing program, and access to a commercial printing service or a school copy machine. The time factor takes a lot of cooperation from the regular classroom teachers of the students working on the newspapers. Publishing a newspaper for the school and the community is a way for townspeople and the student population to gain a new appreciation of each other. (RS)

The newspaper program at the New Suncook School, Lovell, Maine, is a multi-level, language arts based unit designed to develop in students strong writing and interpersonal relationship skills, and to bring relevance to writing. The monthly newspaper features interviews, surveys, news, and some fiction stories written by students. The newspaper is delivered to all classrooms in the school. The prime advantage to this program is that it allows the students to generate stories for a known audience. Students, working in groups of three, write at least one story for each month's newspaper. Students write, revise, and proofread copy. Fifth graders are involved in producing the newspaper students write, revise, and proofread copy. Fifth graders are involved in producing the newspaper students write, revise, and proofread copy. Fifth graders are involved in producing the newspaper students write, revise, and proofread copy. Fifth graders are involved in producing the newspaper students write results achedule. Materials needed include a computer and word processing software, a copy machine, and newspapers to serve as models. This program increases students' abilities to communicate orally and through writing. It also promotes research skills, interpersonal relationship skills, and self-esteem. (RS)

Identifiers—*Process Approach (Writing)

A project in a second and third grade classroom resulted in a classroom newsletter designed and written by regular and special education students to provide the school and parents with information regarding activities in their classroom and school. Students were provided with an authentic opportunity to express their ideas and feelings about school and life, using a process approach to writing. Key components in the writing processes students use to write the newsletter are brainstorming, writing the first draft, peer revising, revising and editing conference, and publishing. The project is flexible enough to meet the needs of teachers, whatever the educational level. A two-hour period was sufficient for the second and third graders in the original project. The cost of the project depends on the computer equipment, software, and paper supplies available. (RS)

The study reported in this paper argues for a process model of postsecondary instruction where reader-response literary theory in general, and L. Rosenblatt's transactional theory specifically, provides a theoretical framework for strategies which use computers to teach postsecondary English. The paper begins with an examination of the historical and theoretical basis of the relationship among various literary theories. The transactional computer-assisted model proposed in the paper reconciles approaches for teaching literature and teaching composition, while addressing questions about the roles of literary theory and computer technology in postsecondary classrooms. The defining characteristics of the model in the paper are that it is computer facilitated, process oriented, student centered, recursive, democratic, generative, and adaptable. The paper suggests strategies and experiences which allow students to consider a text as they might consider the world. The paper reports an application of the model in a computer-assisted postsecondary classroom and includes example lessons and student responses. Those who design postsecondary curriculas, particularly those who teach postsecondary curriculas, particularly those who teach postsecondary curricular, particularly those who teach postsecondary curricular particularly those who teach postsecondary curricular particularly the paper reports an application of the model in a computer-assisted composition program in place. Contains 58 references and student responses. (R5)

Chronicling a year-long project to study fantasy literature, this book presents essays, teaching units, student writing, and "jack tales." The project chronicled in the book consisted of a 3-week intensive study program for librarians and teachers of grades 2 through 7 throughout the Appalachian region, followed up by two more meetings during the following school year, and ending in a Fantasy Fair. The first chapter of the book presents 16 lectures and responses of program participants, including "The Deeper Magic of Fantasy Literature" (Isabel B. Stanley); and "Pantasy and Satire" (Martha Crow); and "A Ladic Approach to 'Charlotte's Web'' (Robert J. Higgs). The second chapter presents eight teaching units for works such as "The Chronicles of Narnia," "The Hobbit," "The Witches," and "Lafcadio." The third chapter presents, in cassay form, teachers' approaches to various fantasy titles, discusses how they overcame obstacles and how they celebrated success, including "Doorway to Fantasy" (Anne Lewis), "Fantasy in the Bighth Grade" (Donns Jordan), and "Teaching across-the-Curriculum with Fantasy Literature" (Marlene Douglass). Chapter 4 includes short fiction and drams written by elementary school students in response to their study of fantasy literature. Chapter 5 presents jack tales and related cluster group activities. Appendixes list participants, staff, and mentors, along with a section on the Fantasy Fair, which includes a description, a catalogue of wining entries, and photographs of the day's events. Lists of 94 books, 74 articles, and 33 reference materials on fantasy literature are attached. (RS)

It could be argued that the basic communication
course is the center of the speech communication
discipline. And yet there is little consensus as to the
approach to teaching speech skills, what skills to
teach, or whether the teaching of skills is even effective. Four areas for discussion must be considered if
communication scholars are to maintain the integrity of the basic course. First, too many basic
courses are taught by graduste teaching assistants.
This is unfair to the students because they receive
in the vast majority of cases an inferior education;
and it is unfair to the graduate assistants because
they are unprepared for a task of this dimension.
Second, it is time that administrators emphasize and
reward teaching. Third, communication scholars
themselves are one of the biggest obstacles to innovation in the basic course. They resist innovation
because it means commitment of additional resources and, furthermore, they are simply unfamiliar with research on communications pedagogy.
Fourth, communication scholars have not done a
good job of educating the university community
about what they do in the basic course; it is not just
about teaching public speaking. Fifth, textbooks
available for the basic course are a disappointment;
for the most part, scholars continue to teach in the
tradition Aristotle outlined 2000 years ago. (TB)

Identifiers—Boyer (Ernest L), Carnegie Foundation for Advancement of Teaching, *Educational Issues

Because of the vast nature of the work of Ernest Boyer and the Carnegie Foundation for the Advancement of Teaching, it is appropriate to highlight specific ideas related to the basic course in communication and offer a response. First, further research must be done to determine the extent to which the basic communications course enhances student skills. Second, communication scholars have allowed the importance of their discipline to decrease in the perceptions of their colleagues and students; scholars must emphasize the importance of speech in all disciplines. Third, communication scholars have not required students to develop critical insights into contemporary problems. Fourth, there is little research done to support the teaching of basic communication courses. Fifth, communications scholars should do more to teach with advancement of knowledge as a goal in the basic communications course. Seventh, communication scholars must rely less on graduate student assistants in the teaching of the basic course. Eighth, communication scholars must do more to reward innovative approaches to teaching speech. Ninth, applying what scholars know about communication practice and theory should be the goal of all communication educators, especially those involved in the basic course. (TB)

iting agencies, administrators in higher education, state legislators, and/or the general public that students are competent communicators when they "pass" one communication course, they are doomed to failure. Before the issue of assessment can be addressed, scholars must identify the specific skills they want students to understand and practice in the basic course. At present there is little consensus about what ought to be taught in a communications course. The field of speech communication is in a quagmire. In many sectors it has not moved beyond the educational practices of Ancient Greece. While certain areas of the classical tradition are worth preserving, specifically, a continued emphasis on skills and a dedication to the inclusion of contemporary issues, a reorientation of instruction to incorporate and a dedication to the inclusion of contemporary issues, a reorientation of instruction to incorporate a receiver-oriented approach ('consumerism'') is in order. Instructors should cover the following areas, as understood from the viewpoint of the listener: (1) organization; (2) supporting materials; (3) reasoning; and (4) credibility. Communication educators must teach students to be akeptical of the messages they receive. If they fail in this area, they fail their students, their colleagues, they universities, their discipline and more importantly their society. (Contains 9 references.) (TB)

One of the most common communication tech-

uate Students, Videotape Recordings
Identifiers—Communication Behavior
One of the most common communication technologies being used in the classroom is the videocassette recorder. The videotaping of students' performances provides the instructor with a form of visual feedback that can be used to reinforce concepts and identify the strengths and weaknesses of the students' performances. Past studies have typically viewed videotaped performances as an effective feedback tool. A survey of 84 undergraduate students enrolled in an introductory oral communications class attempted to determine if this assumption was, in fact, sound. Specifically, it posed the following questions: (1) does the use of videotape as a method of feedback enhance student appreciation of evaluation criteria used by the instructor; (2) does the use of videotape decrease the gap between students' perceptions of their grades and the actual grade they receive; and (3) what is the impact of using videotape as a method of feedback on subsequent student performance? Results showed that the answer to the first two questions was affirmative. Students in the experimental conditions did exhibit a higher level of appreciation for criteria and were more accurate at predicting their grades in relation to the instructor's assessment of their performance. However, the grades of students in the experimental groups did not significantly increase on the next presentation. Findings suggest that instructors may find it helpful to videotape the audience response to student performances. Also, it may not be necessary to discuss the videotapes with students individually. (Student survey is attached.)

RIE JUN 1995

51

It is difficult to think about masculine and feminine behaviors without simultaneously conjuring the sex-trait and sex-role stereotypes that accompany these behaviors. Despite the fact that much has been written identifying other attributes that ought to be equally valued and encouraged in women's and men's communication ('empathy," "cooperation," "sensitivity," "effective listening," and "assertiveness"), a legacy of literature argues that using bi-polar terms to characterize men as "adventurous," "dominant" "forceful," "independent," "masculine" and "strong-willed" and women "emotional," "passive," "dependent," "sentimental," "submissive," "feminine," and "nurturing" persists. If Michel Foucault can offer guidance in handling the general question of "standards for gendered behavior," it would seem that the first step would be to alter the power relations by denying the "dividing practices" which divide women from men, and second, when the practices can not be denied (childbirth is an example), denying that the practices are or ought to be reasons for power divisions. Scholars must break down the assumption that females hold the standard for intimate relationships and males the standard for public or professional relationships. Research that supports a rigid sense of male and female behavior, such as some recent research on conversational interruptions, is often deserving of scrutiny. In the clasarocm, professors must be ever vigilant of absolute gender categories as defined by the textbooks they use. (Contains 79 references.) (TB)

The student who has an understanding of computers and other modern technologies is becoming important in college and in the workplace. Two California State Universities now require a personal computer for incoming freshmen. Vice President Albert Gore has urged all Americans to get on the information superhighway. Parents can assist their child and their child's school to get on the superhighway by, first, recognizing the value of learning mew technologies. Technology is rapidly changing most professions. Second, parents can encourage their child's school to use modern technology in the classroom. Third, parents can advocate computer literacy as a major focus of the child's curriculum. Parents who themselves have difficulty with new technology should keep the following in mind when thinking about computer use for their children. First, fear of technology can be cured; psychologists have developed several approaches to curing fear and anxiety associated with computer use. Second, computers should not be pushed on preschoolers because they require a perceptually rich environment. Third, computers can distance children from real life. According to Craig Brod, "computers can promote in children a distorted sense of time, mental fatigue, social isolation, and an unhealthy attachment to machines." (TB)

Identifiers—Cross Examination Debate Association, Debate Tournaments, *Reflective Judgment It is possible for any forensics organization or other body to center its activity upon public debates. Academic institutions have done so and will continue to do so on the basis that audience debates constitute an appropriate training for citizenship in a democracy and for participation in the economic world. The public debate before real audiences provides three important benefits: accountability; revitalization of the public sphere; and connection with a rich rhetorical heritage for standards and criticism. General interest has been renewed in human judgment as a contributor to academic epistemology as well as in the reconstitution of the publical sphere. Ronald Beiner, in "Political Judgment," provides the clearest picture of the functions of judgment: "Judgment allows us to defeat subjectivity by asserting claims that seek general consent." In practical terms, a distinction between human judgment and "technical rationality," or disembodied adherence to external rules, will be a useful touchstone. The ways in which public debates validate and contribute to consensual meanings and decisions may be divided into four categories: (1) context; (2) knowledge; (3) intuitive thinking; and (4) human interests. The manifest values of public debate with live audiences suggest the possibility that they might somehow be reflected in competitive tournament debate as well. (Contains 11 reference.) (TB)

Using the methods of cultural criticism to analyze the images of Blacks prevalent in American popular culture, this book examines possible connections between the finite and often distorted range of depictions of Blacks, especially prevalent in the mass media, to the treatment that they receive in contemporary society. The book looks at the way that race and racism—through images, stories, and material artifacts—permeate the everyday life of the inhabitants of the United States. Divided into two parts, "Insidious Iconography" and "Blemished Depictions," the book discusses Black images found on collectible objects, such as ceramic figurines, early children's books and sheet music covers, etc.; relates stories and jokes from folklore about Black behavior in unusual situations; and focuses on Black performers on television, Black musical artists, and Blacks in American films, especially the images presented in movies by and shout Blacks. Television Theory
The literature of film and literature of television are, to a large extent, two separate entities. The

The interature or rum and interature or television are, to a large extent, two separate entities. The major film theorists have not had much to say about television, and television has inspired few theorists of its own-few, that is, whose major concern, like the film theorists, is aesthetics. One of the earliest of its own-few, that is, whose major concern, like the film theorists', is aesthetics. One of the earliest forms of commentary on television is the production manual, most of which are elementary surveys covering technology, program types, basic principles of perception, composition and camera movement. Drawing on 31 production manuals—bur four of these in particular (Hubbell's "Television Programming & Production"; (Millerson's "The Technique of Television Production" Problems"; and Zettl's "Sight-Sound-Motion")—a study examined the treatment of film and video theory. Two areas in particular were concentrated on: (1) specific references to film theory and conventional filmic practices, as they are applied to television; (2) discussions of television's unique, essential properties. In "Television Programming and Production," Richard Hubbell goes to greater pains than most in comparing television to its antecedents; he poses four striking questions that probe the essential nature of television. The manuals that contrast television with film, on the other hand, identify such distinct characteristics as its live /immediate/spontaneous/simultaneous nature, and its relatively small image size. These manuals show scholars what areas deserve the greatest attention in future books on television theory. Major issues on television's image quality have gone almost completely uninvestigated. Identifiers—Communication Context
The typical textbook for the basic course falls to
integrate the broad range of topics it introduces to

the new student of communication. One way of addressing this problem would be to use feature films in the course, such as "Wall Street," "True Colors," "Other People's Money," "Milagro Beanfield War," and "Lean on Me." A summary of these films shows how well they demonstrate communication in a variety of contexts: interpersonal, groups, public speaking, typically within a larger organization, and stretching a bit, within a culture. Bach contains a public speech given by one of the major character? The integration of communication themes begins to occur for students when they see the character's speech as influenced by the same principles that influence his or her communication in other contexts. Most importantly, each film reveals an overarching theme about the role of communication in human interaction. The films give tangible representation to abstract and often difficult-to-understand themes. One or more of these films could be shown early in an academic term, immediately after the introductory chapters have been covered. For instance, "Wall Street," develops several themes relevant to the student of communication: the impact of symbolic forms on human behavior, the role of the spoken word and modern technology play in the creation of (not just communication of) information in society, and the nature of illusion and perception. The film clearly shows that information has become the commodity people seek, not tangible goods. (Contains 15 references.) (TB)

course, "Theory Practice Relationship Identifiers—Communication Context, Professional Concerns
Although a relatively new area of scientific study, theory and research on nonverbal communication in the courtroom has produced important findings for students and practitioners in five key areas: voire dire and jury analysis; opening and closing statements; client demeanor and direct examination; cross-examination; and judge demeanor and communication. During "voire dire," attorneys should build rapport with potential jurors by using warm nonverbal behaviors such as close distances, eye contact, and soft vocal tones. Research suggests tay good rapport may be associated with an interactants' adopting similar postures (mirroring), speech styles, facial expressions, and patterns of coordinated movement. In general, an attorney's delivery is likely to be helped by such factors as a moderately fast speech rate, fluent speech, strong eye contact, channel consistency, confident and varied tones, a direct and conversational style, natural gestures, the avoidance of body adaptors, and purposeful movement. With regard to the jury's assessment of a client, research shows that attractiveness, attire, physical features, and body language are all important in contrast to direct examination, cross examination calls for nonverbal stactics that discredit the witness; body language is used to intimidate or demean the witness. Finally, judges may signal to the jury through body language how they feel about a defendant's case. A functional model, consisting of 16 enumerated points, assumes that nonverbal signals combine to serve important communicative goals. (Contains 32 references and one figure.) ism, Press Opinion, Skilled Occupations, "Technical Occupations, "Television Identifiers—Local Television Stations, "Organizational Culture, "Professional Concerns
The voices of photographers and other visual-crafts workers rarely are heard in public discourse about local television news. All rank-and-file news-workers potentially face reprisals resulting in short-ened or blighted careers if they participate openly in assessing and criticizing the medium. A fresh examination of these newsworkers' views and morale is important because they have largely been neglected, but also for another reason: continuing economic pressures on broadcast outlets are affecting all crafts. Eighteen stations supplied 963 question-naires through mail boxes or other informal routes to non-management staff members across all news crafts; 145 forms (15 percent) were returned. The form employed 26 questions to establish each respondent's basis for entering local TV news and specific characteristics of that first job and posed 34 questions to determine comparative characteristics of the respondent's current job and his or her outlook on the industry and its future. Results showed that workers in this study have a gloomy picture of their jobs. Since their entry into the field, most have seen changes in television news and say their impact tends to be negative. Photojournalists in particular are critical of "live shots" as poorly motivated, and find ratings pressure in conflict with their ethics. Visual craft newworkers have neutral-to-negative news of their newscasts as journalism and suspect the public rates them similarly. There is some evidence to suggests that photojournalists make greater demands on their newscasts a journalistic performance than do even reporters. (Contains 2 tables of data and 31 references.) The presentation strategies used in debates are as often a feature in the contraction of the presentation strategies used in debates are as often a feature in the contraction.

Identifiers—Debate Delivery, *Debate Strategies, *Rudeness
The presentation strategies used in debates are as often a factor in the outcome as the content. Rudeness and humor are important considerations in examining the effect of various delivery styles at either the National Debate Tournament (NDT) or the Cross Examination Debate Association (CEDA) debate. J. H. Howe has elaborated on some of the reasons that humor has not been used much in debates: (1) the NDT radition has highly emphasized the used of evidence; and (2) debaters perceive an inadequacy in the use of humor. Howe best summarized his feelings on the issue of humor in 1981: "Above all, what the author believes to be an easential aspect of audience debating is the use of humor. As a factor of attention, humor has few equals." Other research suggests that humor should be personalized to the situation and should be used in situations where a debater can boost his or her credibility. Also, debaters should avoid humor that employs the "ad hominem" attack. Most critics would consider personal attack as rude behavior. V. Patterson and D. Zarefaky contend that when faced with a less skilled opponent debaters should avoid being rude or arrogant. Also, M. Pfau, D. Thomas and W. Ulrich argue that sarcastic or overbearing treatment of an opponent is inappropriate conduct as far as most judges are concerned. Displaying a humane side is a more appropriate style. Identifiers—"Television Literacy
Television has a pervasive presence in our lives and connects us to a larger world. Children spend more time watching television than any other activity (except sleeping). According to Bernard Percy, television can have a positive effect on children: it can build vocabulary, stimulate interests and motivate actions. Parents should consider doing some of the following: support successful educational programming in their child's school; encourage their child be an active television viewer. After watching a program, they should discuss with their child what they liked to disliked about the show. They should discuss issues and ideas related to the program. On the other hand, television viewing can be quite damaging to children. The American Academy of Pediatrics says that "protracted television viewing is one cause of volent or agreessive behavior." Parents can limit the negative effects of television by setting a strong example for their children by choosing responsible programming. Also, parents should monitor programs viewed by their children and limit their children's viewing time. (TB)

"Rhetorical Criticism, Social Values, United States History
Identifiers—Discourse Communities, Historical Background, "Religious Movements, Secular Humanism, 'Unitarian Universalist Association Noting that college students in the 1990s are once again becoming interested in religious /spiritual phenomens, this analysis of religious humanism as persuasive discourse first touches upon the event-filled 1960s and 70s, which saw social unrest and turbulent change, much of it emanating from university students. As background, the analysis points out that during those same decades a sophisticated history-of-ideas scholarship emerged from communication scholars, joined with a humanistic interdisciplinary approach to examine the rhetorical discourse of mass movements and public campaigns. The analysis employs a theoretical model constructed by Bill Balthrop (1975) to examine the humanist-theist controversy within early 20th century Unitarianism as a rhetorical movement having enduring significance in the intellectual history of American religious experience. The analysis discusses: (1) the structure of the Lieuterian group. enduring significance in the intellectual history of American religious experience. The analysis discusses: (1) the structure of the Unitarian group; (2) religious humanism as an emergent scientific perspective (giving attention to the discourse of its leaders John H. Dietrich, Curtis W. Reese, and Charles Francis Potter); (3) its membership and organization; and (4) agents of social control. The analysis concludes with a concise discussion of existentialism in American religious thought and with the hope that studying religious rhetoric in history will help today's students resolve their own ideas about life in the future. Contains 114 endnotes. (NKA)

Assessment in the discipline of speech communication is far from a "passing trend." Between 1988
and 1991, assessment activity on college and university campuses moved from a 55% level of involvement to 81%. Following certain steps allows
for an approach that needs to be taken to make the
transition to departmental assessment a manageable
one. The plan not only focuses on developing de-

DIE JUN 1995

partmental acceptance of the process, but it also recognizes the value of strategic positioning of the department in the total university environment. First, it is important to have at least one individual in the department with a working knowledge of communication assessment. This person must become familiar with key resources in communication assessment, particularly SCA actions on assessment, published resources, other campus initiatives, and various assessment tools. Second, the concerns and suspicions among departmental faculty must be replaced by an attitude that encourages empowerment and ownership. Faculty must feel that they own the process and sot that it is being dictated to them. Third, faculty must stay in touch with university assessment initiatives and make sure their views are represented in university discussions and mandates. Fourth, assessment must be brought directly into the department's structure. Fifth, faculty should look at communication departments on other campuses. Sixth, faculty must investigate creative means of funding assessment. In general, the department chair is the key person when it comes to assessment efforts. (TB) at efforts. (TB)

The current trends of today's workplace indicate that effective communication in business is very important. If scademics are in sync theoretically and conceptually with the business world, they are not effectively communication to the terrior to the strength of the series of application. A survey was conducted of 1,000 managers/recruiters as well as academicisms who teach business and professional communication at colleges and universities; 346 questionnaires were returned. Academics and recruiters generally agreed on the top five characteristics necessary for new hires in getting and keeping a professional job: ability to communicate; ability to get along with people; listening effectively; and teamwork capabilities. Academics included "writing effectively" on their list; recruiters included "time management skills." An examination of texts used in business communication courses shows strong similarities on the level of content. However, professors should go beyond instruction in communication technology in the classroom; (2) use multimedia presentations in the classroom; (2) use multimedia presentations in the classroom; (3) bring the real business world into the classroom; (4) do exercises using a hypothetical company; (5) perform realistic role-play simulations. Since the Federal Communications Commission is to be a regulation service in the public interest, several studies investigated what several Midwestern American groups would consider "in public interest." The study began in 1991 with an examination of college students' attitudes. A second

part of the study (in 1992) administered questionnaires to adults (age 53 to 92) in retirement communities and senior activity centers; and to 125 church
members in a college town of 20,000. Researchers
for the study used factor analysis because it focuses
attention on commonalities among a broad spectrum of participants. Some of the results of the three
studies are as follows: (1) all but the senior citizens
think that society should be careful about sex and
violence in programs; (2) the question of censorship
did not appear in the pooled groups' factors; (3)
crossownership and the consequent diminishing of
the number of voices in the community is a concern
to all these groups, not surprisingly since the town
these groups live in was not one the PCC grandfathered; (4) the participants do not like broadcast
campaigns and particularly commercials; (5) all
groups recognize the importance of broadcasting
and cable as both entertainment and issue/public
service media; (6) all groups think the media should
cover local events. (Contains five appendixes of
data, the questionnaire, and 21 references.) (TB)

Background, Interpretive Research
This classic, definitive study of Black images in
American movies has been completely revised and
updated to include new chapters on the films of the
1970s and 1980s. This new version of the book reveals the way in which the image of Blacks in American movies has changed-and also the way in which
it has remained the same. Following a preface to the
expanded edition and a preface to the first edition
in which the author details many personal interviews with Black performers in addition to his archival research, the book proceeds chronologically,
beginning with silent films. Chapters in the books
are: (1) Black Beginnings: From "Uncle Toms'
Cabin" to "The Birth of a Nation"; (2) Into the
1920s: The Jesters; (3) The 1930s: The Servants; (4)
The Interfude: Black-Market Cinema; (5) The
1940s: The Entertainers, the New Negroes, and the
Problem People; (6) The 1950s: Black Stars; (7) The
1960s: Problem People into Militants; (8) The
1970s: Black Superstars and the Era of Tan. The
book is generously illustrated with movie stills
throughout the years. (NKA)

Identifiers—Extemporaneous Speaking, Writing Contexts
Each student needs to achieve optimally in oral communication. The rural student should have ample opportunities to experience quality learning activities in communicating with others. First, pupils should have ample opportunities to practice making introductions. In society, people are introduced to each other. It is important to make the introductions properly so that enjoyable conversation might follow. Second, an excellent activity to stress is extemporaneous speaking. A learner should be given a topic and have to supply the content in a short period of time, say, 10 minutes. Third, pupils should select a poem to be read to the class. Fourth, rural learners should engage in debates. Debating can definitely lead to higher levels of thinking such as critical and creative thought. Sixth, students, when reading aloud out of the basal reader, should be

instructed to read in an audience-centered manner. Seventh, rural pupils should write their own poems and read them to the class. Eighth, pupils should have ample opportunity to engage in creative prose writing. Ninth, practical writing is a must for all rural learners. Functional situations should be stressed. Thus, if pupils are practicing writing a friendly letter, the contents should be mailed or exchanged with classmates. (TB)

*Student Evaluation Identifiers—*Laptop Computers, Rend Lake College II., Technology Integration
The traditional method of evaluating student speeches involves an instructor who listens to the speeches while filling out a critique form and/or writing comments. There are many problems with the traditional method that can be solved by the use of computer feedback; moreover, it will give the student speaker specific design and evaluation suggestions allowing the instructor to perform a more thorough and balanced student evaluation. A computer feedback system would involve the following: (1) an appropriately designed evaluation form for thorough and balanced student evaluation. A computer feedback system would involve the following:

(1) an appropriately designed evaluation form for each speaking assignment; (2) a bank of prepared comments keyed to each of the evaluation forms; (3) a word processing macro system such as Word-Perfect or MicroSoft Word and augmented with Tempo II Plus or Quickeys 2; (4) Macintosh Powerbook. Rend Lake College (Illinois) speech communication faculty would be involved in designing the various evaluation forms and macro comments to be used in Speech 1101. Each instructor would be assigned a Macintosh Powerbook equipped with the appropriate software. The advantages of computer feedback are numerous: it enhances the instructor's role as evaluator and critic; it improves departmental evaluation consistency; it increases student learning through immediate feedback; it motivates students and reduces grading complaints; it facilitates student evaluations; it adds a computer usage element to Speech 1101. Theater
Interactive theater is a performance based medium which utilizes drama to present and provide a forum for the discussion of socially sensitive issues which impact youth and adults. A scene is presented to an audience up to a crisis point, at which time the audience asks cast members questions while the cast stays in character. Interactive theater can be the catalyst to begin discussions of issues which are not always talked about in public. Scripts, sets, and costumes are not used, and performance environments are not a major concern. Workshops are available to train cast members in basic theater skills. Audiences have grown in personal awareness levels, and they train cast members in basic theater skills. Audiences have grown in personal awareness levels, and they have had the opportunity to hear what their persthink about the issues presented and discussed. Cast members, have seened. ers have grown in many ways, from performing skills to interpersonal relationships. (RS)

Parents should keep in mind a number of things
when preparing for teacher-student conferences.
First, parent-teacher conferences are important to
the child's success at achool. Parent-teacher conferences give parents the opportunity to deal with any
misunderstandings and discuss things that relate to
their child's progress in school. It is an opportunity
for two-way communication. Second, parents
should write down specific questions. If parents feel
that their child is receiving too much homework,
they should sak, what about all this extra homework? Third, parents should visit their child's classroom as part of the conference. A short tour will
make parents aware of what their child is experiencing
every day. They might also consider taking some
time to leave their child a positive note on his or her
deak. Fourth, remember that your child's success is
linked to effective parent teacher communication.
The child needs to know that his or her parents are deak. Fourth, remember that your child's success is linked to effective parent teacher communication. The child needs to know that his or her parents are working together with the teacher. Fifth, parents should avoid interrogating the teacher. They should try to avoid a rapid-fire series of questions; occa-sional comment from the parents does much to change the tone of the interview. Sixth, parents should try to remain calm. They should try to avoid getting angry and never make a personal attack on the teacher. (TB)

Number 43
Fourth graders in the Meroby School, Mexico, Maine, produce a weekly news program that is transmitted to all classrooms via closed circuit television. The classroom teacher is in charge of day-to-day preparation, working on the writing and the necessary skills with students. Teachers and students use their creativity to come up with new programming them. Number 43

day-to-day preparation, working on the writing and the necessary skills with students. Teachers and students use their creativity to come up with new programming ideas. At this school, the gifted/talented teacher works with the classroom teacher on the programs. Students spend about three hours preparing the half-hour program. The shows take many forms-contemporary news, theme shows, and other special programs developed by students. The programs started with one camera, a table and chairs, and a small room. It has grown substantially over the years. Students involved in the project sometimes show unexpected talents. Gifted second gradients up to high school students can adapt the basic ideas of the Broadcast News project. Students' writing and communication skills improve as they write and perform for real audiences. Social studies, acience, music, art, physical education, and mathematics can all become part of the shows. People resources are important. Commitment from the classroom teacher is essential. Broadcast News is a focal point that can encompass many areas of the curriculum at once. (RS)

Dorothy Heathcote's "mantle of the expert" approach is discussed in which teachers and students explore, in role, the knowledge they already have about a problem or task while making new discoveries along the way. The book also presents a variety of examples of planning for and using a mantle of expert approach in language arts, history, mathematics, and science classes. Chapters in the book are: (1) A Dialogue between Dorothy Heathcote and Gavin Bolton; (2) Some Introductory Guidelines; (3) The Dimension Factor: Using the Mantle of the Expert Approach across the Curriculum; (4) Life in a Medieval Monastery; (5) Scandal, Disease, and Deathl A Teacher's Nightmare?; (6) A Couple of Adventure Dramas; (7) Teaching Nine-Year-Olds about Another Culture; (8) King Arthur of England. An Extended Example; (9) Drawing a Few Threads Together; and (10) A Final Euchange of Letters. Appendities present material related to the examples presented in the book-a letter from a "bishop," a floor plan for a monastery, notes on chamber theater and a script, and a pronunciation guide for King Arthur of England. A pilot study internationalized an existing set of four models of public relations and field tested an instrument that represents a cultural approach to public relations practice. The instrument is based on a combination and extension of G. Hofstede's views of culture as mental programs comprised of values about power, distance, uncertainty avoidance, masculinity-femininity, and individualism-collectivism, and J. E. Grunig's four models of public relations practitioners and researchers in an urban midwestern city, completed the instrument which reflected cultural variables, models of public relations practitioners and researchers in an urban midwestern city, completed the instrument which reflected cultural variables, models of public relations, preases agentry and public information. Results indicated that: (1) power distance correlated with both of the one way models of public relations, preases agentry and public information of? Hofstede's uncertainty avoidance dimension correlated with the public information model only; (3) the separated index of femininity correlated with both the two-way saymmetrical and two-way symmetrical and two-way symmetrical models; and (4) both individualism and collectivism correlated with data from outside the continental United States. Two characteristics that are commonly associated

Two characteristics that are commonly associated with organizational behavior, power and sex, are examined. Sexual behavior within the workplace and schools is discussed as are the effects of sexual stereotypes, sexually harassing and non-harassing sexual behavior, and office romances on the organization and its members. A conclusion is that these attitudes and practices benefit neither women nor the organization, but men. It is necessary to identify the sexual aspect of organizations and organizational behavior and develop ways to insure that a sexually safe and erotically neutral environment is maintained. Perhaps then the erected hierarchy can be deconstructed and more women will move to positions of power. (LMI)

This document consists of all six issues of the "Journal of Research for School Executives" published before it was discontinued. The spring 1991 issue includes four research articles and one essay on employee discipline, school reform, experiences of state departments of education in school/college collaboration, legal aspects of disciplining students with disabilities, and administrative roles in school-centered decision making. Also, two reviews of Samuel J. Freedman's book, "Small Victories: The Real World of a Teacher, Her Students and Their High School" is included. The fall 1991 issue contains four research articles and one essay on Glasser's control theory, censorship and the public school library, the effectiveness of principals and effectiveness indicators, cooperative learning, and school facility evaluations. Also included are two reviews of John Goodlad's book, "Teachers for Our Nation's Schools." The winter 1991-92 issue is devoted to cooperative learning, including articles on

the accommodation of mainstreamed learners within cooperative groups, administrative support, teacher strategies, coaching, and three exemplary lessons using cooperative learning techniques. The book, "What's Worth Fighting For? Working Together for Your School," by Michael G. Fullan and Andy Hargreaves is reviewed. The spring 1992 issue contains five research articles and one essay on administrators' perceptions of priorities for dealing with dropouts, implementation of school-based management, principal communication during performance evaluations, charismatic leadership, school-community relations and John Dewey, and school reform. The fall 1992 issue concludes five research articles and two essays on Total Quality Management, teachers and instructional improvement, moral decision making, the student teacher effect on elementary school class a chievement, superintendent mobility, self-evaluation, and the role of technology in curriculum reform. Two reviews of Howard Gardner's book, "The Unschooled Mind: How Children Think and How Schools Should Teach," are also included. The winter 1992-93 issue contains six research articles on administrators' perceptions regarding the implementation of the "Education for All Handicapped Children's Act," collaboration, i.e., between universities and schools, the role of school board policy as a control mechanism in curriculum challenges, administrator values, the languages of leadership, and the role of values education / civic education in Indonesia. toon, rigger Education, instructional Materials, Leadership, "Leadership Training, Personal Narratives

Despite a long history in the arts and humanities as curricular mainstays and a continuing presence as sociocultural mythological anchors, biographies and other forms of life writing have been neglected as sources for teaching educational leadership. Besides biographies, these include autobiographies, portraits, profiles, case studies, memoirs, diaries, and journals. This paper examines the reasons for their under-utilization and discusses emerging perspectives that foster a reexamination of the efficacy of life-writing materials as teaching tools for professors. It also comments on some of the exemplars of life-writing and discusses the advantages to be gained from an expanded application in educational leadership curricula and pedagogy. For example, biography teaches context and helps establish and define the meaning (hermeneutics) of leadership, restores the human variable to the study of organizations; and is an excellent way to teach about moral leadership. Generally accepted criteris for selecting and critiquing biographies and other forms of life writing are also presented. These criteria include: (1) the angle of vision; (2) subjectivity or detachment; (3) the selection of materials and its impact on conclusions; (4) the use of background and historical context; (5) the use of grounded and traceable analysis to explain motive and cause; (6) the means used to portray the internal life; and (7) the application of appropriate methods in reconstruction as well as style (comprehensive, open, logical, inclusive, non-reductionistic, and non-polemical). Two figures are included. (Contains 75 references) (LMI)

This publication summarizes recent research findings on home education. In particular, the booklet examines the movement's historical background; reasons why parents choose to home school their rehildren; home-schooling characteristics, practices, and outcomes; and the impact on children's social development. Findings indicate that the home-education population is continuing to grow. Families who home school are not significantly unusual, but they have chosen an educational route for their children that is unique. The data also show that the home schooling population is diverse. In general, however, ideological beliefs are the foundation of parents' rationales for choosing home education. Home-educated children appear to do well in terms of academic achievement, participation in nonacademic activities, and measures of social and emotional adjustment. Research, however, has been limited by the lack of causal-comparative studies. It also rarely investigates the effect of home education on aspects most important to home educators, such as spiritual development, close family relationships, and adherence to religious values. As Texas public schools undertake their third year of implementing site-based decision making (SBDM), it becomes incressingly important to examine the extent to which SBDM has achieved its purported goals. This paper examined how Texas public school districts might effect mandated governance changes through the political phenomenon known as site-based decision making, and examined the influence these governance changes might have on public participation in educational policy decisions. It also examined citizen demands related to policies enacted. The Delphi method was used with two panels of experts composed of: (1) board presidents, superintendents, and principals; and (2) parents and community/business members. Three rounds were conducted with each panel. A total of 65 people participated in the first round, 55 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round, and 50 of the original panel in the second round and participation of the paters of the pat

Community-based interagency collaboration may allow agencies to more effectively involve residents and create a preventive, proactive social-service delivery system. This paper presents findings of a study that investigated the role of principals in community-based interagency collaboration (CBIC) in a large midwestern city. The project was initiated by top administrators in the four participating agencies-police, social services, schools, and public health. Interviews were conducted with a total of 36 individuals—9 principals and assistant principals, 3 district administrators, 17 interagency team members, 2 parent-school liaisons, and 5 top-level agency administrators. Observations were also conducted at all interagency team meetings. Findings indicate that principals were generally supportive of the project despite their exclusion from its formative stages. The principals responded to the project implementation in four ways: (1) by ignoring the project; (2) by offering encouragement and support; (3) by interacting with neighborhood team members, and (4) by concentrating increased efforts on improving and coordinating the school's internal environment. A majority of them were unable to articulate the link between the CBIC and the schools. In contrast with the active role generally played by principals mer eloss involved and responsible as CBIC participants. Finally, CBIC has the potential to create a sense of community, provide an outreach role for the principal, and facilitate school reform. (LMI)

Equal Facilities, Evaluation, Professional Development
This book, assembled by the National Coalition of
Educational Equity Advocates (NCEEA), addresses broad structural issues that can serve as the
foundation for rebuilding an equitable educational
system that is committed to excellence for all children. It argues that local, state, and federal governments and agencies are needed to create an
integrated system of support. It also calls for national, state, and local recognition that equity is inseparable from quality in the measure of educational
excellence; offers a comprehensive view of systemic
change beyond the current content and performance standards; and examines several of education's structural elements of an inequitable U.S.
educational system. Chapters address the following
areas: the characteristics of desirable schools, opportunity-to-learn standards, school finance, family
empowerment, teacher development, and student
assessment. Recommendations are offered regarding the role of federal, state, and local governments
and agencies. Three figures, two tables, and a list of
contacts for the NCEEA Support Groups are in-

cluded. (Contains 128 references.) (LMI)

This book offers a range of original perspectives on issues of planning and managing education in small systems. It is based on the proceedings of a conference held at the University of London's Institute for Education, supported by the European Community Directorate General for Development. The conference addressed a range of themes relevant to policies and practice within educational sectors in small systems of Europe, the Commonwealth, and the Africa and the Caribbean and Pacific (ACP) group. Part 1 defines and maps the intellectual terrain. Part 2 presents case studies from the following small system contexts: Lesotho, the South Pacific, West Indies, and Bhutan. The third part presents two chapters on regional coopersation. The following key conceptual issues dominate. the South Pacific, West Indies, and Bhutan. The third part presents two chapters on regional cooper-ation. The following key conceptual issues dominate the discussion: (1) definitions and conceptualiza-tions of smallness; (2) the nature of decision making; (3) disadvantages of smallness; (4) advantages of smallness; (5) patterns of educational provision; and (6) appropriate models and alternative pathways to development. Appendices contain data on geo-graphic and demographic factors and economic, po-litical, and social indicators. Contains an extensive hibitography (I MT) bibliography. (LMI)

Descriptors—Court Litigation, Disabilities, *Discipline Policy, Due Process, Elementary Secondary Education, Expulsion, *Federal Legislation, Guidelines, *Legal Problems, *Legal Responsibility, *Special Needs Students, Suspension Despite the significant amount of attention given to atudent description, a serious controversy remains regarding the procedures that constitute effective discipline. This book is designed to meet the need for systematic investigation of the parameters of appropriate disciplinary practices for all students. It helps administrators formulate, evaluate, and implement more effective, legally sound disciplinary procedures. Case histories, court decisions, literature reviews, and positive educational practice regarding the use of proper intervention plans are included. Following the introduction, chapter 1 provides an overview of discipline in the public schools, and chapter 2 describes the role of the multidisciplinary team in situations requiring the evaluation and assessment of students who may suffer from serious emotional disturbances. The role of individualized education programs (IEP) is examined in chapter 3. The fourth chapter explains the legal parameters for discipline policies, particularly the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act of 1973. Guidelines for student suspension and expulsion are outlined in chapter 5, and positive educational alternatives to traditional discipline are explored in the sixth chapter. Strategies for developing schoolwide discipline plans and for conducting the due-process hearing are offered in chapters 7 and 8. The addendum provides an overview of strategies and remedies for parents. Appendices contain an individual management plan, intervention resources, proce-

dural guidelines, a sample student-suspension policy and notice, samples of an expulsion policy and pro-ceedings, checklists, a staff memorandum, and an educator's guide to legalism. An index and table of cases are included. (LMI)

Descriptors—"Curriculum Design, "Curriculum Development, Curriculum Guides, "Educational Planning, "Educational Quality, Elementary Secondary Education, Instructional Effectiveness, Organizational Development, Participative Decision Making, "Total Quality Management In the face of increasing demands for school reform, educational leaders are looking anew at the core elements of the instructional program, including the curriculum. This book serves as a guide to both understanding and practicing sound curriculum development. It lays out the steps of a quality curriculum-development process and emphasizes that this is a collaborative process involving district leaders, school administrators, teachers, students and parents. Shared leadership among stakeholders who are committed to student learning and educational quality is essential. The first chapter describes the foundation principles that guide the improvement effort and outlines basic concepts of W. Edwards Deming's Total Quality Management concept. Chapter 2 details the several types of groups and the planning needed to accomplish curriculum work. As chapter 3 explains, certain foundation documents are also needed: curriculum guides necessary to quality teaching. Chapters 5-8 describe three major steps district work takes, under direction of the Curriculum Planning Council: aligning and monitoring the curriculum ensuring effective implementation of the district task guide the improvement effective implementation of the district guide; and developing the school and classroom curriculum. The ninth chapter describes the "bottom-line" audit, through which the effectiveness of the entire curriculum-development process is evaluated. Thirty figures are included. Appendices list questions to be asked when conducting the audit. (LMI)

Attempts to implement W. Edwards Deming's Total Quality Management (TQM) principles in education and transform school systems into world-class, quality learning environments have proved somewhat disappointing. This book asserts that educators need a way to translate the ideas about corporate quality for adaptation and use in schools. The "missing link" is offered in the description and discussion of Total Quality Education (TQE) presented in this document. The book first

clarifies what quality is and who the customers and suppliers in education are. It then presents a Quality Fit Framework, which describes how quality can be infused into school systems. This framework is built on three basic leverage points—hared purpose, structure, and dynamic relationships—that form the basis for applying 18 common core premises of quality to school organizations. Chapter 1 addresses the issue of the international educational challenge and serves as a primer for defining quality and various quality premises. Chapters 2-4 define each of the three leverage points and present strategies for carrying them out in the school system. Chapter 5 presents suggestions for making significant differences in the lives of today's youth. Sixty-two figures are included. Finally, chapter 6 examines the criticisms of TQM in education. (LMI)

Descriptors—Curriculum Design, Educational Assessment, "Educational Change, Educational Planning, "Educational Quality, Elementary Secondary Education, Models, "Organizational Development, Organizational Theories, Total Quality Management Identifiers—"Total Quality Education To design a school where all children succeed means creating a place that puts learning, rather than competition, at the heart of the process. This book does not propose Total Quality Management (TQM) as the cure for improving performance of U.S. schools, but rather argues that schools as a place and name should be replaced with the term "Testain places." The book gives clear-cut illustrations of how the new learning place should look from the perspectives of curriculum, classroom environments, teaching, and architecture. In addition, the term "Total Quality Education" (TQE) should replace TQM. Chapter I discusses the nature of TQE and chapter 2 describes the shift from school to learning place in terms of philosophy, psychology, pedagogy, psychometrics, and curriculum. The third chapter presents the learning model for the learning place, which addresses the domains of self-readiness, competence, and inquiry. Curriculum models that are based on arens and nonlinear planning are described in the fourth chapter. Chapter 5 presents an evaluation approach that rejects the false science approach of education, which asserts that it is possible to relate learning outcomes to inputs and processes. Each chapter concludes with a list of key terms and concepts. Four tables are included. (LMI)

Descriptors—Elementary Secondary Education,
"Faculty Development, "Organizational Development, Organizational Theories, Quality of Working Life, Teacher Motivation, "Teacher Role, Teaching Conditions, "Total Quality Management, Work Environment Identifiers—"Total Quality Education This book advances the premise that teachers, in addition to students, must be viewed as customers of the school. Teachers' jobs and work environ-

ments must therefore be redesigned for maximum professional growth and development. Unless teachers are supported in developing a quality work environment, efforts to improve schools will be marginally successful. Chapter I elaborates the concept of teachers and students as customers. The second chapter examines the motivation of teachers through "profound knowledge," knowledge that is essential for building a supportive workplace. Ways to increase teacher involvement are described in the third chapter. The process of "kaizen," or continuous improvement, is examined in chapter 4. The final two chapters offer strategies for consensus decision making and fostering continual learning for teachers. A total of 13 exhibits and 11 figures are included. Key concepts and terms are defined at each chapter's end. (LMI)

This book offers guidelines for school administrators who want to apply the principles of Total Quality Management to the organizational challenges faced by schools. Based on W. Edwards Deming's nine attributes of successful leadership, the book shows how to make the transformation to instructional leadership based on Total Quality Education (TQE). Chapter 1 examines how leaders get a diverse faculty to work together in pursuit of a collective vision. This is accomplished through the strategic planning process. Chapter 2 assimilates the key concepts of Total Quality Management (TQM) into the school by asking the key questions: Who is the customer? and How can principals organize the suppliers to maintain a focus on quality and continuous improvement? Chapter 3 addresses the role of instructional leader as "people developer," an administrator who is committed to optimizing the talents of all staff members. Chapter 4 offers concrete examples and specific suggestions for using peer coaching and peer supervision as mechanisms to foster continuous improvement. Data-based decision making is examined in chapter 5, specifically, the use of collaborative action research. The sixth chapter focuses on several mechanisms used by principals to build a professional learning community. It offers practical advice on how to implement "management by walking around" (MBWA) in schools, how to use governance process to maximum benefit, and what differentiates the leaders of learning communities from administrators in seemingly stagnant schools. The concluding chapter presents an integrated model of the TQE instructional leadership process. Twenty-three figures are included. Key terms and concepts are defined at the end of each chapter. Management
Identifiers—"Total Quality Education
Total Quality Management (TQM) promotes a
long-term, strategic look at organizations; by extension, Total Quality Education (TQE) promotes an
casential, strategic view of communities, educational provisions, and children. This book discusses
applying the TQM approach, which focuses on
long-term quality, to a TQE, communitywide focus.
The emphasis is on long-range solutions to the problems affecting schools. The book abows school administrators how to communicate TQE concepts
and build strong ties with community and business.
It also offers strategies for organizing a campaign
that refocuses communities on schools. Chapters
contain practical tips, checklists, charts, reflective
forms for developing strategies, surveys for data collection, and information management tactics. The
first four chapters describe strategies for creating
constancy of purpose, changing from competition to
cooperation, building trust among partners, and fostering interagency collaboration. The fifth chapter
describes educational futures in collaborative systems-changes in education to meet the needs of all
children in the next century. Key terms and references are offered at the end of each chapter. (LMI)

Communication, Organizational Development, "Total Quality Management, "Unions, "Work Environment Identifiers—"Total Quality Education
This book is designed to provide school administrators and labor leaders with ideas about how to improve school district labor relations by incorporating the principles of Total Quality Management (TQM). In schools that apply the principles of Total Quality Management (TQM). In schools that apply the principles of Total Quality Management (TQM). In schools that apply the principles of Total quality Education (TQE)—that is TQM as it modified to school practice-labor and management can agree to disagree while still maintaining a positive atmosphere of trust and mutual respect. Chapter 1 prosents a brief history of U.S. teschers and their early associations. Chapter 2 focuses on the problems caused by industrial-style teacher unions and develops a rationale for abandoning adversarial union-management relations. The third chapter examines W. Edwards Deming's "14 points for management," which form the basis for the transformation of an organization into one that embraces the principles of TQM. Each of the points is related to the educational setting and school district labor relations are examined in chapter 4, which discusses the various conflicts and concordances, harmonies and dissonances, to determine whether collaborative bargaining is a vehicle or barrier to reform. Chapters 5-7 deal with the transformation from industrial unions to professional unionism, and chapter 6 delivers some practical advice for launching a new quality labor relationship in a school district. Chapter 7 is focused on the policy trust agreement. Key terms and references accompany each chapter. A total of 5 exhibits, 9 tables, and 1 figure are included. (LMI)

Recent changes in society have greatly complicated the ability to provide an equitable and
high-quality learning experience for all students.
This book provides a basic discussion of the issues
that are intrinsic to cultural diversity, with a focuon the school administrator's role in affirming student diversity, it relates these issues to Total Quality Education (TQE) concepts to help the school
administrator think about cultural diversity in the
schools. Chapters 1 and 2 discuss the nature of prejudice and discrimination and how they are manifested in society. Chapter 3 describes those
practices that can negatively affect student learning.
The key role of the administrator in enhancing staff
and curriculum development is described in the
fourth chapter. The role of school leaders in working
with staff, students, and families to affirm cultural
diversity is discussed in chapter 5. The sixth chapter
argues that to develop a multicultural ethos in
schools there must be fundamental shifts in patterns
of thinking. It is asserted that facing diversity requires principals to take risks and reflect on their
decisions. The final chapter discusses the skills
needed for total quality leadership. Key terms and
concepts are included at the end of each chapter.

School board members are entrusted by taxpayers to establish and maintain quality in their school systems. Unfortunately, most board members lack the
experience or training necessary to face a wide
range of new and daunting challenges. This book
was designed to help school administrators and
board members understand the principles of Total
Quality Education and their relationship to school
governance. It provides a research-based body of
information on board roles in key areas related to
successful school governance, grounded in principles of system quality improvement. Chapter I describes school board characteristics, functions, and
the need for educational change. Chapter 2 presents
the ideas and precepts of Total Quality Education
(TQE) with a flavor relevant to boards and governance functions. The third and fourth chapters offer
guidelines for using policy to implement a bold vision and for designing board policy for quality
improvement. Long-range planning processes and
strategies are described in chapter 5. Chapters 6-8
offer suggestions for achieving quality leadership
and teamwork, exercising board oversight responsi-

bilities, and implementing TQE in the school board structure and processes. Key terms and concepts end each chapter. Forty-nine figures are included. (LMI)

This book provides a total "how-to" approach for the use of technology, including information on the types of systems, hardware, and software available. It offers guidelines for determining how to match specific systems and needs, as well as strategies for implementing technology and Total Quality Education (TQE) to improve teaching. It also looks at developing the support necessary for the implementation of technology by using Total Quality Education in this application. The first three chapters set the background for developing a TQE method of thought and problem solving, developing the concept of an education as the product of schools and learning as the process. Suggestions for helping instructional managers change classroom practices and helping teachers apply TQE and technology are provided. Chapters 4 and 5 offer information regarding particular technological solutions. The specific systems, hardware, and software are defined, and tips for purchasing, implementing, and sustaining the systems are presented. Chapters 6 and 7 focus on the support necessary for success, including training, technical support, and maintenance. The eighth chapter challenges the educator to think about the future and what more schools and teachers could become. Chapter 9 provides some checklists, and chapter 10 offers thoughts to guide good decision making. Key terms and concepts end each chapter. Fifteen figures are included. (LMI)

Identifiers—"Total Quality Education
This book presents a wide array of sophisticated
problem-solving tools and shows how to use them in
a humanizing way that involves all stakeholders in
the process. Chapter 1 develops the rationale for
educational stakeholders to consider quality tools.
Chapter 2 highlights three quality group-process
tools-brainstorming, the nominal group technique,
and the focus group. The third chapter discusses the
seven basic quality tools, often referred to as statistical process control (SPC) quality tools: histograms,
pareto charts, scatter diagrams, run charts, control

charts, cause-and-effect diagrams, and flowcharts. Chapter 4 introduces seven additional quality tools that move cross-functional groups into the beginning stages of planning and management-affinity diagrams, tree diagrams, matrices, interrelationship diagrams, tree diagrams, force-field analysis, and benchmarking. Action planning, activity networks, the Plan-Do-Check-Act (PDCA) cycle, and Hoshin planning are integrative quality tools presented in the fifth chapter. The final chapter offers suggestions and reasons for getting started. Key terms and concepts are defined at the end of each chapter. Seventy figures are included. (LMI)

This book provides the steps, methods, and strategies that a team of professional educators successfully used in one school to develop Total Quality Education (TQE). As the final volume in the TQE series, the book is a useful guide for teachers, administrators, and parents in creating the self-renewing school. Seven chapters are based on the experiences of the staff at Orange Grove Middle School, located in the Catalina Foothills School District in Tuscon, Arizona. The concept of mapping improvement in schools is introduced in the first chapter, with a focus on addressing paradigms held by participants and the complexity of the school culture. Chapter 2 considers how the introduction of dynamic complexity can result in a sense of fear on the part of staff members. It is argued that each individual's purpose in the organization must be understood in order to develop communication and collaboration. The third chapter describes how to determine the beliefs and assumptions that already exist in relationship to organizational values. Ways in which a vision can be developed as a result of exposing prior values are described in the fourth chapter. Chapter 5 maintains that if the vision is to be realized, the organizational structures must be consistent with that vision. It explains how to assess and adjust existing structures, implement feedback mechanisma, and utilize system-dynamics strategies. The sixth chapter describes how to utilize external support structures for achieving school goals. Chapte

This book was designed to help citizens evaluate and improve their local schools. It contends that the solution to the potential end of America's progress is through positive school reform—the public management of schools. It presents a system of participative and results-oriented management that is implemented by boards, administrators, and teachers. The first two parts provide an overview of the system and the history of the public-management revolution. Part 3 describes the what, who, why, and how of beginning the public-management revolution in America's schools. The fourth part describes the system's three primary components—governance policies, management plans, and performance measures. Guidelines for implementing the system's evaluation techniques for school improvement—using outside sudits, conducting parent and teacher surveys, and evaluating student test data—are outlined in the fifth part. Part 6 offers strategies for rewarding staff through participative management plans, and part 7 describes a plan and criteris for evaluating the school board and superintendent. The final chapter summarizes the results in 10 school districts that applied participative-management plans, and part 7 describes a plan and criteris for evaluation techniques for implementing the school board and superintendent. The final chapter summarizes (1) America's students and teachers can achieve mor

agement and performance measures. Seventeen exhibits and 2 figures are included. (LMI)

Since 1985, a group of scholars has formed the School Expansion Workshop to examine empirical evidence for causal theories of school expansion. This book contains a collection of articles that are the result of the workshop's annual meetings. Specifically, the book asks, What forces are driving the spread of mass schooling? The preface, by Bruce Fuller and Richard Rubinson, is titled "Does the State Expand Schooling? Review of the Evidence." Part 1 focuses on how popular demand for more schooling is constructed, largely but not exclusively by political actors. Chapters include: (2) "The Rise of Popular Literacy in Europe" (David Mitich); (3) "Building the Institution of Mass Schooling: Isomorphism in the Modern World" (Francisco O. Ramirez and Marc J. Ventresca); (4) "Institutions, Citizenship, and Schooling in Sweden" (John Boli); (5) "Western versus Islamic Schooling: Conflict and Accommodation in Nigeria" (William R. Morgan

and J. Michael Armer); and (6) "Legitimating the State's Involvement in Barly Childhood Programs" (Sorca O'Connor). Part 2 focuses on relationships between education and the economy. It argues that the right question to ask is Under what conditions does education increase economic growth? The articles include: (7) "Specifying the Effects of Education on National Economic Growth" (Richard Rubinson and Bruce Fuller); (8) "Educational Expansion and Economic Growth in the Modern World, 1913-1985" (Aaron Benavot); and (9) "The Economics of School Expansion and Decline" (Walter W. McMahon). Part 3 focuses on how the state and other institutions endeavor to supply mass schooling. Articles include: (10) "Strong States and Educational Expansions: France versus Italy" (Jeraid Hage and Maurice Garmier); (11) "Who Should Be Schooled? The Politics of Class, Race, and Ethnicity" (Pamela Barnhouse Walters); (12) "The Politics of American Catholic School Expansion, 1870-1930" (David P. Baker); and (13) "Historical Expansion of Special Education" (John G. Richardson). In part 4's single article, "The Social Construction of Motives for Educational Expansion," John W. Meyer concludes the volume with the question, "What institutional conditions allow central agents, such as the state, to become credible actors in expanding and reinforcing the authority of mass achooling?" He focuses on the underlying faith that legitimates central actors when they argue for the virtue of building more schools. (Contains 340 references, an index, and information about the authors.) This book deals with the process dimensions of
curriculum development through the prism of creative imagination and self-expression. Its theme is
that personal and professional growth can occur in
tandem. It shows how to create settings and learning
communities that empower people to identify and
use their talents. Case studies of critical incidents
are offered to bridge theory and practice. Attention
is given to the "inner curriculum," which refers to
a sense of self and personal goals. In part 1, chapter
1 begins with a letter from an educator who communicates the ways in which she developed her own
curriculum to integrate her personal and professional lives. Chapter 2 searches for a definition of
curriculum that reconciles contradictions and identifies a common pitfall in curriculum development-the view that development is a technical
matter, rather than a creative artistic challenge. Part
2 places self within the context of vocation, which
refers to the concept of a calling. Chapter 3 shows
administrators that self-knowledge is essential before significant school changes can occur. The
fourth chapter describes how to communicate enjoyment of work to others. Chapter 5 suggests ways
to avoid or overcome burnout. The third part presents concrete ways in which educators can relate to
self, others, and the school environment. Chapter 6
defines leadership as

This book shows how to use evaluation to find effective solutions. The first two chapters introduce evaluation as an administrative function at the school level. Chapter 1 draws on two kinds of literature-educational-administrative practices) and educational-evaluation literature (evaluation practiced by professional evaluators). The second chapter introduces a new model of the administrative process and a corresponding instrument for data collection and analysis. The instrument is a systematic checklist pertaining to decisions and evaluations that occur when achool administrators face problematic situation. The model includes the description of the situation, the delineation of 4 key decisions that occur during the problem-solving process, and the specification of 22 sets of evaluation scattered among these 4 decisions. Chapter 3 presents 10 interviews with school administrators using the interview protocol described in chapter 2. In total, 30 interviews were conducted with 12 elementary school principals, 6 middle school principals, 6 assistant high school principals, and 6 high school principals in 7 southern California cities. The remaining 20 cases are summarized in Resource A. Chapters 4, 5, and 6 offer different uses of evaluation as part of the problem-driven administrative process. The fourth chapter synthesizes data derived from the 30 interviews for purposes of improved practice. The fifth chapter synthesizes data derived from the 30 interviews for purposes of improved practice. The fifth chapter synthesizes data derived from the 30 interviews for purposes of improved practice. The fifth chapter decisions within the decision-making process. Selected practical applications of the instrument are depicted in the sixth chapter. Six figures and 11 tables are included. Contains 79 references. (LMI)

*Organizational Climate, Self Control, *Self Management
This book presents an alternative way of thinking about school discipline policy. It advocates the establishment of a school environment that supports good student behavior and provides an organizational look at how to build good school discipline, based on actual experiences. Punitive approaches, whether based on rewards or punishment, simply employ techniques to control student behavior. They produce little self-discipline and only short-term compliance. Discipline must, therefore, be viewed as part of the larger learning system whose goal is to strive for long-term learning that produces mental and moral involvement. Important elements of a supportive school climate include positive parent-teacher expectations of students, respect for students, and good communication. Chapter 1 discusses the impact of teacher and administrator perceptions on how students learn to be self-disciplined. Chapter 2 examines various approaches to discipline from a schoolwide perspective, particularly the approach used by one high school in developing its discipline-management pro-

gram. Varieties of inschool suspension programs are also described. The third chapter discusses various in-class strategies for good student discipline and the powerful influence of teacher perceptions on how students learn to behave. Practical considerations for building and training successful problem-solving teams are offered in the fourth chapter. Chapter 5 discusses the limitations of traditional discipline strategies for at-risk students. Chapter 6 presents a cost-benefit analysis of corporal punishment and suggests alternatives to that approach. The final chapter reflects on some of the contradictions in considering school discipline. Sample letters, worksheets, problem-solving forms, 12 figures, and 8 tables are included. An annotated bibliography contains 15 references. (LMI)

This book contains a collection of essays about schools that have successfully implemented Total Quality Management (TQM) through partnerships with the business community, parents, higher education, school board members, and others. Following the perface, foreword, and introduction, the book is divided into five sections: school leaders in Total Quality Management (TQM) implementation; primary links (teachers, students, parents, and the school board; secondary links (partnerships with business, higher education, and external consultants); state-level links; and other critical links. The articles include: (1) "We Expect Excellence'—Kenmore-Town of Tonawanda Schools, Winner of New York State's Excelsior Quality Award' (John E. Helfrich and Dorothy Vienne); (2) "The Total Quality Approach in Dickinson ISD" (Linda Hanson); (3) "An Application Case Study of the Journey: Total Quality in the Parkview Schools, Jamesville, Wisconsin" (David Romstad and Michael Jamison); (4) "Using Total Quality Management in an Inner City School: George Westinghouse Vocational and Technical High School, Brooklyn, New York" (Lewis A. Descriptors—Administrator Effectiveness, Administrator Responsibility, Administrator Role, "Coping, Elementary Secondary Education, 'Obe Performance, "Principals, Quality of Working Life, "Stress Management, "Stress Variables, Work Environment When properly managed, stress can serve as a key to successful job performance. This book explores the link between pressure and performance in schools. It shows how to recognize stress as both a facilitator and debilitator of effective performance. Chapter 1 serves as a personal stress checkup. Chapter 2 explores the myths of administrative stress and identifies personal stress traps for principals. The third chapter outlines action plans for converting stress into useful energy. The ways in which stress affects performance are explained in the fourth chapter. Strategies for overcoming "rustout," a situation in which one's skills are underemployed, are described in chapter 5. Chapter 6 presents coping techniques for situations of burnout, in which one is overemployed. Ways to maintain a high level of productivity and to sustain the competitive edge are discussed in chapter 7. Eight tables, 8 figures, and 18 exercises are included. The resource section contains a secretarial stress index and a secretary-principal stressors profile. (LMI)

This book serves as a guideline to help administrators prepare for and respond to a wide variety of crisis situations. Following the introduction titled "Advance Preparation for Crises," five chapters provide information, drawn from actual personal experiences, on the following categories of crises-individual-related, group-related, communication-related, affinance-related, administrator's personal crises, and major disasters. The first section of each chapter presents basic information about the topic. The second section saks readers to consider alternative approaches to resolving the crisis and to reflect on the effects of each. The third section describes the actions taken and offers an indepth discussion of the situation. (LMI)

Staff Meetings, the feeling of accomplishment.
This book explains how to make meetings more efficient and effective. It outlines: (I) the correlation
between excellent meetings and excellent results;
RIE JUN 1995

(2) how to plan, open, conduct, and follow through with meetings, and (3) strategies for managing problems that arise during meetings. Chapter I addresses how morale, culture, planning, team building, and change are enhanced through productive meetings. Chapter 2 examines different meetings in which school leaders participate-parent, faculty, grievance, community groups, media, student, and opening and closing school sessions. Chapter 3 stresses the importance of determining if a meeting is necessary, and if so, establishing the purpose, agenda, handouts, time, place, participants, and minutes. The leader's role in terms of establishing climate, facilitating the group, observing body language, building consensus, closing, evaluating, and acting on evaluations is described in the fourth chapter. The final chapter analyzes common conflict situations and illustrates ways to handle them. A resource list contains planning tools, such as sample communications and checklists. An annotated bibliography of 22 references is included. (LMI)

This handbook offers strategies for school principals who have become the primary marketer for
their schools. It is designed to help them draw on
school and community resources to build a support
base of human, material, and financial capital. Much
of the material is based on practicing administrators'
responses to a survey sent to "Principals of the
Year" in all 50 states. Following the foreword, preface, and introduction, 10 chapters present information on understanding the communication process,
marketing the school, building school decision-making teams, conducting needs assessments, improving internal communications, involving parents in
the school, creating community outreach programs,
producing public-relations publications, enhancing
media relations, and planning for and managing crises. Nine sample documents are included. (LMI)

Identifiers—ERIC Digests Is the criticism of today's public schools and its employees unwarranted? This document highlights some data that cast the performance of American public schools in a more favorable light. Contrary to popular belief, today's students compare favorably with those in the past and with students in other countries. A higher percentage of American students complete high school than ever before, and many go no to college. Students who directly enter the workplace are generally well prepared. The digest traces the decline in SAT acores to changes in the demographics of test takers, and shows how comparisons with other nations do not reflect cultural differences. For example, in many countries the tests are taken by an elite group of students who have more hours of instruction and practice than students in the United States. Nearly 60 percent of American students progress to postsecondary studies and about 26 percent receive bachelor's degres. superits in the United States. Nearly 60 percent of American students progress to postsecondary stud-ies and about 26 percent receive bachelor's degrees. Finally, social and economic conditions have a large influence on the educational system's ability to per-form its task. (LMI)

This paper presents findings of a study that examined the effects of age and gender on the ways in which students in The Netherlands coped with academic and interpersonal stressors. Two types of coping strategies were examined-problem-focused and emotion-focused. Problem-focused coping refers to attempts to alter the stressor through confrontation or planful problem solving. Emotion-focused coping involves attempts to regulate negative emotional reactions to the stressor. The methods used included administration of the Stress and Coping Inventory (SCI) to 1,638 students (418 fifth-graders and 1,265 students in the second grade of secondary education). Interviews were also conducted to determine the extent to which students experienced psychosomatic symptoms. Findings showed that the girs reported more stress than did boys. Students reported more problem-focused coping in response to academic stressors and more emotion-focused coping in response to interpersonal stressors. In addition, emotion-focused coping increased with age. Giris and boys used similar coping strategies in response to academic stressors. However, girls tended to adopt a double-focused approach to interpersonal stressors. These findings indicate that the conflict of interest between allocating resources to gain mastery and maintaining emotional well-being may be stronger in females than in males. In some stressiful academic situations, an ambivalent coping strategy may chronically tax personal resources for marginal benefits. In situations involving interpersonal stressors, active coping, coupled with self-management techniques, may enhance female students'

This paper first proposes a definition for outcome-based education (OBE) and then identifiers questions that challenge the assumptions of OBE. In so doing, it sets the agenda for an honest debate on issues of policy, process, and assessment. OBE calls for a shift from an emphasis on inputs to an emphasis on performance standards for all students. The approach is based on the belief that the success of schools should be measured by what students know, rather than on what they are supposed to know. Key elements of a comprehensive outcome-based model include the following: (1) a concept of education as a process; (2) continuous and benchmark assessment; (3) early student readiness; (4) an engaging learning environment; (5) family involvement; (6) development of a community partnership; (7) qualified teachers; (8) state-of-the art facilities; and (9) shared governance. In conclusion, the concerns surrounding the assumptions including the political abasis for serious debate. The full potential of OBE will be achieved only if the emphasis is on the learning process and not the outcome. Contains 11 references. (LMI)

Educational leaders may recognize the promise of a performance-based educational system, but often are wary of confronting well-orchestrated special interest groups who oppose the change. This paper provides a basis for dialogue on both the promise of outcome-based education (OBE) and the challenge it presents to educational leaders. It argues that the success of OBE depends on enlightened leadership and that administrator-education programs play a critical role in preparing administrators for the transition process. The paper provides a brief background of the OBE movement and identifies concerns raised by opponents. It then describes the conditions essential to the implementation of OBE. (1) trust; (2) the concept of education as a journey; (3) continuous and benchmark assessment; (4) student readiness; (5) an engaging learning environment; (6) family involvement; (7) qualified teachers; (8) state-of-the-art facilities; (9) community partmerships; and (10) shared school governance. During 1993-94, the Morrison Institute for Public Policy at Arizona State University conducted a study on behalf of the Arizona Department of Education, This document presents findings of that study, which examined linkages between health services and schools for a comprehensive service delivery to students. Following the introduction, chapter 1 provides a national overview on children's health and the public schools, presenting national and legislative initiatives and a framework for linking health services and schools. Chapter 2 reviews what is known about the major issues in child health in

Arizona and its schools, synthesizing health data from several sources. Survey results from 531 Arizona school principals about school-based/school-linked health and social services are also analyzed. A discussion of the Arizona perspective follows in chapter 3, which examines the philosophy guiding state initiatives, key players, the processes that support school-based/school-linked health services, and a sample of current state activities. The fourth chapter provides a view of how some Arizona schools are attempting to address these issues through the provision of student health services are or near school sites. The last chapter reviews action necessary to facilitate linkages between schools and health services, and the status of Arizona efforts. It concludes with some considerations for the future. A conclusion is that the state is making significant progress toward promoting and, in some schools, implementing such services. Eight tables and seven figures are included. (LMI)

miques, Professional Associations, Reference Materials

This book is the fifth edition in a series designed to help individuals plan programs and teach courses in leadership. It offers descriptions of various methods, designs, current texts, and development tools for teaching leadership education. Following the introduction, the first part on courses and programs includes sections on the following: leadership majors and minors; courses on college and university campuses; programs and resources for the professions; programs for community and nonprofit leadership; other course and program resource material; and a cumulative list of courses and programs for 1986-1992. The volume also provides an annotated bibliography; a list of films and videos, directories of resource persons, resource organizations, and conferences and meetings; and an index. (LMI)

Descriptors—*Administrator Education, Doctoral Degrees, *Doctoral Programs, *Educational Administration, *Field Experience Programs, *Graduate Study, Higher Education, Internship Programs, *Theory Practice Relationship This paper presents findings of a study that evaluated the effectiveness of a field-based doctoral program in educational administration. The Ed.D. program at the University of Utah attempted to link theory and research to the practice of improvement. Specifically, the study examined the degree and ways in which student field-based projects and coursework resulted in program or policy changes in schools or other education-related agencies. Data were obtained from a survey of 18 Ed.D. students in the first two cohorts and from an analysis of students' field-applications projects and dissertations. Findings suggest that approximately one-half to two-thirds of the projects resulted in some sort of policy or program change in educational practice. The changes took the form of either policy adop-

tions that addressed legal and/or personnel administrative concerns or instructional program implementations. Factors that enhanced the likelihood of a project resulting in a policy or program change were: (1) the student's familiarity with relevant problems of practice; (2) the degree to which students worked closely with other organizational employees in developing and refining the project; and (3) the utility and conceptual/analytical quality of the proposal itself. This publication contains testimony, given by personnel at the Center for the Study of Educational Finance, initially intended for legislators at the federal and state levels to help them deal with public policy matters in K-12 finance. The first document is testimony given before the United States Senate Committee on Education, Arts, and Humanities, in July 1993. The Subcommittee was holding hearings on problems and issues in public school finance as background for reauthorization of the Elementary and Secondary Education Act of 1965 as amended, and on other pending K-12 legislation. The second document is testimony given to the Revenue Committee of the Illinois State Senate in September 1993. The committee was holding hearings on the tax structure of Illinois state Senate in September 1993. The committee was holding hearings on the tax structure of Illinois and its relationship to education funding. The third document was prepared for State Senator Alice Palmer of Chicago, and was a continuation of the State Revenue hearings. The fourth document is a letter to Progress Illinois concerning the state's progressive income tax. Documents 5 through 7 are communications from Dr. Robert Arnold to selected legislators, including the president of the Illinois State Senate and Representative Penny Wessels. The appendix provides information on the status of school finance constitutional litigation as of November 1993. (LMI)

This document presents findings of a study that

Special Needs Students, *State Norms Identifiers—"Illinois This document presents findings of a study that examined costs incurred by local education agencies (LEAs) in the state of Illinois for the delivery of special-education services. Data were obtained from a survey of 110 out of 296 Illinois school districts in 6 geographical regions, a 37 percent response rate. Findings indicate that the expenditures for special education were high, but so were other types of education that attempt to deal with individual needs. It is concluded that special education does not need to be drastically reformed to solve its funding problems. However, more attention should be paid to costs of education in general and to alteration of the traditional methods of educational services delivery by utilizing enhanced instructional technology and home instruction. An adequate and equitable funding system could be ensured with standard delivery systems and with funding based on student need and regional differences. To fully fund special-education students, the state will have to restructure the tax system and shift the support for education from local property taxes to state in REE JUN 1995

come and sales taxes. Eight tables and two figures are included. Appendices contain the survey form and eight tables that show total and net expenditure ratios by region. (LMI)

Education, Fign Schools, Minority Groups, 'Racial Identification, 'Racial Integration, 'Racial Relations, Socioeconomic Status
Since the mid-1960s, some affluent white schools,
both public and private, have made efforts to welcome low-income students of color into their student bodies. However, studies of these efforts have
sually ignored the complex and deep ambivalence
experienced by many young people of color in white
middle-class institutions. This paper attempts to
gain insight into the challenges that young men of
color face in education, with a focus on faculty and
student development, and to clarify the phenomenon of institutional inclusion and exclusion. It describes a university-school collaborative effort to
create a more inclusive school environment at an
urban high school of 1,110 male students. The
school increased its minority student population
from less than 5 percent to 12 percent in 1991. A
new Director of Diversity, a graduate student of
color at Boston College, the second member of the
partnership, was hired to work collaboratively with
faculty, students, and a college faculty member.
Methods included: (1) observation; (2) interviews
with teachers, students, and parents; (3) document
analysis; and (4) an examination of demographic,
political, and economic statistics. Findings suggest
that university-secondary school collaborative research raises the level of discussion mecessary to
form inclusive school communities. The following
common themes have emerged from qualitative
case studies of school segregation: the dynamics of
interracial relationships; the need for a sense of
home; the importance of adults of color; the dynamics of
interracial relationships; the need for
unwillingness of the majority to understand the
properties of the minority. Contains 41 references.

In fall 1993, 13 graduate students at Boston Col-

agement Development, "Theory Practice Relationship
In fall 1993, 13 graduate students at Boston College (Massachusetts) completed a seminar entitled
Administrative Theory and Leadership. This paper
examines the students' perspectives on the interplay
between theories of educational leadership and the
narratives of practicing administrators. As part of
their assigned coursework, each of the students conducted interviews with two practicing administrators about their definitions of the terms
"leadership," "administration," and "management." A total of 24 interviews, the work of 12
students, were reviewed. The narrative analysis indicated that the practicing administrators viewed
leadership and administration as different concepts;
they recognized the existence of a chasm between
rhetoric and reality, particularly in the domain of
ethics; and they expressed skepticism about the use-

fulness of administrative theories. It is concluded that administrative theories and knowledge need to consider the institutional context in which they ex-ist. Programs of administrator education need to include a "pedagogy of possibility," which starts with field work and student-faculty learning. Con-tains 46 references. (LMI)

Civen the advent of new forms of schooling in

ership, Leadership Styles, Public Schools, *School Administration
Given the advent of new forms of schooling in American education, specifically, integrated social-service schools (ISS), a radical rethinking of traditional leadership models is needed. This paper suggests a new role for K-12 public school leaders—that of the school president. Data were derived from a review of the job descriptions of the presidency in 40 Jesuit college-preparatory high schools nationwide. Findings indicate that a congruence exists between the job descriptions and the emerging needs of public ISS schools. Leaders of ISS schools must perform chief-executive officer (CEO) functions, procure and distribute resources, hold together policy and praxis in a complex structure, communicate effectively to a variety of stakeholders, coordinate a wide range of professionals, and promote external relations. Given the triple task of teaching, research, and service, the university is the most appropriate place in which to explore models of leadership for ISS schools and to prepare prospective and current practitioners for the role. Contains 56 references. (LMI)

proach, Partnerships in Education, "Vocational Education
A current focal point of Oregon's school restructuring effort is on closing the gap between academic and vocational disciplines to increase opportunities for all students. This Bulletin examines a spectrum of practices aimed at facilitating integration of academic and vocational education while exploring issues, problems, and solutions common to all approaches. The introduction summarizes the key arguments for integration and gives an overview of its premises. Chapter 1 introduces various models of integration and some of the components of a revised curriculum. Chapter 2 examines partnerships and collaborative efforts—key components of the shift to applied learning—among various members of the education system. The third chapter examines barriers to integration and synthesizes successful administrative approaches. The conclusion highlights ongoing issues that must be confronted as the process of integration moves forward. Data from telephone interviews conducted with 10 Oregon education specialists and administrators illustrate chapter themes. (LMI)

Three areas have become focal points in the restructuring movement: achievement, equity, and school-based governance. Restructuring efforts are initiated from four main sources—national and regional reform projects, state initiatives, district strategies, and individual school efforts. The Center on Organization and Restructuring of Schools is engaged in a 5-year program of research and dissemination that will analyze restructuring along 6 issues pivotal to elementary, middle, and high schools subsentic achievement, educational equity, decentralization, communities of learning, reflective dialogue, and accountability. This document encourages education writers to submit accounts of local school restructuring efforts. It offers questions to help stimulate story ideas on different aspects of restructuring. The questions for individual schools are related to the three areas of achievement, equity, and school-based governance. The questions for the district pertain to goals, process, budget, and staff development. A list of selected contacts-professional associations and organizations on school restructuring and education writing-is included (LMI)

This document was published by the Council for
Aid to Education, the only national nonprofit organization that focuses on education and private giving, particularly corporate giving. The first part
presents national estimates for corporate contributions made during 1993. Preliminary data for 1994
indicate little if any growth, though the outlook for

1995 is somewhat more positive. Some of the findings were: (1) Adjusted for inflation, contributions have climbed 8 percent annually between 1976 and 1985, and have fallen an average of almost 1 percent unually since; (2) Corporate foundations continue to play a major role in bolstering consolidated corporate giving; (3) Corporate support of educational causes represented 42 percent of total contributions in 1993; (4) Higher education received the bulk of education support; and (5) The ratio of contributions to pretax income fell from 1992-93, while profits climbed. The second part presents results of the 1993 Survey of Corporate Contributions. A total of 321 out of 371 companies responded. The data are supplemented by findings of the Council's Voluntary Support of Education (VSE) survey. One highlight of the survey findings is that: education received the largest share -43 percent, or \$739 million-of the \$1.767 billion reported given to specific causes in the United States in 1993. Second, colleges and universities secured almost 73 percent of the education dollars. And finally, gifts of company products and property accounted for 16.4 percent of contributions to all causes. Fifteen tables and 13 figures are included. (LMI)

The Education Council Act of 1991 Established the National Education Commission on Time and Learning as an independent advisory body and called for a comprehensive review of the relationship between time and learning in American schools. The commission's report, released in May 1994, found that school reform is destined to founder unless programs provide time for learning. This document is a supplementary volume to the first report, summarizing research and suggesting an agends for further research. Section I, comprised of four chapters, summarizes research findings considered by the commission. These chapters review research regarding four of the commission's substantive recommendations: (1) reclaim the academic day; (2) fix the design flaw; (3) keep schools open to meet the needs of children and communities; and (4) give teachers professional time and opportunities. The second section outlines a number of critical questions asked by the commission for which little or insadequate information was available. It returns to the four major concerns of the precoding chapters and specifies further information needed in these areas. Two figures are included. (Contains

Time on Task
The Education Council Act of 1991 established

the National Education Commission on Time and Learning as an independent advisory body and called for a comprehensive review of the relationship between time and learning in U.S. schools. This document serves as a supplementary volume to the commission's first report released in May 1994, which found that most school-reform designs are structurally flawed by their adherence to a traditional school calendar. This volume describes innovative approaches to the use of school time. It provides nearly 40 examples of exemplary efforts to make better use of available time and extend the amount of time students spend learning. The brief program descriptions are from 15 elementary schools, 15 middle and senior high schools, 4 districtivitie efforts, and 6 special programs. They include public and private schools in rural, urban, and suburban areas from 26 states. Information for reaching contact persons is provided. A review of the programs indicates that many different kinds of schools and districts have already implemented many of the commission's recommendations. The most common approaches in descending order include: (1) redesigning available time; (2) employing technology; (3) extending the school day or year; (4) providing time for professional development; and (5) providing support services for children or families. Finally, the approaches to the redesign of time usage differ by school level. (LMI)

This document describes the principal's role in
supervising a teacher mentoring program. It provides tips for guiding mentors and describes the
characteristics of a good mentor. For example, mentors working with a novice should focus on three
areas-the classroom, emotional support, and practical applications. Three styles of mentoring include
acting as a responder, colleague, or initiator. Guidelines for pairing mentors with proteges are offered,
which focus on recognizing these important characteristics of a good mentoring relationship: (1) similar values about achievement; (2) complementary
skills and knowledge; (3) the mentor's experience
level; (4) the mentor's willingness to share information; and (5) the willingness of both parties to listen
and ask questions. In conclusion, mentoring involves many skills-knowing when and how to work
with a new colleague, who should mentor, and how
much mentoring is enough. The key, for the principal, is to act as a team builder and to maximize the
mentor's effectiveness. (LMI)

This book contends that choice is critical to the process by which parents, students, and teachers can build consensus that allows a community of learning to emerge. It argues that the key to meaningful school choice is a system of tuition vouchers involving nongovernment achools, together with deregulation, which will foster an education that is nonelitist, pluralistic, and empowering. Part I deals with general issues in education and the need for choice, particularly through vouchers. Chapter I presents an overview of the conditions of education today and the reasons that government schools no longer meet the needs of a changing society. Chapter 2 describes some of the paradoxes and ideological factors that surround the voucher debate. The third chapter examines how the limited choice among achools functions and explains why the absence of incentives to expand the supply of alternative schools undermines the success of this approach. An opportunity for choice that involves both government and nongovernment schools is described in chapter 4. Part 2 (chapters 3-7) focuses on the failure of efforts by government achools to improve the education of minorities and the poor. The third part (chapters 8-10) examines empirical evidence about the effects of nongovernment schools on the poor and the effects of voucher-like policies in higher education and in systems of primary and secondary education around the world. The fourth part (chapters 11-15) responds to criticism of vouchers and examines the larger social issues involved in permitting choice, including the equitable provision of information, problems of attracting investment to schools in poverty areas, the presumed dangers of failing to socialize all children in a common culture, elitism, and accountability. The final chapter reviews issues and examines some of the political motivations that will sustain ongoing coefficit over vouchers in the ensuing decade. (Contains 257 references.) (LMI)

This book describes how schools can develop and thize portfolios as frameworks for evaluating school reform. The portfolio is a nonthreatening self-assessment tool that exhibits a school's goals, progress, achievement, and vision for improvement. Chapter 1 examines the school portfolio as an effective and positive, ongoing monitoring system that can reflect each school's many dimensions and simplify school evaluation. Chapter 2 discusses the structure, purpose, and the various uses of the school portfolio. The third chapter illustrates how the effective use of a school portfolio depends on the criteria used to monitor the process, product, and progress of the improvement efforts. It sets forth guidelines for creating, adopting, or adapting criteria and introduces the "Education for the Future" Continuous Improvement Continuums that form the basis of the assessment framework. The next seven chapters (4-10) are devoted to a Continuous Improvement Continuum. Each chapter describes the desired outcomes and elements of the continuum and provides examples and lists of items to include in that section of the portfolio. The continuum standent achievement, quality planning, professional development, partnership development, and continuous improvement and evaluation. Chapter 11 examines issues and logistics related to building a school portfolio, and the benefits of working with an external change agent. Thirty-four figures and a list of school reported are included. Appendices contain staff-developed rubrics and figures illustrating the school-improvement process. (LMI)

This book presents findings of a study that analyzed the ethical dimensions of administrator-preparation programs in University Council of
Educational Administration (UCEA) member institutions. Data were obtained from a survey of 42
representatives of 42 UCEA institutions regarding
their policies on ethical concerns for school administrators. Following two forewords and the preface,
chapter 1 discusses six ways of thinking about ethics
that have informed recent discussions of moral leadership. Chapter 2 offers a historical overview of ethics in administrator-preparation programs. Chapter
3 presents an analysis of the survey data. Programs
explicitly devoted to ethics at 13 of the universities
are described in the fourth chapter. Data indicate
that many programs adopted a problem-solving or
decision—making agends, often using cases and examples. Most programs paid much attention to the
analysis and development of professional and sometimes personal codes of ethics. Three categories of
ethics curricula were identified—courses that stress
knowledge about ethics, issue-oriented courses, and
those that offer some combination of the two. The
final chapter discusses sissues that must occupy the
attention of academics and practitioners in the coming years. It is recommended that educators engage
in ongoing reflection dialogue to promote moral
thinking and acting. (Contains 234 references.)

This document contains selected proceedings from an Education Finance Workshop. The workshop addressed various perspectives about the appropriateness and cost of some currently popular reform approaches. Two introductory papers are:
(1) "Our Task: Building the Links," by Ron Henderson; and (2) "Is Public Education Necessary to a Democratic Society?" by Kern Alexander. Articles that address issues in outcome-based education are:
(3) "Outcome-based Education as a Product of Trends in School Finance Litigation and School Reform" (Alan Odden); and (4) "The Outcome-based Accountability System in Dallas" (Sandy Kress).
Part 3, "From Theory into Practice: State Experience with Linking Education Reform and Finance" (Charles Lentz); (6) "Wisconsin's Experience with Linking Education Reform and Finance" (Charles Lentz); (6) "Kentucky's Experience with Linking Education Reform with School Finance" (Al Short). The fourth part contains three articles: (1) "Wisconolin's Experience with Linking Education Reform and Finance" (Charles Lentz); (6) "Kentucky's Experience with Linking Education Reform and Finance" (Al Short). The fourth part contains three articles: (3) "Choice, Vouchers, and Charter Schools: An Overview" (Louann Bierlein); (9) "Vouchers: A Serious Threat to Public Education" (Bill Comer); and (10) "Charter Schools: Time for a Change?" (Larry

Wicks). The final article, by Gary Watts, is entitled, "Defining the Future of Public Education." (LMI)

Descriptors—Budgets, Educational Economics, "Educational Finance, Elementary Secondary Education, Financial Exigency, "Income, Local Government, "Property Taxes, State Aid, "Tax Allocation, "Tax Effort, Tax Rates Fiscal stress has plagued state and local governments in the first part of the 1990s, and difficulties in balancing budgets and obtaining revenue for needed public services are likely to continue. This document examines the leading alternatives for increasing state and local tax revenue, pointing out that the best options vary from state to state. It is concluded that the state government should play a major role in funding schools, but a strong case can also be made for relying on local school districts to raise a significant portion of their own revenues. The personal income tax has become more prominent in state tax systems; however, the property tax its still the primary source of local school revenue. Taxes differ in their growth potential, fairness, conomic effects, stability, ease of administration, political salability, and exportability. Nine options for increasing state tax revenues are identified. The real root of financial inequality among districts is the reliance on local revenue, not the property tax itself. Suggestions for when and how to raise taxes, which is not always a political liability, are offered. State and local tax systems vary greatly. The benefits of earmarking taxes and lotteries for education are often exaggerated. The most attractive revenue opportunities for each state are concentrated in the three major taxes-personal income, sales, and property. Ten tables, one figure, and a glossary are included. (LMI)

Identifiers—*North Carolina
The selection and planning of sites appropriate for school facilities is a critical and complex undertaking. This publication describes the many factors to be considered during the process of site selection, planning, development, and use. The introduction streases the importance of knowing the community or territory and the local school system. The second section describes the site-selection process and discusses considerations for the site-selection committee. Technical requirements include size, shape, location, topography and drainage, access and traffic, security and safety, soil conditions and plant life, noise levels, utilities, and costs. Guidelines for carrying out the site-planning process are offered in the third section. Steps for developing the site include conducting a topographic survey, learning (studying) the natural characteristics of the site, and creating a master plan of site components. These components include the buildings, transportation, pedestrians, utilities, and playgrounds. Sections 4 and 5 offer specific guidelines for designing playgrounds and recreation fields. Information on relevant North Carolina statutes and a list of North Carolina resource agencies and professions are provided. (LMI)

Instruction that engages students and gets them to
use their minds well is referred to in this document
as "suthentic instruction." To assist in the articulation of a vision, the Center on Organization and
Restructuring of Schools has proposed criteria for
authentic instruction, which consists of the following five dimensions higher order thinking, depth of
knowledge, connectedness to the external world,
substantive conversation, and social support for student achievement. The first article offers examples
of two teachers who illustrate aspects of authentic
instruction. A social-studies teacher emphasizes
coaching in a socratic seminar, and a mathematics
teacher models mathematical thinking. The second
article describes in detail a framework, based on the
five dimensions of authentic instruction, for observing instruction. The last article, an interview with a
middle-school principal involved in school restructuring, offers views on how to support authentic
instruction. (LMI)

Identifiers—"Hate Speech, "Political Correctness
Both freedom of speech and freedom from discrimination are generally accepted expressions of
public policy. The application of these policies,
however, leads to conflicts that pose both practical
and conceptual problems. This paper presents a review of court litigation and addresses the question
of haw to reconcile the conflicting societal goals of
free speech and freedom from discrimination, considering the limited guidance provided by courts.
The following principles emerged from the review of
cases: (1) Racially biased conduct, including speech,
which interferes with another person's ability to
benefit from or participate in the district's programs
creates an unlawful racially hostile educational environment; (2) school districts have an affirmative
obligation to take prompt and decisive remedial action when racially biased conduct creates a hostile
educational environment; (3) the nature of the remedial action must be designed to redress the harm
caused by the offensive conduct and prevent its recurrence; (4) speech or expressive conduct which,
although offensive, does not interfere with another
person's ability to benefit from or participate in the
district's program is protected by the state and federal constitutions; and (5) school districts should
adopt a clear statement of policy in support of an
educational environment free of racial or other bias
as well as a complaint procedure under which racial
incidents may be fairly and systematically investigated. A model school district policy is inclu

Identifiers—"Americans with Disabilities Act 1990,
"Family and Medical Leave Act 1993
The Americans with Disabilities Act (ADA) and
Pamily and Medical Leave Act (FMLA) are two
major pieces of social legislation that impact private
and public employers including school districts.
Public school employers must have thorough awareness of the legal requirements of both laws and must
analyze the ways in which those requirements interface with collective-bargaining obligations. This
document describes legal requirements, negotiations, and policy considerations that are impacted
by the two laws. The first section discusses how to
successfully integrate the ADA with the legal duties
associated with the collective-bargaining process. It
examines the extent to which collective-bargaining-agreement requirements pose an undue hardship and describes how to avoid direct bargaining
charges. A sample ADA provision is included. The
second section presents information on the key aspects of the Family and Medical Leave Act and
provides a framework for developing district proposals and/or policies. The major provisions of the
FMLA are described. The third section discusses
issues in negotiating family-care leave, which include coordinating FMLA leave with existing leave
provisions in collective bargaining agreements, creating notice and certification requirements, and responding to requests to extend the benefits afforded
under state or federal law. (LMI)

By state law, many educators are being forced to move from a traditional norm of autonomy to one of coilaboration. This paper presents findings of a study that identified the changing role of the 21st century superintendent and described the way one female superintendent promoted state-mandated collaboration in a rural school district with very low commitment to democratic practices. The female superintendent, an advocate of collaboration, had recently been hired in a district that had a history of "old-boys" club" leadership. Data were derived from: (1) a survey of all teachers (N = 317) in a rural southern Oregon school district, which yielded a 60 percent response rate; (2) interviews with 24 teachers; (3) observation of the superintendents; and (4) a review of district personnel office's formal written feedback to the superintendent-findings suggest that the 21st-century superintendent-findings suggest that be 21st-century superintendent set a norm for harmony despite the district's prior leadership history. The superintendent was effective in that she utilized people-oriented strategies, modeled collaboration in her personal behavior, remained dedicated to the change effort, and demonstrated a willingness to take risks by leading in a way contrary to established district norma. Colleges and universities have a unique organizational culture that influences the decision-making processes used by leaders of higher education. This paper presents findings of a study that attempted to identify the theoretical frameworks that administrators of higher education use to guide their decision-making processes. The following theoretical frameworks were used to analyze leadership processes. (1) power and influence theory; (2) behavioral theory; (3) trait theory; (4) contingency theory; and (5) symbolic theory. Interviews were conducted with 10 higher education administrators from one university and one community college. Findings indicated that their implicit leadership styles comprised a mixture of integrated frameworks. They overwhelmingly used influential and behavioral frameworks to describe effective leadership. Good leadership was seen in terms of a leader empowering a follower for personal and professional success, and in terms of a leader's positive behavioral inspiring followers to achieve organizational goals. A majority of the administrators used a traditional approach, they were directive and held high authority, yet consulted with staff. A small group emphasized consensual decision making and advocated a group approach to leadership. Appendices contain survey correspondence, the interview format, and samples of interview responses that illustrate each theoretical framework. (LMI)

Descriptors—*Civil Rights, Civil Rights Legislation, *Court Litigation, Educational Environment, Educational Policy, Elementary Secondary Education, *Federal Legislation, Freedom of Speech, Guidelines, Higher Education, *School Districts, *Sexual Harassment, State Action This paper presents findings of a study that identified the actions taken by states to deal with sexual harassment in school districts. It also provides a historical overview of federal legislation and court litigation related to sexual harassment, civil rights, and First Amendment rights. Data on state actions were derived from a survey of all state departments of education. Responses were received from 35 state department administrators and I from the District of Columbia. Findings indicate that each of the responding departments had either state guidelines and legislation or provided school districts with workshops, materials, and policies. Most had formal compliant procedures and comprehensive definitions of harassment, and they provided information on federal and state legislation to their districts. In addition, interpretation and practice of policy varied greatly among the Office of Civil Rights Rejonal Offices. Citing the statistic that 85-90 percent of sexual-harassment cases occur between students, it is recommended to take immediate action. Education requires participation by all social institutions and groups. Appendices contain summaries of state departments of education policies, state contact sources, and a copy of the state survey. Regression (Statistics), Rural Urban Differences, School District Spending, State Surveys
This paper presents findings of a study that examined the relationship between structural conditions and parent proclivity to educate their children at home. The term "structural costs" was used to refer to conditions within the district that could be changed by the district. Data were obtained from a survey sent to the departments of education in five states with widely different regulations for home schooling. Wisconsin, Michigan, Washington, Oregon, and Nevada. The data from each state were divided into two groups based on the percent of home-schooled students in each of the selected districts. The first analysis step conducted t-tests for independent samples. The independent variables included per-pupil costs (PPC), reading scores, type of district (rural, isolated, or nonrural), local mill rates or percent of local resources in the PPC, and percentage of free and reduced lunches. Next, multiple regression analysis was conducted. Pindings indicated no correlation between student reading scores and the rates of home schooling. Rural, independent, and sonrural districts did not demonstrate differences between high and low home-school districts on any of the scademic measures. Oregon was the exception in each of these findings. Some support was found for the hypothesis that district socioeconomic conditions influence parents' decisions to home school. The data overwhelmingly demonstrated no support for a linkage between structural costs and parents' proclivity to home school. It is concluded that school-linked matters are not responsible for the dramatic rise in the percent of students being home-schooled in the United States. (LMI)

Identifiers—*Charter Schools
This report was prepared in response to requests by Senators Specter and Kennedy for information regarding charter schools. It presents data on the following: the number of charter schools approved under state law; characteristics of charter-school instructional programs; factors for school autonomy; accountability mechanisms; and the challenges posed by charter schools for federal education programs. Methodology included: (1) a review of documents for most of the 83 approved or proposed charter schools as of May 1994 (in California, Colorado, Massachusetts, and Minnesota); (2) telephone interviews with the principals of 50 charter schools, district officials in 34 school districts with charter schools, and state officials in the 11 states with laws authorizing charter schools; (3) analysis of the laws of the 11 states; and (4) a review of oral updates provided by officials in the 11 states. Findings indicate that as of January 1995, 134 charter schools had been approved in 9 of the 11 states with charter school in terms of instructional programs, autonomy, and assessment plans. An important issue is whether charter schools can be considered as local education agencies (LEAs) and thus be eligible for Title 1 funds. It is recommended that the Secretary of Education determine whether states may consider charter schools LEAs for federal program administration. If such schools may be LEAs, the Secretary should provide guidance that specifies how states may allocate Title 1 funds to charter schools particularly in states that use census data to count low-income children, and how states may determine chools proposed or approved as of May 1994, a copy of a federal grant provision to support charter schools proposed or approved as of May 1994, a copy of a federal grant provision to support charter schools in the Denartment of one ngure are included. Appendices contain lists of charter schools proposed or approved as of May 1994, a copy of a federal grant provision to support charter schools, comments from the Department of Education, acknowledgements, and a list of GAO contacts. This document presents findings of a study to be used as a basis for determining the condition of the nation's school facilities. This report presents information on the amount of funding the nation's schools report is needed to improve inadequate educational facilities, and on the overall physical condition and prevalence of schools that need major repairs. Data were obtained from: (1) a survey of school officials in a nationally representative random sample of about 10,000 schools in over 5,000 school districts, which elicited a 78 percent school response rate; and (2) site visits at 41 schools in 10 school districts, which elicited a 78 percent school response rate; and (2) site visits at 41 schools in 10 school districts, which elicited a 78 percent school response rate; and (2) site visits at 41 schools in 10 school districts, which elicited a 78 percent school response rate; and (2) site visits at 41 schools in 10 school districts, which elicited a 78 percent school response rate; and schools need sout 5112 billion to repair or upgrade facilities. Of this, \$11 billion (10 percent) is needed over the next 3 years to comply with federal mandates that require schools to make all programs accessible to all students and to remove or correct hazardous substances. About one-third of the schools, which were distributed nationwide, reported the need for extensive repair or replacement of one or more buildings. Almost 60 percent of the

achools reported at least one major building feature in disrepair, requiring extensive repair or replacement. Most of these schools had multiple problems. In addition, about half reported at least one unsatisfactory environmental condition in their schools. Some district officials attributed the declining physical condition of schools to decisions by school districts to defer vital maintenance and repair expenditures due to lack of funds. Appendices contain 10 district profiles, photographs of the worst conditions, a list of project advisors, a copy of the questionnaire, data points for the report findings, acknowledgements, and GAO contacts. Descriptors—Age Differences, "Disabilities, Early Childhood Education, Emotional Adjustment, Evaluation, Parent Participation, Parent School Relationship, Severity (of Disability), Sex Differences, Socioeconomic Influences, Special Education, "Student Evaluation, Teacher Attitudes This paper reviews early childhood special education assessment literature, particularly as it relates to parental involvement. First, the significance of the topic is addressed by examining the importance of parental participation in the assessment and in-

tervention process, and the influence of parental participation on various relationships. Second, the paper identifies the salient factors that appear to influence parents' observations, including: (1) adjustment to disability; (2) experience with the child; (3) age of child; (4) gender; (5) socioeconomic status; (6) severity of the disabling condition/s; and (7) the sasessment instrument. Third, the critical factors that influence observations by the professional knowledge, experience, and the assessment instrument. Fourth, the paper discusses implications for "best practice" regarding professional and parental roles, as well as considerations relating to the type of response requested from the parent and the assessment. Finally, an analysis of the studies and summary of the literature on assessment as it pertains to parental and professional congruency are presented. A table listing characteristics of the studies reviewed is appended. (Contains 115 references.) (DB)

This manual, intended as a training module for professionals involved in providing community-based vocational education, provides a thorough review of the Fair Labor Standards Act (FLSA) as it applies to vocational education, training, and employment of students. Individual sections address the following topics: (1) relationship of the FLSA to other federal initiatives including the Individuals with Disabilities Education Act, the Rehabilitation Act of 1973, and the Americans with Disabilities Act; (2) other applicable federal and state wage/hour laws; (3) specific requirements of the FLSA including guidelines for community-based educational programs for students with disabilities; and (4) conditions under which subminimum wages can be paid under the FLSA. Appendices comprise the bulk of the document and include: overhead transparencies; guidelines for implementing community-based educational programs for students with disabilities; compliance checklists; examples of Department of Labor application forms; a handy reference guide to the FLSA; a copy of the Fair Labor Standards Act of 1938 as Amended; regulations concerning hours worked, records to be kept by employers, and child labor requirements in agricultural and nonagricultural occupations; requirements concerning certificates of age; and requirements for the employment of workers with disabilities under special certificates. assist states in planning, implementing, and developing a statewide system of comprehensive, coordinated, multidisciplinary, interagency programs for young (birth to age 3) children and their families. As Minnesota is currently wastelined in the control of the nated, multidisciplinary, interagency programs for young (birth to age 3) children and their families. As Minnesota is currently participating in the fourth year of the Part H program, the first section of this monograph briefly explains what happens if Minnesota participates in year 5 of the Part H program. Some legislative concerns are raised about year 5, which will involve creation of an entitlement program for all eligible children and their families. The second section describes Part H program components, including requirements, the needed services, and how they are provided. These include evaluation and assessment, the individual Pamily Service Plan, criteria for early intervention services, components of an early intervention system, and interagency coordination. The third section raises some questions about Part H participation. These address the areas of choosing a case manager, defining developmental delay for eligibility purposes, determining eligibility, funding entitlement costs, requiring interagency agreements, imposing stringent personnel standards, and establishing procedural safeguards. The definition discussed is based on that of the Fourth Edition of the Diagnostic and Statistical Manual of Mental Disorders, as are the listed criteria for diagnosing PTSD. Other aspects of PTSD discussed include re-experiencing the traumatic events, symptoms of increased arousal, and clinically significant distress. A section on working with children diagnosed with PTSD notes additional symptoms a teacher might see in the classroom, such as hyper and hypovigilance and increased sensitivity to sound and touch. Classroom guidelines address helping the child learn to feel safe in the classroom saff with the child and family, behavioral issues, individualizing behavior management, setting limits in the classroom, making a referral, and working with the family and professionals. Estimates of the incidence of abuse of children with disabilities range from 2 to 10 times the rate of children without disabilities All forms of abuse, including multiple types of abuse, and multiple victims within a grouping of children, exist within the population of children with disabilities. The majority of the perpetrators are known to the abuse victim. Disabilities caused by child abuse are estimated to represent 25 percent of all developmental disabilities. Signs of abuse include, among others, frequent unexplained injuries, aggressive or withdrawn behavior, and wariness concerning physical contact. Family members should be informed that their children are at risk. Parents should talk to their children about abuse awareness and should be empowered to take firm action to apprehend the perpetrator. Many children can benefit from self defense programs with individually tailored defense and response techniques. The key to successful intervention and amelioration of maltreatment is recognition by the fields of child abuse protection and disabilities of their common interest. Professionals need to develop working relationships that allow for cross referral, cross training, consultation across agency lines, and increased accessibility for the disabled community. Identifiers—"Indiana
For the 1992-93 achool year, the Indiana Department of Education awarded planning grants to 10 school corporations and special education cooperatives which applied to be Inclusion School Pilot Sites. Funding was provided for activities related to planning and becoming more inclusive. Visits and interviews at the sites led to conclusions about positive elements to include in planning, from the perspectives of teachers, administrators, parents, and student participants. The interviews addressed proportions of students with disabilities, mission statement for the school, faculty participation in the planning project, professional development experiences, collaboration and teaming, special education teacher's schedule for collaboration, team communication, homeroom assignments for students, opportunities for student-student interactions, extracurricular participation, and social networks. The schools involved found that the decision to initiate change, and subsequent decisions about how to create it, must come from the local building level. Individuals must feel that they have power to determine changes which will impact their classrooms. Time must be taken to engage in essential planning—to get ideas flowing, allow for false leads, and try again. Two "prized" activities in the planning process were visitations to existing inclusive schools and time for local planning term meetings. A copy of the interview guide is appended. State Standards, Student Rights, Suspension, Violence
This report reviews current state policy and practices in the disciplining of students with disabilities,
as they are expressed in state documents including
statutes, regulations, and other types of written records. Federal law, regulations, and case law are
summarized in the report's introduction and background. Findings are presented in terms of an overview of the state documentation as well as specific
components of state discipline policy. Issues discussed include definitions, the evaluation team and
the Individualized Education Program, referral for
evaluation concerning suspected disabilities during
disciplinary action, consecutive versus cumulative
days, in-school suspension and transportation, continuation of education after suspension and expulsion, violence and weapons, and some unique state
provisions. The report concludes that the success of
the reform effort to raise the standard of American sion, violence and weapons, and some unique state provisions. The report concludes that the success of the reform effort to raise the standard of American education depends on eliminating the perception that students with disabilities are exempt from school discipline rules and on development of a clear understanding of the need for protecting their rights. The report does not contain a compilation of all state-level legal provisions, nor is it intended to be a source of any state's complete policy on this topic. An appendix lists source documents reviewed. (Contains 25 references.) (JDD)

The report contains three sections: (1) legal information including the provisions of the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act 1073, the similarities and differences in their application to matters of discipline, and examination of suspension and expulsion; (2) policy implications of discipline, focusing on school climate, staff performance concerns, general and special education concerns, and interagency concerns; and (3) a discussion of school discipline plans and prevention strategies, such as corporal punishment, time out, level systems, systematic exclusion, and modified school day. The paper concludes that a clear understanding of legal requirements coupled with a combination of well-planned services firmly supported by families and staff contribute to a positive and total educational environment. School officials are also urged to create strong relationships among school personnel and with families and community agencies. Congress is urged to address the legal and procedural quagmire which has resulted from its silence in the IDEA as to the discipline of students with disabilities. This report presents the outcomes of a policy forum convened to address issues of disciplining students with disabilities. Summaries of panel presentations are provided, focusing on legal and policy issues, school/interagency solutions/good practices, and family and community issues. Observations and recommendation of forum workgroups are also summarized, in the areas of: definition/scope of discipline, interagency/community/family issues, systemic reform practices, array of services and intervention strategies, and training and empowerment. Forum participants recommended that a range of discipline options be available, and the focus should be on early intervention. The school curriculum should include the development of prosocial behaviors, problem solving, mediation, negotiation, and other skills that lead to positive student behaviors. In general, forum participants favored an emphasis on dissemination of information about effective practices and support for systemic capacity building, rather than the development of additional federal and state law and regulation changes. Appendixes provide a participant list and forum agenda. (JDD)

Education, Hearings, Incidence, National Surveys, Program Effectiveness, *State Government
This survey of 50 states and 3 of 10 non-state U.S.
jurisdictions concerning state due process procedures focuses mainly on the use of mediation as a
form of dispute resolution that offers an alternative
to due process hearings in special education. A
background section discusses the definition of mediation and the mediation systems, timelines, mediators, funding, the involvement of attorneys, number
of mediations held for the years 1991 through 1993,
and mediation effectiveness. Statistics are provided
on the number of mediations held from 1991
through 1993; design of systems as one-tiered (single hearing process provided by the state) or
two-tiered (local initial hearing with state-level appeal); and timelines in due process systems. Opinions of state personnel favored the use of mediations
as an effective mechanism for implementing the
procedural safeguards of federal special education
statutes, but felt that the opportunity for due process
should be kept in place. The paper recommends the
compilation of national data on due process procedures, and training of educators in dispute prevention. Appendixes provide a copy of the survey form
and a list of state contacts. (Contains 20 references.)

Development, *Program Evaluation, Special Education, *State Programs, Systems Approach
This report reviews the outcomes of a forum convened to examine policy and practice issues surrounding the annual evaluation of effectiveness of programs and services for students with disabilities.
At the forum, alternative approaches being used by states to implement program evaluation were discussed, along with issues in gathering accountability data and the role of the federal government. The meeting resulted in identifying 11 characteristics of a statewide evaluation system that addresses the education of students with disabilities: clear definitions/purposes, feasible, flexible, capitalizes on prior work, is results-oriented with the goal of improving instructional practice, reflects consensus on outcomes, is inclusive of all students, contains incentives and supports, meets multiple levels of need and use, involves stakeholders, addresses accountability dilemmas, and is linked to reforms for all students. Recommendations are offered for action by the Office of Special Education Programs and state education agencies. Appendixes contain a participant list, an agenda, and a paper by Kenneth Olsen titled "Have We Made Progress in Fifteen Years of Evaluating the Effectiveness of Special Education Programs?" which contains 72 references. The Olsen paper identifies five strands of change that have implications for special education program evaluation such as the changes in emphasis from program improvement to accountability and from simple to complex conceptual models. This paper reports on the design, purpose, implementation, and outcomes of a policy forum on disproportionate representation of students from minority ethnic/racial groups in special education. The purpose of this policy forum was to develop an action agenda for implementation of two recommendations assigned a high priority by a group of stakeholders: (1) prereferral strategies should be an integral part of the educational process and should be made available to service providers prior to the initiation of a formal assessment, and training should be provided in this area; and (2) training should be provided in this area; and (2) training strengths and needs of an increasing heterogeneous student population, including training in the area of parent/professional collaboration, and family members from different ethnic/racial backgrounds should be used as resources. Two speakers offered remarks: Robert Solomon on prereferral strategies and Beth Harry on home-school collaboration. Forum participants then identified compelling reasons to implementation, and critical components of an implementation plan. Appendixes contain a participant

list, a list of background materials for the forum, as agenda, and tips for successful prereferral. (JDD)

*Psychologista, *School Psychologista, Student Evaluation
A survey was conducted of 56 clinical child psychologista, 93 school psychologista, 24 family physicians, and 24 pediatricians concerning assessment methods and interventions for use with children with attention deficit disorders (ADD). Survey results are compared with results of a 1986 survey by R. Rosenberg and S. Beck to assess changes over 6 years. Data on use of the following assessment methods, by each group, are cited: interviews with the child, teachers, and parents, specific behavioral assessments, standardized tests; drawing tests; rating scales; apperception tests; and neuropsychological tests. Six groups of interventions were also examined: medication, behavior therapy, modification of school environment, cognitive behavior intervention methods most commonly reported by all four groups were interviews and behavioral observations. School psychologists tended to modify the school environment and employ cognitive behavior therapy more frequently than did other groups. The survey also examined cach group's work settings, level of education, workshops or classes on ADD attended, and extent of ADD children in their workload. (JDD)

Descriptors—Disabilities, Educational Change, "Educational Philosophy, Elementary Secondary Education, Humanitarianism, "Humanization, "Inclusive Schools, Mainstreaming, "Politics of Education, Regular and Special Education American society has consistently pursued a political vision of humanitarian development—a vision of a free, open, and liberating pluralistic society. One of the crucial problems confronting society is how to provide an education for all children. The idea of including children and youth with significant disabilities in regular classrooms is a completely illogical way to improve the quality of learning. Inclusion would destroy the domain of special education, which has been developing analytical techniques and methodological skills designed to handle various disabilities over the last 45 years. Many parents probably do not want to compel their children to associate with students who have so much more capacity to learn. Inclusion of children with disabilities creates a contradictory environment for teachers who are expected to get their students to achieve at high levels. The quality of learning will decrease as public schools become a dumping ground for students with disabilities. Expensive reductions in class size will be necessary as children with disabilities are integrated. Recommendations are offered, focusing on convening state educational summita, expressing concerns to political leaders, generating professional development programs, and educating parents. Special educators are urged to ensure that only those students who need their specialized treatment are considered disabled and others are

returned to the regular classrooms. (Contains 20 references.) (JDD)

Identifiers—Canads, *Deaf Community
This discussion focuses on the growing trend in deaf education toward bilingualism/biculturalism, with special emphasis on schools for the deaf in Canada. American Sign Language and la Langua Signes Quebecois on the one hand and English and French on the other are used as examples of bilingualism. Biculturalism is seen in the deaf individual's participation in both deaf and hearing cultures around the world. Theoretical assumptions of monolingual/monocultural approaches are contrasted to those of bilingual/bicultural education. Trends at specific schools in Canada, the United States, and Sweden are examined. An evolving paradigm which sees English as a second, rather than first, language for people with deafness is noted, as are trends toward increased community support for deaf bilingual/bicultural education and for general bilingualism. Trends in research are also identified,

including new insights into how deaf children read and a paradigm shift which views deafness as a difference rather than a deficiency. Theoretical aspects of bilingualism are reviewed and a new model of deaf education is formulated. Specific implications of this model are drawn for families and for universities. An appendix summarizes course requirements in 33 programs for preparing teachers of individuals with deafness in the United States and Canada. (Contains 47 references.) (DB)

This 2-year study examined how assistive technologies are used in educational programs for children who have significant multiple disabilities. Naturalistic inquiry incorporated qualitative collection procedures including observations, videotapes of children, and questionnaires and interviews with teachers and parents. Three groups of children were studied. The children had used technology applications in early intervention programs or received technology assessments and follow up as part of related projects. Case studies were developed on 14 children who had from 2 to 10 years experience with assistive technology when the study began. Findings indicated that assistive technology has positive effects on children's development even when they have significant disabilities and their technology experiences are inconsistent. Generally, children were able to use technology use. Additionally, parents and service providers perceived that using assistive technology are noted, including problems of funding, personnel training, and collaboration among staff and between staff and families. Appendices include site descriptions and questionnaires. (Contains 68 references.)

Teacher Effectiveness lentifiers—Family Needs, *Minnesota This newsletter focuses on what works in inclusive

education. A major article is "Inclusive Education: Needs of Minnesota Families-Major Findings from a Together We're Better! Study." This article presents findings of a statewide survey of families of children with disabilities. Findings are categorized within four areas: (1) educational placement; (2) parent satisfaction; (3) inclusion of students in general education; and (4) parent support teams. Other articles include: "Inclusive Education: Nathan's Story" (Jean Trainor); "Inclusive Communities Support Effective Conflict Resolution" (Jo Montie and Terri Vandercook); "A Problem Solving Process" (Gary Hoganson and Laura Medwetz); "Together We're Better: Resources for Inclusive School Communities" (Laura Medwetz and Mary McDevitt); "What Makes Educators Effective Facilitators of Inclusion?" (Jennifer York and others); "Why Educators Support Self-Determination for Students with Disabilities"; and "The Perfect Pumpkin: A True Story" (Chuck Palmer). Columns present ideas for classroom practices, list resources for educators and families, and list events concerned with integration. (DB)

This paper documents an approach to meeting the

Iconic Representation, "Occupational Safety and Health Act 1970
This paper documents an approach to meeting the training requirements of the Occupational Safety and Health Act (OSHA) and the "reasonable accommodation" requirements of the Americans with Disabilities Act (ADA) for individuals with developmental disabilities. It describes a training program used with three adult workers with mild mental retardation which utilized icons to teach recognition of: (1) protective equipment; (2) hazards; (3) emergency response equipment; (4) the National Fire Protection Association labeling system; (5) target organs (dangers with acute or chronic effects on specific body organs); and (6) routes of entry (such as ingestation or inhalation). Subjects were given four weekly training sessions. Significant differences were found between baseline and post training scores with substantial maintenance on retesting 2 months after the training. Results have implications for training which increases employment opportunities for people with developmental disabilities. (Contains 14 references.) (DB)

This newsletter theme issue outlines the intentions, concepts, and structures of the Americans with Disabilities Act (ADA) as it relates to employment. The article simplifies the provisions of Title I into the following statement: "If, despite my disability and despite some cost to be borne by my employer; Lean perform the basic functions of the job I have or want, my disability is an unlawful reason for my employer to deny it to me or treat me differently from other, nondisabled employees." The particular provisions of the law are then outlined, including effective dates, covered employers, protected individuals, covered employers, protected individuals, overed physical or mental impairments, when protections apply, essential functions of a job, reasonable accommodation, exclusion for illegal use of drugs, prohibited conduct, pre-employment inquiries and medical exams, qualification standards, and enforcement and penalties. *Language Acquisition, *Language Impairments,
Limited English Speaking, Low Income Groups,
Mainstreaming, *Multicultural Education, Preschool Education, *Thinking Skills
This practicum project exposed seven preschool
students with language deficiencies to multicultural
experiences and strategies, resulting in improvements in both language and thinking skills. The children were included in a regular preschool program
serving low-income families. The program was
based on a multicultural awareness curriculum
which utilized such teaching strategies as role playing, parental involvement, storytelling, puppet play,
cooking, show and tell, and arts and crafts. Language enhancement activities included group size
variations, field trips, microphone and tape recorder
use, interactive communications, story drawing,
picture and story captioning, multicultural literasture, and use of big books as part of whole language
activities. Vocabulary was introduced through cocrete objects, stories, books, games, songs, and activities. This practicum report presents numerous
ideas for multicultural learning activities, using the
culture of different geographic area as the theme
of each week's activities; areas include Ireland, Africa, Haiti, Jamsica, Dominican Republic, Colombia, Vietnam, Pakistan, Italy, and the United States.

A bibliography of 37 items and a discography of 13
items are included. Appendices provide a home language survey, teacher observatio

EC 303 633 ED 378 736

room teacher and the transition student. The practicum involved the development of a transition procedure as part of the student's individualized education plan, a written communication flowchart, teacher responsibilities (regular classroom and resource room), modified resource room schedule, student profile, possible regular classroom modifications, daily and weekly assessment, and inclusion of regular classroom teachers at special education meetings. Analysis of the data revealed that successful transitioning occurred following the practicum implementation. Student improvement occurred in the completion of regular classroom assignments and homework assignments, positive classroom behavior, and passing grades. Appendices contain copies of questionnaires and other practicum project materials. (Contains 22 references.) (JDD)

Rehabilitation
Identifiers—*Psychistric Rehabilitation
Traditional cure-then-place approaches to vocational rehabilitation of individuals with psychiatric
disabilities have had little success. An approach
known as psychiatric rehabilitation, advanced by
William Antony, emphasizes occupational and independent living adjustments and has a relative lack
of emphasis on a psychiatric cure. Such approaches
have enjoyed greater success by focusing on the
promotion of adaptive behaviors in role-related environments. In the planning phase of this approach,
the rehabilitation counselor and consumer identify
roles the consumer wishes to function within, then

determine the critical skills necessary for success, and locate resources that can be used to promote success in the environments specific to the selected roles. A case example shows the steps involved in assessment and planning, and interventions designed to promote two critical skills are illustrated. The key to success is specificity of skill identification in terms of location, frequency, and duration.

tervention, Neonates, Neurology, "Prenatal Influences
Identifiers—"Fetal Drug Exposure
The behavior of the infant with prenatal drug exposure (PDE) is different from a nonexposed infant, and it is a difference that changes the rules of interaction for the caregiver. Infants exposed to opiates such as heroin or methadone demonstrate very specific signs of neurobehavioral dysfunction as they go through classic withdrawal symptoms. Infants exposed to cocaine exhibit somewhat more subtle behavioral dysfunction, but many of the same symptoms are present. Infants with PDE have poor self-regulatory abilities and are either crying or sleeping. Motoric differences are evident in tone and movement. Autonomically, infants with PDE frequently have penisisent tremors, starties, moderate tachypnes, and other signs. All of these signs of neurobehavioral dysfunction range from severe to moderate and often are still present throughout the first months of life. Reduction of stimuli is the key, as infants' dysfunctional behavior is the manifestation of overstimulation. Caregiving techniques include protection from light and noise, swaddling, gentle vertical rocking, soft quiet voice, quiet feedings, and careful phasing in of visual and auditory stimuli. Identifiers—"New York City Board of Education
The Special Education Professional In Training
(SEPIT) program is a tuition assistance program
designed to alleviate critical shortages of special education teachers and clinicians in New York City
Public Schools. It gives individuals the opportunity
to pursue post-baccalaureate study and obtain
placement in bilingual and monolingual special education teaching and evaluation. The New York City
Board of Education pays for each participant to obtain a maximum of 12 college credits in special education to qualify for a certificate as a Preparatory
Provisional Substitute Teacher. In exchange for tuition assistance, each participant must sign a contract that indicates that he/she will provide a
minimum of 1 year of service in a special education
setting. This evaluation of the program found it to
be successful in placing teachers in special schools.
Of 46 respondents to a questionnaire, 45 had completed the program and worked in the New York
City Public Schools. Overall, the participants rated
the program highly. However, they asked that the
Board of Education be more helpful and flexible
with their job placement, be more prompt in paying
their college tuition to avoid their receiving late
fees, and be more efficient in processing paperwork.

Descriptors—Advisory Committees, Conferences, *Disabilities, Educational Planning, Elementary Secondary Education, Meetings, Professional Development, Program Effectiveness, Program Evaluation, *Special Education Teachers, *Staff Development, "State Aid, Teamwork, Training Allowances, Workshops Identifiers—New York City Board of Education This evaluation of the State Incentive Grant (SIG) training program in 1993-94 compared five schools in the city of New York with relatively high involvement in SIG training and good planning with five schools reported to have low SIG involvement and poor planning. The evaluation also included a sampling of workshops at the District 75 annual conference and an assessment of Central Consultation Committee (CCC) meetings. Interview with douctors found that the highly involved schools were more aware of the role and function of the school-based advisory committees (SBACs), their SBACs had adopted more strategies to inform staff about SIG options, the SBACs more actively sought input from staff regarding their professional interests, and their administrators participated more at SBAC meetings and encouraged SBAC initiatives. The District 75 annual conference attracted more educators than the previous year, and most workshops were well received by participants. The CCC appeared to be committed to developing strategies to maximize staff participation in SIG

Descriptors—Attitude Change, "Blindness, "Consciousness Raising, "Experiential Learning, "Misconceptions, Safety, Simulated Environment, "Simulation, Training Methods Identifiers—"Attitudes toward Disabled Many educators in facilitative roles have approached the subject of visual disabilities by constructing activities designed to simulate blindness, using a blindfold or similar device. Participants are subsequently encouraged to perform rudimentary tasks such as eating a meal or moving about with a sighted companion as a guide. Prequently, individuals will emerge from experiences where they have worn a visual occluder with the impression that they have, in essence, experienced what it is like to be blind. Serious misconceptions may be created as the result, due to the potential for creation of false impressions, and the issue of safety while moving about the environment when occluded and without proper training. Simulation participants have had no instruction in the skills of blindness, such as cane travel, and thus their lasting impression is that being blind is hard and there is not much that can be done. Safety issues arise in situations involving stairways, overhanging objects, or narrow passageways. A more favorable approach would be to invite positive community role models who are blind or parents of a child with blindness to the classroom and create an exchange among those in the class and the guest. This document focuses on employer/employment services in vocational rehabilitation (VR) programs. Vocational rehabilitation is undergoing transformation in employment services to respond to redefined priorities, diverse populations, changing labor markets, state-of-the-art technologies, legislative mandates, and economic factors. Changes in employment trends have necessitated new approaches to placement of individuals with disabilities. The themes woven throughout the chapters of this document include: transformation from business as usual, focus on employment outcomes rather than process, emphasis on vocational customers-individuals with disabilities and employers, consumer astisfaction versus compliance, and challenges for long-term commitment from leaders. (1) the need for long-term commitment from leaders in the state/federal program; (2) the need for

VR emphasis on employment outcomes in terms of the 1992 amendments to the Rehabilitation Act of 1973 and the Americans with Disabilities Act; (3) employer perceptions of VR based on employer surveys; (4) VR limitations in placement; (5) VR assets in placement; (6) a new paradigm for serving clients and employers; (7) what VR must do to provide appropriate services leading to employment of people with disabilities; and (8) methods for using this document. Appendices list employer concerns, list services provided to employers by VR agencies, and provide survey and recordkeeping forms. (Contains 26 references.) (JDD)

Project COED (Career Opportunities through

ary Education, Transitional Programs, Vocational Evaluation
Project COED (Career Opportunities through Education for Persons with Disabilities) was developed to: (1) provide career instruction for adults who are functionally mentally retarded, through job training opportunities in food services, clerical/office work, or housekeeping/jaintorial work; (2) increase levels of clients' financial independence; (3) provide assistance and outreach to minorities and women who are mentally retarded; and (4) provide abridge from career instruction to internship placement in a job that fits the goals and needs of both employee and employer. Project COED is a model that matches the job training with the desires and expectations of employers. It offers classroom instruction (16 weeks), an 8-week paid internship as a bridge between the classroom and the world of work, and advocacy support for long-term career development. Project COED's strengths are the identification of the key knowledge, skills, and competencies expected by employers and transition of clients into the world of work with a look toward a short-term job. This handbook addresses: marketing, selection, curriculum, assessment, transition, personnel, facilities, and evaluation. Numerous exhibits are provided, including recordkeeping forma, a work interest inventory, lists of curriculum goals, and skills assessment forms. (JDD)

ondary Education, "State Programs, "Transi-tional Programs Identifiers—Colorado, Minnesota, National Transi-tion Network, Nebraska, Virginia This document brings together descriptions of ed-ucation-to-work transition services for individuals with disabilities, as presented at a 1994 conference. The document begins with a discussion of the Na-tional Transition Network, focusing on its historical background and state-level technical assistance. "Transition from School to Adult Life for Students with Disabilities: A Guide for Educators in Ne-brasks Public Schools" (Barbara Schliesser and oth-

era) clarifies work guidelines, presents transition services indicators, and reviews the specification of transition services in Individualized Education Programs. Sharon dePar then describes Virginia's UNITE (Unified Intercommunity & Transition Empowerment) for Youth with Disabilities in a paper titled "A Planning Aid To Integrate Transition into IEPs Using Strategic Questioning." Minnesota's Transition Systems Improvement initiative is the described in a compilation of materials presented by Stephanie Corby and Sandra Thompson, which include forms for a transition planning folder, a reprint of an article titled "Promoting Post-Secondary Education for High School-Aged Youth with Disabilities: A Model of Empowerment," by Robert J. Miller and others, and a list of resources for transition planning. Susam McAlonan outlines the Colorado Systems Change Transition Project, describing transition planning, parent involvement, curriculum, school/community coordination, and transition outcome indicators. ties, *Mild Mental Retardation, Resource Room Programs, Social Development, *Student Placement Identifiers—Social Emotional Dimension Scale This study examined behavioral differences among junior high students enrolled in three special education programs, using the Social-Emotional Dimension Scale (SEDS). The focus of the study was on examining the relationship among measured intelligence, type of placement, and behavior. Subjects were 59 students with learning disabilities or mild mental retardation. Itinerant program students (n=20) received special education services less than 24 percent of the school day, Resource Room Students (n=20) received special education from 25 to 50 percent of the school day, and the Part-Time group (n=19) received such services 51 to 85 percent of the school day. There was a directional trend among the three groups in IQ, with a mean IQ of 99 for Itinerant students, 89 for Resource Room students, and 81 for Part-time students. Overall performance on the SEDS was not found to be significantly related to intelligence. Although there were no significant differences between the Itinerant and Resource Room groups on the SEDS, the Part-Time group was found to be significantly different on several behavioral dimensions and overall performance on the SEDS. Implications of these findings for programming needs are addressed. (Contains 18 references.) (IDD)

This document is a report of the Early Childhood
Intervention Programs (ECIPs) in Saskatchewan
(Canada), covering 1984 to 1990. The report describes: the ECIP approach to early intervention;
the children who are enrolled in the ECIP; children's levels of development when entering and
leaving the ECIP; changes in rates of development
while in intervention; and conclusions and implications. Disabilities included developmental delay,
apeech and language delay, cerebral palsy and other

neuromotor disorders, Down syndrome, and at risk due to environmental factors. The ECIPs provide home-based intervention using a developmental plan with parents and children. Over the intervention period, children in most categories showed a pattern of initial marked positive change in rate of development, with a gradual tapering off. The less disabled children tended to move on to other programs while the more seriously disabled remained for 30 or more months of intervention with the ECIPs. Positive changes in rates of development were seen for all but one group of children (the Down Syndrome children). Appendices contain a reprint of a paper by Mark Wolery titled "Proportional Change Index: An Alternative for Comparing Child Change Data" as well as 28 figures and 27 tables showing developmental data about the 788 children in the study. Mainstreaming, School Districts, School Policy, School Responsibility, *State Departments of Education, State Government, Student Rights Children with attention deficit hyperactivity disorder (ADHD) are provided for under three federal statutes: the Individuals with Disabilities Education Act (IDEA), Part B; Section 504 of the Rehabilities Act of 1973; and the Americans with Disabilities Act of 1970; State education agencies have ultimate responsibility for providing a free appropriate education for students with this disability by providing services directly, by contracting for services, or by delegating responsibility to local education agencies. To meet legal requirements, schools must identify and provide services for eligible children, educate children with ADHD along with non-disabled children to the extent possible, eliminate practices and policies that allow disabled children to be suspended or expelled for more than 10 days for behavior associated with their disability, and follow procedural safeguards outlined in IDEA. Because state education agencies are responsible for school oversight, a state's education policymakers have a clear mandate to formulate policy and develop a state plan for educating disabled students. To prevent school failure for children with ADHD and unnecessary lawsuits, they must be sure the policy and plan are known and implemented in the state's schools. Questions that policymakers need to ask about providing services to students with ADHD are listed. Efforts in Kentucky, Tennessee, Virginia, and West Virginia to train regular education teachers to educate children with ADHD are described. (Contains 15 references.) (JDD)

Self Evaluation (Individuals), Student Motivation

This career planning guide is intended for precollege students with disabilities who desire careers or preparing for them. The first section summarizes the
advantages of a career in these fields, such as earning a good salary and contributing to society. The
second section belps students evaluate themselves

through considering what interests them, who they
admire, what they read, and what they do for fun.

Next, suggestions are offered for seizing opportunities toward the students's career goals, including
finding out about summer programs, joining a
school club, and finding a mentor. The following
section saks students to evaluate whether they have
the personal qualities, such as determination and
self esteem, to be a successful scientist. Keys to
success identified by scientists include asking for
help when needed, asking toro

Project

Project The Bridging Early Services Transition (BEST) Project-Outreach was designed to help families, administrators, and service providers facilitate the transition of young children, birth through age 5, as they move between services and service systems including: from early intervention to special preschool services; from Head Start or preschool to kindergarten-level programs; and from more restrictive special programs to less restrictive centers which serve all similar aged children in the community. Planning for these transitions as part of each family's Individualized Family Service Plan is required under federal law. The BEST model includes formats for: (1) local interagency needs assessments; (2) interagency agreements; (3) communication between families and service providers; (4)

family partnership in decision-making; (5) constructing interagency and intra-agency transition timelines; (6) building a transition timeline for each child; (7) identifying local agencies for referral; (8) preparing the child for changes in programs and personnel; (9) systems change to incorporate more options for inclusive services; and (10) evaluation of transition procedures. The project worked with state leaders and local service systems in 17 states to develop state and local transition services. Sections of this final report address goals and objectives, the project's conceptual framework, a description of outreach activities, problems encountered, evaluation findings, project impact, and future activities. Appendices include a project brochure, staffing information, and evaluation data. (Contains 89 references.) (DB)

This report describes activities of the Integrated Outreach Project, which provided workshops and follow-up technical assistance to 248 early intervention personnel in rural areas of Utah, Idaho, Arizona, and Wyoming, Over the 3-year period, the project directly benefitted 1,183 children with disabilities and 810 typically developing peers. A training cycle of entry, contracting, action-taking, and ongoing evaluation was developed, implemented, and found to be effective and efficient in producing improved practices. Forty-five introductory and on-site workshops were given and evaluated as good or excellent by the participants. The primary focus of these workshops were given and evaluated as good or excellent by the participants. The primary focus of teachers while the secondary focus was to promote developmentally appropriate educational practices emphasizing naturalistic instruction in inclusive settings. Project staff assisted local education agencies and programs in developed and disseminated. Graduate courses in least restrictive environment and naturalistic instruction were coordinated with Utah State University. Train the trainer workshops were also provided in Utah and Idaho. A Collaborative Consultation Manual was developed and disseminated. Appendices include data on participant evaluation of workshops, program effect

This informational digest considers assistive technology for students with mild disabilities in the context of Public Law 100-407, the Technology-Related Assistance for Individuals with Disabilities Act of 1988 which was designed to enhance the availability and quality of assistive technology devices and services to people with disabilities and their families. First, assistive technology devices are briefly described. Then seven areas in which assistive technology can assist students with mild disabilities are explained with examples. These are: (1) organization, (2) note taking, cents with must dissources are expanient with examples. These are: (1) organization, (2) note taking, (3) writing assistance, (4) productivity, (5) access to reference materials, (6) cognitive assistance, and (7) materials modification. Contains three references and three suggested resources, and includes electronic resources. (DB)

This report is the fourth in a series of follow-up analyses of nine longitudinal studies addressing the costs and effectiveness of alternative types of early intervention for children with disabilities. An introduction provides an historical perspective and conceptual framework for the studies, including common study elements and how research sites were selected. Focus of the studies has been on effects of variation in program components. A summary is provided for each study consisting of, first, information about the alternative forms of intervention being examined, and, second, a graphic summary of the outcomes for the various measures of child and family functioning. The bulk of the report consists of individual site reports in which each include a rationale, methodology, results and discussion, and conclusions. The individual studies are: (1) the New Orleans Visual Impairment Study (which varied the intensity of family involvement); (2) the SMA/LakeMcHenry Intensity Study (which varied the frequency of intervention services); (3) the Arkansa Intensity Study (which varied the frequency of a center-based intervention and the adult/child ratio); (5) the Sait Lake City Medically Fragile Study (which varied the age at which sensorimotor intervention was begun); (6) the Charleston, South Carolins Medically Fragile Study (which varied the intensity of intervention; (7) the Columbus Medically Fragile Study (which varied the intensity of intervention); (8) the Des Moines Public Schools Study (which compared center-based interventions with and without a parent education component); and (9) the Utah Parent lavolvement Study (1986) (which also compared center-based interventions with and without a parent education component). Writing Skills
Students with disabilities often experience particular difficulties with handwriting, and these problems can hinder their development both in school and in postsecondary settings. This paper addresses three issues: (1) the possibility of a prejudicial and potentially lasting first impression, based on the individual's handwriting; (2) the lack of corrective handwriting instruction after the elementary grades; and (3) the variety of methods available to improve a student's handwriting. These issues are discussed in the context of the following topics: handwriting problems, the importance of writing, the absence of instructional considerations such as print versus cursive skills acquisition and skills maintenance. The importance of an ongoing and consistent program of handwriting instruction is stressed, especially for students with disabilities who need to fight negative first impressions. Identifiers-*Behavior Managen

This manual is intended to help educators and families address students behavioral problems so that students with emotional and behavioral difficulties can be included in regular education. Chapthat students with emotional and behavioral diffi-culties can be included in regular education. Chap-ter I is an introduction and uses signettes to identify supports that students, educators, and families say they need. Chapter 2 offers case studies on how to devise a support plan for students with challenging behavior. A team approach is emphasized. The third chapter focuses on establishing the collaborative team. It provides checklists for educators and fami-lies, identifies who should be on the team, and con-siders how such teams make decisions and solve problems. Chapter 4 considers the importance of getting to know the student and understanding the problem behavior's functions. The fifth chapter of-fers suggestions for identifying student supporting each other and the effects of various teaching styles. The selection and teaching of replacement behaviors are discussed in the sixth chapter. Chapter 7 looks at the importance of appropriately responding to challeng-ing behaviors, noting the effects of emotion, school discipline policies, and the need to neutralize a tense situation and refocus students. The final chapter fo-cuses on specific ways to include students with chal-lenging behavior in regular class activities, monitor progress, and plan transitions. Attached is a list of 84 recommended resources. (Contains 18 end-notes.) (DB)

Evaluation, Substance Abuse
Identifiers—"Fetal Drug Exposure
This guide was developed to provide effective and practical strategies to meet the needs of prenatally substance-exposed children in preschool or day care settings. Techniques are based on good child development practices and are equally effective for both teachers and parents. The first chapter outlines information about prenatal substance exposure, such as the effects of different drugs on the fetus and the resulting behaviors and learning characteristics. The second chapter presents teaching strategies, including protective factors involving daily routines, transitions, and rules; facilitative factors such as relationships, peer sensitivity, and decision making; and strategies for play, communication development, and home-school partnerships. Characteristics of an exemplary child development program are then described in chapter 3. Practical guidelines are offered for dealing with parents with chemical dependency in chapter 4. The final chapter focuses on assessment and offers a preschool assessment protocol consisting of a parent interview and developmental history, administration of developmental screening tests and instruments, play observation, and behavioral observations. An appendix lists organizational resources, training resources, written resources, vincotapes, audiotapes, free reference materials, newsletters, and other resources; unother appendix defines terms. (Each chapter contains references.) (JDD)

This report updates an earlier study on educational placements of children with mental retardation, comparing data from the 1989-90 school year with the 1990-91 school year. The data indicate that regular class placements increased from 6.7 percent to 7.4 percent from 1989-90 to 1990-91. Resource room placements increased from 20.1 to 23 percent, while separate class placements decreased from 61.1 to 58.3 percent. Separate achool placements decreased from 10.3 to 9.8 percent and residential facility placements decreased sightly from 1.4 to 1.1 percent. Tables indicate the percentage of studential separate class placements decreased gistly from 1.4 to 1.1 percent. Tables indicate the percentage of studential separate class promatic separate class promatic promatic separate class placements decreased gistly from 1.4 to 1.1 percent. Tables indicate the percentage of studential separate popular separate promatic popular promatic popular percentage of studential percentage of stude decreased from 10.3 to 9.8 percent and residential facility placements decreased slightly from 1.4 to 1.1 percent. Tables indicate the percentage of students placed in regular classrooms, resource rooms, separate classes, and separate schools, for the U.S. and for individual states, for both the study years. Another table uses a formula for weighting different placements to compare states on the inclusiveness of their educational settings. The data indicate that for 1990-91: (1) Vermont, Wyoming, Idaho, Montana, and Minnesota had the highest inclusion scores; (2) New Jersey, New York, the District of Columbia, Illinois, Maryland, and Florida had the lowest inclusion scores; and (3) nine states placed fewer than one percent of students with mental retardation in regular classes. The report urges governments, advocacy organizations, and educators to continue efforts to achieve the inclusion of children with mental retardation by the year 2000. (JDD)

This paper presents a historical background and definition of Tourette Syndrome (TS), a review of the literature, and a view of the TS person as stigmarized in society. Social processes are examined through the eyes of the TS individual, and the impact of education on the TS person is examined. TS is viewed as the presence of motor or vocal tics, with the associated features of attention deficit (hyperactivity) disorder, learning disorders, sleep disorders, aggressive behaviors, mood disorders, self-injurious behavior, anxieties and phobias, obsessions and compulsions, and sensory integration problems. The literature review addresses the focus of existing research, diagnostic confusion, treatment, education, families, and social problems. Social stigma is discussed within the framework of Symbolic Interactionist theory, exploring the problem of acceptance, reatment, invasion of the private self and self development, the parental role, the educational setting, and life chances. Researchers are urged to address social issues in their research of TS; education of physicians and educators is recommended; and parents are encouraged to become advocates for their children. Appendixes list examples of motor and vocal tics, chasorom strategies, causes of school problems, and phases of learning. (Contains 62 references.) (JDD)

The Individuals with Disabilities Education. Act calls for students to be placed in the least restrictive environment, which is presumed by some educators to be the regular classroom. The drawbacks of separate programs are not felt to be offset by clear benefits. Grouping children with like disabilities can be counterproductive; for example, grouping children with two disabilities together results in poor role modeling for language. Education reformers emphasize that learning environments should be changed to allow these children to succeed. Some educators feel that inclusion belaters disabilities of the caperts argue that special education provides help that is significantly different from general education. In addition, "full inclusion" means different things to different people; some educators want a continuum of placements, some educators want a continuum of placements,

RIE JUN 1995

while others want a continuum of supports. Some educators are concerned about disabled children's need for specialized attention and life skills instruction. Regular teachers may not receive enough support to cope with diverse students. Suggestions for becoming more inclusive are offered to schools. Also included is a section, "Inclusion and the Disruptive Child." (JDD)

This guidebook was developed for early childhood administrators and consultants who provide services to support the integration of children with disabilities into preschool classrooms. It provides practical information on finding and hiring the best consultants, unraveling the special education and third-party payor resources that support specialist services, developing strategies that will ensure mutual understanding and respect, and instituting procedures that promote staff-consultant semwork. Chapter 1 discusses the types of consultants who are available, their qualifications, and how to find them. Chapter 2 addresses funding options for consultant services, summarizing key legislation and describing programs that provide funding such as Medicaid, Head Start, and private insurance. Chapter 3 provides information on important elements to consider when designing a contract for a consultant or an outside agency and includes sample contracts. Chapter 4 examines the responsibility of the administrator and the consultant in supporting and understanding each other in order to forge a positive and productive working relationship. Appendices list Resource Access Projects and University Affiliated Programs. (Each chapter contains references.) (JDD)

This document presents summaries of state and federal special education court cases from approximately 1980 through 1992 and the federal regulations for Part B of the Individuals with Disabilities Education Act (IDEA) as amended through March 1993. Cases are grouped by issue addressed and include a citation and a one-paragraph summary of the decision. The following seven major topics are covered (with sample subtopics in parentheses): (1) qualification for services (residency, age, and qualification under IDEA); (2) due process procedures (Individualized Education Program development and review, notification and consent requirements, and judicial review); (3) student placement (appropriate placement/services, length of day and year, least restrictive eavironment); (4) related services (psychiatric services and psychotherapy, nursing care, and transportation); (5) disciplining students with disabilities (corporal punishment, suspension, and disciplinary program incorporated into the Individualized Education Program); (6) relief under IDEA (reimburnement for private services, attorney fees, and compensatory education); and (7) financial issues (equal protection, state funding, and state immunity). Additional sections summarize cases specific to preschool, higher education, and employment. A table lists cases alphabetically. The IDEA Part B regulations are presented in the order of the law's various sections. (DB)

Identifiers—*Doe v Plyler, Supreme Court

This study attempted to identify critical issues in the provision of special education services to children of undocumented immigrants in the context of the 1982 Supreme Court decision, Plyler versus

Doe, which affirmed the state's obligation to educate these children. The study developed a questionnaire which was sent to eight states having large numbers of undocumented immigrants. Arizona, California, Florida, Illinois, New Jersey, New Mexico, New York, and Texas. Findings are reported in the following areas: (1) state policies, guidelines, or directives (aix states indicated they have no written policies or directives regarding undocumented students with disabilities); (2) offices/departments in the state education agency that address needs (no states have offices specifically designated to address the needs of this population); (3) challenges and concerns (e.g., limited English proficiency and high mobility of this population); (4) interagency support (in some states such support fiors service agencies); (5) educational needs specific to this population (mostly secondary to parents' fear of being identified as undocumented); (6) service delivery strategies (generally those serving a culturally and inguisiteally diverse student population); and (7) costs (no data were available). The questionnaire is

appended. (Contains 11 references.) (DB)

Identifiers—"Special Education Directors
This report summarizes the results of an issue validation activity regarding the provision of special
education programs and services to students with
disabilities in rural areas. Eight state directors of
special education served on a communication panel
to provide feedback on identified rural issues. They
represented the states of Maryland, West Virginia,
Texas, South Dakota, Maine, Utah, and New Mexico. The first section of this report characterizes
rural America, with a discussion of definition, defining features, nature of the economy, employment
and per capita income, and poverty. The next section identifies the population and characteristics of
students with disabilities residing in rural areas. Section 3 describes the project's process in forming the non identifies the populsion and characteristics of students with disabilities residing in rural areas. Sec-tion 3 describes the project's process in forming the questions and obtaining feedback on rural special education issues identified through a literature re-view. State directors agreed that the most prevalent issues for this population included the following: (1) recruitment and retention of personnel; (2) trans-portation; (3) language minority and limited English proficient students; (4) low incomes and poverty; (5) geographic isolation; (6) declining economies including high rates of unemployment; (7) financial burden of unfunded or underfunded state and fed-eral mandates; (8) competing priorities; (9) poor fis-cal management; and (10) parent involvement. Additional financial support was the most common recommendation of state directors. (Contains 28 references.) (DB) references.) (DB)

This synthesis paper examines the use of mediation to improve parent-school district communication and resolve disagreements in special education. It focuses on the development and implementation of mediation as a viable alternative to the formal hearing process under the Individuals with Disabilities Education Act (IDEA). After an introduction, the first section describes state mediation models in five states: Connecticut, Massachusetts, New Jersey, New Hampshire, and Pennsylvania. The next section examines the role of the mediator and training for that role. The third section presents 1993 data on mediation usage in the five states studied and related issues, including the outcomes of mediation and the effect of attorney fee reimbursement. Mediations held in these states varied from 17 in New Hampshire to 768 in Massachusetts. The paer's concluding section notes such ongoing issues as the growing cost to states in maintaining the mediation service and the excessive litigiousness that sometimes characterizes the process. Recommendations include reviewing all aspects of special education due process as part of the pending resuthorization of IDEA. (Contains 17 references.)

This document reports on the design, purpose, implementation, and outcomes of an October 1994
policy forum on the impact of the Goals 2000 pro-gram on students with disabilities. Conclusions and recommendations of the forum identified 31 critical gram on students with disabilities. Conclusions and recommendations of the forum identified 31 critical activities grouped into six major strategies to ensure the inclusion of students with disabilities in Goals 2000 initiatives. These strategies are: (1) define and implement accountability; (2) improve teaching and learning; (3) use Goals 2000 as the umbrella for reform; (4) build local trust, involvement, and commitment; (5) build leadership; and (6) offer unified, integrated technical assistance. In addition, 17 barriers were identified and grouped into the following key obstacles: a rigid, traditional special education paradigm; fear and mistrust among stakeholders; unresolved tension between excellence and equity; pervasive public distrust/discounting of public education; legacy of fragmented, additive reform efforts; complacency/caution about need for change; and disconnected, outdated personnel systems. The group also related identified issues to existing and future projects of the Office of Special Education Programs (OSEP). Appendices include a list of participantic participants, the forum agenda, abstracts of participating OSEP-funded projects, and draft guidance for Goals 2000 comprehensive plan review. (DB)

ties, Therapeutic Environment Identifiers—*Childrens Villages

This paper summarizes a project which assessed and evaluated three alternative master planning alternatives and a final master plan for Children's Village, a residential center for children with severe emotional disturbances in Detroit, Michigan. The paper first presents an assessment of the current facilities and program of the center and then reviews current trends and future directions in residential care. The Village currently provides comprehensive residential treatment for 60 children, ages 5 to 15. It also provides a foster care program, an adoption services program, a single parent and pregnancy counseling program, and a day treatment program. Focus groups and interviews involving 48 residential staff and 10 children were conducted preliminary to developing three alternative master plans. A Master Plan combining features of the three alternatives is recommended. This final plan would include renovating and expanding some of the existing cottages, building some new cottages, developing a new Community Activities Center, retaining and expanding the school on campus, and building a pew office/activity center. Attached material includes photographs, floor plans, and site plans for the three alternatives. (Contains 21 references.) (DB)

The Iowa Behavioral Initiative is a staff development venture designed to help educators with the increasingly complex student behaviors which seem to defy former standards of intervention. Participation in the Initiative activities provides general and special educators with practical, validated strategies for dealing with student behavior problems. This booklet examines what is known about challenging behaviors and discusses issues and onecerns in serving students with behavioral problems. An educational philosophy is presented, emphasizing lows's commitment to ensuring the social, emotional, and behavioral preparedness of all students. Beliefs supporting this philosophy are outlined, such as achieving student discipline through instruction rather than coercion, focusing on prevention and early intervention, and viewing the child as part of a family with complex needs and strengths. Attitudes, skills, and systems most likely to lead to student behavioral reams Academy, (2) the Statewide Behavioral Disorders Network, (3) the Interagency Cadre, (4) demonstration sites, and (5) information dissemination. Identifiers—"Peabody Reintegration Project,
"Transenvironmental Programming, Vanderbilt
University TN
The debate about whether special education
should abolish or conserve its cascade of services
model has produced conservationists, who believe
in a case-by-case approach to integration by which
movement into less restrictive settings is planned,
implemented, and evaluated individually, and abolitionists, who work for full inclusion of all students
with disabilities into regular classrooms. Because
case-by-case reintegration embodies the individualization principle and is supported by federal law, its
is the approach used by the Peabody Reintegration
Project at Vanderbilt University (Tennessee). This
project uses curriculum-based measurement and
ransenvironmental programming to boost students'
achievement levels in reading and math to a point
commensurate with mainstream expectations. The
reintegration process then begins, involving: recruiting the players, identifying the competition, scouting with a classroom inventory, developing the
game plan, executing the game plan in special education, deciding to reintegration students and provide the individualization necessary for continued
academic growth. Annotations for three bibliographic resources are appended. (Contains approximately 80 references.) (JDD)

Using a system that monitors just the process of education does not guarantee positive student outcomes. What education needs is a consistent set of accountability procedures for all students. As educations take steps toward a new and inclusive accountability system, they need to look at: (1) possible alternative approaches to accountability; (2) data needed to demonstrate that education is working for students with disabilities; and (3) barriers to the collection of these data and ways to overcome these barriers. Alternative approaches to accountability may include: focus on results or outcomes, collect information on achievement of Individualized Education Program objectives, analyze extant data, use norm-referenced tests, and create accreditation programs. Data needed include input, process, and outcome data. Barriers to collecting data include, among others, competing stiffuely openent, involving stakeholders, mandating collection of accountability data, and other activities. (JDD)

The "Goals 2000: Educate America Act" emphasizes including all students in education reform considerations and expects all students to achieve world-class educational standards and learn challenging content to a high level of performance. The Act also establishes voluntary opportunity-to-learn (OTL) standards. OTL standards are defined as the criteria for, and the basis of, assessing the sufficiency or quality of the resources, practices, and conditions necessary to provide all students with the opportunity to learn material in national or state content standards. Different perspectives view OTL standards as equivalent to school delivery standards, as part of systemic reform, as input conditions, and as a time variable. Issues surrounding OTL standards include: (1) how to define OTL standards, (2) how to measure OTL standards, (3) minimum standards and "dumbing down," (4) when OTL standards include: (1) how to define OTL standards include: (1) how to define OTL standards includes: (1) how to define OTL standar

considered in addition to the quantitative nature of instruction. Five recommendations are offered.

Education Relationship, Team Teaching, "Teamwork

Identifiers—"Teacher Collaboration

This book discusses collaboration as it occurs in all of its varying contexts in schools, such as consultation between special education among classroom teachers, collaboration among classroom teachers, collaboration between university faculty in special and general education, and collaboration between institutions of higher education and public schools. The book's approach contends that collaboration is a way of being and is not limited to isolated actions; it is a way of redefining how adults interact in schools. Part 1 presents a description of the shift to a collaborative paradigm in schools and suggests a multidimensional framework that encompasses four basic collaborative functions: facilitative, supportive, informative, and prescriptive. Part 2 considers the basic communication skills that form the foundation of any collaboration is facilitative, supportive, informative, and prescriptive part to the foundation of any collaboration skills that form the foundation of any collaborative interaction. It provides a communication model, elaborates on ways to facilitate or inhibit communication when engaging in a collaborative dialogue, and addresses group dynamics. Part 3 describes how collaboration plays out in practice in four contexts: specific classroom and school-wide problem solving, team teaching, school-university collaboration, and school-family collaboration. Each chapter provides examples from practice to illustrate points made and contains reflective questions to sid in relating concepts being discussed to individual situations. (Contains approximately 90 references.) (JDD)

Identifiers—*Kids are People School MA
This book tells the story of the Kids are People
School in Boston, Massachusetts, which began as a
day care facility, enthusiastically welcomed children with special needs, and developed a multicultural inclusive elementary school. It is the story of
the school's determination to provide the therapeutic services essential for each child's development
and to adjust the curriculum so that all children
could successfully participate. Its history has been a
stormy one, but its success suggests that the inclusion concept can work given the right environment.
The book was written to show that inclusion can and
does work; to help people who want to create inclusive programs do it right; and to point out problems
with the ways that children with special needs are
educated, tested, and treated. The book addresses
the goals and practices required to allow every child
to be included in regular classes, with the expectation that the child's special needs-educationally,
personally, and socially—will be addressed with appropriate programs. Chapters address characteristics of the children; teaching methods; staff
configuration; curriculum and materials; accessibility; evaluation; specialists; and comments of parents, children, and staff. Appendices offer a brief

This practicum was designed to increase the number of elementary school students eligible for placement in a gifted program by improving the prescreening process. Major goals were to: (1) im-

of summit participants concludes the report. (JDD)

prove teachers' ability to identify giftedness in children; (2) improve the referral rate for gifted screening; and (3) increase the identification and placement rate of children into the gifted program to the expected level. A list of characteristics of giftedness was developed and a series of meetings with a total of 23 teachers provided training in the recognition of potentially eligible students. A parent workshop was also held to educate parents about characteristics of gifted students as well as the screening, evaluation, and placement process. Analysis of results indicated that teachers made more than double the number of referrals compared to the previous 3 years and that all teachers who received the training made nominations of students for acreening. The number of students ultimately qualified approached, but did not reach, the two percent goal. Appendices include the gifted characteristics checklist, teacher pre-test and post-test, a sample acreening and evaluation log, and a summary of the identification process. (Contains 38 references.) The social and emotional development needs of fourth and fifth grade students (N = 16) with learning disabilities were addressed through development and implementation of a 12-week awareness program called "Puplis" Over-Whelming Esteem Rise" (Project POWER). This project targeted: (1) self-awareness, (2) social awareness, (3) coping, or ganizing, problem solving, and planning; and (4) evaluation, through author-made games, activity sheets, creative projects, and use of technology. At program completion, most students demonstrated awareness of their specific learning style strengths and weaknesses and were able to use this knowledge when interacting with poers and teachers. A student-generated computer presentation showing their understanding of learning styles had a positive effect on student self-esteem. Increases in social skills and self-esteem were documented by pre/post-test differences. Appendices include educator, parent, and student concern surveys; learning/teaching style inventories and explanations; hemispheric mode indicator and game; self-evaluation scale and results; and a program outline. The complete program guide is attached, with examples of numerous learning activities for the project's targeted skills. (Contains 27 references.) (DB)

"Public Policy, "Social Responsibility, "Teacher Education
This report contains in summary format the recommendations from a 2-day summit on the nation's responsibility in relation to individuals with learning disabilities. The report contends that a national summit on learning disabilities was needed because of such factors as the large number of people affected by learning disabilities, the plethora of interventions needing to be validated, the need for dissemination of scientific progress, the need for collaboration between public and private agencies, the historic precedence set by the last summit in 1987, the need for a vehicle for looking to the future, and the evidence that outcomes for people with learning disabilities are unfavorable. The goal of the summit was to provide a blueprint for the future, encompessing issues from preschool through adulthood. Critical issues that energed from the summit included early intervention, teacher development, collaboration, public awareness, and funding. Recommendations are offered in each of these areas, suggesting significant activities that must be undertaken to improve the lives of those with learning disabilities. An Interagency Committee is recommended to include representatives from the Departments of Education, Labor, Justice, and Health and Human Services, as well as researchers, public policy experts, practitioners, and consumers. A list

Descriptors—College Students, Data Analysis, Data Collection, "English (Second Language), Foreign Countries, Foreign Students, Higher Education, Hypothesis Testing, Japanese, Language, Puency, "North Americans, "Oral Language, Questionnaires, Research Methodology, "Sex Differences, "Speech Acts, "Student Attitudes, Student Behavior Identifiers—"Japanese Speaking, United States This article discusses the expression of gratitude in spoken English by Japanese and American college students in the United States. Five hypotheses were tested: (1) Advanced non-native speakers would find expressing gratitude difficult in the target language; (2) A verbal expression of regret would occur whenever the Japanese speaker believes he is imposing upon another person; (3) Foreign students would exhibit numerous errors in lexicon and grammar; (4) Native English speakers would not verbalize regret; (5) Expressions of gratitude by Japanese females would be longer than those of their male counterparts, and the responses of American males and females were tested to the students. Results indicated the following: American males expressed regret more often than expected and American females less so; responses of American males and females were similar in length and formality; responses of Japanese females were replete with lexical and grammatical errors. Appended are the questionnaire, samples of native male vs. female responses, samples of Japanese remales were responses of native male vs. female responses, samples of Japanese remales were replete with lexical and grammatical errors.

onses, examples from a rating system, word onts, table of acceptable responses, and a T-test dysis of Japanese learners. (Contains 22 referes.) (CK)

Descriptora—*Class Activities, *Classroom Communication, Communicative Competence (Languages), *English (Second Language), Foreign Countries, Instructional Materials, Second Language Instruction, *Teaching Methods
An English-se-Foreign Language instructor's repertoire of effective classroom activities is extended not only through acquiring useful, new ideas, but through adapting these activities (new and old) for varied needs and purposes. This article focuses on the potential for adaptation of one popular, communicative activity: "Find someone who..." Suggestions for modification include: employing different grammar points, increasing linguistic complexity, decreasing linguistic support, broadening the information gap, using follow-up questions, one-word cues and picture cues, looking for "no" answers, using information questions, doing indirect questioning, linking with follow-up activities, developing topical themes, and using trivia quizzes and personalized cues. Together, these modifications exemplify how many activities can be adapted to better reach our students and respond to the various needs we encounter. (Contains 13 references.) (Author)

This document is the first of 17 volumes on indigenous Mexican languages and is the result of a project undertaken by the Archivo de Lenguas Indigenas de Mexico. This volume contains information on Zapotec, an indigenous language of Mexico spoken in the listhmus region of Juchitan, Oxacca. The objective of collecting such a representative ampling of the linguistic richness of the region was to store it for typological and historic comparisons. To gather data, questionnaires designed to elicit responses that would reveal the linguistics, vocabulary, grammar, and syntax of the language were administered to the indigenous people of the area. This work is the first systematic attempt to create source material of such magnitude. Basic information has been collected that is directly useful and will serve as a departure point for detailed study. Each volume deals with the phonology, morphophonemics, grammar, and vocabulary of the language. Literature is included with Spanish translations, as is actual dialogue. Numerous sentences are analyzed. (CK)

This volume contains information on Totonac, an indigenous language of Mexico spoken in Papantla, Veracruz. The objective of collecting such a representative sampling of the linguistic richness of the region was to store it for typological and historic comparisons. To gather data, questionnaires designed to elicit responses that would reveal the linguistics, vocabulary, grammar, and syntax of the language were administered to the indigenous people of the area. This work is the first systematic attempt to create source material of such magnitude. Basic information has been collected that is directly useful and will serve as exparture point for detailed study. Each volume deals with the phonology, morphophonemics, grammar, and vocabulary of the language. Literature is included with Spanish translations, as is actual dislogue. Numerous sentences are analyzed. (CK)

Values

Identifiers—Australia

The value of foreign language education at the elementary school level for Australia is discussed from two perspectives: its contribution to tolerance of cultural diversity within Australian society and its contribution to Australia's role in the global society. Reference is made to a variety of studies and commission reports. First, the relationship between language and human rights in general is examined, including recent Australian legislative and organizational initiatives and the principles underlying a recently-developed universal declaration of language rights. The role of civics education in a culturally diverse society is also considered. International relations and international trade are then discussed, and it is concluded that if Australia and Australians are to enjoy equity as they compete for world marater of enjoy equity as they compete for world marater of enjoy equity as they compete for world marater of enjoy equity as they compete for world marater of enjoy equity as they compete for world marater of enjoy equity. and it is concluded that if Australia and Australians are to enjoy equity as they compete for world markets, it is essential that many more people attain high skill levels in a variety of languages and better use be made of existing skills in the community. Implications for determining language priorities, esbalishing policy concerning cultural diversity, fostering favorable cultural attitudes, providing quality instruction, meeting business and industry needs, and promoting community awareness are outlined. The guide, designed for regular classroom teachers, outlines principles and strategies for teaching limited-English-proficient children. The first chapter addresses the task of building a trusting relationablip with students and establishing a comfortable learning environment. Topics include sensitivity to cultural and linguistic differences, fostering classroom involvement, and meeting parents. The second chapter reviews principles of second-language development, with special attention given to setting reasonable expectations. Chapter 3 presents a number of practical teaching strategies, both techniques borrowed from language teaching and innovative ideas. These include using language effectively, using multisensory activities to engage students, building literacy skills, creating a learning community, and using technology. The final chapter encourages teachers to network with other professionals in the school and community, through student peer partners, team teaching, special school personnel services, cross-age tutoring, and other community resources. In each chapter, suggested activities and suggested readings are offered. (MSE)

A study of fourth- and fifth-grade students who were taught science in Spanish as a second language is reported. The primary issues studied were: (1) the role of first-language skills in learning science in a second language, and (2) whether hands-on instruction, seen as effective by many for science teaching, is appropriate for second-language-medium instruction. Forty science lessons were observed and videotaped from September to May. Twenty students read four science teats in Spanish, three expository and one narrative, all linked to themes and previous performance assessments by the teacher involved. Students were asked to read and recall the texts in the language in which they felt most comfortable, then several days later, were interviewed about reading in science. During the study's last month, the same students were administered a performance assessment. Quantitative data and interview results are analyzed together, and implications are drawn concerning the role of first-language skills in second-language performance, the role of reading in science instruction, and appropriate use of performance assessment. This study looks at natural syntactic processes in the development of verbal mood in first- and second-language acquisition, language change in RIE JUN 1998

progress, history, and creolization. Correspondences are examined in the development of the subjunctive vs. the indicative mood. The study presents an integrative perspective, taking into account seemingly disparate linguistic areas in order to reveal universals of markedness. A model of syntactic markedness is proposed that is closely aligned with C. J. Bailey's theoretical views, as well as with Faingold's studies of phonological and morphological development. The model relies on psycholinguistic studies on first- and second-language acquisition, as well as on sociolinguistic variation and change, language history and creolization. The constraints on the development of verbal mood revealed cannot be explained without referring to non-syntactic and non-linguistic factors. Results demonstrate the relevance of second-language learning for markedness theory in particular, as well as for the study of linguistic theory in general, and the relevance of linguistic analysis for foreign language teaching. Pedagogical implications for teaching the subjunctive in American universities are outlined. (Contains 41 references.) (CK)

This paper argues that as the number of concordance lines presented to researchers increases in line with ever-growing corpus size, the automatic selection of the most central lines will become more important. A method will be presented for selecting the most representative members from a set of concordance lines on the basis of repeated lexical features. This follows from previous work on lexical cohesion that was utilized in a system for automatic abridgement generation. Such a system would grant full accessibility to corpus material while avoiding the presentation of so much data to researchers that they become overloaded. (Contains 7 references.) (Author/CK)

School Curriculum, Second Language Instruction, "Second Languages, Space Utilization, "Student Recruitment, Teacher Attitudes, Teacher
Role, "Uncommonly taught (LCT) language to
thrive in a high school curriculum, issues of support
and accessibility must be addressed. Counselors, administrators, and teachers must work together to
show students that these are not difficult languages.
Designing the programs for "gifted and talented"
students unfairly excludes many capable ones, so a
philosophy of equal access is important. Establishing and maintaining an LCT language must not fall
totally on the teacher, but should be supported by
district and building administration. Designating a
classroom helps these languages find their identity
within the school. The LCT language teacher's efforts to publicize it may be perceived as recruitment
by other teachers, the teacher should meet with jumior- and senior-high counselors to answer questions and address preconceived ideas about the
languages' difficulty. A flier sent to entering freshmen can be useful. A language club helps reinforce
the languages difficulty. A flier sent to entering freshmen can be useful. A language club helps reinforce
the languages and culture and promote its study. Earolling freshmen helps ensure continued high enroll-

ment. Creating a four-year sequence and preparing students for continued study in college also helps achieve success. Finally, a good relationship be-tween the LCT and other language teachers is vital; enrollment issues and concerns about sharing class-rooms should be discussed. (MSE)

An analysis of lexical innovation in Ghanaian English uses ten linguistic categories identified in earlier research on Nigerian English, offering an explanation of each category and a number of examples. The categories include: loanshifts (English words manipulated to produce and transmit meanings beyond purely denotative reference and conveying a range of emotional, attitudinal, and symbolic content); semantic underdifferentiation (neutralization of emotive distinctions between lexical items); lexico-semantic duplication and redundancy (couldn't be able to"); ellipsis (headword deletion in a nominal group structure); conversion (use of noun as a verb); clipping (subtraction of one or more syllables from a word); acronyms; translation equivalents (translation of native language usage into English); analogical creation formation of new words on the basis of partial likeness or agreement in form or sense with existing words in English); and coinages (invention of lexical imnovation are also identified: non-recognition of the local variety; expanding usage; gradual acceptance as the norm; and recognition. This study investigated verbal play, including teasing and self-mocking in a naturally occurring conversation, among four Chinese female friends. The study illustrates how these speakers engage in teasing activities and then discusses the implications and significance of verbal play. Examples are taken from a casual, playful conversation participated in and taped in the summer of 1990 during a 2-hour lunch at a restaurant in Tapei, Taiwan. A recurrent topic for teasing is the speech style of two of the participants. Some of the teasing is rude and face-threatening. The four women repeatedly mocked themselves or playfully put others down. The target of teasing tended to agree or even elaborate when being degraded. In an informal conversation, participants who are intimate and share common history with one another tend to share the same "interactive frame." Speech acts that are intrinsically face-threatening can be offered and received as "play," Women can be the initiators as well as the receivers of humor. It is concluded that communicative strategies should be interpreted in terms of interactive frame rather than gender or politieness considerations. (Contains 16 references.) (CK)

Descriptors—Educational Environment, "Enrollment Influences, High Schools, High School Studenta, "Language Enrollment, "Russian, School Surveys, "Second Language Learning, "Student Attitudes A survey conducted in a large, predominantly white suburban high school in the midwest investigated student attitudes toward study of Russian and other foreign languages. Respondents were \$15 students of Spanish, French, German, Japanese, and Latin at three levels of instruction. Students were first asked to rank the reasons they chose the language they were sated to rank the reasons they did not choose to studying Russian included perceptions of its academic difficulty, lack of interest in the culture, interest in pursuing languages begun in middle school, and lack of job or career potential associated with Russian study. It is concluded that: students accident clusting seven and subtings have tremendous influence on the foreign language chosen, while counselor influence is minimal; students study languages with cultures that interest them; and students are generally satisfied with their language choices. Considerations and recommendations for secondary school Russian language program development, based on these findings, are outlined. (MSE)

Languages, "Speech Skills Identifiers—"ACTFL Proficiency Guidelines, Oral Proficiency Testing
This study investigated the extent to which home exposure (HE) to the Chinese language affected the oral proficiency of students of intermediate-level college Mandarin Chinese. In fourteen hypotheses, it was predicted that HEs would perform at a higher level than would non-home-exposure students (NHEs). Students were given a simulated oral proficiency interview, evaluated according to American Council on the Teaching of Foreign Languages (ACTFL) proficiency guidelines. Brror analysis of the taped interviews focused on features in five categories: fluency and complexity; phonology, semantics; syntax; and syntax and semantics. Subjects were 6 students with intermediate-level proficiency ratings enrolled in second- and third-year Mandarin courses; three were HEs and three were NHEs. Results confirmed five of the fourteen hypotheses, those relating to patterns in code-switching and errors in vocabulary, tone, pronunciation, and word order. It was found that while the ACTFL intermediate-mid and intermediate-high level criteria seemed to describe the subjects, there were some differences to which the ACTFL guidelines may not be sensitive, particularly the skills of the non-educated but astive speaker. Implications for second language instruction are discussed. Contains 31 references. (MSE)

Identifiers—New York City Board of Education

This report explores the educational progress of

students of Limited English Proficiency (LEP) who

entered the New York City Public Schools in the
fall of 1990 and 1991. It describes students' success

in meeting the exit criteria for bilingual and Eng
lish-as—Second-Language (ESL) programs. The

study focuses on such short-term outcomes as the

time required to exit such programs and reading and

mathematics achievement in English after moving

to monolingual-English classes. Students entering

the schools are considered eligible for ESL or bilin
gual programs if they speak a language other than

English at home, and if they score at or below the

40th percentile on the Language Assessment Bat
tery (LAB). This research tracks two cohorts of stu
dents whose first-time enrollment in the schools

followed the establishment of new criteria for enter
ing LEP programs. The report is divided into the

following sections: Results: Exit Rates from ESL

and Bilingual Programs by Grade Entered, Exit

Rates from ESL and Bilingual Programs by Home

Language, Entering Level of English Proficiency,

Tested Achievement of Students who Exit LEP

Programs, and Discussion and Recommend

through spring 1994; (5) Number of Years to Exit ESL-Only and Bilingual Programs Controlling for Students' Level of English Proficiency upon Entering the Program (fall 1990 through spring 1994); and (6) Number of Years to Exit ESL-only and Bilingual Programs Controlling for Students' Level of English Proficiency upon Entering the Program (fall 1991 through spring 1994). Young Children
The phrasebook provides Irish phrases and vocabulary needed for typical exchanges between parents
and children. It is intended for parents who wish to
speak a little Irish to their young children, and may
be used by individuals or in a class situation. First
it presents the phrases for calling children, attracting their sttention, praising them, warning them,
asking what they want, and so on. Then it addresses
the situations that arise in a normal day: getting up,
having meals; going to school; shopping; going out
in the car; gardening; household chores; bedtime;
medical matters; accidents; special occasions; and
playing games. Lyrics to several children's songs
and a list of vocabulary, with pictures, are included.

The illustrated guide provides vocabulary for common classroom terminology in 15 languages: Arabic; Bengali; Chinese; Farsi; Haitian-Creole; Hindi; Italian; Korean; Polish; Russian; Serbo-Croatian; Spanish; Tagalog; Urdu; and Vietnamese. The language are those most commonly spoken by immigrants to the United States. For each language there are four pages of illustrations labeled in the language (using alphabets and authentic alphabets, characters, and symbols), phonetically, and in English. All of the words and phrases and some additional ones are presented again in lists, organized by category, that follow the illustrations are designed so that children can scan them to find the term(s) they wish to convey. The vocabulary refers to the classroom environment, teacher-child and peer interactions, body parts, playground activities, and parents and administrators. Some classroom uses for the materials are suggested. (MSE) gested. (MSE)

rs-*Ireland

A national survey conducted in November-De-cember 1983, similar to one in 1973, investigated attitudes toward, competence in, and use of Irish among adults in Ireland. Of the 1,131 individuals attitudes toward, competence in, and use of Iriah among adults in Ireland. Of the 1,131 individuals interviewed, all aged 18 or over, about 420 were under age 30. The report summarizes preliminary results. The first section reports general attitudes toward Iriah as an ethnic symbol, Irish usage and instruction in the schools, use of Irish in interpersonal interactions, attitudes toward the Gaeltacht (areas in Ireland where Irish is the primary language, and beliefs about the viability of the language and its relevance in modern life. In the second section, respondents' evaluations of their own ability to speak Irish, and that of other family members, are summarized. The third section presents data on respondents' use of Irish in conversation, in writing, at home, at work, and in watching television. Section four reports on attitudes toward Irish language policies, including anticipated feelings if Gaeltacht disappears, priorities for Irish language policy, the school program preferred for most children, support for Irish entrance requirements for postsecondary education, and views of policies concerning Irish in the medis, public administration, and support for voluntary language groups. The final section presents statements from the 1973 survey, followed by a summary of findings of the 1983 survey. (MSE)

thinguansm, "two today," the language sentifiers—Buropean Community, "Ireland Issues in the debate in Ireland over Irish language struction in the achools are reviewed in light of the stablishment of the European Economic Commu-

nity. In the first chapter, three points of view are compared: results of research on Irish, attitudes of the general public, and those of language interest groups. The second chapter provides a brief overview of public language policy from 1922-1950 and outlines results of a 1983 survey of attitudes toward Irish language use and the teaching of Irish to children. Chapter 3 looks at issues of individual and collective rights concerning language usage and attudes toward use of Irish in primary, secondary, and postsecondary education. The two subsequent chapters address primary school and secondary school Irish curricula and instruction in greater detail. In the final chapter, related concerns are discussed, including the growing cultural diversity in Europe, European Community (EC) policy on multilingualism, EC standards for language usage, languages and the labor market, and additional language policy considerations. Descriptors—Comparative Analysis, Educational Policy, Elementary Secondary Education, Foreign Countries, *Irish, *Language Attitudes, Language Research, Policy Formation, *Public Opinion, *Public Policy, Surveys, *Teacher Attitudes, Uncommonly Taught Languages identifiers—"Ireland Results of research attitudes toward the use of Irish in Ireland's schools are examined. The first section reports on three surveys of the adult public in 1973, 1983, and 1985. The second section discusses three surveys among national samples of young people in Ireland in 1980, 1981, and 1983. In the third section, two attitude surveys of primary school teachers are discussed. It is concluded that while there are some technical problems and some differences in emphasis and survey timing, the main surveys reviewed are generally consistent, and that discrepancies occur more in interpretation than in data. With regard to educational policy, the public pursues varied objectives and the majority endorses current policy. It is also generally agreed that "slow learners" and students whose parents do not endorse Irish instruction should not be required to learn Irish. Demand for change appears to come from minority groups with different viewpoints. Teachers are among the groups most proficient in Irish, most favorably disposed to it, and most likely to use it often. They also feel students with low

academic or language shility should not be required to learn Irish. A new curriculum is desired. Students and young adults based their judgments on the per-ceived utility of the language. (MSE)

Identifiers—"Brazil, "Implicatures

A study investigated the extent to which native speakers (NSs) and non-native speakers (NNSs) of Fortuguese understand implicatures in Brazilian television commercials in Fortuguese. Subjects were nine Brazilian graduate students and 11 American students of Fortuguese at the University of Illinois at Urbana/Champaign. Correct inference of the implicatures was measured by a multiple-choic test, followed by an oral interview. Results revealed that the NSs' interpretation of implicatures was very uniform, with an average of correct answers (93.3 percent). Conversely, the performance of the NNSs varied, with an average of 47.3 percent correct answers. This was found to be true even in cases in which the implicatures in Brazilian Portuguese operated the same as in American Eaglish. Analysis of the data suggest that each case of successful inference requires some specific knowledge that may not be equally shared among NSs and NNSs. It is recommended that the pragmatic competence of American learners of Portuguese be addressed in language instruction. (MSE)

Identifiers—Augier (Emile), Balzac (Honore de), Becque (Henni), Mirbeau (Octave), Zola (Emile) It is argued that while it is important to make the French second language curriculum relevant to today's world, it is also important not to neglect the cultural and literary components of the traditional French major, including those learning French for business. In light of this, several French novels, plays, and stories in which business is a major element are recommended as reading for students of business French, who have or would easily learn the business, commercial, financial, and legal vocabury incorporated into them. The novels include: Honore de Balzac's "Cesar Birottesu"; Balzac's "L'Illustre Gudissart," "Le Faiseur" (or the play "Mercradet" based on it); "Le Gendre de M. Poirier" by Bmile Augier; Emile Zola's "An Bonheur des Dames, ""Le Ventre de Paris, ""La Curee," and "L'Argent"; Henri Becque's "Les Corbesux"; Octave Mirbeau's "Les Affaires sont les affaires"; and "Promont Jeune et Risler aine" by Octave Mirbeau.
Among the theines and issues in these works are bankruptcy, marketing, advertising, ambition, corruption, general commercial activity, and women in the world of business. (MSE)

Discussion begins with an examination of the concept of language maintenance and the reasons it merits the attention of linguists, language planners, and language teachers. Australian policy concerning maintenance of Aboriginal languages is briefly outlined. Research on language maintenance and language six in relation to endanguered languages is also reviewed, and the ambiguous role of education in language maintenance is considered. Two areas in which Edith Cowan University has been active are then described. The first is a pilot study of Aboriginal and Torres Strait Islander language development and maintenance needs and activities, a national initiative with its origins in national language and literacy policy. The second is an effort to mobilize teachers for bidialectal education, in both Aboriginal English and standard spoken English. The project involves the training of 20 volunteer teachers of Aboriginal children. The role of the university in facilitating change and supporting language maintenance is emphasized. ory, Pragmatics, "Regional Dialects, "Speech Acts Identifiers—"Agree Disagree Statements, "India, Politeness
This study examined the speech act of agreement and disagreement in the ordinary conversation of English-speakers in India. Data were collected in natural speech elicited from educated, bilingual speakers in cross-sex and same-sex conversations in a range of formal and informal settings. Subjects' ages ranged from 19 to about 60. Five agreement strategies were analyzed: (1) direct expression of agreement or stated agreement components; (2) building on the previous speaker's turn; (3) uttering partial and complete repetitions of components in the previous turn; (4) delaying; and (5) hedging. Four disagreement strategies were examined: (1) explicit statement of disagreement or stated disagreement components; (2) softening of disagreement with softened negative statements, honorifics, spologies; (3) delaying; and (4) hedging. These patterns are explained, with examples, and discussed in light of research on politeness behavior. It is noted that while these strategies are appropriate in their own cultural context, potential for misunderstanding increases in cross-cultural contexts, and to some extent in cross-gender interaction. Contains 26 references. (MSE)

Identifiers—*French (Canadian), Spain (Madrid)
A study of middle verb constructions in Canadian
French and Madrid Spanish suggests that two alleged defining characteristics of these constructions
are not really defining characteristics. These are: (1)
that the constructions only appear in generic sentences, and (2) that they disallow "by" phrases of
the type found in passive sentences. It is argued that
the French spoken in esstern Canada and the Spansiah spoken in Madrid undermine both of these assumptions. Based on data from those varieties and
five additional considerations, it is concluded that
Romance middle constructions are associated with
a structure similar, but not identical, to one in which
there is a "pro" internal to the verb phrase that bears
the external theta-role. This account is shown to
accommodate not only the full range of micro-parametric variation but also offer an explanation for the
generic constraint at work in most dialects of Romance languages. Contains 39 references. (MSE)

Language), Foreign Countries, Immigrants, *Language Patterns, *Language Variation, Prepositions, *Regional Dialects, *Syntax, Tenses
(Grammar), Time Factors (Learning), Verbs
Identifiers—Indirect Questions, Relative Clauses,
United States
A study examined the English syntactic problems
persistent in the performance of educated Arabs living in the United States for an average of 5 years.
The study is seen as significant because it reflects
the features that distinguish the Arabs' English as a
performance variety that develops where English is
used as a foreign language. Subjects were 15 bilingual Arabs, either graduate students or educated
individuals engaged in business. Data were gathered
in three tasks: a multiple-choice test of verb forms;
a translation task; and a picture description task.
Results indicate performance problems in the areas
of: (1) tense agreement; (2) relative clause construction; (3) indirect questions; (4) perfective tenses;
and (5) use of prepositions. It was also found that
the degree of deviation in these areas depends on
both the amount of time spent in the United States and
bethe deviation and the educational level of the speaker; the longer
the time spent in the United States and the higher
the academic achievement level, the less deviation
observed. These results are also compared with findings of previous research. The three tasks are appended. Contains 26 references. (MSE)

Program monod Languages, openion, Second Languages, openion Speaking Two Way Billingual Education
The roles of first and second languages were studied, using ethnographic methods, in a middle school two-way billingual education program that served Mexican-background students. The primary stated program goal was to develop bilingualism and billiterscy in both minority and majority language students. Classes were taught using English and

Spanish on alternate days. The study focused on a core group of 21 Hispanic and 8 white students from working-class backgrounds. It was found that for academic purposes, the Hispanic students used English almost exclusively, and this is attributed to institution to subtle aspects of program policy and a hidden curriculum. These included announcements made in English first, then Spanish, and the daily requirement that students learn an English vacabulary word but not a Spanish one. Student perceptions of the relative importance of English-medium and Spanish-medium tests were influenced by both the way in which students were prepared for them and the way the tests were administered. It was also found that instructional practices unwittingly devalued language-minority students' linguistic and cultural capital, through used "high?" rather than vernacular Spanish. It is concluded that despite good intentions, inattention to policy and practices can have unintended results, and that success through bilingualism and biliteracy is built on well-conceptualized and carefully monitored bilingual programs that give equal emphasis to minority languages and English. Contains 26 references. (MSE)

Identifiers—*Content Area Teaching

This paper reports a study that examined the academic language of middle school social studies education, as found in textual and classroom discourse,
and the instructional practices effective in guiding

students to accomplish academically and socially meaningful tasks. It involved classroom-based research, analysis of textbook discourse, classroom talk, and student work samples. Student language development was also examined. The study also resuited in development of two thematic units for integrating language and social studies objectives with thinking/study skill practice and multicultural perspectives, on protest and the American Revolution, and conflict in world cultures. Textbook discourse analysis included examination of text structure and content and use of vocabulary. Analysis of functional academic language in social studies looked at its semantic and syntactic features, language functions and tasks, and routine classroom discourse and analyzed its specific features. It was also determined that aocial studies offers many opportunities for higher-order thinking tasks. It was found that both English-as-a-Second-Language and content area teachers used specific bridging strategies to accommodate student language needs. Limitations were identified in existing instructional materials, and explicit socialization into classroom culture was found to be desirable. Implications for instruction are addressed briefly. Identifiers—*Australia, Edith Cowan University (Australia)

Two distinct but related studies are reported, both investigating linguistically- and culturally-based communication problems between service providers and service seekers in Australia. The first examined language problems occurring in naturalistic situations involving a public servant and a client within three public agencies, the departments of taxation, immigration/ethnic affairs, and social security. Data were gathered ethnographically, through non-participant observation supported by note-taking, and, where appropriate and permitted, by recording and interview. Analysis revealed distinct communication error patterns: sound-related linguistic lacunas; grammar-related linguistic lacunas; meaning-related linguistic lacunas; communication-elated cultural lacunas. Explanations and examples are offered for each category. A second study examined service-type interactions at Edith Cowan University (Australia), reported in less detail but indicating contrasts in the two communication situations, particularly in the use of communication situations, particularly in the use of communication situations, particularly in the use of communication situations, particularly in the

The origins, rationale, and design of a program to prepare refugee children for elementary school experiences in the United States are described. The program, conducted in overseas refugee camps, began in 1987 as a complement to adult transitional programs. All children receive 18 weeks of instruction, with a schedule and activities similar to those found in a typical U.S. elementary school. The largest single block of school time is spent on English-as-a-Second-Language (ESL) instruction, taught thematically through a variety of activities integrating language skills (listening, speaking, reading, writing) and science and social studies content instruction. Additional time is devoted to English literacy, mathematics, and enrichment activities. The report describes program structure briefly; the bulk of the report is an explanation of guiding principles underlying the program, methodologies used for oral language development (whole language approach), and a list of classroom instructional methods approach), and a list of classroom instructional methods approach), and a list of classroom instructional methods approach).

Programs

teristics, Teacher Evaluation, *Transitional Programs
A program to prepare refugee adolescents for secondary school experiences in the United States is described. The program, conducted in overseas refugee camps, began in 1985 as a complement to adult transitional programs. The daily program is designed to simulate the schedule and classroom procedures of a typical U.S. secondary school. Classes include three periods of English-as-a-Second-Language (ESL) instruction (one each for listening/speaking skills, grammar, literacy instruction), one of basic math, and two of American studies. ESL instruction focuses on language for communication and academic purposes, taught thematically. Methodology is eelectic, uses individual and small group instructions, and emphasizes basic school and study skills and ilteracy. The mathematics curriculum prepares students for formal math courses by teaching computational math and math language. The American studies curriculum contrasts American and Asian cultures, preparing students for culture shock through opportunities to make decisions, solve problems, and resolve conflicts. The need for strong cultural identity is emphasized. Extracurricular sectivities, parent involvement, guidance counseling, and linkages with U.S. schools are described briefly. Appended materials include lists of ESL topics and language functions, math competencies, American studies teaching points, student handouts and profile forms, and a teacher evaluation checklist. Second Language Instruction, Teacher Attitudes, Teacher Student Relationship, Teaching Methods Identifiers—"Vietnam

A study investigated the experiences of three Australian teachers of English as a Second Language (ESL) who conducted teacher workshops on communicative language teaching methods in Vietnam. It provides a critical description of cultural conflicts arising from the introduction of a western teaching approach and the informants' interpretations of those conflicts. Initially it seemed that Vietnamese resistance to adopting the communicative approach lay in class sizes, grammar-base examinations, and lack of exposure to authentic language. On closer examination, it appeared that to adopt the approach, Vietnamese teachers would have to change radically some basic cultural beliefs. It is concluded that for the communicative approach to be made suitable for Vietnamese conditions, it must be both culturally attuned and culturally accepted. Based on the literature and informants' experiences, the eventual form of pedagogical practice would involve the teacher's ability to either filter the method to make it culturally appropriate or redefine the teacher-sudent relationship in keeping with the cultural forms embedded in the communicative approach. However, it is proposed that while this "mediating" has potential to overcome cultural barriers, it alone will not ensure the success of the approach, However, it is proposed that while this "mediating" has potential to overcome cultural barriers, it alone will not ensure the success of the approach, the coding system and the case study consent form. Descriptors—Behavior Patterns, Comparative Analysis, "Cultural Differences, Foreign Countries, "Interpersonal Communication, "Overt Response, Pragmatica, "Social Behavior, "Social Status
Identifiers—Americans (United States), "Compliments (Language), Politeness, "Thai People A study investigated the extent to which the gender and social status of the complimenter as well as the gender of the receiver account for the choice of strategy Americans and Thais use to respond to compliments. Subjects were 40 American university students in the United States and 40 Thai students in Thailand. In a discourse-completion test, each subject responded orally to 16 compliment situations; each was then interviewed. Results suggest that there are both similarities and differences in both groups. Analysis revealed 13 compliment response types, placed on a continuum between acceptance (agreement) and rejection (disagreement and avoidance of self-praise). Acceptance occurred most frequently in both groups, with the Americans using it more often. Americans were also more likely to give long responses by combining different strategies or repeating a strategy; Thais tended to be brief. Both groups appeared affected by the complimenter's social status; more complimenter. This pattern was more pronounced among Thais. The study also revealed difficulty in assigning all responses to rigid categories because a number of them could perform multiple functions. It is proposed that there is a continuum of compliment responses in which responses have different degrees of agreement and self-praise avoidance. Contains 24 references. (MSE)

This bibliography presents a retrospective index of 6,050 doctoral dissertations, accepted by Western European universities, on Hispanic and Luso-Brazilian languages and literatures, part of a larger, world study of that field. The bibliography's scope is limited to doctoral dissertations on the Romance languages and dialects of Portugal, Spain, and Ibero-America and on the literatures written in these languages. Also included are dissertations on the relationships between these literatures and those of other nations, and on literary portrayals of Hispanic or Luso-Brazilian countries, customs, or people in other literatures. Some works on the iteratures and cultures of Iberian and Ibero-American ethnic minorities, studies of bilingualism and pedagogy involving the languages, aspects of language teaching and learning, historical documents, library collections and archives, and political and cultural institutions are included when felt to be relevant. An introductory section discusses inclusion criteris, information on organization, and secknowledgements. A list of academic institutions, with addresses, and a list of published sources consulted follow. The main section consists of a listing, alphabetical by author, of the dissertations and a subject index. (MSE)

The current and future role of educational technology in adult English-as-a-Second-Language (ESL) instruction in the United States is examined, drawing on practice, literature, and the experiences of an Arlington, Virginis program. Throughout, policy implications are drawn from the discussion. First, the ESL service delivery system is examined and the diversity of the population being served is discussed. Perspectives on the benefits and the challenges of using technology in ESL instruction are reviewed. The variety of technologies available is outlined briefly, including computers and computer software, video, interactive videodics, and integrated learning systems. Both the extent and the nature of current technology usage are examined, and promising models for future applications are described. It is concluded that despite a lack of empirical data on the effectiveness of technology for ESL instruction, continued investment in the technology is warranted, and federal and state governments and foundations should take a leadership role in promoting use of technology. RIE JUN 1995

A discussion of English as a Second Language (ESL) in the workplace looks at current challenges and future educational needs. It begins with an overview of adult immigrant demographics in the United States and federal government conclusions about the kinds of skills needed by this population. Challenges facing immigrant workplace education are then reviewed. They include the volume of services needed, fragmentation of services when it is available elsewhere, disagreement over whether ESL should be considered education or training, and tension over curriculum between advocates of workplace education and workforce development. It is argued that despite a lack of research on workplace language tasks, some basic language functions are identified, including those of getting a job, surviving in the workplace, and thriving on a job. Some indicators of the quality of workplace education programs are outlined, and characteristics of successful delivery models are described. Costs and funding are also discussed briefly. The materials comprise a 30-hour training package designed to assist workplace supervisors in Australia in understanding the issues and strategies for managing and training a multicultural workforce, particularly when it includes refugees or immigrants of non-English-speaking backgrounds. The course is to be taught by, and these materials are intended for, teachers of English as a Second Language (ESL). The course consists of 6 modules on these topics: communication in the workplace; communicating by reading and writing; cultural issues; problem-solving in the workplace; and language and training. Materials in each module include presenter's notes, a list of related publications, specific learning outcomes and performance criteria, assessment suggestions, and series of class activities. For each activity, recommended procedures for the instructor, related resource sheets (appended to each module) or other recommended resources, and approximate time requirements are specified. Considerations in designing and implementing

family literacy programs for the limited-Englishspeaking population are examined and some solutions are illustrated in one federally-funded program
for Latino families, Project FLAME (Family Literacy: Aprendiendo, Mejorando, Educando/Learning, Bettering, Educating). An introductory section
looks at the family's role in children's learning and
barriers to family involvement in education. Family
literacy programs are seen as a means of forging
closer ties between homes and schools. Project
FLAME, which emphasizes the role of parents as
teachers, is then described. A discussion of program
development looks at these considerations: taking
the appropriate first steps; determining the location
and scheduling of classes; curriculum design; language of instruction; selecting instructional materials; staffing; maintenance of attendance and
involvement; and program evaluation. A Project
FLAME model lesson plan and a list of resource
organizations are appended. Contains 29 references.

Increasingly, educators understand that learners
represent a complex array of personal experiences,
values, and intentions that can inform curriculum
development and classroom instruction. This is particularly true of the diverse population in English-a-s-Second-Language (ESL) and family ESL
literacy programs. Educators respect and honor
their learners' ways of kanowing when they create
and work from curricula that emerge from issues
important to them. In effective family literacy programs, diverse ways of knowing are explored and
valued, and it is important that learning be multi-directional: children, parents, and teachers all
learn from one another by sharing experiences. Participatory techniques, such as comparing social and
family values of the cultures represented in the
classroom, have several benefits: they provide a forum for discussing learner knowledge; do not force
participants to devalue their own cultures; and provide valuable information for teachers and their own
and other cultures. Comments of adults in intergenerational literacy programs reflect these benefits.

Identifiers—ERIC Digests, *Family Literacy, New Mexico, Policy Issues
The current trend toward collaboration is having an impact on the fields of adult basic education and adult English-as-a-Second-Language (ESL) and literacy education. This digest looks at collaboration for adult ESL programs and for family bilingual and ESL literacy programs. It discusses the distinctions among cooperation, coordination, and collaboration; presents a framework for collaboration; reports on uses of technology for collaboration; and explores ethical considerations, evaluation concerns, and policy issues. Each of these areas is examined on uses of technology for collaboration; and explores ethical considerations, evaluation concerns, and policy issues. Each of these areas is examined in turn, and it is concluded that: collaborative efforts can offer better services than individual agencies can offer separately; the democratic nature of collaboration should benefit all participants—while providing the best services to clients. An inset briefly notes two successful collaborations in New Mexico, one urban and one rural. (Contins 10 references.) (Adjunct ERIC Clearinghouse on ESL Literacy Education) (LR)

Five questions and answers are presented in this
document. They are as follows: (1) Are family literacy and intergenerational literacy the same? The
first term, it is explained, focuses on the parent and
child, while the second term, used in the broader
sense, involves other adults such as grandparents
and neighbors, etc. (2) What are the goals of family
and intergenerational programs, and what are some
models for working toward those goals? AnswerThe goals of both types of programs include: promoting parental involvement; improving attitudes
and values as well as skills linked to reading; increasing families' sense of the wider social significance of reading; and addressing the unique
difficulties of multilingual families that have been
uprooted and displaced. (3) What instructional approaches, methods and techniques are used in family literacy programs? The answer provides two
approaches, methods and techniques are used in family literacy programs including Even Start, of
Washington state, combine both approaches. (4)
What materials and resources have been developed
for family and intergenerational programs? Different types of curriculum that will address particular
concerns are described in the sanwer. (5) what are
some promising directions for the future? The an-

Worksheets, Writing Exercises, Writing Instruction

Worksheeta, Writing Exercises, Writing Instruction
The set of instructional materials included here consists of reading, writing, and language development worksheets to be used in adult Englishas-a-Second-Language (ESL) literacy education. Materials are grouped according to four themes; this volume contains units on theme 3 (diary writing) and theme 4 (study skills). Each unit contains an introduction, contents list, teacher's notes, a reading and resource list, and the worksheets geared to three difficulty levels. The diary unit introduces diary writing to students as a way of using language experience to encourage reading and writing. It also includes some examples of other common text types (letters, reports, posts cards), with ways of identifying their features, and worksheets for practicing functional everyday literacy skills. The unit on study skills initiates discussion of different ways of learning and outlines strategies to assist with learning. This section assumes that students with limited educational backgrounds do not transfer skills and knowledge about texts and learning from another language but need to be introduced to them. Several worksheets focus on decoding information in the form of charts, maps, and timetables. The teacher's notes are indexed to specific worksheets. Written primarily for an Australian audience, the materials reflect Australian speech and writing conventions. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Program Characteristics
This study sought to: (1) investigate the degree to
which course content on elder abuse and neglect is
a part of higher education curriculums in aging; (2)
determine which specific elder abuse and neglect
course content is included in required and elective
coursework; and (3) describe the attitudes of instructors toward including elder abuse and neglect
course content in the overall curriculum. Completed
questionnaires were received from 211 contact persons representing gerontology instructional programs that are members of the Association for
Gerontology in Higher Education. The responses
indicated that about 30 percent of all undergraduate
courses and 40 percent of graduate courses offered
included content on aging. Of those courses, only a
small percentage included course content on elder
abuse and neglect. The results indicate, however,
that many programs provide students with the opportunity to attend classes in other instructional areas that cover elder abuse and neglect topics,
although few require students to stend such classes.
The majority of respondents felt that other problems
facing the elderly, such as the unavailability of affordable long-term care, deteriorating physical and
mental health, and poverty, were more serious than
elder abuse and neglect. (MDM)

Journals, Summative Evaluation, Teacher Attitudes
This paper addresses difficult issues in evaluation of college faculty for scholarship, teaching, and service particularly noting areas that trouble faculty themselves. A section on evaluation of teaching notes long standing debate and disagreement. This section then lists many of the central questions around evaluation of teaching and notes that some faculty pay little attention to teaching in order to focus more on research and scholarship. A discussion of evaluation of scholarship considers the following issues: the problems of publishing; the difficulty of placing articles with reputable journals; the difficulty of placing articles with reputable journals; the difficulty of published pieces; the possibility of faculty working with preases in a relationship where the author virtually pays to have his or her book published; and the mining of data from vast research projects for information of perhaps questionable usefulness. The section on evaluating faculty service to the institution describes the very extensive time demands of advising and committee work and the difficulties connected with effectively evaluating such work. A final section notes that often the administrators evaluating a faculty member's research productivity do not have the expertise to accurately assess scholarship. (JB)

This report describes the development of the Brooklyn (New York) College Learning Center (BCLC), which provides direct academic support services to students, staff development services, and new technologies for instruction and support services. The report used information available from institutional databases and information from research efforts initiated by BCLC staff. The BCLC was developed to link various academic intervention and retention strategies and to improve their effectiveness and impact. The BCLC's new facility opened in 1994 with all services, staff, and equipment in place. Program evaluation found that nearly 5,000 students had visited the facility over 3 years logging a total of 33,450 visits, and accruing a total of 47,250 hours. The evaluation study found that students who used the BCLC persisted in school longer than those who did not. Despite the fact that BCLC users were generally less well prepared for college level work than non-users, after 3 years enrollment, BCLC users completed their minimum proficiency requirements at rates higher than non-users. North Central Bible College (Minnesota) has implemented a faculty development program over severesses.

College MN
North Central Bible College (Minnesota) has implemented a faculty development program over several years despite restricted financial resources. North Central Bible College (NCBC) is an independent, primarily residential college that is owned and operated by a group of 11 Assemblies of God districts. It offers bachelors degrees in 22 majors and enrolled 1,535 students in Fall 1993. The faculty is relatively young. Although NCBC does not offer tenure, it does have a faculty security program. NCBC's commitment to faculty development has been demonstrated in the Board of Regents' practical and symbolic gestures, and in leadership and encouragement by the President's Cabinet, the Vice President for Academic Affairs, and department chairs. Most importantly the faculty themselves have demonstrated commitment to their own development and growth. Creative institutional initiatives have been directed by principles that include clear purpose, flexibility, balance, measurable goals, creativity, cooperation, ownership, accountability, relevance, and rewards. Examples of actual program components include new faculty orientation and mentoring, campus-based faculty development activities, provision of in-service stipends, professional membership stipends, benefits for part-time faculty benefits, asbabtical leaves, promotion policies, annual evaluation, and an annual personal conference by the Vice President of Academic Affairs with each faculty member. Data were gathered and analyzed in Fall 1993 on the use of residence hall facilities at all New York state operated colleges with residence halls and these data were also analyzed for trends by comparison with data since 1984. Twenty-six institutions were surveyed. Findings include the following: (1) in Fall 1993 the total utilization of residence hall facilities, (headcount) was reported to be 58,857, the smallest utilization in the past 10 years; (2) net revenue producing adjusted design capacity also decreased slightly from 1992 to 61,340 (bedcount); (3) occupancy level (96 percent) was only marginally higher than 1992 (95.7) percent) and was therefore the second lowest in the past 10 years; (4) trend data indicated that for 6 of the last 10 years revenue producing utilization of residence halls for purposes other than resident student occupancy generally increased; (5) the average number of students per resident assistant for the system as a whole remained relatively constant over the past 10 years; (6) University Centers all showed increases in percent utilization of net revenue producing adjusted design capacity from Fall 1992, and (7) Fall 1993 data showed that percent utilization of net revenue producing adjusted design capacity for the University Colleges decreased for the third consecutive year from the Fall 1990 peak of 100.8 percent. Twelve tables present the data in detail. (JB)

This validation study was part of a larger longitudinal study of two entire cohorts of students entering the college in 1976 and 1977, of whom most were predominantly first generation college students from working class backgrounds who worked before, during, and after college. Validation of the AACLC scheme focused on positions reported 5 years after graduation by 243 working female graduates. The study created three types of variables to validate the AACLC (1) two criterion measures, a position autonomy scale and a cooperative organizational thinking and action ability factor; (2) four secondary validation variables (e.g., annual salary and current level of education); and (3) two variables validating the scheme's consistency, continuity in career area and causal modeling. Analysis found that the AACLC effectively measured career advancement and was anchored in meaningful definitions of career advancement for college graduates. The AACLC was found to be internally consistent in ranking position titles of alumna's colleagues in the organization. The AACLC demonstrated greater sensitivity to post-college career advancement than the socioeconomic index in the fields of nursing, business and management, and education. (Contains 48 references.) complete campus building condition evaluation survey in 1989 that identified the nature and magnitude of the capital renewal/deferred maintenance requirements for each campus building. The survey design was based on a model developed by Harlan Bareither at the University of Illinois. Data were collected at weekly meetings held for 3 hours each over several months. The dollar value of all necessary capital renewal and deferred maintenance work was estimated on a building by building basis. The total snalysis covered 1,118 buildings comprising over 11 million square feet. The estimate for each building was compared to the total replacement value of the building and the resultant percentage deficiency was recorded. Results found that: (1) roof and window replacements totaled almost \$19 million; (2) new fixed equipment and elevators totaled over \$36 million; (3) plumbing and fire protection waste piping and sprinkler systems totaled over \$22 million; (4) replacement of heating, ventilating and sir conditioning systems equipment and controls accounted for almost \$79 million; and (5) new distribution wiring and fire alarms were estimated at \$22 million. The analysis also noted that under a formula funding system like the one UG uses, the total deficiency of almost 30 percent cannot be corrected with the planned yearly funding level of .75 percent of total replacement cost. An introduction briefly reviews the development of higher education law beginning with a landmark case in 1819. This section also covers sources of higher education law and general differences for public versus private institutions. The paper notes that the basis of the law in public institutions is predominately constitutional, whereas the basis in private institutional institutional and personal, in tort, contract, and federal civil rights aspects. Section 2 looks at management and administration and covers liability, both institutional relations with the regulatory authority of local government entities as well as state and federal civil rights aspects. Section 3 addresses faculty issues including contracts, personnel decisions, and academic freedom. Section 4 concerns student related issues and covers legal status, student discipline, housing, and security. Section 3 addresses faculty issues including contracts, personnel decisions and administrative rules and regulations and their implications for physical plant administrators. (Contains 14 references

Identifiers—Building Maintenance, Facilities Audita, Facility Evaluation, National Center for Education Statistics
This analysis looked at higher education facilities management that, despite exponential growth in responsibilities since the 1960s, has seen reduced resources for operations and maintenance. By extrapolating 1988 data from the National Center for Education Statistics, the review estimated that there are now 3.4 billion square feet of higher education facilities in the United States. Five tables show U.S. and campus populations, number of higher education institutions, number and square footage of higher education buildings, book value of physical plant buildings, and higher education expenditures for operation of physical plants. The data show that the scope of the typical physical plant department has increased significantly to include, such activities as round-the-clock operation of research buildings with complicated supporting services. The typical building is a mixture of air conditioned spaces fearing electronically-baliasted lighting fixtures serving complicated animal care facilities, computer-based instructional rooms, on-line libraries, or recombinant gene research laboratories, all linked by fiber optic cable to the rest of the campus and the world. At the same time, recent decades have seen a large expansion in campus populations. However, when adjusted for 1990 dollars, expenditures for physical plant departments per campus occupant have changed very little in the past three decades. (Contains 14 references.) (JB)

The 127 institutions (of 194 invited to participate) responded to a survey and provided data on admissions criteria, orientation activities, instructional delivery patterns, and program exit criteria. A summary profile describing the typical doctoral degree program in educational administration/leadership was developed using this baseline data. The average doctoral program admits 18 student annually and requires an admission profile that includes the following: a minimum score of 1000 on the verbal and quantitative subtests of the Graduate Record Examination, an undergraduate grade point average (GPA) of 3.00, a graduate GPA of approximately 3.23, a writing sample that includes an essay with a personal statement of goals, and a personal interview. Though doctoral programs bear a strong resemblance to each other and generally follow traditional lines, the study found evidence of new practices such as portfolios, mentors, internships, field-based programs, and technology, as well as a trend in program restructuring and redesign. The comprehensive examination and dissertation continue to be the primary requirements for

exiting the doctoral program. Twenty institutions reported that they had recently completed or were planning program redesigns. (Contains 17 references.) (JB)

Overview of Literature Related to the Study and Practice of Academic Fund Raising.

Pub Date—94

Note—19p.

Pub Type— Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Colleges, Donors, Educational Finance, Financial Support, "Research Methodology," Research Niecds, "Schools Identifiers—"Research Trends

This paper examines the study and practice of academic fund raising, reviewing the major trends in both the scholarly and professional literature and summarizing recent research on the topic. It considers the history of academic fund raising, institutional advancement, and the psychology of giving, discussing research that looks at the social and individual factors that affect fund raising and philanthropy. It then examines research on fund raising systems and practices, as well as the individuals who work at raising funds for academic institutions. Finally, the paper outlines four goals for further research on academic fundraising. Such research meds to: (1) develop more theoretical bases for predicting and understanding individual giving; (2) define and outline the responsibilities, tasks, and challenges of fund raising offices; (3) define measures or criteria for determining fund raising effectiveness; and (4) gain acceptance by the academic community as a serious avenue of inquiry. This report provides various data on student assessment and resource management at Utah's four state universities and five public community colleges. Part 1 discusses the admission requirements of the institutions and the number of students enolled in remedial/developmental coursework at each school. It then examines student progress measures and student outcomes assessment measures, such as licensure examinations, student surveys, exit interviews, placement information, and transferrates. Part 2 addresses the management of faculty resources, focusing on student/faculty ratios, and faculty distribution of time. It then examines faculty assessments such as student course evaluations, faculty research, external grants, and public service. Program measures, such as reviews and accreditations, as well as facility measures, such as fibrary quality and space utilization, are also reviewed. (MDM)

Identifiers—Purther and Higher Educ Act 1992 (Great Britain), "United Kingdom
This collection of seven articles examines achievement-based resourcing (ABR), the concept that the funding of educational institutions should be linked to their success in promoting student achievement, with a focus on the application of ABR to postsecondary education in the United Kingdom. The articles include: (1) "Introduction" (Mick Fletcher), which discusses the current shortcomings and possible future directions of ABR; (2) "Achievement-Based Resourcing: Purpose and Prospects" (Richard Gorringe), which examines ABR in the context of the Further and Higher Education Act of 1992 and other national developments; (3) "A Credit-Based Resource Model for Further Education" (Peter Wilson), which outlines a credit-based model of postsecondary education designed to widen access, improve quality, and increase flexibility; (4) "Resourcing Tomorrow's College" (Milke Field), which examines several methods for the funding of postsecondary education; (5) "Are We Really Considering the Customers" (Tony Webb), which examines several methods for the funding of postsecondary education; (5) "Are We Really Considering the Customers" (Tony Webb), which examines the case for extending the training credits initiative to cover full-time postsecondary education; (6) "Achievement-Based Resourcing" (Lindsay Martin), which looks at the use of output-related funding by the Department of Employment; and (7) "Achievement-Based Resourcing: A College Manager's View" (Jenny Shackleton), which discusses the implementation of an ABR approach at Wirral Metropolitan College. Responsibility, *Leadership Styles, Postsecondary Education
Identifiers—*Educational Leadership
This paper examines the nature and function of leadership in the management of postsecondary educational institutions. It explains the need for studying educational leadership and reviews various theories on the nature of leadership. These include the trait, situational, social influence, functional (or action-centered), contingency, contextual, and strategic leadership theories. The paper then examines the transformational or empowering leadership cycle, which can serve as a model for educational leadership. This cycle emphasizes vision, action, and reflection. Finally, the paper discusses four dimensions of educational leadership; symbolic, political, managerial, and academic. (Contains 26 references.) (MDM)

This paper examines methods that postsecondary institutions can use to cope with faculty and staff incapability, focusing on schools and practices in the United Kingdom. It first discusses the nature and scale of faculty staff incapability in the United Kingdom, reviewing relevant court decisions. It then examines administration responses to incapability that may result from incompetence, short-term sickness, and long-term illness. The paper suggests that administration responses to incapability need to address the purpose of action, coverage, stages, time limits, appeals, sanctions, and recordary it also discusses the conduct of review panels, investigations, and hearings, as well as the relevance of communication, training, and collective bargaining agreements. Appendices offer guidelines and procedures for decision-making in determining incapability. (Contains 15 references.) (MDM)

Postsecondary Education, Retrenchment, Staff Utilization Identifiers—*Cost Containment, Cost Management, *United Kingdom This paper discusses activity analysis and the identification of options as the first two stages of a structured approach to achieving budget savings at postsecondary institutions, focusing on schools and practices in the United Kingdom. It presents five checklists of opportunities for reducing spending and controlling costs. The checklists cover: (1) management staff costs; (2) other staff costs (including staff changes, resignations and dismissals, new appointments, and contractual changes); (3) capital sassets costs; (4) non-staff recurrent costs (including security, insurance, utilities, catering services, professional services, finance and contract management, purchasing, examinations and validation, publicity and marketing, staff development, expense accounts, and hospitality); and (5) costing and pricing. The paper concludes that postsecondary institutions can eliminate waste and better utilize their limited resources through an analysis of their activities that focuses on the identification of possible budget savings. This handbook provides a practical model for developing and using a comprehensive faculty evaluating system that responds to the specific needs, concerns, and characteristics of the faculty and administration of an individual academic unit. It outlines an eight-step procedure that focuses on the determination of: (1) the faculty role model parameter values; (3) roles in the faculty role model; (4) role component weights; (5) appropriate sources of information; (6) information source weights; (7) how information should be gathered; and (8) appropriate forms and protocols. It also examines the selection and development of forms for the student evaluation of faculty, providing amplies of published rating forms and systems. A list of over 500 student rating form items is included. An appendix contains a sample faculty evaluation manual. (Contains approximately 550 references.) (MDM)

ED 378 874 HE 028 023 Strategic Plan To Ensure Racial and Ethnic Diver-sity in Connecticut Public Higher Education. Annual Report: Docember, 1994. Connecticut State Dept. of Higher Education, Hart-

Identifiers—"Connecticut, Diversity (Faculty), Diversity (Student)
This report describes the activities and results of
three programs instituted under Connecticut's Minority Advancement Program (MAP) to promote
racial and ethnic diversity in Connecticut public
higher education. The Connecticut Collegiste
Awareness and Preparation Program (ConnCAP),
which enrolled 1,585 students in 1993-94, is designed to give high school students from disadvantaged backgrounds the necessary skills and
motivation for success in college. The Minority Enrollment Incentive Program (MEIP) monitors the
access, retention, and graduation rates of underrepresented minorities in Connecticut public colleges
and universities. It found an overall increase in minority access, retentione, and graduation rates between 1990 and 1994. The Minority Staff
Development and Recruitment Program (MSDRP)
aims to achieve representative employment for minority faculty, administrators, and other professional staff at Connecticut public colleges,
universities, and central offices. It found an increase
in the percentage of minority staff between 1992
and 1993. Six appendites provide information on
MEIP goals, ConnCAP college-school district partmerships, MEIP peer review committee, MEIP
grants to institutions, and MSDRP grants to institu-

tions. (MDM)

This report discusses the establishment and operation of the Federal Direct Student Loan Program (DL), enacted by Congress in 1993 to partially replace the existing federal guaranteed student loan rograms with a single program that would make loans directly to postsecondary students through their achools. The DL program will be phased in over a 3-year period so that it will originate at least 60 percent of all new federal loans to students during the 1998-99 scademic year. The new DL program includes four different repayment plans: standard, graduated, extended, and income-contingent. The development of the income-contingent plan was particularly controversial, since it was estimated that 52 percent of borrowers would be subject to negative amortization at some time during the loan life, incressing their debt. Other concerns about the DL program include its impact on the general availability of loan aid for students, the ability of the U.S. Department of Education to administer the program, and the program costs. This report discusses recent changes in federal aid to postsecondary students enacted by Congress during 1992-93, focusing on the 1992 Amendments to the Higher Education Act and the 1993 Federal Direct Student Loan (DL) Program. The report reviews recent issues surrounding federal aid to postsecondary students, such as program accountability and simplification, and discusses the various types of grants, loans, and national service programs available to students. It then discusses the changes made to various federal aid programs in the areas of institutional eligibility, default rates, and need analysis. Specific changes in the Pell Grant and Guaranteed Student Loan Programs (now called the Federal Family Education Loan Program) are then examined, including unsubsidized loans, loan limits, interest rates and fees, cost saving and risk sharing, repayment options, and consolidation loans. The report then discusses the DL program, (MDM)

1992, "Pell Grant Program, Program Characteristics
This report discusses the Federal Pell Grant Program, the largest need-related federal postsecondary student grant program administered by the U.S. Department of Education, along with recent changes in the program authorized by the 1992 Amendments to the Higher Education Act. The program is designed to assist student from low-income families who would not otherwise be financially able to attend a postsecondary institution. The report reviews student eligibility, grant size, award rules, and need analysis, along with the characteristics of grant recipients. It also outlines the functions of postsecondary institutions participating in the program related to the control of fraud and abuse, application errors, and financial controls. Finally, the report discusses funding trends for the Pell Grant Program from 1980 through 1994, as well as suggestions for program improvement. It argues that increased funding levels are needed to restore Pell Grants as the foundation of federal student aid. (MDM)

This report discusses the Federal Family Education Loan (FFEL) Programs, formerly referred to as the Guaranteed Student Loan (OSL) Programs, which are designed to insure and subsidize loans private lenders make to students and their parents to help them meet the cost of postsecondary education. Chapter 1 outlines the major features of the FFEL Programs. Federal Stafford loans (subsidized and unsubsidized), Federal PLUS loans, and Federal Consolidated loans. Chapter 3 examines the administration of the FFEL programs by lenders and guaranty agencies. Chapter 4 discusses borrower repayment relief, while chapter 3 reviews loan default and its consequences. Two appendixes provide basic program data and default statistics. (MDM)

This paper presents a review of the literature on governance and management of higher education, BEE JUN 1995

offers a set of concepts for discussion on higher education governance, and identifies recent trends that might have a significant influence on the development of higher education systems. It examines the dynamics of higher education systems, focusing on the distribution of authority, the possibilities of market coordination, governmental steering strategies, the role of buffer organizations, management processes, and educational quality. The paper concludes by discussing the issue of governance in higher education in the context of developments and problems in developing nations. It argues that certain major changes, such as deregulation, decentralization, and a decreased government role, are needed to solve the present crisis in higher education in developing nations. This report presents the results of an employment

dents), National Surveys, Sex Differences
Identifiers—New Zealand
This report presents the results of an employment
survey of 15,583 New Zealanders who received university degrees, diplomas, or certificates during the
1992-93 academic year. Section 1 describes the survey design and population, as well as the general
results. The survey found that 47.3 percent of graduates were employed, 27.9 percent were engaged in
further study, 13.8 percent were looking for employment, 9.3 percent were going overseas, and 1.7
percent were not available for employment. Reaponses are also tabulated by gender, occupational
grouping, and major employment sector. An appendix provides comparisons to 1991 and 1992 data.
Section 2 provides observations on the outlook for
graduate employment, which seems to be improving
alightly. Section 3, the bulk of the report, provides
information on employment destinations for recipients of bachelor's degrees by major subject area.
Data is provided for graduates in the following
fields: agriculture and horticulture; architecture,
planning, and surveying; biological sciences; consumer and applied sciences; dentistry; education; engineering; fine arts, music, and drama; forestry; humanities; law; mathematics, statistics, and
operations research; medicine and human biology;
paramedical; physical education, parks, recreation,
and tourism; physical sciences; social sciences; technology; theology and divinity; and veterinary science. (MDM)

This case study of the early development of communication strategies
This case study of the early development of CONET, a consortium of 35 libraries of multitype educational institutions in northwest Pennsylvanis which is providing CD-ROM access to library patrons. Identified barriers included lack of research, resistance to change, conflict among partners, and lack of communication. Strategies implemented to RIE JUN 1995

overcome these barriers were openness and responsiveness. The resulting co-model is identified as the Collaborativ overcome these outsides. The resulting communication model is identified as the Collaborative Openness, Awareness, and Responsiveness (COAR) Model. Data were gathered during the 2-year planning and implementation stage of CDNET by analyzing the implementation stage of CDNET by analyzing the partnership's communication documents and efforts and by conducting three sets of interviews with decision-makers and implementors. The results of the study established a strong consensus of primary motivations between school and university personnel. The common thread of the motivations given seemed to be the use of technology and networks to provide faculty with greater accessibility to information. Findings on perceived obstacles showed less consensus and identified a greater number of items. Five appendixes provide copies of interview questions, as well as lists of motivations and obstacles discovered. (Contains 45 references.) (MDM)

"Ethical Instruction, Governance, "Higher Education, "Moral Isaues, Politics of Education, Scholarship, Self Actualization, Self Concept, Student Evaluation
This book argues that higher education is fundamentally a moral enterprise that needs to be guided by commitment to what is morally right and fundamentally good, it takes issue with prevailing tendencies to give attention merely to what is intellectually warranted, operationally feasible, or superficially attractive to students who consider themselves more as consumers of educational wares than as aspirants to membership in a special guild. Sixteen chapters consider the purpose of education; education and selfhood; cognitive, affective, and kinesthetic skills in the wholeness of selfhood; the significance of the community for the institution of learning, frolic and celebration in the academy; grading and growth; curriculum boundaries and methodologies; certainty and doubt; scholarly style; scholarly ethos; pedagogical interaction; learning and social responsibility; power and credibility; the academy as neighbor and citizen; governance as communal responsibility; and policy study. Each chapter contains a list of references. (MDM)

State Universities, Undergraduate Study Identifiers—New York, "State University of New York
This three-volume report presents the results of the annual survey of the geographic origins, or permanent residence, of students attending institutions of the State University of New York (SUNY) during the Fall 1993 term. The first volume summarizes:

(1) the distribution of all credit course students by load (full-time/part-time), level (undergraduate/graduate), residency, and relative distance measures for New York State residents; (2) the origins of new (first-time and transfer) undergraduate studenta; (3) each institution's enrollment by level, load, history (first time (transfer), and permanent residence; and (4) data on the total State University system as well as the institutions by type. Volume II provides enrollment data for each New York State county, permanent residence of students from outside of New York State broken out by standard geographic regions, percent distribution of all undergraduate and graduate credit course students in terms of institutional totals distributed across the four New York State Planning Regions and region totals distributed across institutions, and percent distribution of all first-time full-time and transfer undergraduate sudents in terms of institutional totals. Volume III displays data on trends in geographic origins from 1959 through 1993, by individual institution and institutional type, including a 7-year trend in the New York origins of full-time first-time tudents for each SUNY institution or institution type. Identifiers—"Continuous Quality Improvement
This volume presents descriptions of Continuous Quality Improvement (CQI) as it is being applied at 25 institutions of higher education. It offers 25 different perspectives on use of the strategic framework, and provides numerous ways to think about issues confronting campuses that decide to embrace CQI. An introduction outlines CQI's beginnings in W. Bdwards Deminiga" Total Quality Management movement, and examines obstacles to CQI and where CQI is heading. Each of the 25 descriptions considers the institution's reasons for embracing CQI, getting started, the strategic framework, obtacles, key successes, academic activity, faculty resistance to CQI, next steps, and hindaight. The 25

institutions described are: Babson College (Massachusetta), Belmont University (Tennessee), Cornell University (New York), Dallas County Community College District (Texas), Delsware County Community College (Pensylvania), El Camino College (California), Fordham University Graduate School of Business (New York), Fox Valley Technical College (Wisconsin), George Mason University (Virginia), Georgia Institute of Technology, Lamar Community College (Colorado), Maricopa County Community College (Colorado), Maricopa County Community College (Colorado), Maricopa County Community College (Arizona), Rochester Institute of Technology (New York), St. John Fisher College (New York), Samford University of Michigan, University of Michigan, University of Minesosta, University of Tampa (Florida), and University of Wisconsin-Madison. The survey instrument is appended. (JDD)

Identifiers—"Central Missouri State University
The Best and Brightest Program at Central Missouri State University (CMSU) encourages talented high school students to enter the teaching profession. High school students with effective teacher attributes are nominated, through collaboration among university personnel, elementary secondary practitioners, educational organizations, and alumni. These students are contacted directly by university personnel and urged to pursue university studies in education. The students are invited to Career Day for Talented Students in Education, where they receive an overview of career opportunities in education and the university's teacher educations in Education and the university teacher educations in Education and the university teacher educations in Education and the university's teacher educations. Career Day for Talented Students in Education, where they receive an overview of career opportunities in education and the university's teacher education program. Nominations are aligned with state and university scholarship programs designed to provide financial incentives for the students. Evaluation of the program indicates it has led to a significant increase in Missouri Teacher Education Scholarships received by students planning to attend CMSU and in the percentage of freshmen distinguished scholar candidates committed to teacher education. From the first to the second year of the program, there was a 78 percent increase in nominations and a 99 percent increase in enrollment of alented students. The model has been recognized by the Missouri Department of Education as an exemplary recruitment method. (Contains 11 references.) (JDD) exemplary recru ences.) (JDD)

To document the extent and nature of community service activity by Western Washington University
students, a survey was conducted of 1,513 individuals who received a bachelor's degree between Fall

1992 and Summer 1993. Almost half the students had participated in community service activities. These activities included internship experiences, service learning experiences that were course projects, and non-academic service projects. Most common service learning activities were in the social, health, and mental health services; other activities included volunteering in educational settings, on campus, or working for environmental goals. Students engaged in about 4,600 episodes of volunteer service during a typical school year. Most variation in rates of course-based service learning was explained by the different opportunities provided by different major fields. Individuals who volunteered more often were, typically, women, those whose goals emphasized service to society, and those whose goals idd not emphasize income levels. Graduates felt that their service learning activities were extremely valuable in providing new awareness and personal self-improvement. The great majority of service learning participants felt that the university should "definitely" or "probably" increase community service opportunities. (JDD)

This report presents 10 tables of data on the residence and migration of first-time college freshmen
in the fall of 1992 using data from the residency
portion of the "Pall Enrollment" survey of the Integrated Postsecondary Education Data System
(IPEDS). The data are presented by state, by control and level of institution, for all first-time freshmen, and separately for first-time freshmen who
graduated from high school in the 12 months prior
to the fall of 1992. The IPEDS residence report for
fall 1992 accounted for 2.099 million first-time
freshmen. Almost 350,000 of these freshmen (17
percent) migrated between states. Other highlights
of the data include the following: (1) the percent of

first-time freshmen who left their state to attend college varied considerably by state ranging from a low of 6.4 percent in Utah to a high of 52.9 percent in the District of Columbia; (2) in Rhode Island and Vermont over half the classes of first-time freshmen were from out of state; and (3) first-time freshmen who had graduated from high school in the 12 months prior to the fall of 1992 comprised only about 67 percent of the total class of first-time freshmen. Appendixes describe the survey and offer information on study methodology. (JB)

mancial Englency, Higher Education, Flogman Termination, *Retrenchment, Student Pinancial Aid Identifiers—*Department of Education, Elementary Secondary Education Act Title I, Family Education Loan Program, Pell Grant Program Linda G. Morra of the General Accounting Office testified on possible savings in the Department of Education in order to assist the House of Representatives' Appropriations Committee as they considered budget reductions and rescissions. Morra testified first on the need to reexamine programs previously suggested by the Department of Education for elimination because they duplicate other programs, their purposes are already schieved, or they are more appropriately funded through non-federal resources. Next Morra offered evidence on potential funding reductions in higher education programs. These included reductions to the Federal Family Education Loan and Direct Student Loan programs, efficiencies in the Pell Grant Program, and consolidation options among 22 smaller programs representing \$1.1 billion, targeted to specific segments of the school population. Morra also suggested savings in employment training programs for programs that account for \$5 billion in 1995) that currently serve overlapping populations. In closing testimony Morra cited potential means to reduce the negative impact of any Title I or other formula grant funding for student loans, options for reducing funding for student loans, options for reducing funding for fell Grants, and programs for reducing funding for fell Grants, and programs that are candidates for consolidation. A national survey of trends in college grading
practices was conducted in 1992 by gathering data

from college registrars. The survey instrument, which had been field-tested, was sent to registrars at 2,302 institutions and responses were gathered from 1,601 (70 percent response rate). Among the general findings were the following: (1) 97 percent of respondents indicated their institutions use some form of a letter grading system and 90 percent use a 4.0 grading scale; (2) data showed movement away from including transfer grades in both grade point average calculations and in making honors determinations; (3) 98 percent of institutions allow faculty to authorize a grade of "incomplete" in special circumstances; (4) there was great variation between institutions on the time period at which grade changes are no longer allowed and on deadlines for students to drop courses without the enrollment appearing on the permanent scademic record; (5) 86 percent of institutions allowed students to repeat courses to better their grades, and the majority of these included the most recent or highest grade in the student's cumulative grade point average. Appendixes contain the survey instrument, further tables of data, and American Association of Collegiate Registrars and Admissions Officers member profiles. (Contains 48 references.) (JB)

Introductory material explains offense categories and how crime and clearance rates swere calculated for this report. Based on information submitted by the colleges, individual reports summarize the situation at each of 80 institutions. Each report reflects fall term campus population and summarizes monthly crime reports for 34 types of offenses. Each report also includes information on offenses falsely reported, offenses cleared, and clearances involving individuals under 18 years old. One table reports summary totals for all colleges and universities. A final table compares offenses reported for each year, percent increase, and offenses as a percentage of the total for the year. This table shows that the total number of offense reported on Tennessee campuses decreased for the second year in a row from 7,820 in 1992 to 7,658 in 1993. (JB)

This paper argues for an increased role and the importance of higher education in the continuing professionalization of fire service. The article opens by describing the development of higher education in fire service that began with a 1966 Wingspread conference for fire service leaders where a three tiered model and seven content areas were defined. A second Wingspread conference in 1976 evaluated progress in higher education and professionalism for fire service and revised the model to include a private-sector path and graduate education. The next section discusses the similarities and differences between fire and police education noting that to the extent that law enforcement is a profession it is to some degree due to it association with the legal profession. The next section describes central concepts associated with graduate schools and degrees: discrete discipline, research, and body of knowledge. Each of these, the article argues, could be applied to fire service as a graduate discipline. A final section, addressed to fire service members directly, discusses making choices for professional development through additional professional education. (JB) cation. (JB)

This volume presents six lectures on the future of universities in the 21st century, and how they can best meet the future economic and social needs of the United Kingdom. "The Idea of a University" (Stewart Sutherland) reviews some dominant images of university and concludes that university educated individuals should be better equipped to play a wide variety of public roles. "One Industrialist's Views" (Graham Day) reviews post graduation employment, admissions standards, customer satisfaction, the teaching research relationship, and institutional management. "The Research Mission and Research Manpower" (David Phillips) reflects on the emergence of the research mission in universities, characterizes diverse university funding sources, describes the relationship between universities and their funders, and looks at the need for long-term planning in research workforce development. "University 2050: The Organisation of Creativity and Innovation" (Hans Van Ginkel) focuses on the up-scaling of society and the recent development of a knowledge-intensive society. "The University in the Community" (Anne Wright) argues that universities are places for learning and that teaching students is the university's central purpose. "Scholarship Reconsidered: Priorities for a New Cantury" (Ernest Boyer) considers the future of the University from the perspective of higher education in the University from the perspective of higher education in the University and considered Priorities for a New Cantury" (Ernest Boyer) considers the future of

This is a guide for minority group members who are considering entering law school and offers suggestions for success in the application process, in law school itself, and in choosing a career path. The first chapters guide the reader in self-assessment. Chapter 1 poses challenging questions about reasons for considering law school and offers soggestions. Chapters 2 and 3 discuss the significance of schievement test scores and undergraduate transcripts. Chapter 4 encourages the reader to see him/herself as a valuable candidate for law school. Chapter 5 explores financial options including financial aid sources, and where to seek further information. The second section concentrates on exploration of law schools. Chapter 6 looks at how to gather information and how to assess the schools that best match particular needs and interests. Chapter 7 answers questions about sending out applications. Chapter 8 offers additional detail about communicating with the admission office especially ways to demonstrate accomplishments in college and professional life. Chapter 9 describes what happens in the admission office seter the application arrives. Chapter 10 discusses what to do, and what

to think about when a response arrives. Profiles of practicing minority group lawyers are interspersed throughout the volume. Appendixes contain deci-sion profiles, sources of information on financial aid, suggested readings, and information on differences between law schools approved and not approved by the American Bar Association. This volume presents 41 papers on teaching and

Student Reiationship, Teaching Methy Student Reiationship, Stills, Undergraduate Study Identifiers—Diversity (Student)

This volume presents 41 papers on teaching and learning in the college classroom. Papers include empirical studies as well as papers offering philosophical views and informed speculations. Both quantitative and qualitative research are included; and many different research and theoretical perspectives are represented—educationist, feminist, humanistic, psychological, sociological, anthropological, and more. Articles vary from research reports to literature reviews to essays to practitioner-oriented articles. The reader is divided into six major sub-areas. Part 1 establishes historical perspective on the nature and practices of college teaching and learning as well as the historical background of research conducted in this field. Part 2, in examining learning theory and related research as it applies to post secondary settings, addresses the important implications associated with student diversity. Part 3 introduces some general models of teaching followed by specific teaching strategies for classroom implementation. Part 4 focuses on the classroom as an interactional settings and considers teacher and student expectations, teachers' behaviors and practices, and student expectations.

Part 5 provides evidence about student cognitive and noncognitive outcomes, as these outcomes are related to the instructional activities in the classroom and to the effectiveness of the teacher. Part 6 reviews the literature on effective models and techniques for improving teaching, and presents some examples of recent innovations for instructional improvement. Each sub-area also contains an introduction to the group of articles and a list of suggested readings. (Most articles also contain references.) (JB)

This guide to paying for college is written for the state expect to the state of the stat

ings Bonds
This guide to paying for college is written for families that expect to pay most, if not all, of the costs of college out of savings, investments, gifts, inheritances, borrowed funds, or a combination. It outlines usual approaches but also indicates some unorthodox methods. Chapters cover the following

topics: (1) planning for college expenses; (2) saving; (3) savings instruments (financial instruments; savings accounts; NOW accounts, money-market deposits; certificates of deposit, money-market funds, savings bonds, treasury bills, notes, and bonds; government securities; mortgage-backed securities; zero-coupon bonds; mumicipal bonds, corporate bonds, common stocks, insurance; (4) gifts (inheritances, gifts under the Uniform Gifts to Minors Act, and "borrowback"); (5) taxes and income shifting; (6) trusts and loans (minors' trusts, Clifford trusts, Crummey trusts, and charitable-remainder trusts); (7) business and college costs (hiring children, educational fringe benefits, children as partners, corporations, business gifts and leasebacks, borrowing from retirement plans); (8) borrowing (pay-asyou-go, lines of credit, home equity loans, margin financial strategies to personal circumstances (profiles of six types of families). Appendixes contain 1994 tax rate schedules, gift tax table, income tax rate for trusts, interest rates and yields, and worksheets and tables. Includes a glossary and an index. (JB)

This book approaches college and university budget reduction mandates as an opportunity to reexamine and recast outdated, inefficient processes and
to increase administrative effectiveness and efficiency in supporting the academic missions of
teaching and research. The book uses a road-map
metaphor to tell the downsizing story and to advance the notion that downsizing can be approached like a journey. The chapters are titled: (1)
"Planning the Plan: Drawing the Map"; (2) "The
Budget: Reading the Roadmap"; (3) "Effective
Communication: A Two-Way Street"; (4) "Contracting Out: Deciding Whether to Lesse or Own";
(5) "Managing Benefits Costs: Maneuvering a Tight
Turn"; (6) "Managing Risk: Assessing Insurance
Options"; (7) "Reduction Alternatives: A Multiforked Road"; (8) "Programs and Policies: Yielding Right of Way to Laid-off Staff"; (9) "Early
Retirement: Respecting Where You've Come
From"; (10) "Retaining the Institution's Multicultural Character: Many Routes to the Right Place";
(11) "Plexible Work: How To Turn Detours into
Shortcuts"; (12) "Commitment through Work Redesign: Rebuilding the Roads and Bridges"; (13)
"Downsiring Human Resources: Mapping Your
Own Course"; (14) "Monitoring and Reporting
Checking the Landmarks Against the Map"; and
(15) "Old Contract/New Contract: Changes on the
Road to Reduction." Appendixes contain a sample
early retirement agreement and a salary and benefit
cost reduction management guide. (JB)

Identifiers—*National Faculty Salary Survey
This volume presents data from the 13th annual survey of faculty salaries by discipline and rank in the nation's public colleges and universities. Three hundred and seven institutions participated in the survey. Data are presented by disciplines and major field and for both institutions with and without collective bargaining. A final table presents discipline averages in all major fields. A comparison of increases in annual overall salary averages for all institutions over the past 7 years found that average salaries and increased from \$32,980 to \$45,951. Other highlights included the following:
(1) engineering led the salary survey in overall average salaries above the overall average salaries above the overall average salaries as \$57,396, (2) 22 of the 55 disciplines had average salaries above the overall average, (3) as of the 55 disciplines/major fields had at least one faulty member's salary of \$100,000 or more for the 9-10 month academic year, (4) the highest salary was a professor earning \$182,130 in mathematics, (5) the disciplines with the lowest percentages at the professions rank were health professions (nursing, physical therapy), Appendices list participating institutions and describe a data product service that provides special sets of data to institutions for salary comparison analysis. Programs, Taxes, Frend Analysis, Vocational Education
A group of higher education policy experts identified the most pressing federal and state public policy developments likely to be debated in 1995. This report discusses the 10 issues identified: (1) student loan changes; (2) restricted taxpayer support; (3) tax policies; (4) federal support for research and other programs; (5) State Postsecondary Review Entities and other regulatory requirements; (6) accreditation reform; (7) access and diversity; (8) work force preparation; (9) productivity and restructuring; and (10) cost and availability of technology. Discussion of each issue is limited to two pages and includes recommendations for further reading. To make the document convenient to use, an "at a glance" box contains a synopsis of each issue. An introduction compares the 1995 issues to the issues that appeared in the 1994 version of the report. (Contains 24 references.) (JDD) ences.) (JDD)

This background paper examines the current state of higher education finance—the scope of the higher education enterprise, challenges to its funding base, and undesirable consequences of current financing practices—and describes what is meant by a "restructuring" of higher education finance. It demonstrates that the structures and practices embodied in current higher education finance are neither meeting public needs nor supporting higher education's capacity to act in the public interest. The paper begins with data on current enrollments, revenues, expenditures, and credentials. Challenges to the financial base are noted, including diminishing public support, limitations of private resources, voluntary giving which is not expected to replace public subsidies, increasing proportions of ethnic groups that have lower college participation rates, and criticism of American higher education quality. Undesired consequences of current financing arrangements are identified, such as financing education through debt, diminished public investment which undercuts public influence, stratification of opportunity, and a growing mismatch between corporate investment and higher education's needs. Restructuring is defined as "a serious rethinking of higher education uses the funds it receives, and what the public and policymakers expect higher education to do. (Contains 38 references.) (JDD)

Descriptors—Cultural Differences, "Cultural Pluralism, "Curriculum Development, Higher Education, "Nutricultural Education, "Nursing Education, Program Evaluation, Student Educational Objectives

This paper was written to provide nurse educators with strategies for implementing multicultural concepts into their nursing programs. Administrators are urged to design their total educational process and educational content to reflect a commitment to cultural pluralism, in which traits of nonmainstream cultures are treated as differences rather than deficiencies. Such an approach helps all students develop more positive attitudes toward cultural, racial, ethnic, and religious groups and helps students from victimized groups develop confidence in their ability to succeed academically and to influence societal institutions. Nurses need to understand how cultural differences affect their clients' behaviors and attitudes, in order to have an impact in transcultural work. Nine specific knowledge areas that nurses should scquire to practice nursing from a multicultural perspective are outlined. Among them are knowledge of culturally relevant information related to specific diseases; and knowledge of religious variations in relation to dying, bereavement, cuthansia, and other ethical and moral issues. Nursing education faculty and administrators are encouraged to assess existing programs for elements of multicultural education. A suggested guideline is presented, addressing such elements as program atmosphere, materials, and self-understanding. (Contains 10 references.) (JDD) erences.) (JDD)

This book is designed to help college/university faculty and academic administrators become more constructive and knowledgeable participants in the budgetary process. Chapter 1 introduces budgets and the budgetary process, with an explanation of the importance of budgeting in policy making, Chapter 2 discusses economic and political contexts of budgeting and describes the framework for the budgetary process both on and off campus. It addresses the importance of enrollments as a major factor in resource issues, sources of funds, how state and local governments differ with respect to wealth and willingness to tax wealth, and other issues. Chapter 4 describes how participants influence the operating and capital budgetary processes. It discusses the meed for flexibility, the relationship between risk and budgets, and how changes in institutional character can influence the budgetary process of one institution from that of another, focusing on capital budgets and operating and capital budgetary planning for reallocation and retrenchment, emphasizing that the least disruptive strategies are those that are implemented in antici

Identifiers—"Business Process Redesign

Business process redesign (BPR) is a multifunctional, interdisciplinary, and strategic business improvement methodology designed to improve service, costs, and quality. This book provides a conceptual framework for institutions of higher education to shape such an improvement effort including examples of BPR activities and tools. Chapter 1 describes BPR's underlying philosophy. Chapter 2 presents a three-phased conceptual framework from which college/university analysts can develop their own unique approach to change. Within each phase, step-by-step tasks suggest when, where, and how institutions can weave together technological solutions, process improvement techniques, and change management strategies. Chapter 3 provides analytical tools that assess the "as-is" process design. Chapter 4 shows the results of BPR analyses, as well as the expected benefits. The examples encourage teams to look beyond the initial task of data collection to the subsequent tasks of data analysis, conclusion formation, and recommendation development. A glossary and three appendixes, containing ample work distribution charts, samples

Identifiers—Diversity (Student), England, "Loughborough University of Technology (England)
This book addresses broad issues related to flexible learning in higher education and provides specific examples of how one institution of higher
education is implementing more flexible patterns of
teaching and learning. The Flexible Learning Initiative, established at Loughborough University of
Technology in England, provides an environment
which facilitates student involvement and responsibility for the learning process. The book brings together the collective experiences of staff from a
variety of departments and subject areas and examines conceptual as well as practical issues in relation
to fiexible learning. Papers include: "Flexible Provision for Student Diversity" (Keith Hodgkinson);
"Flexibility in Course Structures" (John Costello);
"Plexible Learning and Information Technology in
Higher Education" (Phil Wild); "Off-Site Support
for Flexible Learning and Information Technology in
Higher Education" (Phil Wild); "Off-Site Support
for Flexible Learning Scheme for a First-Year
Mathematics Module" (Peter Lewis);
"A Flexible Learning Scheme for a First-Year

This book presents the personal accounts and re-

Identifiers—"Great Britain

This book presents the personal accounts and reflections of 10 individuals who were given leadership responsibility for the implementation of certain aspects of change in institutions of higher education in Great Britain. The contributions illustrate key dimensions of these changes—the development of strategies aimed at widening access, the introduction of new teaching and learning methodologies in light of increasing student numbers and a declining unit of resource, the utilization of short-term project funding to achieve curriculum change, responses to increased competition and accountability in relation to research, emphasis on generic staff development, and the more active and influential role for students in shaping the educational system. The collection

begins with Part 1, an introduction by Maria Slowey titled "Reflections on Change-Academics in Leadership Roles." Part 2, titled "Leading Change-Heads of Department and Others," presents "Making It Happen-Reflections on a Varied Career" (Christine King; "A Learning Curve in Change Management" (David Thorley); "Accessibility and Institutional Change" (Richard Taylor); "Using Total Quality Management as a Management Tool in Educational Support Services" (Peter Slee); and "Managing Transformations in University Departments" (Jennifer Tann). Part 3 is titled "Implementing Cross-Institutional Change" and presents: "Using Projects for Dynamic Intervention in the Curriculum of Higher Education" (Freda Tallanyre); "Student Guidance and Support-Changing the Approach" (Geoff Layer); and "Strategic Management of the Further Education Curriculum" (Ian Todd). Part 4, "Opportunities for New Actors in Times of Change," includes "Times of Change or Times of Change," includes "Times of Change or Times of Change," (Lealey Cooke) and "Student Unions and Universities in Partnership—The Puture of Higher Education" (Lee Whitehead). An appendix by Rhodri Phillips is also presented, titled "Growth and Diversity: A New Era in Colleges and Universities." (Some papers contain references.) (JDD) (JDD)

This self-appraisal device lists more than 500 "affirmations of quality of teaching." It is intended to be used by teachers as a means to reflect on the areas of their work where they are already successful, and to work out an agenda for areas in which they wish to develop professional expertise. The checklist can also be used as a team resource, aninformal peer feedback resource, a problem identification resource, a framework for formal appraisal, a "teaching quality assessment" agenda, a discussion starter for staff development, or an instrument in preparing portfolios. The checklist items assess the following teaching areas: (1) teaching and learning in large groups (for example, asking rather than telling and using overhead projectors); (2) designing and using resources for teaching and learning (such as assembling study guides and using multimedia); (3) independent study tasks, feedback, groupwork, and assessment; (4) helping learners individually (such as negotiating learning agreements and supervising projects); and (5) personal and professional qualities and skills (such as mentoring new colleagues, team teaching, and planning for future development). An appendix documents how tehecklist links to the teacher accreditation qualification scheme operated by the Staff and Educational Development Association in the United Kingdom. This collection of reports gives a picture of educational systems from a human rights perspective,
monitoring academic freedom in the context of freedom of thought and freedom of opinion and expression. The World University Service's Lima
Declaration on Academic Freedom and Autonomy
of Institutions of Higher Education of 1988 is used as the guiding principle for activities that promote and monitor academic freedom. The collection of reports begins with "Monitoring the Right to Education: Reporting to UN Treaty Bodies" by Audrey
R. Chapman. Following this introductory paper are four papers on Africa, including "Historical Notes on Academic Freedom in Africa" (Mahamood Mamdan) followed by area studies of Malawi (Richard Carver), South Africa (Teboho Moja and Nico Cloete), and Sudan (Abdelhadi Al-Zubeir Hamad). Part, and and the Middle East, "includes papers on China (Pang Lizhi), Burma (Myanmar) (Martin Smith), Sri Lanka (Swarna Jayweera), Tibet (John Billington), Iran (Shahrzad Mojab), and Palestine (Penny Johnson and Emma Naughton). The third part, on Europe and North America, offers: "Access to Education for Refugees and Asylum Seekers in the Countries of Western Burope" and includes studies of Kosova (Peter Getettner) and the United States (James North). In part 4, "Latin America and Peru (Sinesio Lopez Jimenez) are presented. Two appendixes provide the text of the Lima Declaration on Intellectual Freedom and Social Responsibility. An evaluation was conducted of the implementation by public universities and community colleges in Illinois of state policies on student scholarship and achievement in undergraduate education. The policies were proposed in 1986 and revised in 1990 by the Illinois State Board of Higher Education in the context of state and national education reforms. State efforts included adopting admission requirements, examination of student preparation standards, and annual review procedures. Analysis of public university and community college efforts was done using summer 1994 reports from each institution. Results indicated that revised university curricula have given greater attention to students developing bachelor's level skills in communication, mathematics, and critical thinking. The most well developed components of assessment were found in writing with seven institutions reporting that they assess student writing at least once after entry. Among community colleges only 30 percent have implemented comprehensive assessment systems. Both types of institutions were making progress on comprehensitutions as assessment as imposed from the outside rather than as an integral part of academic life allowing the institution to evaluate how well it is fulfilling its purpose. Appendix A contains the 1990 revised polices. (Contains 28 references.) (JB)

A comparative analysis of family policy in various
nations looks at state financial support for families
and in particular how professional women in academia fare internationally with respect to state support
for their families. The analysis includes a review of
the general development of family support through
the industrial revolution and the 20th century, analysis of family policy in the United States, and a comparative analysis of the family policy of other
nations. The comparative analysis notes that, in European countries, family benefits are regarded as a
right. Policies are analyzed for the following
countries: Sweden, Norway, France, Germany, Beigium, Zambia, Mozambique, Ghana, India, Singapore, Peoples Republic of China, Chile, Australia,
and the United States. The final portion of the analysis examines the positive and negative aspects of
state support of the family. Positive aspects found
include support for the initial phase of parenting,
family solidarity, and equal support to all families.
Negative aspects of state support, state intervention
in family life, economic costs, discrimination
against women; were found to be not compelling.
The analysis concludes that the United States
should adopt a national family support policy. (Contains 20 references.) (JB)

Teachers
With the growing interest in leadership in teachers and in the debate over whether teacher oducation programs should foster leadership qualities, this
study assessed how senior students enrolled in the
College of Education at Marshall University (West
Virginia) perceived their own leadership skills. Participants were a random sample of 170 students
from a population of 300 enrolled in the summer
semester of 1993. Usable data from a mailed questionnaire were received from 119 students. The instrument solicited demographic information,
responses to 40 leadership skill statements, and information on the respondent's leadership activities
and organizational involvements. Analysis found
that 114 of the participants were white, that 79 percent were female, and that 62 percent worked 11-40
hours per week while statending school. Participants
appeared to perceive themselves to have greater
leadership skills in management of self and understanding others. Statements with the lowest ratings
were in the categories of communications, motivaing these low ratings suggests that communication
skills are often too narrowly defined as merely writing and speaking. Except for gender, no other demographic characteristics explained variance.

Politics of Education, Student Attitudes, Teacher Attitudes, "Total Quality Management, Universities Identifiers—Academic Community, Australia, Nottingham Trent University (England), Queensland University (England), Teesside Polytechnic (England), University (England), Teesside Polytechnic (England), University (England), University of London (England), University of Queensland (Australia) This volume on quality learning in higher education discusses issues of good practice particularly action learning and Total Quality Management (TQM)-type strategies and illustrates them with seven case studies in Australia and the United Kingdom. Chapter 1 discusses issues and problems in defining quality in higher education. Chapter 2 looks at demands for quality assurances from outside agencies, particularly governments and discusses in particular the experiences in Australia and the United Kingdom. The case study is "An Institution Responds to CQAHE" (Douglas Porter). CQAHE is the Australian government's Committee for Quality Assurance in Higher Education. Chapter 3 details challenges to higher education under current social and political conditions. The case study is "Developing Learning Agents" (Gus Pennington). Chapter 4 investigates the characteristics of quality learning. The case study is "Challenging the Theory" (Ronald Barnett). Chapter 6 explores learning and action research. The case study is "Facilitating Action Research" (Ortrun Zuber-Skerritt). Chapter 7 looks at organizational change and TOM and includes the case study "An Outcomes Approach to a Degree Programme" (Mike O'Neil and Ken Onion). The final chapter argues that institutions must support individual and collective action to bring about a community of quality. Includes an index. (Contains 165 references.) (IB)

RIE JUN 1995

and looks at some central issues and challenges to implementation. Since summative evaluation involved in tenure and promotion decisions cannot be an effective tool for instructional improvement, formative evaluation, assessment specifically designed to improve teaching, should be put into place alongside but spart from summative evaluation. Collaborative peer review is well suited to the formative evaluation task. Faculty can evaluate their colleagues' performance pre-interaction, at delivery, and post-interaction. They can also assess interrelationships among these stages and goals and objectives, methods and materials, and feedback. Methods can include direct classroom observation, videotaping of classes, evaluation of course materials, assessment of instructor evaluation of the academic work of students, and analysis of teaching portfolios. Other formats and combinations of methods have been advocated. With improved processes, faculty may be more willing to participate in peer review. Teaching improvement through peer review can come about in a way that significantly enriches individual faculty members and their institutional academic community. Nine specific recommendations from a study of formative peer evaluation are included. (Contains 8 references.) (JB)

Tais report argues for the central involvement of faculty themselves in collaborative peer review for the improvement of college teaching. An early section makes the case for formative evaluation to improve teaching and argues that collaborative peer review is well suited to the formative evaluation task. The next section examines faculty roles in formative evaluation and also the roles of students, academic administrators, teaching consultants, and faculty development programs. The following section reviews various methods used in formative evaluation including direct classroom observation, videotaping of classes, evaluation of course materials, an assessment of instructor evaluation of the academic work of students, and analysis of teaching portfolios. The section that follows describes, compares, and analyzes some examples of single-institution and multi-institution programs currently in operation. The next section discusses disincentives that may keep faculty from participating in peer evaluation including attitudes about scademic freedom, fairness, and other factors. Final sections discuss incentives to improve participation and the personal and institutional benefits of peer formative evaluation. A final section presents eight recommendations for designing peer review processes based on analysis of ter research and of programs now

tion, State Programs, "Student Financial Aid Identifiers—"Illinois
This report lists fiscal year 1995 recommended allocations of Illinois state funds appropriated to the Board of Higher Education under the Health Services Education Grants Act. These funds are appropriated to support the enrollment of Illinois residents in health professions education programs offered by nonpublic institutions including medical, dental, optometric, podiatric, pharmacy, allied health and nursing programs. Funds are also appropriated to support the enrollment of Black, Hispanic, and American Indian state residents. The tables show grant rates for residents and minority residents in each field, and allocations by institution with institutions grouped according to their type of program. Tables show total participants, state resident allocations, reductions, and recommended allocations. Appended are a statement and table showing final grant allocations under the "Illinois Financial Assistance Act for Nonpublic Institutions of Higher Learning" for fiscal year 1995. This program makes grants of direct financial aid to independent institutions in the state based on the number of full-time equivalent state resident students enrolled. (JB)

This annual report by the Commission on Higher Education's details progress toward goals and objectives, annual statistics, and key issues in accreditation and quality assurance. A recurring themse of the report and the year it covers is the changing relationship between accrediting agencies and the federal and state governments, specifically in light of the Higher Education Act amendments of 1992. Following an opening message from the executive director, the first section describes executive and professional staff lisison with institutions in a range of campus visits and office meetings related to self-study, evaluation, and the requirements and expectations for applicant and candidate institutions. A section on annual statistics lists institutions receiving candidate status, reafframed accreditation, follow-up reports, candidate reports, visits, or other developments. The next four sections discuss infor-

mation literacy and library support efforts, policy development work, new policy statements on student transfer and articulation, and accreditation of free-standing American institutions abroad. This section also discusses areas for policy work and development in 1994-95. The report includes a description of liaison with external organizations and groups, and workshops, conferences and special events held during 1993-94. A final page lists Commission members and staff. (JB)

Pianning, Teacher Role, Urban Universities Identifiers.—Faculty Attitudes, *Portland State University OR Efforts at Portland State University (PSU) in Oregon illustrate how an institution can clarify its own purposes, evaluate how the environment support its academic mission, and effectively institute changes that will bring faculty activities and institutional purposes into a more harmonious alignment. In 1990 PSU began a strategic planning process that produced a two sentence mission statement and a set of institutional characteristics to develop and promote. With these in place a process to examine whether faculty roles and rewards matched the mission and role of the institution began. Faculty attitudes toward redefined roles and responsibilities were found to fall into four categories-either committed, cautious, skeptical, or or strongly opposed. Even though initial projects focused on faculty change were chosen with care, change took longer than expected. Overall the PSU efforts focused on:

(1) creating an environment that supports change;
(2) expanding the scope of change; (3) making con-

nections and creating conditions that will sustain change; and (4) re-balancing the campus in the wake of the ripple effect that the change efforts created. Finally, the experience seemed to support a broad conclusion that institutions and individuals must be prepared for continuous change. (JB)

Identifiers—Internet, Multimedia Technology

Integrated Online Library Systems (IOLS) focuses exclusively on the issues of planning and managing automated systems in libraries and information centers. The theme of the 1994 IOLS annual meeting was "Coordinating Access to Multiple Systems," and 29 papers were selected for presentation that provide insight into the current technologies being implemented in libraries as information professionals interface multiple retrieval systems. Librarians, library automation services providers, automation consultants, and library science faculty documented their experiences with implementing the state of the art in library automation, described their visions, and made suggestions for future directions. Practical aspects of coordinating access to multiple systems are also explored in this collection. The papers are arranged alphabetically by speaker, and an index provides references to all speakers and topics. (SLD)

Descriptors—Cooperative Programs, Creative Thinking, Foreign Countries, Knowledge Level, Learning Processes, *Participatory Research, *Problem Solving, *Researchers, Research Methodology, Shared Resources and Services, *Unions Identifiers—Equality (Social), *Research Circles, Respect, *Study Groups, Sweden The research circle is a form of cooperation between trade unions and researchers that is spreading all over Sweden and beyond its national borders. The research circles described in this book were arranged jointly by SKAF (Swedish Municipal Workers' Union) and the Uppsala University Department of Education. A research circle is a study circle in which researchers participate. Another characteristic is that the work focuses on a problem that a union or other practitioners have brought to the circle's attention because it would benefit from a closer examination. The most important resource that can be used systematically in this analysis is the knowledge and experience of the union participants themselves. The participants in this analysis is the knowledge and experience of the union participants themselves. The participants in the problem under study. Research circles are based on the cooperation of all participants and everyone's knowledge is of equal value and use. The participants have a mutual respect for each other, and there is a willingness on the part of the participants to change something. The research circle liberates people from conventional structures and can be a highly creative environment. The difficulty of this approach is that the work is done slowly as unions and researcher take the time to get to know each other and bridge the gaps between their different outlooks and notions. Research circles reveal a great deal about various educational processes and how they can be related to the conditions under which diverse groups in society operate. (DGM)

tions
Identifiers—Internet, *Telecomputing
Telecomputing means using a computer that is
connected to the Internet or an online service. Examples of how some students use this technology
are presented. Illinois high school students design
their own science experiments. At a middle school
in New Jersey, home and school links and small
group collaborative learning are enhanced through
telecomputing. In Texas, a chemist helps students
discover the causes of poor quality air in their middle school. Foreign language students Pennsylvania
write messages in Spanish, French, and German for
students in other countries. Blind students in Florida explore information resources and communicate

with others in the community through a local bulle-tin board. Maryland students at a technical high school use the Sailor network to access statistics from the U.S. Department of Commerce to create career plans. Each project description includes contact information. The document also contains directions to the U.S. Department of Education On-line Library. (SLD)

Needs, "Social Development, "Technical Education
Computer education in developing nations has been proceeding quietly and on a limited scale, but it has been progressing. An overview of computer education in developing nations is presented, and an annotated bibliography is offered to inform researchers that computer education as it relates to a developing country's social, economic, and political development is an area that needs attention. Most documents about computer education in the developing countries are descriptive and lack in-depth analysis. The 93-item bibliography is based on a search of electronic databases, including ERIC. Items are arranged by across-continent, across-country, and country in alphabetical order. Subject classification is not provided, given the fact that regional unit is most relevant to comparative studies. (SLD)

Identifiers—Educational Indicators, Goals 2000, Internet, *Paradigm Shifts, *Reform Efforts
This paper summarizes and extends an earlier study that reviewed the literature on technology effectiveness, focusing on computers, traditional distance education, two-way interactive telecommunications, multimedia, and the Internet. It also adds some tools for technology evaluation as well as a rationale for using regions to distribute information resources and services electronically. Traditional and emergent definitions of technology from various strands of research are examined, and a paradigm shift from a focus on student achievement defined by standardized tests to one of diverse indicators of learning and educational reform defined by recent research and Goals 2000 is identified. An analytic framework is presented to use the dimensions of technology. Part 1 presents an overview of the framework is presented to use the dimensions of technology. Part 1 presents an overview of the framework is presented to use the dimensions of technology. Part 1 presents an overview of the framework and its uses, while part 2 discusses the new consensus on learning, policy, and technology capabilities needed to support learning and reform. Part 3 considers trends in technologies and agencies, and part 4 presents a concept of regionality as a unit of operation. Part 5 notes critical steps for research, and part 6 explores policy recommendations. Four appendixes contain eight

*Professional Development, Standards, Systems Approach, *Technological Advancement, *Telecommunications (Social), Information Infrastructure, *Reform Efforts
Telecommunications and information technologies can advance school reform to ensure the schievement of high standards if the curriculum guides the investment in technology. Technology must be planned for, and it must be implemented slowly, as an essential part of the curriculum and not as an add-on result of available funds. Systemic reform linked to efforts to build the National Information Infrastructure can have enormous impact on teaching and learning, making access to information easier and active participation by students easier and more appealing. Use of technology to help reduce educational inequity can be achieved if technology is accessible and affordable for all. In addition, students and teachers must have the support they need to be able to reap the benefits of technology. Changes throughout the school organization, particularly in the area of professional development, are necessary to integrate technology into instruction. Funding the necessary infrastructure is a complicated problem, but public-private ventures and regional consortis present two possible avenues of financial support. Ten appendixes provide supplemental information, including legislative background. (Contains 64 references.) (SLD)

The use of information technology within independent colleges is examined by analyzing data from an annual survey by the College Entrance Examination Board and one completed by the Council of Independent Colleges (CIC) members, developed by CAUSE, the national association for the management of information in higher education. The questionnaire was completed by 119 members, a response rate of 38.3%. Findings indicated that senior academic officers appear to be in pivotal positions regarding the possible integration of educational computing, administrative computing, and library information. Eighty-one percent of respondents had a campus strategic plan, and 47 percent had an information technology plan, but few campuses link the two. Investments in information technology represented a significant part of members' discretionary revenue, but members typically invested less than 2% of educational and general budgets in computing and less than 3% in libraries. CIC colleges compared well to other independent colleges and very well to public institutions with respect to information technology, but they were less likely to be connected to the Internet. Few campuses had the latest in high-end facilities. Thirty-eight figures (graphs) present survey findings. An appendix discusses survey responses. (SLD)

ilication is a technology and activity that offers great potential when integrated into academic or vocational curricula. Programs with electrical, electronics, and electromechanical content can benefit from the use of amateur radio, and can also enhance language and communications skills. The biggest value of amateur radio may lie in its ability to enhance a student's motivation and self-esteem. In addition to its specific vocational and technical applications, amateur radio can assist in teaching basic skills and in reducing the isolation of students and teachers as it promotes interdisciplinary education and cultural awareness. Amateur radio is distinctly different from citizens band, as it is a noncommercial service. Ham operators do not need an electronics background, although technical knowledge and skills are helpful. Several examples Identifiers-*Ham Radio

of the educational use of amateur radio illustrate its potential for academic and vocational education. (Contains 23 references.) (SLD)

A mail survey of a random sample of 253 West Virginia teachers elicited information related to subjects' backgrounds, telecommunications akilla, access to computer resources, preferences among common telecommunications applications, and preferences among options for learning about telecommunications for users applications, and preferences among options for learning about telecommunications for instruction, and interest in telecommunications for professional development. The mean age of respondents was 42.7, with an average of 17.6 years teaching experience. Teachers exhibited a higher level of computer literacy than telecommunications literacy, with 62% reporting themselves proficient with word processing software. More than half the respondents had computers at home and 68% reported access in the classroom. Few had access to a modem, and only about 15% had phone jacks in their classrooms. Respondents were more interested in instructional applications of telecommunications. The preferred means of learning about telecommunications was assistance from colleagues, with workshops and conferences ranked next. Data is presented in eleven tables and an appendix contains the survey. Contains two references. (SLD)

Groups of 10 or 12 students were seen twice a week for periods lasting up to 30 minutes. At these ses-

class assignments and leisure reading materials. Groups of 10 or 12 students were seen twice a week for periods lasting up to 30 minutes. At these sessions they were introduced to computer components, proper handling, how to log into a network system, and how to search for materials using Boolean terms and keyword searches. The author developed lesson plans to introduce strategies from fundamentals through advanced techniques. Special teaching methods were used to enhance critical thinking. Students also used practice keyboarding machines to help with typing skills, and a tape recorder was available so that they could listen to instructions as they did online searches. The post-test revealed that all these strategies were effective for teaching students to use the online catalog effectively, and the students' ability to have their own work stations contributed to the study's success. Project evaluations revealed the students' preferences for using an electronic database because of the options it allows. Three tables present study data, and eleven appendixes contain survey and evaluation instruments as well as supplemental information. (Contains 31 references.) (Author/SLD)

The implications of the 1994 Seels and Richey domain structure for instructional technology (IT) conceptual theory and classification systems, in general, for theory construction are explored. The historical evolution of domains in definitions of the field, the formulation of theory, the nature of taxonomies, the role of conceptual frameworks and theoretical systems, and the development of classification systems in IT with seven examples are discussed. It is concluded that without a taxonomic structure, it is impossible to progress towards conceptual frameworks or theoretical systems. The following recommendations are made to insure that 1994 definitional theory will meet the criteria of significance and usefulness: (1) spousor an Association for Educational Communications and Technology (AECT) invitational symposium to address reactions to the domains, relationships between them, and taxonomic issues; (2) continue the relationship with Professors in Instructional Design to explore taxonomic issues; (3) arrange divisional discussions concerning domains and taxonomic development; (4) identify research needs and pursue through integrative research; reviews, cognitive mapping, or descriptive research; reviews, cognitive mapping, or des

"Teaching Methods, Training Methods Identifiers—Finland
The aim of this study was to test the hypothesis that the different teacher groups of the Finnish comprehensive school differ from one another in the pedagogical thinking and practices. The suthors of this article have conducted teacher in-service-training on integrated curriculum using new educational technology (interactive video and a database on integrated teaching). The subject area was the integrated curriculum based on developmental work coordinated by the supervising teacher. Teachers' thinking and attitudes were surveyed after training in the groups of class-teachers and subject-teachers (N=39). The differences between those groups were tested in 11 variables using the t-test. The main results were as follows: (1) both teacher groups thought that they had received new and reliable information, which cannot be received easily from other information sources; (2) the class-teachers tended to feel working on the interactive video and database more interesting and easier than subject-teachers; and (3) the class-teachers also had received clearer ideas of the working modes in integrated teaching than the subject-teachers. Thus, the hypothesis clearly was supported and useful feedback was obtained of such teaching materials and methods. A copy of the questionnaire is included, and data is presented in six graphs. This paper describes some development and initiatives in educational technology in Brunei
Darussalam. The benefits of educational technology to the teaching-learning process are listed, and a brief description of Brunei, its schools, educational policy, and bilingual education system is given. Topics include: (1) media approaches to teaching, especially the use of educational television; (2) development of Educational Media Resources Units (EMRU); (3) a computer studies course for development of Educational Media Resources Units (EMRU); (3) a computer studies course for lower secondary school students; and (4) teacher training programs, including a mandatory course in educational technology. The conclusion notes that, because this is an age of accelerated technological advances, educators have a critical responsibility to prepare students for a future in which they will be constantly tested by change and challenged with new information. Identifiers—Keywords, Subtitles (Television), *Tai-wan, Verbal Memory, Visual Memory
The purpose of this study was to investigate the effects of various translation methods used in imported instructional video programs on Taiwan elementary school students' visual and verbal memory. Following pretesting, 128 fourth grade students from an urban public elementary school in northern Taiwan participated. The students in 4 experimental and 1 control group, watched a 20-minute video program on the reproduction and birth behaviors of animals which was translated in one of the following ways: (1) Chinese narration, with no subtitles; (3) Chinese narration, with complete Chinese subtitles; (4) Chinese narration, with complete Chinese subtitles; (4) Chinese narration, with complete Chinese subtitles; (3) Chinese narration, with hos subtitles. The students were immediately given a post-test, and retested two weeks later. The 51-tiem test measured their visual and verbal memory subtests, in both immediate and delayed posttests. In terms of verbal memory, the Chinese-narration-key-words-subtitle group and the control group in the immediate posttests, in the delayed posttest, here was no significantly outperformed the control groups. In total score, Chinese-narration-no-subtitle group significantly outperformed the control groups. In total score, Chinese-narration-no-subtitle group significantly outperformed the control groups, both in immediate and delayed posttests, there was no significantly outperformed the control groups. Based on these results, it is suggested that Chinese narration be added to imported instructional video programs

This paper outlines how to teach an introductory workshop about the Internet, It includes field-tested instruction and materials, training session agendas, exercises, materials for use with or without handson computer work, a pre-workshop needs assessment form, an instructor evaluation form, and Internet navigation exercises. Although the field test was implemented with graduate students, many of the materials and techniques may be adapted to younger learners. The materials were designed with a plan for teaching students basic computer network skills and information before going online. Since teaching about the Internet presents unique problems such as lack of Internet access and students with a broad range of computer skills and interests, the training accounts for these challenges in the following ways: (1) through the use of three separate training seasions (agendas), one without using computer, but not connected to the Internet, and another with online exercises for those students with a basic knowledge of the Internet; (2) through needs assessment forms which differentiate levels of learners' experience and determine what hardware, software and protocol is available to the user; (3) a workshop evaluation form; and (4) a technology

training checklist. An appendix provides outlines of the three training agendas, the workshop evaluation form, a computer network interest survey, an intro-duction to and history of the Internet, and a list of world wide web (WWW) sites of interest to educa-

Identifiers—Empirical Methods, "Theory Development
Sound practice requires sound theory, and if instructional technology is to mature either as a field or a profession, theory that not only speaks to those problems unique to the field, but is also conceptually sound is required. Instructional technology, though having a practical focus, must build conceptual theory bases rather than relying primarily upon the use of procedural models. This position implies: (1) expanding our knowledge base by addressing processes, variables, and outcomes previously not studied in a systematic fashion; (2) constructing theory in many formats in addition to that of a procedural model; and (3) establishing an empirical foundation for and validation of those procedural models that currently serve as theory. The discussion includes an introduction to the nature of conceptual theory base in information technology; and validation of the field's existing procedural models. (Contains 25 references.) (MAS)

One such point is in the area of visual imagery, Studies have shown that imagery preferred by males and females differs in certain visual characteristics. The purpose of this paper is to: (1) review characteristics of gender-based imagery preferences of children identified in the literature; (2) relate these characteristics to a taxonomy of aesthetic-developmental stages; and (3) present research guidelines and considerations for selecting images based on imagery preferences and gender-based influences with respect to sesthetic awareness and art experience. Ciris tend to prefer colorful, detailed images of people (especially female characters), plants, and animals, and those that are peaceful. Boys prefer images that imply action, suspense, danger, or rescue, and/or that include male characters and vehicles. A child's prior knowledge of art should be considered as a factor in imagery preference because aesthetic development can be accelerated by strong art education programs. When selecting instructional images based on gender, certain artistic factors must be considered: the artistic style of the image; the subject matter; prior experience or exposure to the image; and the appropristeness of ca

The goals of this telecommunications project are
for students to: (1) gain a better understanding
about the world and its people by communication
with other students from other countries; (2) learn
to use telecommunications for electronic mail and
online research; (3) use higher-level thinking skills
in preparing research papers and presentations; and
(4) learn the importance of teamwork in accomplishing a task. The project involved teachers sending a message to the listerry KIDLINK which asked
other countries to participate in a "key-pals" program. Participating countries included: South Africa; Norway; Finland; Demmark; Peru; Russia;
Estonia; Chile; Mexico; England; Iceland; Germany; and Canada. Groups of students selected a

participating country, composed messages off-line and then uploaded their messages to their foreign computer friends using the Texas Education Network (TENET). They used the communications as part of their research into that particular country. Highlights include the guidelines used for conducting this project; guidelines for establishing effective electronic communication; information on designing online project; how to join the KIDLINK and Intercultural E-mail Classroom Connections (IECC) listservs; examples of actual electronic intercultural communications; a copy of the student message log; and recommended questions to ask computer pals. Identifiers—"Pen Pals, Project Linking (Electronic
Mail), Russia, United States
With an emphasis on social and teen issues, the
objectives for this project for students in grades 7-1
are for students: (1) to "meet" and learn from students who live in another country; (2) to be able to
understand similarities and differences between
themselves and their keypals (named so because a
keyboard is used instead of a pen); (3) to be encouraged to develop a desire to travel and learn about
the world and its people; and (4) to learn to use
telecommunications and understand the advantages
of using e-mail. A project which linked schools in
the United States and Moscow, Russis is used as the
example. In 13 lessons, students are introduced to
the targeted foreign country; taught basic word processing and telecommunications terms and skills;
given the opportunity to share and discuss information learned from repeated communication with
keypals; instructed to prepare posters representing
keypal's personality, daily life, and country; and
asked to evaluate Project Linking. Included are suggested questions to ask a keypal, a glossary of telecommunications terms, guidelines for effective
electronic communication, and a list of participating
schools. (MAS)

In response to the federal goal to connect all of the
nation's school classrooms, libraries, hospitals, and
law enforcement agencies to the information superhighway, the Department of Education commissioned a survey to obtain baseline data on the status
of advanced telecommunications in public elementary and secondary schools. Data was gathered from
a nationally representative sample of 1,380 schools
regarding the types and location of advanced telecommunications equipment; services currently
available; current computer networking capabilities;
plans to implement or upgrade wide area networks;
sources of such plans and of the school's budgetary
decisions for telecommunications. This report contains
tabuar summaries (16 data tables and 15 standard
error tables in an appendix) that highlight selected

findings based on the data collected. The tables in this report present data for public achools and for schools by instructional level, size of earollment, metropolitan status, and geographic region of the country. The survey instrument is appended. Con-tains three references. (MAS)

This guide provides information on many aspects of CD-ROM development. Storage requirements of multimedia applications such as graphic images, audio, video, and animation are provided in section one. Storage capacity, transfer rate, and access time are the three criteris used to judge various storage media. In section two, specifications for these criteria are given for floppy disks, hard drives, network delivery, removable media, laser discs, and CD-ROMs. The following aspects of CD-ROM technology are discussed in section three: How do CD-ROMs work?, and How is data read from and organized on CD-ROMs? A discussion on constant angular velocity (CAV), constant linear velocity (CLV), and data layout of CD-ROMs is also included. Section four provides information on CD-ROM standards, including physical level standards (High Sierra, ISO-9660). Hardware and software requirements for CD-recordability are outlined in section five. CD-recordable process steps include: (1) preparing the data and applications; (2) premastering; and (3) mastering. (MAS)

This paper examines two different delivery methods, video and computer-based instruction (CBI) for instructing preservice teachers in the use of an electronic mail system, FIRNMAIL. Three questions were asked about students who were taught FIRNMAIL through a video presentation and those taught through an interactive, computer-based simulation (CBI): (1) Is there a difference in the mean achievement gains on a writing post-test? (2) Is there a difference in students were randomly assigned to either the video or the CBI. Pre- and post-tests indicated that both treatments are instructionally effective. In analysis of perception of instruction it was found that students in the computer-based tutorial/simulation group were more likely to: enjoy the instruction; prefer their mode of instruction over reading the material in a book. Analysis of near-transfer performance revealed that students in the CBI group performed significantly better on the electronic mail assignment than the students in the video group. Data is presented in three tables and four figures. (Contains 34 references.) (Author/MAS)

A unique teaching strategy is presented, which empowers the instructor with affordable technology to become more effective in the traditional teaching-learning process, and involves a sensory montage of multimedia elements superimposed on a single classroom television monitor. Such computer

resources as graphics, animation, QuickTime movies, sound, Hypertext and speech are integrated with external resources like a videodisc player, video microscope, still video camera, photo CD, VCR, camcorder, and CD-ROM audio or graphics to produce a multisensory learning experience. The following subjects are addressed in the strategy: technology requirements; philosophical statement; instructional technology challenge, solution and recommendations; possible software solutions; Hypercard, Supercard, and Digital Chisel; and wiring for video overlay, video switching, and audio mixing. An epilogue reminds educators that multimedia in the hands of a teacher has the power to transform data into meaningful knowledge in the lives of students. Four figures and one table illustrate the strategy. (Author/MAS)

Student Attitudes, Summer Programs, "Youth Programs Identifiers—"Texas This manual is designed to help youth services specialists in libraries in Texas customize their Reading Club efforts for their communities. A successful reading club requires careful thought, extensive planning, and willing and eager participants. Attracting and engaging these participants is of primary importance, as is the reason for the marketing approach outlined in this manual. Marketing is a systematic and customer-focused approach to business and achieving desired change relations with other groups. In beginning a Reading Club one must ask what is to be exchanged—what value are the customers giving and what value are they receiving?

The library offers reading materials and activities in exchange for the child's time and effort. Defining service areas and knowing the audience are vital. Target groups can be defined by age, school, interest, or any appropriate criteria. Registration, record keeping, and rewards are key to program implementation. Promotion must take place in house, in person, and in the media. Strategies must be developed to solicit support. Evaluation is an essential part of program planning, and the basis of new marketing research. Appendixes include a reading club report card, an evaluation survey, and a list of reading club themes through 1995. (Contains 10 references.) (SLD)

A total of 450 video reviews in three journals, published in 1991, were randomly selected and examined through a content analysis, described and compared. This study was undertaken to answer the following questions: What do these journals provide for librarians who have to make informed decisions on video purchases? What criteria do the journals use to evaluate a video? Are there vital differences between reviews in different journals? "The Video Rating Guide for Libraries" makes reference to editing in over 75 percent of its reviews; the other two did not come close to this rate. "The Guide" also delivered substantially longer reviews written by people with a broad range of expertise. The reviewers of "Booklist" made more comparisons between the video under examination and those previously reviewed. An appendix presents codes for content analysis. (Contains 17 tables and 25 reference.) (Author/SLD)

The public library is a natural arena for intergenerational programs that can change "agist" attitudes by bringing older adults and youth together. This study determined the degree to which public libraries in western Pennsylvanis perceive a need for programming for intergenerational programming, to what extent programs Questionnaires were sent to 212 public libraries, and 121 (57%) were returned. It was found that while a majority of libraries perceived a need for intergenerational programming, few had actually done any. Only 53 (44%) libraries listed programs for older adults. While 82 (68%) libraries acknowledged the need for intergenerational programs, only 6 had presented them. Reasons included lack of staff, funds, and space. Five tables present study findings. Three appendiase contain a list of intergenerational programs presented in western Pennsylvania, the cover letter, and the survey questionnaire. (Contains 21 references.) (Author/SLD)

University publishers, responded to this concern by committing themselves to using acid-free paper; however, most commercial publishers, most commercial publishers of general interest were evaluated for the presence of acid-free paper. Approximately 100 periodicals of general interest were evaluated for the presence of acid-free paper. Approximately 100 periodical titles were chosen from the collection at Kent State University (Ohio) and tested with a marking pen developed to demonstrate the presence of acid in paper. It was found that journals published by universities and associations are more likely to use acid-free paper in only 23 titles (22-77%). Only five periodicals included statements about acid-free paper; three were from associations and two were from commercial publishers in Great Britain. Results reinforce the observation that publishers tend to have no real knowledge of the type of paper used in their periodicals. Nine tables present study findings. Three appendices contain the checklist and summaries of evaluated titles. (Contains 29 references.) (SLD)

Identifiers—"Professional Journals, "Wooster Community Hospital OH
As the price of scientific publications soars to Olympian heights, it becomes imperative to base selection decisions on reliable measures for potential use of the prospective titles. A systematic examination of interlibrary loan (ILL) requests should yield hard facts as to the nature of requests and areas of specialization most dependent upon resources outside the existing collection and should highlight subject areas in need of augmentation. The literature on similar use studies indicated that professional journals were the format of choice and that currency was of prime importance to the patrons of medical libraries. This study examined ILL requests from the staff of a small community hospital spanning five years. It was discovered that the in-house collection provided adequate coverage for day-to-day library use. The consortia operation provided the select materials needed for unique situations in a timely and efficient manner. No critical subject areas were exposed as inadequate nor were specific journals revealed to be logical candidates for acquisition. ILL remains the most satisfactory and cost effective method for meeting the information needs of patrons of a small hospital medical library. Data is presented in 12 tables and 4 appendices. (Contains 7 references.) (Author)

A Study of the Description and Evaluation of Indexes in Biographies Written for Children.
Pub Date—24 Mar 94
Note—26p.; Master's Research Paper, Kent State University.
Pub Type— Dissertations/Theses - Masters Theses

EDRS Price - MF01/PC02 Plus Postage. Descriptors—*Biographies, Children, *Childrens Literature, *Content Analysis, Evaluation Meth-

ods, "Indexes, "Indexing, "Information Retrieval, Statistical Analysis, Subject Index Terms, Vocab-

ods, "Indexes, "Indexing, "Information Retrieval, Ustatistical Analysis, Subject Index Terms, Vocabulary
An indexer faces unique challenges when the genre consists of biographical material written for children. The narrative prose style demands vividly descriptive indexing terms, but the youthful audience requires a control of vocabulary and a clear, simple presentation. The literature of library and information science yields a few sources on the indexing of biographies or nonfiction for children, but no source addresses this specific combination. In this research, content analysis and descriptive statistics were used to determine the occurrence and nature of indexes in recommended biographies written for children. Of 300 recommended biographies, about 40% were found to contain indexes, and most dated from recent years. The indexes were evaluated using an adapted checklist that followed the guidelines of the American Society of Indexers. Based on this data, the researcher recommends techniques to improve the quality of indexing in this genre. Indexes should be used consistently for books of more than 75 pages, divided into chapters, and are not heavily illustrated. A variety of indexing techniques should be incorporated, and the typography should be clear, with uncrowded format. (Contains 14 references.) (Author/SLD)

Identifiers—"Wisconsin
This compilation presents statistics about Wisconsin's libraries. Information on public library collections, finances, and staff is given for the state as a whole and by community. A map indicates the locations of the state's libraries, and directories provide addresses and names of library directors. In 1993 there were 380 public libraries in Wisconsin in 17 public library systems. These libraries served five million state residents. Library support is primarily

a local responsibility, but state aid did account for about 10.7% of the \$121.8 million 1993 operating income, and federal aid was about 0.8%. Local tax support for public libraries varies considerably, ranging from \$1 per capita to over \$150. System and public library staff full-time equivalents increased from 2,654.3 in 1992 to 2,730.5 in 1993. The total support of volume responsed stable in 1993 but number of volumes remained stable in 1993, but video and audio recordings increased statewide. A directory and some summary statistics are given for academic libraries and special library services in Wisconsin, listed by community. (SLD)

Identifiers—ERIC, Library and Information Science Abstracts, Library Literature
This study evaluates the "Education Resources Information Center" (ERIC), "Library and Information Science Abstracts, Library Literature
This study evaluates the "Education Resources Information Science Abstracts" (LISA), and "Library Literature" (LL) databases, determining how long the databases take to enter records (indexing delay), how much duplication of effort exists among the three databases (indexing overlap), and how consistently the databases index materials (interindexing consistency). The study employed the methodology of studies on the databases from the 1980s, yet also used measurements based on methodologies not previously. The findings were compared with findings from earlier studies in order to discover indexing trends in the databases, and it was revealed that, over the last 25 years, indexing currency has generally improved, overlap has increased, and joint coverage has remained relatively stable. It was also found that the three databases together cover only 44% of all possible titles. Recommendations are offered to the users and producers of the databases. Data is presented in 11 tables, and 4 appendices provide a list of library serials, a core list of essential journals, a list of serials covered, and core journal names. (Contains 15 references.) Structure, Females, Literature Reviews, *Mothers, One Parent Family, *Parent Child Relationship

ship
A review of children's literature found relatively few books for elementary school children depicting working mothers—an average of about eight per year out of the thousands published for children annually. The working mothers who were depicted were generally shown in a positive manner and were well-adjusted to employment. Children in the stories had positive attitudes about their mothers working, and had good relationships with them. This bibliography annotates 85 realistic books about working mothers; it provides a bibliographic citation, appropriate grade levels, a brief annotation, the mother's occupation, and the type of family configuration. Standards, State Libraries, "User Needs (Information)
Identifiers—"Florida, Paradigm Shifts
In Florida, as in the rest of the country, there is a paradigm shift within libraries. Increasingly, the information necessary to respond to user needs is available electronically-sometimes only or most conveniently in electronic form. For librarians to be most effective in the electronic revolution, they need to link their libraries into a network of cooperating entities. This plan proposes a network of electronic entities. This plan proposes a network of electronic and nonelectronic services through its affiliates the Florida Library Network, Florida InterLibrary Loan, and the Florida Library Online Resource Access Network (FLORANET). Goals are defined to facilitate interlibrary cooperation, resource sharing, and network development in Florida. Goals 1 and 2 call for coordinated leadership and continuing education. Goals 3, 4, 5, and 6 look at network development and use specifically, emphasizing the development of FLORANET. Goal 7 advocates reciprocal borrowing, while Goal 8 defines minimal interlibrary cooperation standards. Goal 9 emphasizes preservation and conservation, and Goal 10 suggests increased public awareness about the information society. Ten charts delineate responsibilities for each goal. (SLD)

This guide was developed to help students and researchers conducting undergraduate-level research find collections of Vermont materials throughout the state. It is not a catalog of specific titles or archival collections, nor is it comprehensive. Information about 38 libraries, all of the academic libraries in the state, some of the larger public libraries, and most of the special libraries and repositories devoted to Vermont collections, is listed. Each entry contains general library information such as name, address, phone number, hours open, and availability of photocopying and interlibrary loan service. The entries all offer a general description of the Vermont collections and, depending on what is available at a particular library, numbers of books, newspapers, serials/periodicals, documents, pamphlets, maps/atlases, broadsides, manuscripts, photographs/pictures, prints/drawings, film/video, music, oral histories, vertical files, data files, and other Vermont collections. Advice is given to researchers on other access points and sources of archival collections. (MAS)

Identifiers—*Contract Employment, Contractors,
*Outsourcing
Due to automation technology, financial restrictions, and resultant downsizing, library managers have increasingly relied on the services of contractors, rather than in-house staff, to accomplish different technical services operations. Contracted services may range from a small project for a selected group of materials to a large project for complete cataloging, authority work, physical processing and retrospective conversion. While a library's individual needs and circumstances vary, there is a core set of questions and considerations common to all outsourcing options. This checklist has been compiled to stimulate thought regarding the variables to be identified and analyzed when comparing the advantages and disadvantages of using outsourcing, and will help a library in selecting possible services to be outsourced, determining associated in-house concerns and costs, and gathering information about a contractor. Through use of this tool, libraries can collect data and make informed decisions in determining which option best meets their individual needs. Sections include an examination of outsourcing for each specific library function (cataloging, classification and holdings information, authority processing, and physical processing of materials); initial outsourcing considerations; retention of some in-house activities; investigation of contractors; and financial considerations. Retention 13 related sources. (MAS)

The face of America is changing rapidly, and this guide helps meet the increasing need for information about our multithnic populace. Classic and contemporary resources in African American history, from 1883 to the present, are annotated and discussed. When svailable, reprint information is provided for classic resources. A variety of resources are highlighted, including collections of primary documents, historical photographic books, traveling exhibits, and videotapes. The objective is to inspire the researcher to move beyond the prevailing stereotypes of African Americans found in standard print and electronic media. Six chapters are arranged by genre and historical period as follows: reference books; collective biography and genealogy; historiographical works y chronological period, from slavery to reconstruction. The annotations are designed to provide enough detailed information to help in curriculum material inclusion decisions, and include bibliographic entry; scope and purpose of work; number and arrangement of chapters (when approprise); usefulness of work; comparison with similar works; unique contributions; audience level; and special features. Policymakers and library administrators are being drawn to the idea of the "virtual library" and the "library without walls," the webs of electronic resources that supposedly will displace books, physical libraries, and most library staff, and are believing the virtual library to be imminent, adequate, and cost-effective. This book describes the virtualists and offers a counter-argument to "technological improvement is worthwhile. Librarians are shown how they can embrace advanced technologies while retaining their libraries" role as service-oriented repositories of all formats of organized information and knowledge. Evidence is presented for the continuing value of books and print collections among diverse medis, the electronic publishing industry and its illusions are targeted, a "survival guide to the serials crisis" is offered, and the economics of collections and access are analyzed. (Contains 74 references.) (MAS) Identifiers-*Virtual Libraries

Policy, *Library Role, *Research Libraries, Surveys
Identifiers—Association of Research Libraries, Bylaws, Constitutions, *Faculty Status
Although librarians in approximately one-third of
Association of Research Libraries (ARL) have a
rank or status similar to other faculty, their activities, responsibilities and involvement vary considerably. A survey was conducted to determine the
autonomy of library faculty organizations and their
role in library and university governance, and results are compared with a similar 1983 survey. Almost all faculties meet regularly and their activities
include: discussion of library policies and problems
(93% versus 100% in 1983); participation in new
library faculty appointments (30% versus 10% in
1983); sponsoring other types of activities, such as
speaker presentations (92%), workshops (66%), social events (62%), in-house newsletters (46%); and
other library publications (23%). All respondents
either formally or informally advise the library daministration, with the following methods: advisory
committees (61%); library faculty executive group
(32%); advise head of the library (69%); and advise
university groups outside the library (69%).
Fifty-three percent of faculty organizations are
chaired from within, while 33% are led by the head
of the library (as opposed to 32% elected from
within and 63% chaired by the library head in 1983). chaired from within, while 33% are led by the head of the library (as opposed to 32% elected from within and 63% chaired by the library head in 1983). Seventy-two percent have elected faculty organization officers, 96% of which are elected by organization members. In sum, the survey demonstrated that library faculty organizations tend to have a major influence on library decision-making and an increased level of autonomy and self-governance. Faculty organization constitutions and bylaws from 14 universities are included, and 18 related reading sources are recommended. (MAS)

Support staff of circulation, reference, interlibrary loan, media services, special collections, information, and reserves make up a large portion of library work forces, and each year are asked to take on more tasks, many requiring advanced skills. This study determined: (1) if there is an actual need for continuing education for support staff; and (2) how to meet these needs. A 26-question survey, covering professional competence, patron service, relation-ships with colleagues, and personal development was sent to public service support staffs in Ohio academic libraries. Ninety-one employees responded (60% return rate), and rated participating in continuing education as being "very important" in order to improve their knowledge or skills of library activities (85%); to develop new professional knowledge and skills (85%); to keep shreast of new developments in the position (74%); to accommodate more effectively the needs of the patrona (71%); to become more competent at work (67%); and to become more productive (67%). The results, compared with an earlier similar study, show that support staffs want and need continuing education. Recommendations to administrators include: improving communication and encouragement, being sensitive to employees' needs, offering in-service programs, and supporting workshop and

ulation Distribution, "Public Libraries, User Needs (Information) Identifiers—Wisconsin Quantitative output measures for municipal and county public library services in Wisconsin provide points of reference for libraries to analyze their needs and establish primary service goals based on unique community-targeted services. Traditional input measures are also furnished, which produce various recommended targets, based on the size of the population the library serves. The data offered here represents a snapshot of certain conditions that existed at the end of 1993. Specific service data is analyzed, estimation methods for service population and per capita measurements are provided, and readers are instructed on applying appropriate measures. Service data analysis includes the following input measures: full time equivalent staff per 1,000 population; volumes held per capita; periodicals and audio and video recordings held per 1,000 population; acquisitions as a percentage of holdings (print); materials expenditures per capita (print and non-print); and hours open. The libraries are divided into service level categories (basic, moderate, and advanced). The data is presented in 3 figures. (MAS)

Identifiers—Locational Analysis, Wisconsin
A locally developed long-range plan is the key to
effective library service, and can account for circumstances unique to the service area that could not
be anticipated from a statewide or national perspective. These standards are meant to guide Wisconsin
libraries in structuring their own locally-focused
planning efforts. Standards in the following areas
are suggested: governance and administration, including planning, funding, and public relations;
staffing collections; services; and socess and facilities, including both physical access and access to
information. Quantitative output measures like reference completion rate and document delivery are
recommended, and are combined with traditional
input-oriented measures such as volumes held per
capita and hours open. Each section contains a
checklist of service minimums (which depend on
local conditions and the role of the library within
the community) for evaluation. Libraries may use
these lists to assure minimum recommendations are
met in all areas; to apply the standards in the context of their community role and mission, thereby
identifying special roles that require additional effort in some areas; or to apply the standards in a
broader, locally-based planning process. Appendi-

ces include eight sample public library role descriptions. Contains 150 references. (MAS)

The purpose of this long-range pian is to describe the status of library development in Wisconsin, the meeds and problems of libraries, and the possible ways of meeting these needs over the next 5 years. The pian reflects reports submitted to the Division for Libraries and Community Learning staff, surveys, consultations with librarians and trustees, and various statewide planning efforts and studies involving librarians throughout the state. The primary focus is on statewide and state-level library activities, division statutory requirements and services, and federal Library Services and Construction Act (LSCA) priorities. The pian is intended to provide frameworks for both division and statewide planning efforts. The Division's organizational structure and mission statement, publications, 1993-94 highights, goals for library service, signativational structure and mission statement, publications, 1993-94 highights, goals for library service, goals are resource-sharing and interlibrary cooperation; improving services to special needs population groups; and utilizing technology to improve services. This report reflects the results of an evaluation of the definitions used in the annual Public Library Statistics (PLS) program, a joint federal-state information collection project, and is intended to raise specific issues for discussion among the National Center for Education Statistics (NCES), the Federal State Cooperative System (FSC3), and the states concerning these definitions. Definitions are given for four categories of variables for which statistics are collected: outlets, staff, collections, and services. The statistics for each variable measure the number of occurrences at the individual public library level, and permit aggregations at the state and national levels. Each subsection of variables contains: (1) the FSCS definition, including any prior changes that are useful in the definition's analysis; (2) the state definition and comparison to the FSCS definition; (3) data describing what the statistics indicate about

how the definition is applied; and (4) issues describ-ing any problems in the definition or its application. In addition, each subsection provides a brief back-ground description for the general category, the variables, and the products or services the PLS cen-sue is attempting to measure. (Contains 66 refer-ences and 20 tables.) (MAS)

Curriculum reform across Canada resulted in a
new commitment to resource-based learning, Not
only is the provision of resources important but also
the development and implementation of resource-based programs, which are initiated by
teacher-librarisms and planned cooperatively with
classroom teachers. This study addresses the relationship between the presence or absence of an effective library program in the school, the ability of
that school to implement a resource-based teaching/learning program, and the role of the teacher-librarian in program planning and
implementation. Principals, teachers, and library use
and communication among the 3 groups; (4) cooperative planning and teaching; (5) expectations of,
attitudes towards, and beliefs about understanding
of school library services; (6) the role of the school
ilbrary; and (7) the role of the librarian in resource-based teaching and learning, there is no
agreement among principals, teachers, and librarians
on the role of the library and librarian in resource-based teaching and learning, there is no
agreement among principals, teachers, and librarians on the role of the library and librarian in resource-based teaching and learning that training
is required to change their attitudes sbout the benefits of school libraries. A copy of the questionnaire
is appended. (Contains 18 references.) (MAS)

eracy Education, Prisoners, "Prison Libraries, User Needs (Information)
Prison librarians usually work in isolation from other librarians, so getting information and advice about their jobs can be difficult. This book offers a guide to prison librarians, presents new ideas, and raises compelling issues about this field of librarian-ship. Ten current or former prison librarians cover all aspects of prison libraries and the unique challenges that they face. Topics are: "The Prison Community" (Daniel Suvak); "The Prison Community" (Daniel Suvak); "The Planning Process" (Rhea Joyce Rubin); "The Professional Staff" (Sandra Souza); "The Inmate Staff" (Stephen M. Mallinger); "Collection Development" (Diana Reese); "Services" (Rhea Joyce Rubin and Daniel Suvak); "Programa" (Nancy Pitts); "Literacy" (Ann Piascik); "Budgeting" (Daniel Suvak); "The Facility and Equipment" (Timothy Brown); "Automation" (Vibeke Lehmann); and "Providing Legal Access" (Jay Ibrig). Contributors were selected to represent a cross-section of the states, types of prison, and types of experience. Appendices include a sample collection development policy, request for reconsideration of library materials form, checklist for reconsideration of library materials form, checklist for reconsideration of library materials form, checklist for reconsideration of library materials form, and sample automation needs assessment survey. A 66-item librarians. (Contains over 150 reference.) (MAS) (MAS)

Development, Meetings, Personnel Evaluation,
"Public Libraries, "School Libraries, "Youth Programs

Administrators of public library youth services departments and managers of school library media centers often rely on broad sources for advice on managing their specialized youth services. This book is designed to assist youth services librarians in becoming well-versed in management skills crucial to the continued existence of quality service to youth in libraries. Thirteen experienced youth services professionals offer their advice for dealing with general management issues, personnel issues, and communication. The chapters are: "The Why and How of Planning" (Ployd C. Dickman); "Budgeting" (Kathleen Deerry; "Seeking Alternative Funding: Grantsmanship" (Sherry Des Enfants); "Youth Services and Procedures" (Mary M. Wagner and Gretchen Wronks); "Evaluating Library Services and Programs" (Virginia A. Walter); "Job Descriptions" (Yvette Johnson); "Recruiting and Retaining Youth Services Librarians" (Maria B. Salvadore); "On Planning and Presenting New Staff Orientations" (Kathleen Staerkel); "Continuing Education" (Mary Fellows); "Establishing Staff Relations" (Kathleody Lloyd Allen). Examples of planning checklists, policies, and evaluation forms are also included. (Contains over 150 references.) (MAS)

Descriptors—"Academic Libraries, Access to Information, Costa, Higher Education, Information Services, "Information Technology, "Library Research, Online Searching, "Online Systems, Optical Data Disks, Research Libraries, "Use Studies This research is concerned with the pragmatic performance characteristics of competing information technologies (ITs) and services in the university research center, as measured by user demand and choice. Technologies and service operating at cost recovery, open to all; (2) end-user service collecting token charges; and (3) CD-ROM based research work stations freely available. Recorded data from the administrative information system was gathered over 15 years in an "ex post facto" analysis of the levels and patterns of use of the three competing information services. This data was supplemented by surveys of 186 graduate students concerning the values assigned to activities, perceived problems, and reported failures and successes. It was discovered that monetary cost, convenience of access, and time spent are the central factors which determine student selection and use of ITs. Users are willing to subordinate certainty of success, precision, recall, authority and currency for services which are convenient and largely free of cost. This study proved that information content is of minor importance when compared to other features such as cost and convenience when compared to other features such as cost and convenience when compared to other features and has cost and convenience when compared to other features and has cost and convenience when compared to other features and has cost and convenience

The mission of the international program is to
enable the preservation of materials in the spirit of
worldwide cooperation, and to ensure enduring access among countries and throughout time. The
commission's international program involves collaboration among scholars worldwide through the
European Commission on Preservation and Access
(BCPA), raising awareness and assistance for the
preservation problem. The commission's work includes enriching American and international scholarship; encouraging and coordinating international
cooperation in eliminating redundancy and wisely
using financial resources; stimulating preservation
activities in developed countries; and bringing preservation information to less developed countries.
The first step of the program was to identify needs
regarding preservation of and access to the world's
written knowledge and how to meet these needs.
Hundreds of institutions from dozens of countries
have contacted the commission for information and
guidance. The forthcoming series of program reports, which illustrate the breadth and variety of
BCPA's cooperative preservation initiatives, is discussed. (MAS)

Identifiers—"Bulgaria, National Preservation Program (Bulgaria)
This report provides a review of Bulgaria's history
as it relates to library collections, and describes the
current state of preservation activities at key institutions. The discussion includes: the political history
of Bulgaria and its library collections; the Soviet
state and its aftermath; economic constraints; decentralization of Bulgaria's research libraries; and a
description of and statistics for five specific key research libraries. It was discovered that although Bulgaria's government cannot make preservation a
priority at this time, the libraries are free to initiate
their own projects and collaborations. Bulgarian libraries suffer from inexperience in democracy, priority setting, management, and implementation, but
are receptive to reorganization at all levels, and
ready for reform, modernization, and leadership.
The issue of decentralization and centralized library
programs is complicated, but the past three years
suggest that decentralization would be detrimental
to progress and advancement. The most significant
problems are: a lag in development of libraries and
the profession; gaps and uneven levels of knowledge

and expertise within the profession; nonexistent ma-terial resources; and lack of English-speaking librar-ians to absorb svallable information. Recommendations are made for the reintroduction of a national preservation program. (MAS)

While the rapid evolution of electronic technology has made possible stunning advances in access to information, the price of adopting new systems and formats has forced major changes in how libraries allocate their resources. The 31st symposium of the graduate alumni and faculty of Rutgers School of Communication, Information and Library Studies addressed the impact of technology on the economics of Information, servival of libraries. Papers presented include: "Introduction: The Economics of Information Storage in Academic Libraries: Changing Fundamentals" (Malcolm Getz); "What Bang for the Buck: Costs and Beneficial Impacts of Library Operations" (Paul B. Kantor); "Changing Technology and Changing Markets: A Scholarty Publishing Perspective" (Janet D. Bailey); "The Government Information Market" (Janes P. Love); and "Costs and Values: The Politics of Economics (Arthur Carley). A transcript from the panel and audience discussion is provided A 65-item annotated bibliography offers leads to further discussion aspects of economics of information. (MAS)

Identifiers—"California Community Colleges
In response to 1986 state legislation calling for improvements in college effectiveness and accountability, the California Community Colleges began various efforts to promote the evaluation of matriculation. One effort, the Matriculation Local Research Options Project, was formed in 1989 to develop models for local evaluation of matriculation and through June 1992 produced four major volumes of work. The first volume, produced in November 1989, described the goals of the project, indicating that the designs for evaluation would be simple, comprehensive, and operate within advised legal constraints. The work also provided nine research estimates and adapted by local research offices. Volume II, published in February 1991, described findings bearing on the socuracy, utility, and fairness of assessment practices at system colleges, emphasizing the implications of minimum assessment standards published by the Chancellor's Office. Volume III was completed in February 1992 and described findings from a study of college use of the nine designs made available in Volume I. Dats indicated that fewer reports from colleges using the designs were received than anticipated, due in part to changes in assessment standards by the Chancellor's Office. Finally, Volume IV provided guidance to colleges in the following five areas of matriculation research identified as problematic or not yet addressed in previous volumes: (1) monitoring instructor grading practices; (2) multiple measures; (3) validation of course prerequisites; (4) follow-up activities; and (5) information tracking systems. In order to meet the challenge of institutionalizing technology, community college educators must first define their needs; second, delineate the physical, social, and cultural conditions that affect the environment; and third, examine the knowledge made available through the computer and its paraphermalis. Institutionalizing technology requires: (1) establishing institutional policies that address themes of funding; human infrastructure; rights and responsibilities of students, faculty, and staff; faculty and staff recruitment; and criteria for promotions, honors, and awards; (2) obtaining external funding; (3) undertaking a cost effectiveness study; (4) restructuring the human infrastructure; (5) using a 1:1:1:1/2 ratio in budgeting for hardware, software, personnel, and upgrading; (6) involving department heads in the integration of computing and curriculum; (7) promoting discipline-based training of faculty in computer applications; (8) promoting collaborative projects among faculty; (9) recognizing and rewarding employee contributions to the achievement of institutional goals; (10) providing pedagogical and research support to discipline coordinators and faculty; (11) shifting the role of faculty to become facilitators of learning; (12) encouraging faculty to become their own researchers as they integrate computer applications into their curriculum; (13) providing discipline-based support at the developmental level; and (14) informing administrators and staff of facult

Identifiers—*California Community Colleges
In California community colleges, state-mandated matriculation consists of services intended to enhance student success and processes to improve institutional effectiveness by developing capacities for evaluation, coordination, and training. Each year, the Chancellor's Office conducts evaluations to assess the extent to which matriculation is being implemented by the state's community colleges. In 1990-91, the evaluation approach shifted to a detailed, on-site examination of matriculation evaluation, including the impact of matriculation revolution, including the impact of matriculation and the state of the previous year's initial evaluations, but at each there were some components requiring additional development. In general, admissions, counseling, and orientation components were the most thoroughly developed. Assessment (beyond placement testing), student follow-up, coordination and training, and research and evaluation were most often the weakest components. The 1990-91 report provides information on the status of the following: (1) coordination and training and research and evaluation were most offen the weakest components receive aspects of matriculation. Also noted are effective aspects of matriculation components occurring in California colleges which can serve as examples for other colleges. The "Team Member's Guide to the Matriculation Evaluation" at Compton College is appended. (KP)

In California community Colleges
In California community colleges, state-mandated
matriculation consists of services intended to enhance student success and processes to improve institutional effectiveness by developing capacities for
evaluation, coordination, and training. Each year,
the Chancellor's Office conducts evaluations to assess the extent to which matriculation is being implemented by the state's community colleges.
During the 1992-93 evaluation, matriculation processes at 16 colleges were reviewed by 3- to 6-member site visit teams. The evaluation found that: (1)
with respect to coordination and training, matriculation was being increasingly managed with sufficient authority and time and that all colleges had
appointed Matriculation Advisory Committees; (2)
admissions standards were well implemented,
though at seven schools modified admissions services for ethnic and language minorities were recommended; (3) orientation was the most
well-implemented components; (4) substantial
progress had been made in meeting state requirements regarding admissions; (5) full-time certificated, professional counselors were generally
supplemented by part-time professional counselors
and student paraprofessional advisors; (6) six colleges had implemented relatively effective early
alert systems; and (7) regardless of progress, a majority of the campuses had not fully implemented
the research and evaluation component. The
1992-93 report highlights examples of successful
matriculation practices in California colleges.

In a joint venture between the University of Arizona
(IA) and the Pima County Community College District (PCCCD), the Partnership to Aid and

Retain Transfer Students (PARTS) was designed and implemented to aid minority PCCCD students planning to transfer to UA. Specifically, the program sought to create faculty professional development activities across the curriculum, to increase transfer-student academic achievement by increasing student/faculty interaction, and to create a culturally sensitive scademic environment. In Phase I and Phase II of PARTS, 68 students, 6 faculty members conducted workshops and acted as mentors, while peer advisors held weekly meetings to discuss transfer topics. The program employed various instructional techniques, including the use of minority role models from the community, cooperative learning, student learning styles training, student self-esteem building, and classroom analogies relevant for minority students. To assess program impact, preand post-evaluation questionnaires were administered to the 32 Phase II students. Results, based on responses from half of the students, indicated the following: (1) 87% indicated that they feel more confident about being assertive in getting needed scademic information; and (5) 81% felt more confident about being assertive in getting needed academic information; and (5) 81% felt the program should be open to everyone. Includes data tables and questionnaires. (KP)

Used to determine grant rates for state financia
support and as an accountability report to citizens
this unit cost report presents data for fiscal yea
(FY) 1994 on course offerings, enrollments, and

costs for Illinois public community colleges. Specifically, data are presented on: (1) comparison of FY 1994 net instructional unit cost (NIUC) with previous years; (2) comparison of FY 1994 NIUC, full instructional unit costs, and total institutional unit costs; (3) summary of FY 1994 NIUC by cost categories; (4) FY 1994 indirect instructional support unit cost; (3) FY 1994 NIUC in seven instructional categories; (6) FY 1994 expenditures by function, cost category, and instructional support areas; and (7) NIUC per credit hour. The report indicates that the FY 1995 state average NIUC was \$136.09, representing an increase of \$9.21 (7.3%) from FY 1993. Full instructional unit cost was \$142.94, while total institutional unit cost was \$142.94, while total institutional unit cost was \$155.58. Of the unit cost, \$52.60 was direct salary cost, \$38.93 was direct department cost, \$1.66 was direct equipment cost, \$55.95 was allocated indirect cost, \$16.44 was operation and maintenance cost, and \$.50 was building rental cost. The state average unit costs for support services were \$12.19, exademic administration and planning cost; \$4.82, learning resource cost, \$11.75, student services cost; \$4.04, administrative data processing cost; \$10.03, general administration cost, \$3.4, auxiliary services cost; and \$12.78, general institutional cost. Colleges, "Enrollment Management, "Information Dissemination, Mail Surveys, Questionnaires, "School Registration, State Surveys,
"Student Recruitment, Two Year Colleges, "Two
Year Colleges Students
Identifiers—"Kansas, "Oklahoma
A study was conducted to identify and evaluate
the kinds of student recruitment procedures currently used by community colleges in Kansas and
Oklahoms. After a literature search, an 18-item
questionnaire was used to collect data on four recruitment techniques; i.e., on-site high school
pre-registration; campus tours; early bird on-campus pre-registration; and recruitment by correspondence. Admissions officers at 38 two-year colleges
in Oklahoms and Kansas were surveyed by mail
regarding the use and effectiveness of these practions. Study findings, based on an 87% response rate,
indicated that the most popular of the four techniques was campus tours, followed by early bird
on-campus, pre-registration; pla school pre-registration; and mail recruitment. Data from colleges
where enrollment increased between 1993 and 1994
indicated that schools with increased enrollment
(1) frequently allowed students to enroll during an
initial recruitment session; (2) involved faculty and
students in conducting campus tours; (3) usually
held "early bird" on-campus pre-registration sessions on weekday evenings; (4) sent follow-up correspondence to students who toured their campuses
or listed their institutions on Pell applications, and
(5) purchased lists of student names and test
scores-67% of those who practiced this technique
were successful in recruiting students from the lists.
The survey instrument is included. (Author/KP)

lege During fall 1994, Piedmont Virginia Community follege (PVCC) surveyed employers of the col-

lege's recent graduates to evaluate the occupational success of PVCC graduates and the effectiveness of the college's academic programs in preparing graduates for work. Surveys were sent to the employers of 41 graduates from the class of 1992-93 who had previously given permission for their employers to be contacted. Usable responses were received from 33 employers, for a response rate of 80.5%. Survey findings included the following: (1) nearly 90% of all employers rated the graduates as either "excellent" or "good" in every job performance category; (2) over half of the employers rated PVCC graduates as "good" in every category, and nearly half rated the graduates as "excellent" in "cooperation with fellow workers" and "cooperation with supervisors"; (3) a comparison with previous surveys indicates that employer satisfaction with job performance has increased; (4) over 60% of the employers felt that PVCC graduates had better math, writing, speaking, research, and logic skills than most employees; (5) in two categories, math and logic skills, 76% of the employers rated PVCC graduates as either "excellent" or "good"; (6) for writing, speaking, and research skills, between 64% and 68% of the employers rated the graduates as either "excellent" or "good"; and (7) in the categories of occupational education and training and general education, 84% of the employers rated PVCC as either "excellent" or "good," up from 72% in the 1991-92 survey. (Appendixes include employer evaluations and comments, graduate job titles, participating employers, and the survey instrument.) (KP)

A study was conducted at Gainesville College (GC) in Georgia to investigate the enrollment patterns, retention rates, and graduation rates of black students. Depending on the data element, the period of time covered extended from the late 1980's to winter 1995. In some cases, comparisons were drawn with other units of the University System of Georgia. Study findings included the following: (1) American black enrollments consistently fell below 5% of the total enrollment between fall 1990 and winter 1995, with reasons for this low enrollment rate being the small number of college-ready black students coming out of local high schools, increases in enrollments at Lanier Technical Institute, and local students with financial aid choosing to attend other colleges and universities; (2) 5-year system wide retention rates for black students a GC were lower than for all other students, though similar to the average statewide experience of blacks who begin at other two-year colleges, but lower than the rates at traditionally black colleges; (3) of the 25 black students in 1993-94 were white, with the major feeder of black students in 1993-94, a review of the literature on topics related to the recruitment and retention of minority students is included. Identifiers—Grossmont Cuyamaca Community College District CA
This booklet presents policy positions adopted by the Grossmont-Cuyamaca Community College District Governing Board, forming a legislative agenda for the college focused on the state issues of access, financing, economic development, and regulatory impediments; and the federal issues of financial aid, workforce development, and administrative burdens. A summary of the state issues indicates that:

(1) with respect to access, positions include opposition to significant tuition increases which would negatively affect enrollment; opposition to differential fees; support for additional exemptions to the differential fee for public service employees, contracted education, and mandated continuing education courses; and strengthening transfer and articulation processes; (2) with respect to financing, positions include opposition to enrollment fee increases; advocacy for "hold harmless" provisions to mitigate the impact of enrollment declines; support of legislation that would require the state to "backfill" property tax shortfalls; and support of the reduction or exemption of community colleges from state and local taxes; (3) in the area of economic development, positions include support for the designation of community colleges as the state's pristate and local taxes; (3) in the area of economic development, positions include support for the designation of community colleges as the state's primary delivery system for workforce training and retraining; support for initiatives that include transition skills in the provision of workforce training and basic literacy; support for funding for defense conversion; and support of proposals to encourage the use of industry equipment by community college students; and (4) with respect to regulatory impediatents, and (5) with respect to regulatory impediatents, and (4) with respect to regulatory impediators and support for greater flexibility at the local level; support for the reduction of the number of state mandates; support for accompanying new mandates with appropriate funding; and support for Workers Compensation reform to reduce costs and enhance service delivery. Background and positions on each state and local issue are included. (KF)

In an effort to improve the writing performance of
non-native English-speaking students in a college
preparatory composition course, a project was undertaken to reduce problems of self-esteem caused
by communication apprehension through a speech
sasignment involving critical thinking and peer reviews. To evaluate the effect of the assignment, the
Rosenberg Self-Esteem Scale (PHSC), the Coopersmith Self-Esteem Inventories (SEI), and other
self-concept measures were administered to 42 students in the college preparatory class. A lecture was
then given on delivering a speech and students selected topics for their own speeches. The speeches
were graded by fellow-students and the teacher on
content, appearance, eye contact, props, and time
constraint. After each speech, strengths and weaknesses were discussed by the class. In the final phase
of the project, the self-esteem inventories were
re-administered in the last 4 weeks of the course. A
comparative analysis of pre- and post-test results
indicated the following: (1) in general, students
showed increased levels of self-esteem on all the
instruments; (2) for the SEI, 38% showed a positive
change, compared to 12% showing a decline in
self-esteem; and (3) similarly, on the RSE 66.66% of
subjects showed positive change, compared to 12%
showing a negative change. The report includes
speech g

A comparison is provided between general education core requirements and basic skills and competencies at the community college level in Illinois. First, general education core requirements from the Illinois Community College Board and South Suburban College are outlined related to communication; mathematics; humanities and fine arts; social and behavioral sciences; physical and life sciences; and computer literacy. A comparison is then presented of core competencies from Alegany Community College (ACC), the Secretary's Commission on Achieving Necessary Skills (SCANS) competencies, and core competencies from Alegany Community College (ACC), the Secretary's Commission on Achieving Necessary Skills (SCANS) competencies, and core competencies /skills based on an April 10, 1992 Tech Prep report. The following competencies are detailed: (1) communications skills, including reading, writing, and speaking; (2) learning skills, including the effective use of information as an independent, self-directed learner; (3) critical thinking, including the ensalysis of facts through logical problem-solving analysis and synthesis; (4) interpersonal skills, including sensitivity, cooperation, collaboration and understanding of self and others; (5) computational and computer skills, including performance of basic calculations and use of a computer; (6) culture and society, including attitudes and skills required to understand cultural differences and an appreciation of the contributions of individuals to society; (7) science and technology, including an understanding of roles in society and impact on daily life and the environment; and (8) wellness, including an awareness, understanding, and appreciation of the components of a healthy lifestyle. Each competency includes a list of related essary Skills

activities showing mastery of the competency. (KP)

Perkins Vocational and Applied Technology Education Act (VATEA) of 1990. First, background information is presented on the VATEA, indicating that it authorizes and provides significant funding to develop and operate four-year tech prep education programs and calls for statewide articulation agreements between secondary schools and postsecondary institutions. Next, the following requirements for curricula in tech prep education majors and programs are outlined: (1) graduation from the secondary school; (2) general education requirements for the associate degree; (3) specific requirements of an occupational degree or certificate; (4) courses that build student competencies in mathematics, acience, communications, and technologies; (5) worksite learning experiences; (6) the option to fulfill requirements for a baccalaureate degree; (7) the option to fulfill requirements for a particular baccalaureate degree major; and (8) placement and employment for students. A history of tech prep in California since 1985 is presented and recommendations are made for increasing articulation among educational segments. Finally, an inventory of tech prep programs is provided, including information on fiscal agents (i.e., consortia administering the grant, special projects, and/or first-year consortia); participating institutions; funding amount; and the educational areas focused on in the program. Bach year, the Governor of California issues the
Governor's Coordination and Special Services Plan
(GCSSP) providing goals and objectives related to
program funding and special initiatives. This report
presents modifications to the GCSSP for July 1,
1993-June 30, 1994, including new language for
changed sections of the GCSSP related to program
information and activities. The report first describes
changes related to program information, indicating
that the Governor's goals and objectives for program year (PY) 1992-93 were replaced by those for
PY 1993-94, and describing measures to be taken by
the state to ensure coordination and non-duplication of Job Opportunities and Basic Skills training
programs and of Service Delivery Area (SDA) linkages with federally authorized programs. Changes
related to program activities are then addressed, including complete descriptions of the following: (1)
the state's projected use of resources as of PY
1993-94 (i.e., \$104,119,438 for Title IIA,
\$86,849,261 for Title IIB, and \$76,701,237 for Title
IIC): (2) oversight policies to ensure fiscal accountbilitie. (1) Title III. Howded training activities for \$86,849,261 for Title IIB, and \$76,701,237 for Title IIC); (2) oversight policies to ensure fiscal accountability; (3) Title II-funded training activities for adults and youth; (4) use of State Education and Coordination Grants, including designation of the agencies that will administer them and projects to be funded; and (5) SDA involvement in capacity building and technical assistance funds. Attachments include vision and mission statements from the State Job Training Coordinating Council; 1993 goals and objectives for Californiu's Job Training and Placement Programs; and a chart of barriers to employment, with the corresponding Title II category. ning. Two Year Colleges, "Vocational Education Identifiers—" California
Providing information on a memorandum of understanding (MOU) between the California State Board of Education and the Board of Governors of the California Community Colleges to facilitate the articulation and coordination of vocational education programs and services funded by the Carl D. Ferkins Vocational and Applied Technology Education Act (VATEA), this document describes the planning process between the two agencies and timelines for division of funds. Following a brief introduction indicating that the MOU delegates the maximum responsibility to the Board in administration and operation of community college vocational programs funded by the VATEA, the report describes areas of agreement related to the following.

(1) shared planning and coordination, including staff operations and the background, purpose, functions, and operational procedures of the Joint Advisory Committee on Vocational Education (JACVE); (2) the development of the state plan for vocational education and/or amendments, including the processes for adopting, developing, and monitoring the implementation of the plan and amendments; and (3) procedures for resolving differences, indicating that if the JACVE fails to reach an agreement is still not reached, the Board of Education will make a decision. Placiner Salaries, I wo Year Courges Identifiers—Texas Published four times a year by the Texas Junior College Teachers Association (TJCTA), this newsletter discusses events affecting Texas Junior Colleges and their faculty, chronicles the efforts and activities of the TJCTA, and provides a forum for leges and their faculty, chronicles the efforts and activities of the TJCTA, and provides a forum for discourse on topics in community college education. Most of the September 1993 issue is devoted to an analysis of Texas's Optional Retirement Program/Tax Deferred Annuities, providing information on selecting a tax-deferred program, types of investment programs, strategies for investment, managing funds, investment return on fixed-annuities, assessing costs, and safety and reliability of insurance companies. The December 1993 issue contains an interview with Texas State Senator John Montford on educational funding: "The Virtual Library and Equal Access," by David Drake; a table showing 1993-94 base salaries for faculty by college and years of service; "Reminiscing," by Robert W. Wyle, an account of a community service writing class for older solutis; and dats on compensation and utilization of part-time instructors by college. The January 1994 issue is the program for the TJCTA annual convention, focusing on the theme of "Strength in Diversity." The April 1994 issue announces the adoption of a common course numbering system for the state's community colleges and every public senior institution except one. Also included are "Tran's Story-And Ours," by Scott Nelson, about a professor's work with a Vietnamese student; "Counseling Services and Advising Functions: A Case for Separate Identities," by Mary Forbes and Joe Rode; and "Study Indicates Job Placement Rate Remains Constant." This guide to Promoting Access to Vocational Education (PAVE) Facilitator Training provides an overview of an 18-month training program for new facilitators working to improve services for vocational students with limited English proficiency (LEP) on their campuses. The guide covers all major topics addressed in facilitator is not supposed to the project. Part 2 describes the essential components of a successful LEP vocational program from through a survey of model programs, with emphases on the Billingual Vocational Training formst, widely viewed as the ideal program for meeting the needs of LEP vocational students. Part 3 examines the impact of cultural issues on program planning and allows facilitators to assess their own cultural sensitivity. Part 4 surveys curricular elements of a successful LEP vocational program that incorporates both language and vocational training and is grounded in cooperative learning strategies and an awareness of workplace realities. In part 5, facilitators learn when, why, and how to evaluate a program and how to create an evaluation instrument. Part 6 examines the facilitator's role as an agent of change, using theories of change management developed for business and in-ustry. Finally, a comprehensive resources list guides readers to sources of funding, materials, texts, and additional information such as on-line networks. (KP)

Communication, Learning, "Nursing Education," Peer Teaching, "Tutoring, Tutors, Two Year Colleges Identifiers—"Tutor Training Intended for upper-level students in nursing and related professions who have been selected to work as peer tutors, this book was designed to help peer tutors become a caring, competent resource for nursing students through independent study. The book attempts to lay the theoretical groundwork for understanding tutoring as a legitimate aspect of the larger field of learning assistance within a holistic framework. After a brief introduction, unit 1, "Orientation to Tutoring," describes attributes of a successful tutor; teacher-tutor relationships; tutor-student relationships; tutor-institution relationships; the multidimensional role of the tutor; goals and objectives; critical thinking; awareness of learning processes; and successful interpersonal skills. Unit 2, "The Learning Process," covers the following topics: preparation, input, processing, storage, output, learning styles and modalities, blocks to successful learning, situational blocks, internal blocks, and learning skills and modalities, with the successful interpersonal strategies for when problems arise. The final unit offers "Practical Strategies for Nursing Tutors," focusing on language skills and nursing tasks; active reading strategies for mastering nursing texts, tutoring for writing; nursing matria, and test-taking and study skills. The College Assessment and Planning Process
(CAPP) at New Mexico State UniversityGrants(NMSU-G) combines in a 2-year cycle the
processes of assessment of student academic
achievement, review of program effectiveness, strategic planning, and institutional development. Virtually all faculty and staff are involved in the
process, which features individually designed assessment strategies, and program and institutional
development throughout the 2-year cycle. Assessment activities are conducted on an ongoing basis.
These activities include classroom assessment and
classroom research; as well as assessments of instructional programs, instructional support, adult
basic education, student services, outreach services,
and institutional support. In addition to assessment
activities, focus group activities, concerns,
and action plans. Focus group activities occur primarily in the second (i.e., fall) semester of the
four-semester CAPP sequence, with groups identitying strengths and concerns related to instruction,
student services, outreach programs, and institutional support. During alternate spring semesters,
the campus director brings together key players
from all college functions to conduct focus group
institutional planning activities. All college employces and representatives from the community are invited to participate in a retreat where college-level
strengths and concerns reldentified and an action
plan is developed. Implementation of the action

plans may require the following 2 years of the se-quence. After the institutional action plan has been fully implemented, the Alpha Group conducts a re-view of the operation of the complete cycle of the CAPP projects. The role of institutional research in the CAPP process is two-fold: completing institu-tion-wide research projects (e.g., student, employee, and community surveys) and coaching and advising employees in various departments as they develop individual assessment projects. A study was conducted at Southwest Texas Junior
College (STIC) to assess current management practices used by the physical plant maintenance department (PPMD) and to develop a strategic plan for physical plant management. Procedures included an analysis of current management practices and systems that affect physical resources, and periodic and preventive maintenance, and the development of recommendations for the design of a system for expansion and modification of existing facilities and construction of new facilities. A survey designed to determine the adequacy of facilities and services was sent to 141 administrators. Study findings, based on an 88.65% response rate, indicated that STJC needed: (1) a fire safety training program; (2) a hazardous substance training program; (4) a space management program; (5) an adequate heating and cooling system; (6) proper application of janitorial services; (7) review of PPMD staffing; (8) better lighting; (9) plans for handicapped personnei; (10) improvement of general campus maintenance; (12) a computerized control system; (13) better enforcement of parking policies; (14) coordination between committees; and (15) plans for increased enrollment. Based on survey results and interviews with the PPMD personnel, a master plan for future facilities planning, maintenanc

Using data from the National Center for Education Statistics, Bureau of the Census, and other sources, this pamphlet presents current information on community college students; college outcomes and impact; community college staff, governance, and expenditures; and tuition and financial aid. In addition, trends in enrollments, numbers of institutions, full-part-time employment status of faculty, and Pell Grant awards are illustrated. Selected highlights include the following: (1) there are approximately 1,100 community colleges in the United States; (2) community colleges enroll 44% of the nation's undergraduates and 49% of all first-time freshmen; (3) about 47% of all minorities in college attend community colleges; (4) more than half of higher education students with disabilities attend

public community colleges; (5) women make up about 58% of community college enrollments; (6) the average age of a community college enrollments; (6) the average age of a community college to 100,000 students; (8) the most popular fields of study are liberal studies/humanities, business, health professions, engineering-related technologies, and protective services; (9) part-time students greatly outnumber full-time students; (10) the five most popular programs are dental hygiene, nuclear medicine technician, nursing, physical therapy, and robotics/automated manufacturing; (11) a worker with an associate degree earns approximately \$11,589 more than a worker with a high school education; (12) 65% of community college faculty are employed part time; (13) women make up 42% of community college faculty nationwide, compared to 29% at four-year institutions; (14) sources of community college revenue include state funding, tuition and fees, local governments, sales and services, federal government, private gifts, grants, and contracts, and endowments; and (15) the average annual tuition and required fees at public community colleges is \$1,114 compared to \$2,543 at four-year colleges. izatiom Aid, "Resource Allocation, "State Aid, State Legislation, Two Year Colleges Identifiers—"Florida
In May 1991, the Florida Legislature directed the State Board of Community Colleges to develop a method to equalize the base funding of community colleges, including an appropriate cost differential equation. As a result, an allocation process of legislative appropriations was developed which supported the relative priorities of each college from the budget request, enabling each college to project is funding at any level of appropriations. For example, the 1995-96 Legislative Budget Request concains the following: (1) an urgent call for access, equity, and excellence; (2) indicators of the value of community and excellence; (2) indicators of the value of community and achievement, range of academic programs, emphasis on instruction, community and economic development projects, and soccasible and functional campunes; (3) information on the fiscal losses that have affected the state's community colleges since 1989-90; (4) an overview of the consequences of steady or declining state appropriations; and (5) a rationale for the 1995-96 budget request, which seeks, over the next 2 years, a state allocation of \$4,020 per student, which will restore the 5-year 16% loss in state support. Priority One of the 1995-96 budget request is the base Community College Program Fund Support, which includes the operating cost of new facilities, competitive salary enhancements, money for educational equipment and library resources, an enrollment workload, and equalization funding. Equalization is defined as equivalent funding revenues per full-time equivalent student calibrated for the following college characteristics; program mix and costs, college size, and cost of living in the district. dentifiers—Massachusetts
The Tech Prep West Project, established in 1991,
rought together three Massachusetts community

colleges, seven secondary vocational schools, and one comprehensive high school to develop an alternative college preparation pathway for students, leading from the junior year of high school to an associate degree and employment in a specific career field. Key components of the program included: (1) tech-prep specialists at each site to direct program planning and implementation; (2) collaborative curriculum development; (3) joint staff development for faculty and counselors; (4) tech prep leaders in each school to enlist students and ensure institutionalization of program objectives; (5) curricular materials to support applied academics instruction; (6) a tech prep outreach counselor to promote the program in middle schools and high schools; and (7) tech prep clubs and other strategies to support and nurture student involvement. Members of the Tech Prep West Business and Industry Council review, modify, and validate program goals and curriculus, as well as contributing time, staff, and work-experience opportunities. Over 70 articulation agreements between schools and colleges, aff, ording credit in 25 career areas, provide incentives for student participation. The project report includes outtimes of the Voc-Tech and Career Cluster curricular options from grades 6-8 to grades 13-14, with possible exit points after high school and community college graduation; a list of the key features of the Tech Prep West model; information on the target population and curriculum; an overview of curricular changes between 1991 and 1995 in each of eight schools; and outlines of four sample curricula. Springfield Technical Community College Was the first college in Western Massachusetts to establish formal 2 + 2 articulation agreements with 19 schools relating to 18 different associate degree programs. There are many benefits of curriculum articulation but most importantly it produces more graduates, with higher-level skills, and clearer goals. The first phase of articulation includes exploration of possibilities with secondary schools, exchange of visits between institutions, the development of recommended terms for an articulation, approval and formal signing of the agreement. The second phase includes program promotion, student application for credit, and periodic agreement review. A typical sriculation specifies: (1) specific courses articulated and total number of credits awarded; (2) a competency level for the awarding of credit; (3) complementary course work that might be required; (4) recommended courses for optimal preparation; (5) each institution's commitment to some variety of promotional activity; (6) encouragement of students to take College English/Math Placement tests in the spring of seniory year; (7) an agreement to meet annually to review, refine, or expand the agreement; and (8) recommendations reflecting particul

Identifiers—Sauk Valley Community College IL
A stratified random sample of 538 students at
Sauk Valley Community College in Illinois were
surveyed in class about their attitudes and behaviors
regarding alcohol, sex, and exercise. Study findings
included the following: (1) one-half of the respondents indicated that they never read the student
newspaper, and 22% that they rarely read it; (2)
talking with a friend was the preferred method of
getting information about alcohol and sex for single
students; (3) 21.1% of the students felt that drinking
was never a good thing: 30% felt that drinking was
"OK," but a person should never get "wasted", and
42.5% felt that an occasional "drunk" was OK as
long as it does not interfere with responsibilities; (4)
27% of the male respondents reported consuming 10

or more drinks at parties, compared to 4% of the female respondents; (5) 24% of respondents under the age of 18 admitted to mixing alcohol and other drugs, and 32.7% of the males admitted to the same; (6) \$8.5% of males and 39.3% of females had driven while intoxicated; (7) 81% of the respondents reported that they had engaged in sexual intercourse, and 31% reported having had multiple partners in the past year; (8) although many respondents, especially the younger ones, indicated that they were quite active sexually, many of them were of the opinion that other students were more active than they; (9) less than 1% of the respondents reported having contracted a sexually transmitted disease; (10) 9% of the 18-20 year olds reported having experienced an unwanted pregnancy; (11) of the single respondents who had sexual intercourse at least once in the past 30 days, 38% never used a condom; (12) 76% of the students exercised, with the norm being 3 hours a week; (13) older respondents and females were more likely to consider themselves overweight; and (14) 93% of the respondents expressed some interest in a fitness center on campus, and 57% were willing to pay for using one. The survey instrument is appended. (KP)

leges Identifiers—Food Processors Skills Building Project

Identifiers—Food Processors Skills Building Project OR
The Food Processors Skills Building project was undertaken by four Oregon community colleges, with funds from the Oregon Economic Development Department and 11 local food processing companies, to address basic skills needs in the food processing industry through the development and implementation of an industry-specific curriculum. Based on employer needs assessments, the project steering committee decided to focus on these seven curricular areas: reading, writing, mathematics, reasoning, English as a Second Language, Spanish for supervisors, and communication. Using the new curriculum, the colleges offered 26 pilot classes for their local food processing partners between November 1993 and June 1994. Outcomes of the pilot project included the following: (1) company representatives reported significant improvements in project participants' general job performance; (2) worker evaluations indicated increased confidence and movement towards personal and work-oriented goals; and (3) 9 of the 11 companies had classes scheduled beyond the project's duration or had expressed serious interest in continuing the program. Important elements in the success of the project were that the project developed a series of models for implementation; every company identified a representative to serve as a link with the steering committee, the colleges, and instructor; and the partnerships provided opportunities for continuous feedback. In addition, assistance was sought from the companies in marketing and promoting the program, and the college industry partnerships (Includes a list project participants.) (KP)

Identifiers—Alberta (Fort McMurray)
While the average age of journeymen in Alberta, Canada is close to retirement, students wanting to learn skilled trades have difficulties finding companies that will hire them, meaning that there may not be enough apprentices and journeymen to replace retiring workers. To address this situation, Keyano College (KC) joined with 10 local businesses in 1992 to develop the Keyano College Community Cooperative Apprenticeship program for heavy mechanics, millwrights, welders, pipefitters, boilermakers, and automotive mechanics. The program brings tudents in at the first-year level and rotates them into four different companies for their work experience. In the first 2 years of the program, 39 students were in apprenticeships at 11 local businesses. While students are not guaranteed jobs at the end of the 4-year apprenticeship period, they will have the certification, skills, and experience necessary for employment. Benefits of the program include enthusiastic young trainees and experienced employees later for business, stronger relationships with the business community for KC, learning and employment opportunities for students, and closer contact for instructors to trends in business practices. In addition, the program is easily replicable, with similar programs being developed at Red Deer College (Alberta) and the Northern Alberta Institute of Technology. (Includes a list of businesses in the KC program.) (KP)

Identifiers—Dade County Public Schools FL
A study was conducted at Mismi-Dade Commu-

nity College (M-DCC), in Florida, to measure the preparedness of Dade County Public School (DCPS) graduates for the state's community colleges and universities. Data was compiled from Basic Skills Tests taken by all first-time-in-college students attending Florida community colleges and universities during academic years 1991-92 and universities during academic years 1991-92 and 1992-93. The analysis showed that the proportion of DCPS test-takers passing the mathematics, reading, and writing sections of the skills test decreased from 42.5% in 1991 to 39.4% in 1992, while the number of atudents not ready in all three areas increased 9.5%, from 4,097 in 1991 to 4,448 in 1992. Morsover, DCPS pass rates were lower than rates in the rest of the state for both years. Approximately 76% of the DCPS graduates attended MDCC, with the number of unprepared DCPS graduates at the college increasing by 113 in mathematics, 416 in writing, 453 in reading, and 346 in all subjects from 1991 to 1992. Given the institutional cost per credit hour for college prep courses of 557.10 in 1993, it is estimated that the undeprepared DCPS graduates alone would add between \$224,289 and \$448,578 to the cost of education at MDCC during 1992-93. Finally, analyses by race and ethnicity also indicated that DCPS graduates in all categories performed worse than their counterparts in the state. (KP)

In November 1994, a study was conducted at Miami-Dade Community College (M-DCC), in Florida, to determine outcomes after 1 year for first-time-in-college students who began in fall 1992. Specifically, the study sought to determine the percent of first-time students continuing enrollment at MDCC beyond their first year, the effect of student readiness for college on outcomes, and the highest level course in which students who left carned credit. Findings included the following: (1) 8,359 first-time students seeking a degree enrolled at M-DCC in fall 1992; (2) 70% of all degree-seeking students continued enrollment beyond the first year; (3) 22% left with credits earned; (4) the remaining 8% left with no credits earned; (5) the continuation rate varied based on readiness for college, with only 68% of the college preparatory and 63% of students lacking English language proficiency continuing after the first year, compared to 83% of the college-ready students; (6) for degree-seeking students who left, 58% had earned through 1000 level courses and 12% through 2000 level courses; and (7) for students lacking English language proficiency, 37% of those who left had earned credit in college preparatory English as a Second Language only and 42% had reached college-level English skills. (Includes tables of findings) by student readiness-level and MDCC campus.)

This report provides a demographic profile of fall
1993 supplemental vocational education students
(SVES's) at Mismi-Dade Community College, in
Florida, or students enrolled in non-credit courses
designed to upgrade job skills. The profile is based
on registration forms completed by 7.584 SVES's
and includes data on student age, ethnicity, gender,
and residency for the college as a whole and for the
North, Kendall, Wolfson, Medical Center, and
Homestead campuses. Highlighted findings include
the following: (1) campus-wide, SVES's accounted
for 12% of the total enrollment; (2) 52% of the
SVES's were at North Campus and 33% at Kendall;
(3) the mean age of the SVES's was 37.6 years,
compared to 26.1 for ceedit students and 33% at Kendall;
(3) the mean age of the SVES's was 37.6 years,
compared to 26.1 for ceedit students and 33% of of credit students and 23% of vocational certificates
students; (5) 32% were White non-Hispanic and
51% were male, while vocational certificate students
were 35% Black non-Hispanic, and 60% female; (6)
while only 28% of 14 to 20 year-old SVES's were
male, 56% of those over 40 were male; (7) 50.7% of
the Black SVES's were female, compared to 58% of
Hispanics, and 40% of Whites; (8) North Campus
enrolled 3,964 SVES's, representing 18% of its total;
and (9) Wolfson Campus had 261
SVES's, 2% of its total, and Medical Center campus
had 848 supplemental students, accounting for 18%
of its total enrollment. (KP)

Representing Miami-Dade Community College's (MDCC) mandated report to the state on accountability efforts, this document provides discussions and tables related to statewide accountability measures, providing local data and comparisons to statewide outcomes where possible. The following measures are addressed: high school graduate enrollment by ethnicity; status of Associate of Arts (AA) and Associate of Science (AS) degree seekers after 4 years; AA degree transfers to state universities; licensure pass rates; vocational program placement; trends in students needing college preparatory courses and outcomes after 2 years; and passing rates for the College-Level Skilla Assessment Test. Data tables included for each measure provide definitions of the measures, data on outcomes, a five-year target, and a list of activities to meet the target. Highlighted data include the following; (1) 70% of the 1990-91 Hispanic graduates from Dade County high schools enrolled in MDCC the following year; (2) from fall 1990 through summer 1993, 87% of AA degree seekers were successful and 75% were retained over the 4-year period; (3) for AS seekers in the sarse period, 87% were successful and 75% were retained over the 4-year period; (5) almost 90% of students required to take licensure examinations in 1991-92 passed them; (6) from 1989-92, M-DCC had a job placement rate of 92% to 95% in vocational programs; and (7) 70% of the students entering M-DCC in fall 1990 tested as deficient in one or more areas compared to 48% for the rest of the state's community colleges. (KP) cient in one or more areas compared to 48% for the rest of the state's community colleges. (KP)

In winter 1994, a study was conducted at Miami-Dade Community College (M-DCC), in Florida, to determine credit students' perceptions of vollege services. Surveys were distributed to students in 200 credit courses requesting ratings for 21 college services with respect to the importance of the service for their "ideal" college and their level of satisfaction with the service at M-DCC. Surveys were returned from 165 classes for a final sample of 1,595 student responses. Study findings, based on averaged students ratings on a 5-point scale, included the following: (1) college-wide, all 21 services received ratings above 4.0 in terms of their importance; (2) the five most important services to students were a library that meets their needs, faculty members who are up-to-date, a flexible schedule of courses, and a financial aid program that helps make college affordable; (3) over 60% of students agreed that M-DCC provided these top five services; (4) however, 21.5% of the respondents disagreed that M-DCC provided a library meeting their needs, 23.1% did not think the college had an excellent career counseling program, and 21.5% did not agree that M-DCC had an excellent job placement program; (5) over 85% of students were either somewhat or very satisfied with the Miami-Dade experience; and (6) students supressed strongest reservations with respect to vocational programing. (Tables of responses college-wide and by campus and the survey instrument are included.) (KP)

Miami-Dade Community College (M-DCC), in
Florida, to determine students' perceptions of the
college's educational goals. Surveys were distributed to students in 200 courses, representing 5% of
all classes offered in the term. Using a 5-point scale,
students were asked to rate both the importance of
0 educational goals frequently pursued by higher
education institutions and their level of satisfaction
with M-DCC's attainment of those goals. Surveys
were returned from 168 classes for a final sample of
1, 476 student responses. Study findings, based on
averaged student ratings, included the following: (1)
college-wide, 19 of the 20 goals received ratings
above 4.0 in terms of their importance; (2) the five
most important goals were maintain high academic
quality, prepare students to communicate effectively, maintain an excellent reputation, prepare
students for a career upon graduation, and provide
students with the opportunity to become broadly
sducated; (3) over 60% of students agreed that
M-DCC addressed these top five goals; (4) no goal
item received a disagreement rating of 20% or more;
(5) over 83% (n=982) of students were either somewhat or very satisfied with their Miami-Dade experience; (6) students at all sites generally expressed
satisfaction for goals related to academic quality;
and (7) at the Inter-American Center instructional
site, however, at least 20% of respondents disagreed
that M-DCC fuffilled of 10 the 20 goals. (Tables of

A study was undertaken at Miami-Dade Commu-

trial Education, Two Year Colleges, "Two Year College Students Identifiers." Misami Dade Community College FL. A study was undertaken at Miami-Dade Community College (M-DCC), in Florida, to draw a demongraphic profile of students in the college's Vocational Certificate (VC) programs. The study examined VC student characteristics as compared to credit students with respect to ethnicity, gender, age, citizenship, residency, native language, and basis of admission for students enrolled for closing fall term 1993 and completions for 1990-91 through 1993-94. Highlighted findings include the following: (1) while proportions of White non-Hispanic credit and non-credit enrollments were similar, Black VC enrollments far exceeded Black credit students (35% to 21%) and Hispanic credit enrollment exceeded Hispanic VC enrollment (57% to 46%) (2) the 40 to 60 ratio of males to females for VC students was similar to the male/female ratio for credit students; (3) 70% of VC students were 26 or older, REE JUN 1995

compared to 38% of credit students; (4) 55% of VC students were U.S. citizens, compared to 61% of credit students; (5) more than 98% of VC students were Dade County residents, compared to 94% for credit students; (6) 50% of both programs; enrollments were native English speakers; (7) in fall 1993, there were 2,656 VC students, 52% of whom had declared a program major; (8) 91% of VC students were high school graduates; and (9) the annual number of completions increased dramatically from 6 in 1990-91 to 262 in 1993-94, although this number is believed to be critically under-reported. (Contains 10 references. Includes data by instructional site and M-DCC-wide.) (MAB)

It examines biological, family, school, emotional, cognitive, social, and cultural factors which contribute to violent behavior. The report reviews what psychologists have learned about the factors

that accompany and contribute to youth violence. It recommends a variety of specific efforts to reduce youth violence through: (1) early childhood interventions; (2) school-based interventions; (3) heightened awareness of cultural diversity; (4) development of the mass media to be part of the solution; (5) limiting access to firearms by children and youth; (6) reduction of youth involvement with alcohol and drugs; (7) psychological health services for young perpetrators, victims, and witnesses of violence; and (8) education programs to reduce prejudice and hostility. Two appendixes list the table of contents of the commission's full report (volume 2) and describe the commission's work. (MDM)

tionship Identifiers—"Attitudes toward Disabled For integration of special needs students to succeed, teachers and caregivers must be aware of the challenges inclusion can present, and engage in thoughful planning and follow-through. This book provides information and support for early child-hood staff with special needs children in their classrooms. The introduction describes the child with special needs and why this child is in a regular class.

The second chapter addresses dealing with teacher's feelings about persons with special needs, while the third chapter suggests areas in need of consideration when preparing oneself and the physical environment to accommodate such children. The child with special needs and ways to assist with integration are discussed in chapter 4, while techniques that the staff can use to encourage acceptance and understanding of children with special needs by children with typical needs are suggested in chapter 5. Chapters 6 and 7 outline, respectively, working with parents of both groups of children and working with other service agencies. Names of organizations; suppliers of relevant publications and materials; and publications, children's books, recordings and videos are listed in the resource section of the book.

Noting that beyond the individual variations among humans, there is a body of mental abilities common to every human being, this book examines the debate among researchers about the extent to which humans are "preprogrammed," and suggests a new scientific psychology of human development. By examining experimental data obtained from adults, newborns, and animals, humans are able to adapt in astonishing ways to new situations and needs, but only in certain areas and within certain limits. Although cognitive acquire new knowledge, they do so only within a restricted framework. Although cognitive skills can evolve, they can do so only within a restricted framework. Although cognitive skills can evolve, they can do so only within the confines of a relatively narrow genetic envelope, which imparts to members of the species a fixed core of spitulose that everyone possesses. The chapters of the book are as follows: (1) "Esplaining Our Behavior"; (2) "Seeing and Hearing"; (3) "The World and Its Objects"; (4) "Self and Others"; (5) "The Biological Foundations of Language"; and (6) "Conclusion: Human Nature and the Cognitive Sciences." (Contains nearly 300 entries.) (AA)

Method, Thailand
This paper relates the experiences of an early
childhood professor from the Freie University of
Berlin on a trip through East Asia to provide advice
and assistance on the situational approach to preschool education. Impressions of the sociopolitical
and educational environment and needs of Thailand, Hong Kong, Indonesia, Singapore, Malaysia,
and the Philippines are presented. It describes the
educational and social problems in these nations, as

well as the attitudes of local teachers, administrators, government officials, parents, and children. Among the impressions noted are: (1) the planners and inspectors at the workshop in Bangkok were not prepared to accept an imported package to meet their needs and wanted to develop an indigenous solution; (2) the relationship between the Thai village parents and the schools is adversarial; (3) the 1997 transfer of Hong Kong to Chinese control will have drastic implications for Hong Kong preschoolers, who are neither British nor Chinese; (4) preschools in Hong Kong are based on rigid drills and standardixed exams; (5) the variety of religions in Indonesia is a significant factor for preschool development; (6) Indonesian preschools adapt primary school curricula; (7) Singapore schools resemble those of Hong Kong, with rote drills and standardized tests; (8) well-educated Singapore mothers are rewarded by being allowed to have more than one child; (9) in Malaysis, language, class, and race all impinge upon preschool education; and (10) in the Philippines, poverty, malnutrition, prostitution, and a guerrilla war require many different approaches to preschool development. (MDM)

This report describes a nationwide study of female children and the family in rural India. The objectives of the study were to generate data on the situation of female children; to identify the major problems related to their status; to start a series of programs to help remedy those shortcomings; and to assist communities, and women in particular. Demographic data, including family migration, occupation, economic status, government programs received, housing, family structure, education, and occupation, were obtained. Chapter 1 describes the study's rationale, methodology, and conceptual framework. Chapter 2 provides a profile of households. Chapter 3 reports vast gender bias inherent in the socialization of children, including gender expectations, parent-daughter activities, and behavioral restrictions related to gender are reported. Chapter 4 presents data on school attendance, participation in extra-curricular activities, and behavioral restrictions related to gender are reported. Chapter 4 presents data on school attendance, and the view of female children's ideal level of education. Chapter 5 includes data on mother's health, immunization, nutrition, health treatment, appearance, and environmental factors. In chapter 6, survey results on menstruation knowledge, puberty rites, taboos, and restrictions are reported. Chapter 7 reports the percentage of female children performing economic activity. Chapter 8 includes six case studies and five brie

Education, Educational Policy, "Professional Development, "Teaching (Occupation)
Identifiers—"Caregiver Training, National Association Educ of Young Children, "Professionalism The goal of NAETC's National Institute for Enry Childhood Professional Development is to improve the quality of services provided to young children and their families by enhancing the quality, consistency, and accessibility of early childhood education professional preparation. In this compilation of presentations, key leaders offer their perspectives on achieving the Institute's goal of an articulated professional development system, represented by the early childhood career lattice. The first article presents the conceptual framework for this professional development system and outlines the official position of NAEYC. The remaining articles are the opinions of the authors and are presented in four parts. Part 1 indicates the different kinds of programs from which early childhood educators enter their careers and the resulting inequities in status, differences in standards for programs and practitioners, various program delivery mechanisms, and lack of consensus on cherished values. Part 2 opens with five descriptions of various components of the profession's core knowledge and emphasizes the need for specialized professional development options that build on this knowledge. Also included are articles that discuss the knowledge base for the Baccalaureate Early Childhood Teacher Education Program and a contextual model to promote professional sim in early childhood deucation and care. Effective strategies that can improve the day-to-day skills of professionals who are engaged in fostering each other's learning are explored in part 3. The volume concludes with practical and policy implications of this vision of a coordinated professional development system and shifts the focus to financing for professionals who are engaged in fostering each other's learning are explored in part 3. The volume concludes with practical and policy implications

It summarizes the main articles of the convention and explains the international legal structures by which the rights of children are protected. The booklet then examines human rights and children's rights, the role of the United Nations in protecting these rights through minimum standards, and the role of the Australian government in protecting these rights through policy. It discusses opposition to the Convention in Australia, voiced primarily by parents who believed that the Convention would abrogate certain parental rights and responsibilities. The booklet then considers: (1) recent developments in Australia that reflect the principles of the Convention; (2) implications of the Convention on early childhood philosophy, policy, and practice; and (3) the prevention of child abuse in Australia. A resource list of 14 publications is included. A separately published official summary of the major issues covered by each article of the convention is attached. Contains 13 references. (MDM)

Skills, Teacher Roie, Test Wiseness Identifiers—Organizing Strategies, Schema Theory, SQ3R Study Formula

On the premise that even young students can learn to study effectively, this book provides a framework and activities for the systematic teaching of study skills during the elementary grades. The book is consistent with current research and theory about learning and remembering; concepts such as schema and metacognition pervade the suggested classroom and student activities. Relevant research is discussed at the beginning of each chapter, and week-by-week outlines of suggested classroom activities are presented. The reproducible student activities are presented to the study skills program for elementary students. The first chapter defines study skills and describes how to use the guide. Chapter 2 describes activities designed to help students develop metacognitive awareness, monitor their learning, and make connections with what they already know. Chapter 3 suggests methods for teaching organizational skills, from keeping a neat deak, work folder, and sasignment sheet to scheduling an appropriate time and place to study. Chapter 4 through 6 propose methods for extracting min ideas, and strategies to promote active reading and active listening. Chapters 7 and 8 suggest ways for organizing newly acquired information, such as note-taking and mapping. Chapters 9 and 10 propose skills for effectively demonstrating knowledge by answering essay questions and writing summaries and reports, as well as taking tests. Contains 99 references. (AA)

There is a growing consensus among educators

Identifiers—*Curriculum Implementation, *Developmentally Appropriate Programs, Subject Centered Curriculum
There is a growing consensus among educators that a major reason why traditional curriculum approaches have failed is that they are not based on knowledge of what is age-appropriate or individually appropriate for young children. This book provides practitioners with a practical framework for making curriculum effective and responsive for children in the primary grades. Part 1 presents the six teaching strategies for constructing and implementing such a curriculum: (1) knowing the children by understanding their developmental and individual characteristics as well as their cultural context; (2) building a classroom community that is able to address children's social, emotional, and cognitive development; (3) structuring the classroom and involving children in it; (4) guiding children's learning and (6) building a partnership with a significant adult in the child's home life. Part 2 of the book shows how the five subject areas of curriculum content-inaguage and literacy mathematical thinking, scientific thinking, social studies, and the arts and technology-can be taught within a developmentally appropriate framework. Lists of resources and references appear throughout the book. (BAC)

Pamily Support, Historical Background, 'Reform Efforts
This book explores why past efforts to reform the human services system have had marginal impact in improving the quality of life for children and families, and offers new directions for future social service reform. Chapter 1 examines the sociopolitical antecedents of service integration that have emerged from the uniquely democratic experience of the United States. Chapters 2 and 3 analyze formal attempts at service integration and stress the cacophony of broad-based multidisciplinary efforts of the early 1970s, with special emphasis on research and development and on policy initiatives. Chapter 4 addresses the comparatively recent and more circumscribed categorical approaches to service integration. Chapter 5 examines evolving and diverse definitions of service integration. Chapter 6 explicates differing theoretical approaches-structuralist, humanistic, and systemic—that have undergirded and given rise to different definitions, conceptualizations, and approaches to service integration. Chapter 7 delineates action frameworks or typologies that codify approaches to service integration. Chapter 8 presents the barriers to and incentives for implementation, and chapter 9 discusses specific activities that compose the repertoire of service integration of the implications of this analysis in chapter 10 and recommendations for future work on service integration in chapter 11. Contains over 200 references. (TJQ)

On the premise that all children can learn, Reuven Feuerstein developed a classroom curriculum designed to build the cognitive functions of students with the concepts, skills, strategies, operations, and techniques necessary to become independent thinkers. These nine essays advocate education systems that consider intellectual power as their end rather than their means. The first section of the book discusses the contribution of two theorists to the concept of cognitive development, including Feuerstein's discussion of Structural Cognitive Modifiability and Mediated Learning Experience. The second section summarizes studies on the effects of IE. The thrid section addresses the implementation of IE, including studies that pertain to at-risk students. The essays are: (1) "Intervention Programs for Low Performers: Goals, Means, and Expected Outcomes" (R. Feuerstein and others); (2) "Mediated Learning: The Contributions of Vygotsky and Feuerstein in Theory and Practice" (B. Presseisen and A. Korulini); (3) "Empirical Status of Feuerstein's Instrumental Enrichment (FIE) Technique as a Method of Teaching Thinking Skills" (J. M. Savell and others); (6) "Combining Instrumental Enrichment and Creativity: Socioemotional Development for Disadvantaged Gifted in Soweto: Part I and Part II" (M. Skuy and others); and (8) "Impl

Training
Identifiers—Multiple Intelligences, Paradigm Shifts
Noting that thinking processes cannot be separated from educational content, this two-volume
collection aims to define the profound changes in

educational thought during the 20th century, as well as to present examples of how these changes are embodied in excellent schools and other learning communities. Volume one is divided in three sections. The first section provides the background for thought-centered schools and probes their potential, examining both barriers to restructuring and major paradigm shifts already occurring in the schools. Section two calls for substantive school renewal and redesign from the inside out, addressing policy formation at the national, community, and school levels. Section three dictates transformational change for schools, that is, curricular reconceptualization that goes beyond the cognitive and into the metacognitive realm, in which the uses, applications and creative transfer of learning become the most significant outcomes. Volume two also presents three sections. The first delineates the theoretical basis for instructional methodologies that highlight cognitive skills and strategies, outlines cognitive strategies two scenarios depicting future school models. The second section introduces cooperative learning as a means for developing intellectual skills, indicating that problem-solving and critical-thinking skills can be experienced, practiced, analyzed, and applied in collaborative settings. The final section begins with a reassessment of student assessment methods, elaborates on methods and models for assessing, and provides a strategic plan for tracking students' transfer of learning. Each of the 51 articles includes references. (AA)

Mental Exercisea, "Mental Imagery, Relaxation, Self Talk

The methods outlined in this guide offer teachers a variety of ways to stimulate interest, enhance concentration, increase understanding, and improve memory in their students. Chapter 1 discusses the LEARN (Learning Efficiently And Remembering Mnemonics) system, a set of strategies that help students use a variety of processing styles to a greater advantage, and the 4M and VIP system, a set of strategies that incorporate Mnemonics, Metaphors, Mind maps, and Music; and Visual strategies, Imagery, and Positive suggestions. Chapter 2 provides an overview of visualization, its role in learning, and how it is used in these systems. Chapter 3 discusses Memory Foundations for Multiplication (MFM), a multiplication system using mnemonics. Chapter 4 presents finger multiplication (MFM), a multiplication systems, and chapter 5 discusses several different patterns and strategies to help students with spelling. Chapter 6 presents reading, science, and social studies mnemonics. Chapter 7 discusses strategies for developing and using metaphors and other associative techniques. Chapter 8 covers an organizational technique called mind mapping, and chapter 9 presents ideas and teaching suggestions for using music to enhance learning. Visual strategies are discussed in chapter 10, and imagery techniques are presented in chapter 11. Chapter 12 covers positive suggestions, including relaxation techniques and positive self-talk. Contains 74 references. (TJQ)

School Choice, School Role, Socioeconomic Influences
Identifiers—"Germany
This lecture describes the legal status of parental rights pertaining to German schools, and ideas about the practical problems of cooperation between parents and schools in Germany, especially under the auspices of a multicultural society. Four legal parental rights are listed: (1) the right to decide if their child should statend private or state school; (2) the right to decide if their child should take part in religious instruction; (3) the right to choose for their child one of the different kinds of middle- and secondary-schools; and (4) the right to be informed by the school. In addition to these individual rights, parental collective rights are addressed, not only as the rights of a group but also as a social movement. The reality of parental rights in Germany is mentioned in the context of socioeconomic factors influencing parent participation and the parent-teacher relationship. Two points, parental choice on religious instruction and improvement of parental involvement, are raised for a discussion. Finally the aspect of the cohesion of a multicultural society and the importance of the school in fulfilling this function are pointed out for future study. (WP)

Identifiers—Multiple Intelligences, "Tribes Approach
Blending the fields of group process and cooperative learning; prevention and resiliency; learning
theory; and school change into a comprehensive
guide, this book describes the on-going development of the Tribes group process, whereby small
learning groups are used to promote human growth
and learning. A tribe consists of three to six students
who work together each day throughout the school
year. Through the process, students learn to use
specific collaborative skills, and to reflect on both
the interaction and the learning that is taking place.
Tribes are formed on the basis of sociometrics to
evenly distribute boys and girls, students of high and
low peer acceptance, and ability levels. The book is
divided in 12 chapters. The first chapter give a brief
description of the project and its implementation.
Chapters 2 and 3 analyze the goals of the project
and the principles and theories behind them. Chapters 4 through 6 describe ways of forming Tribe
groups and making them work in a classroom. Chapters 7, 8, and 11 suggest strategies and activities for
designing and implementing learning experiences
appropriate for the project's educational objectives.
Chapters 9 and 10 present the opinions and commentary of people who have implemented the Tribe
project. Finally, chapter 12 proposes different resources for implementing the project and assessing
the progress of participating students. The appendix
includes a 76-item bibliography, Tribes classroom
posters, notes from chapters 1-10, and materials for
the Tribes Learning Community. (AA)

The European Forum for Child Welfare (EFCW) is committed to promoting the implementation of the United Nations Convention on the Rights of the Child, and the Convention's views underpin and influence the work program of the EFCW. The 1994
EFCW Conference concentrated on articles within the Convention whereby mobility within Europe may have a detrimental effect on children. This report contains the following presentations from the conference: (1) "Children at Risk in a Mobile Society and Mobile Children in a Risk in a Mobile Society and Mobile Children in a Risk Society" (C. D. Spinellis); (2) "The Rights of the Child in Europe: In the Context of Human Rights" (Anna Gillett); (4) "The Rights of the Child in Europe: In the Context of Human Rights" (Anna Gillett); (4) "The Rights of the Child in Europe: (Michael Jarrann); (3) "The Rights of the Child in Europe: In the Context of Human Rights" (Anna Gillett); (4) "The Rights of the Child in Europe: (Michael Teirlinck); (5) "Social Exclusion in Europe." (G. Thiakaios); (6) "Children from Minority Communities and Indigenous Populations: Racism and Xenophobia" (P. *Public Policy, Racial Balance, *Racial Factors, Social Agencies, Social Work, Social Workers Identifiers—England (London), *Placement (Foster Care)
This book presents a case study of the introduction of a new policy of 'racial matching' in foster care, the matching of foster child and family on the basis of culture and race, and reviews the policy's implications for the recruitment of black foster caregivers. The report describes how the issue arose on the social work agenda, and how it was approached within one London borough. Chapter 1 provides an introduction to the new policy of racial matching. Chapter 2 discusses methodological and ethical issues. Chapter 3 describes how the new ideas gained prominence in social work thinking. Chapter 4 presents an overview of developments London-wide as reported in a postal survey of principal fostering officers. Chapters 5 and 6 examine the evolution of policy with the borough fostering team, based on interviews with workers and an analysis of team meeting minutes. Chapter 7 describes the recruitment campaign that was the focus of the study. Chapter 8 examines changing ideas about applicants' suitability within a model of cultural diversity, and chapter 9 examines issues relating to professionalism and the acquisition of intercultural skills. Chapter 10 looks at different interpretations of the concepts of 'public' and 'private', and chaper RE JUN 1995

ters 11, 12, and 13 describe two innovative ap-proaches to assessment-the introduction of group training and assessment, and joint assessment visits with a black foster parent co-worker. Chapter 14 explores the study's findings within the broader context of sociopolitical change. Contains a bibliog-raphy of over 400 items. (TJQ)

emer rarucipation, Parent Role, Parents Teschers, Parent School Relationship, "Parent Student Relationship, "School Community Relationship Hemperane of, and benefits from, parents involvement in their children's education, this book offers parents, educators, and community organizations a source for understanding the meaning of partnerships between school, family, and community. Chapter 1 discusses broad emerging change factors as the United States undergoes a transition with resultant modifications in family patterns. Chapter 2 takes a look at family patterns and the relationship to the African-American experience in the context of changing socio-economic conditions that affect educational success. Chapter 3 describes the status of Hispanics in the United States and their unique family characteristics. Chapter 4 describes the ethnic composition of Asians in the United States and their unique perceptions of educational excellence. Chapter 5 provides information on goals, and on activities and leadership roles of citizens/parents groups that have been formed to provide guidance, monitoring, and leadership in schools. Chapter 6 analyzes the different roles parents need to play in advocating for children and communities. Chapter 7 presents the hypothesis that parents as well as students need to have a positive self-image. Chapter 8 provides a discussion of the specific characteristics of a successful school and chapter 9 presents characteristics of successful students. Chapter 10 generals recommendations to improve parental involvement and chapter 12 lists organizations and agencies that have been recognized as advocates for parents. Each chapter includes references. (TJQ)

Designed for use by both parents and professionals who work with young children, this reference
work is intended to include all of the major areas in
the field of early childhood education. Current topics such as AIDS and computers are addressed, as
are more traditional concerns such as family and
parenting issues. The book is organized into six topical chapters, which include short essays and lists of
resources relating to specific subjects within the
main topic. These chapters cover the following: (1)
growth and development; (2) social and emotional
development; (3) family issues; (4) child care and

early education; (5) the expressive and cultural arts; and (6) social policies. The seventh chapter, Services and Information, contains lists of organizations involved in early childhood education, electronic information services, and government agencies. Also included is an index of approximately 1,000 titles referred to in the book. (5W)

Grade-Level Status Effects in Multiage Groupwork: The Lady Bountiful Syndrome.

Pub Date—4 Apr 94

Note—39p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, L.A., April 4-8, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MPDI/PC02 Plus Postage.

Descriptors—*Cooperative Learning, *Cross Age Teaching, Elementary Education, Learning Processes, Mixed Age Grouping, Peer Relationship, Peer Teaching, *Student Attitudes

A study investigated whether grade-level status affects learning through cross-age activities. Data were collected through unstructured and openended audiotaped interviews with 11 pairs of students in a combined third—and fifth-grade class. Coding and analysis of data revealed seven themes related to students' perceptions of their interactions as they worked in cross-age pairs. Three themes were elaborated upon: (1) "We both know different things"; (2) "Because they help us a lot"; and (3) "We work together." Interactions between these themes were investigated to see how and why status differences influence small group work. Status was defined by grade level/age, and therefore, knowledge. Results showed that fifth graders perceived the third graders as incapable and therefore did things for the third graders as opposed to trying to help them learn to do them on their own. Results suggest that the effects of differences in knowledge status in small groups can lead to interactions that do not foster learning on the part of either the high-or the low-status partner. Suggested ways to deal with this "Lady Bountiful syndrome" in classrooms include assigning lower status students to leadership loositions and "preteaching" key elements to lower status students. Identifiers—Canada, *Child Safety
Written by pediatricians, this book is designed to
bring vital health information to caregivers providing child care in their homes. It provides caregivers
with practical answers to common questions about
children's health, safety, and well-being. The guide
is divided in six sections. The Health section contains a simple practical strategy for staying healthy,
advice on how to read the signs of sickness, and
what to do when with sick children in the day care
setting. The Safety section helps to develop as
wareness of the risks in and outside the home and
proposes strategies to reduce such risks. The Guidance section offers answers to some common questions about how to nurture babies and children, and
suggests ways to make home a place that promotes
children's self-control, play, and creativity. The Nutrition section offers a practical guide for feeding
babies and children and includes information on
food safety. The section on Your Health offers suggestions in support of caregivers' emotional, physical and professional well-being. Finally, the Tools

132

section contains clear charts, records, and tools designed to ease the stress of child care, improve communication with parents, and increase awareness of children's development and well-being. The guide includes a list of provincial and territorial child care offices, family day care associations, and national child care organizations. A suggested reading list with nearly 40 titles, categorized by topic, is also included. (AA)

This book examines the business community's responsibility to sid employees and their families with child care. It provides information on why businesses should provide child care and how to plan and manage a work-place child care facility. The 11 chapters cover: (1) program design; (2) architecture; (3) playground design; (4) security; (5) financial systems; (6) permits and licensing; (7) equipment; (8) insurance; (9) administration; (10) marketing; (11) staff training; (12) income; (13) legal issues; and (14) curriculum. The book's nine appendices include: (1) a listing of companies with employer supported child care; (2) a listing of child care center liability insurance carriers; (3) a listing of state child care day care licensing offices; (4) and a sampling of architectural firms with child care center experience. Also included are sample worksheets to help evaluate the process of establishing a child care program. (SW)

Identifiers—"Age Appropriateness, "Developmentally Appropriate Programs, Developmentally Inappropriate Programs
A collaborative study examined early childhood
teachers' philosophies and practices as they pertained to developmentally appropriate practices and
their influence on inner-city early childhood settings. Data were collected by recording conversations among five teachers. Excerpts indicate
agreement over interrelated developmental reascurriculum, teaching strategies, and parent-family
relations, as suggested by developmentally appropriate practices and their successful implementation. Constraints of time and "institutional"
expectations, however, limit such implementation. The collaborators disagreed regarding the place: of
skills instruction and accountability; of teacher-directed, large group instruction, of extrinsic reward
structures; and of the teacher's role in disciptine.
Also identified were issues that remained unclear,
such as age and individual appropriateness, appropriate and inappropriate practices, sources for developmentally appropriate practices, lack of
guidelines to implement them, and lack of emphasis
on importance of family and community. The final
concern was how "inner-city" settings are the same

as and different from "mainstream" schools and communities. Based on these conversations, it is recommended that all early childhood educators exine developmentally appropriate practices and ess how they compare to their own teaching ctices. (BAC)

Child Relationship, Physical Development, Questionnaires
Identifiers—Japanese People
A study investigated the attitudes of Japanese breastfeeding mothers in the South Bay area in Los Angeles. The sample consisted of 20 Japanese mothers over the age of 18 who were born in Japan, who recently came to the United States, and whose youngest child has been breastfed for at least 6 months. Subjects were interviewed in their native language. The results indicated that unrestricted breastfeeding, night nursing while co-sleeping, and long term breastfeeding were practiced. The mothers tended to choose breastfeeding as a matter of course and did not feel shy when nursing in public. They felt that breastfeeding was important for them. In addition, the study indicated some barriers that interfere with their breastfeeding practices, such as cultural and nutritional conflicts and conflicting advice from professionals. Results suggested that knowing the psycho-social obstacles to breastfeeding in the United States can facilitate breastfeeding of culturally appropriate childrearing practices—such as unrestricted nursing, late weaning, and co-sleeping—may be needed among medical professionals as well as mental health professionals. (The survey questionnaire is appended. Contains approximately 110 references.) (AA)

A study evaluated the Early Childhood Resources Teacher Training Project (TTP). The purpose of the TTP is to train preschool and early primary grade teachers in developmentally appropriate practices. The evaluation sought to: (1) determine the extent to which teachers undergoing training were able to understand and implement the content of the TTP; (2) assess the impact of training teachers in developmentally appropriate practice on the children they teach; and (3) measure the effects of training on the participants' colleagues, school administrators, and schools. Six case studies were initiated when a new group of teachers began a 2-year training cycle. Each teacher worked at a different school, with a proportionate number teaching kindergarten and first grade. The findings of the study suggest that teachers' participation in the training influenced their classroom practices, children's engagements in the classroom paratices, children's engagements in the classroom practices, children's engagements in the craining program. (Six appendices include a draft of the Earty Primary Practices Observation Scale; interview questions for the teachers', administrators, and colleagues; and observational indicators of children's engagement.) Designed to specify what an exemplary school-age care (SAC) program would look like, this guide provides instructions for establishing a SAC program that provides a balance of educational, social, and recreational opportunities. The guide covers care for children from ages 3 to 14 and includes care of children from ages 3 to 14 and includes care of children with disabilities or special needs. Chapter 1 introduces school-age programs, describing whom they serve, how the day is organized in such programs, and what the benefits are of a quality SAC program. Chapter 2 describes working with school-age children, including their developmental stages and the needs of children under streas or with special needs. Chapter 3 discusses planning program activities, including ensuring the activities are developmentally appropriate. Chapter 4 discusses creating SAC environments, and includes choosing materials and equipment, and using the outdoors. Chapter 5 discusses managing the program, including setting program goals, and selecting, training, and evaluating staff. Chapter 6 discusses establishing partnerships with parents, school, and the community. The appendices include a list of developmental stages of school-age children, a staff orientation checklist, a staff training assessment and planning form, and a parents' program evaluation survey. struction, "Testing, "Test Validity Identifiers—California (San Bernardino County),
"Project Head Start In light of debate about the developmentally inappropriste and culturally questionable use of standardized testing for placement of preschool children, alternative approaches to screening and assessment are required. The impact of a Head Start program upon children must involve documentation of physical and mental health, speech, hearing, vision, and overall wellness, as well as traditional developmental domains. In 1988, the Preschool Services Department of the San Bernardino County (California) Head Start Program reviewed a variety of developmental screening instrument, but decided to refine and use its own instrument, the Child Development Screening Form. The developmental status of 5,000 Head Start children was sampled during 2 consecutive program years using 60 observable behaviors representing standard developmental milestones. Teachers and aidea attended inservice training for using the screening form. Screening was done both pre-program and post-program. For one of the sample years, the 2,753 children showed demonstrable developmental gains, an average of about 6 points across all domains out of a possible 20. Children with disabilities averaged an 11 point gain. The current version of the screening form has a developmentally appropriate set of items and differentiates development trajectories and variations. It is user- and child-friendly, economical, and meets Head Start requirements. (The screening form, charts of screening results, and 25 references are included.) (TM)

This issue of the Canadian journal "Transitions," presented in French- and English-language editions, deals with immigration as it relates to families. "Immigration, Integration, Families, Values: Old Wine In New Bottles" (Morton Weinfeld with Kathy Eisner) discusses the process of immigrant integration, which spans generations, and its impact on family

and cultural values. "Immigrant Women Speak" consists of excerpts from two recent books about Canadian women and what it means to them to be a "hyphenatied" Canadian. The importance of the family in preserving and promoting the language (French) and its bearing on the demography of Quebec are explored in "Quebec: The Politics of Survivai" (Michel Vastel). In "How Tolerant Are We?" (Darrell Bricker), a polister examines Canadiani attitudes on a range of issues associated with ethnocultural diversity and views regarding immigration. Also included in this journal issue are short articles about directions and options for redesigning federal programs, a campaign encouraging families to spend time together, and startling facts and staticies on poverty and the mental health of children. Identifers—Canaca, Ontario, "School Based Child Care Centers
Recognizing that child care located in the schools has many benefits, this manual was prepared for those planning or implementing school-age child care partnerships for kindergarten and primary grade children. Reporting on programs in the Ontario (Canada) area, the manual notes five issues that are central to developing such a program: (1) cooperation versus integration of care centers; (2) continuity and consistency versus diversity in programming; (3) supervision versus independence of the child; (4) targeting versus universality of eligibility; and (5) flexibility versus stability of service delivery. Section 1 explores how changes in demography are affecting children's out-of-school lives. Section 2 reviews the implications of child care quality on children's learning and development. Section 3 describes the legislative and funding framework that shapes the management of school-child care partnerships. Section 4 discusses how school boards can make policy and program initiatives so as to play a leadership role in responding to changing families and communities. Section 5 analyzes operational issues that school boards and child care managers should consider when implementing a school-based child care strategy. Section 6 summarizes the history of the partnership among schools, child care services, and recreation programs, which predates the 20th century. Section 7 uses a holistic approach to present specific strategies for organizing people, space, and materials. Section 8 presents specific strategies needed to foster effective partnerships in neighborhood schools. Work sheets, sample programs, and lists of resources are included. Contains a 137-item bibliography that inhere partnerships in neighborhood schools. Work sheets, sample programs, and lists of resources are included. Contains a 137-item bibliography that in-cludes historical sources, and archival and other pri-mary sources. (TM)

During the past decade, community-serving organizations have encountered increasing pressure to implement comprehensive acreening of program staff to reduce the risks inherent in working with vulnerable populations, such as young children. This acreening *tool kit* suggests a process of staff screening based on the requirements of the position, the nature of the contact with clients, and legal limitations on the use of acreening tools. The book includes chapters on: (1) legal aspects of screening; (2) position descriptions; (3) recruitment and applications; (4) interview; and (5) reference and record-checks. Included are sample position descriptions, applications, and interview questions. A list of State Child Protective Agencies and State Criminal History Repositories is provided, as well as references to relevant case law. Contains a list of resources and a 16-item bibliography. This report describes the relationship between comprehensive prenatal care services and healthy babies, and examines the inclusion of social support services with medical care for women at-risk of

problem pregnancies and unhealthy babies. The report notes that the United States trails many countries in indicators of maternal and child health. In 1989 Congress required states to expand Medicaid to pregnant women, and most states have established support services, such as home visiting. Although prenatal health services are vital, the most effective prenatal care programs include home visiting and other support services. Home visiting programs into high-risk pregnant women and infants to other important medical and social services. Examples of programs in Virginia, North Carolina, New York state, and Hawaii, which show promising results and cost savings are provided. Appendices give state-by-state information on Medicaid coverage for prenatal care and list key components of successful home visiting programs. (TM)

(Friedrich), Historical Background, "Kondratieff Waves, Locke (John), Pestalozzi (Johann Heinrich)
Certain economic theories can help explain the rise to prominence of parent participation preschools in the 1950s and help to make predictions about their future. Specifically, the long-wave cycle of economic behavior and its explanation of social systems and innovations can be useful. One popular approach is that of the Soviet economist Nikolai Kondratieff, who discovered 50-year cycles in capitalist economies, although governments now may be able to moderate those cycles in the future. A related observation is that clusters of inventions or innovations that have been proposed while the economy descended into a depression have become successful as it recovered. Purther, while invention is constant, application of such invention is cyclic: only during a "window of opportunity" provided by an economic downturn will new concepts be seriously considered. Educational developments seem to fit this pattern, including the introduction of the ideas of Locke, Pestalozzi, and Froebel into United States education. Charting the history of the nursery school movement in the United States shows that the years for the introduction of parent co-ops and their rapid rise occurred as the economy rose to a plateau after World War II. At that time, federal funding for war-time nursery schools was terminated, and mothers with increasing numbers of preschool children were dependent upon the co-opcommunity for social support networks. Thus, awareness of economic wave theories may add a critical perspective to analysis of early childhood education history and enable comprehension of current and future situations. Noting that school recess periods are one of the few times when children interact with their peers on their own terms—with minimal adult intervention—this book examines recess behavior and its social and pedagogical implications. In addition to studying spontaneous peer interaction among school children, the book addresses issues of; (1) the role of recess in schools and the curriculum; (2) educational outcomes of recess; (3) relationships between playground design and behavior; (4) and differences in playground behaviors across age and gender groups. The book concludes by noting that recess allows children to make choices regarding whom to interact with and how to socially negotiate interactions; builds a number of high-level cognitive strategies; and raises levels of motivation. Each of the book's 11 chapters contains references. (SW)

tionship, *Parent Workshops, Program Evaluation
Identifiers—*Developmentally Inappropriate Programs, Developmentally Inappropriate Programs A university early childhood laboratory school was making a transition from an academic orientation to one focusing on developmentally appropriate practices. This practicum was implemented to improve parents' awareness of developmentally appropriate programs by means of workshop sessions. The goal was to increase their knowledge of what is developmentally appropriate in programs for children 3 to 8 years of age. Three workshop sessions were designed to provide participants with information on appropriate and inappropriate practices that was provided through video tapes and overhead alides comparing appropriate and inappropriate practices. Each session included a question and answer period to allow for further clarification. A post-test was given at the end of the third session to determine information gained. The results indicated that, compared to the pretest, parents were able to identify more developmentally appropriate practices for children ages 3 to 8. (Four appendixes contain the parent questionnaire, the laboratory school's annual assessment form, the survey pretest/posttest, and consent letter.) (AP)

Identifiers—Columbus Public Schools OH, Emergent Literacy, "Print Awareness
This report describes the All Day Kindergarten (ADK) Program undertaken at 18 elementary schools in Columbus, Ohio, and presents an evaluation of the language development component of the rogram. ADK provides an extra half day of instruction, using a language-based curriculum to reinforce the skills, concepts, and educational experiences taught in the regular kindergarten classroom. It was a desired outcome of ADK that at least 50 percent of the pupils in the program would demonstrate an awareness of early concepts about print such that they would successfully complete at least 12 of 17 items on a concept about print test, "Balloons." An evaluation of the program found that, of the 247 pupils who attended at least 80 percent of the ADK sessions during the 1992-93 achool year, 195 (78.9 percent) successfully completed at least 12 of 17 items on the "Balloons" test. Forty-seven pupils completed all 17 items correctly. The report recommends that ADK be continued in the 1993-94 school year, that program teachers be provided RIE JUN 1995

more inservice meetings, and that the program eval-uator increase the number of classroom visits. An appendix provides copies of program evaluation forms. (MDM)

This technical assistance paper presents information designed to assist achool personnel in assessing the strengths and needs of children and planning developmentally appropriate curriculum strategies. The first topic addressed is assessment strategies, which include developmental screening, diagnostic instruments, teacher observation, guarent observation and interviews, reports from medical personnel, and reports from early intervention services. The second section suggests guidelines for assessing behaviors of young children. The next topic is observation and recordkeeping strategies, such as developing each child's portfolio and using checklists. A sample learning prescription is provided, illustrating how to summarize the information sequired through observation procedures. The final section of the paper presents assessment information to families and suggests strategies for acquiring additional information from parents through conferences. Contains 7 additional resources and 12 references. (BAC)

This paper discusses the five components of preschool program planning. The first component involves reviewing information about child development, developmental characteristics of young children, and the specific needs of children and families enrolled in the program. The second component involves formulating goals that reflect the philosophy of the program and provide the larger framework into which teachers organize desiyation a classroom environment in terms of planning the space, organizing materials and equipment, and setting up the learning environment. The fourth component involves preparation of a schedule of activities, routines, and transitions that will provide the time frame for implementing the daily program. Preparation of a written daily schedule is considered a critical part of this component, and written policies and procedures that address emergency and routine situations are also required to implement the schedule. The last component relates to determining and developing an appropriate curriculum by identifying strategies to implement planned experiences. Three steps characterize a curriculum planning strategy: (1) brainstorming; (2) designing a theme's implementation; and (3) planning specific activities for the group as a whole and for learning centers. A sample plan for small-group experiences and a chart outlining the physical, social, emotional, creative, and cognitive components of the curriculum are included. Additional resources are also included. Contains seven references. (BAC)

This technical sasistance paper examines the importance of planning the physical preschool environment and its impact on the child's total development. The two main aspects of the physical environment which are discussed in detail are creating areas of interest in the classroom, and planning the outdoor environment. Issues explored in creating interest areas are: (1) what kind of materials need to be to promote learning, (2) how should materials be organized, and (3) what safety guide-lines need to be followed. In addition to providing experiences through interest areas, the significance of planning for everyday tasks is also stressed. The outdoor environment is seen as an extension of the classroom, and ways to plan the space and the kinds of equipment needed are considered. Special mention is made of how the physical environment can be adapted to promote the integration of children with special needs. Included in this paper are six figures that providee (1) suggestions on how to determine the location of learning areas; (2) a sample floor plan for children's indoor space; (3) a checklist for room arrangement, materials and supplies of in-

terest areas; (4) suggestions for a variety of active learning areas; (5) a sample electch of a playground area; and (6) a list of modifications that can be made to accommodate special needs children. Contains 7 additional resources and 10 references. (BAC)

Recognizing that a child's family is his or her first and most important teacher, this technical assistance paper stresses the importance of preschool teachers involving the family in the development of the child. It examines the fundamental principles that guide the creation of a partnership with parents and some of the objectives of building the family-school partnership. Four steps are identified that help in implementing an effective plan for involving families: (1) determining resources within and outside the school for implementing a Family Involvement Program; (2) getting to know the families, (3) devising a plan of action based on available resources and knowledge of the families; and (4) designing a calendar and formalizing plans. Strategies that can be used to build relationships with families are discussed, such as parent conferences, home visits, bulletin boards, notes, newsietters and handbooks. Mention is made of special considerations for families with special needs children. A sample parent conference sheet and newsletter as well as guidelines for parent conferences are included. Con-

tains eight additional resources and seven references. (BAC)

In addition to the sppropriate equipment and curriculum, a necessary ingredient of an effective preschool program is the quality of the interpersonal elimate within the classroom. This interpersonal elimate within the classroom. This interpersonal elimate within the classroom. This interpersonal elimate noting that the teacher's responsibilities in this respect are: (1) developing teacher-child relationships; (2) designing effective home-achool relationships; and (3) building relationships with the support resource staff. It also notes that the personal qualities considered important in early childhood teachers are awareness of the uniqueness of each child, flexibility, and a wide range of interests. Checkinsts of characteristics and skills of good early childhood teachers are included. The developmental stages of teachers are examined to assess the different kinds of learning opportunities that would benefit each stage and strengthen professional commitment. The paper suggests workshops, conferences, inservice training, and periodicals as ways to enhance professional growth. It also notes that an additional way to grow professionally is through self-assessment of teaching performance in the classroom setting, of the several models for staff evaluation, the paper recommends the "enabler model." because it supports developmentally approprist early childhood education. Contains 13 references, inservice training, of the periodicals as ways to

This technical assistance paper answers the question, "How can quality education programs for young children be assured?" by addressing four issues: components of quality education programs for young children be assured?" by addressing four issues: components of quality education programs for young children be assured?" by addressing four issues: components of counteract pressures for inappropriate practices, types of early childhood programs, measures to counteract pressures for inappropriate practices, types of early childhood programs, and program evaluation methods. The paper notes the following as recognized components of quality in the preschool setting: (1) a developmental philosophy; (2) integration of children; (3) flexible grouping; (4) teachers as facilitators; (5) individualization; (6) successful conflict management; (7) respect for the child; (8) effective communications; (9) choices in activities; (10) an appropriate physical environment; (11) integrated curriculum; and (12) support services for families. The paper form parents who want the classes to be conducted in ways that are developmentally inappropriate. Ex-

amples of what are considered inappropriate and appropriate practices are provided in the form of a checklist. The paper then briefly describes different types of early childhood programs. While sugesting that several methods of evaluation should be explored, the paper focuses on self-study, which may utilize specific instruments and may lead to accreditation. The paper concludes with a list of essential socreditation criteris, including: interactions among staff and children, developmentally appropriate learning experiences, teacher-parent interactions, and staff qualifications and development. Teacher Attitudes, Teacher Effectiveness, Teacher Workshops, Teaching Models, Teaching Styles

A practicum was designed to develop training that would increase teachers' understanding of an integrated curriculum and how to plan for implementation. Subjects were 23 teachers at a K-5 elementary school. Training was developed to provide a common knowledge base of an integrated curriculum, productive collaboration and planning, and understanding of work-behavior styles. The researcher developed and administered pre- and positiests, teacher stitude surveys, and training session evaluations; acted as a resource person for team planning for integrating curriculum; reviewed lesson plans; and made classroom observations of curriculum integration. Analysis of the data showed that teachers who participated in the training had a clear understanding of integrating curriculum and how to plan for integrating curriculum. The positest results showed mastery of concepts presented in the training, and teacher attitude surveys showed participants felt communication had increased between grade-level team members and between and among grade levels. (A Readiness for Curriculum Integration survey, a curriculum integration assessment questionnaire, and a survey to measure school-wide communication about curriculum are appended. Contains 29 references.) (AA) mmunication about curricul entains 29 references.) (AA)

Noting that children spend an enormous amount
of time in child care, this book illustrates the
strengths of family child care and how to capitalize
on these strengths by careful space design. Five
chapters give advice on how to create a well-organized family day care environment. Chapter 1 discuases how to put first the needs of the provider, the
provider's family, the children in child care, and
other people when arranging and deciding to use a
space. It includes tips on how to make the space
accommodate the people who will use it. Chapter 2
looks at all the different people in the family child
care business that must be accommodated, such as
the children cared for, their families, and others
connected to the business. Chapter 3 considers the
provider's family, including guests and extended
family members. Chapter 4 examines the activities
these people engage in and the kinds of space required for their activities. Chapter 5 considers the
child care space as a whole, inside and out, and how
to find usable space for all possible activities. It includes suggestions for how to implement a space
lan, using not only the rooms, but also the furnishings in the rooms. Two appendices include forms to
use when planning activity areas and a list of compamies that specialize in child care equipment. (TJQ)

Identifiers—*Access to Services
Because all early childhood programs must now
be prepared to serve children with special needs,
early childhood staffs confront a host of new challenges and opportunities. This research monograph
offers early childhood of education a foundational resource of information needed to develop inclusion
practices. Chapter 1, "Introduction to the Inclusion
of Young Children with Special Needs in Early
Childhood Tograms" (Mark Wolery, Jan S. Wilbers), presents historic and foundational information about including young children with
Special Needs (Mary Beth Bruder), describes issues related to collaborating with members from various
disciplines to develop defensible early childhood
storices. Chapter 3, 5, 6 and 7 by Mark Wolery
describe information related to designing and implementing classroom-based services for young chil-

dren with disabilities. Chapter 4, "Assessing Children with Special Needs" focuses on assessment issues, chapters 5 and 6 "Designing Inclusive Environments for Young Children with Special Needs" and "Instructional Strategies for Teaching Young Children with Special Needs" focus on intervention practices, and chapter 7, "Implementing Instruction for Young Children with Special Needs in Early Childhood Classrooms" focuses on implementing the Circle: Planning and Implementing services for helping children with disabilities and their families make the transition from one program to another. Chapter 9, "Conclusions and Future Directions" (Mark Wolery), provides summary statements and identifies issues for future research. Contains over 400 references. (TJQ)

Identifiers—"Service Learning as the formal integration of public service into student instruction and learning, this guide provides teachers with ideas for narrowing the gap between what students do in school and what they will do after they leave school. The example activities, derived from actual projects, demonstrate the nearly limities range of possibilities for service learning. The guide is divided into four sections. The first section provides examples of interdisciplinary projects, by subject and grade level. The third section offers practical information on the steps involved in establishing service learning programs. The fourth section contains descriptions of useful publications on service learning and annotated lists of organizations at the local, state, regional, and national levels that can provide information and resources to people interested in initiating or expanding service learning. Throughout the guide, "Program Profiles" provide fuller descriptions of useful publications on service learning and expending or expanding service learning programs in schools and organizations in the Southeastern United States and across the country. Appendices contain standards for service learning on the information. Contains a 123-litem bibliography. (HTH)

This report, written for the Americans for Indian Opportunity "Ambassador Program," addresses the need to research the detrimental effects of the guardianship program on Native Americans. The guardianship program was established by the United States government during the early 1900s to protect monies that Indians received from mineral and oil discovered on their allotments. Unfortunately, many ladians did not comprehend the complicated Euro-American laws and policies concerning land ownership. Few Indians who were in the guardian program gained anything or benefited from this policy. Angle Debo, author of "And Still the Waters Run," characterizes the guardianship program as a severe injustice to Native Americans and describes the prejudicial attitudes of the government and American people toward Indians. In 1924, Gertrude Bonnin was a research agent assigned to the Indian Welfare Committee, who studied the Indian probate situation in eastern Oklahoms. Although the report made strong recommendations to remedy the guardianship situation, most were never enacted. Other than Ms. Debo's and Ms. Bonnin's work, there are few reports or books that investigate the guardianship issue. A problem contributing to this lack of research could be the shortage of Indian scholars, historians, and researchers. This paper suggests that more research needs to be done on this topic, as the issue still affects American Indians today. Oral history, cross-referenced with other types of research, is an excellent method for linking the past to the present and investigating the guardianship issue. (LF)

This paper describes a project that was required for completing the Americans for Indian Opportunity Ambassador Program. The project resulted in development of a course on American Indian family history taught at the Native American Educational Services College (Chicago, Illinois). Part of the course required American Indian students to document their family histories. This project is important because researching family and community history leads to examining how conditions evolved over time and provides both enlightenment and perspective on current life situations. Secondly, very little has been written about American Indian families. Nearly all the research that exists on American Indian families has been written by noon-Indians and often in not relevant to Indian community situations. Lastly, researching family and community history is conducive to developing an emotional understanding of American Indian history. Included is a syllabus developed for teaching a course on American Indian Family History. The class lectures and course readings examine the effects of attempting to assimilate American Indians into White society. Additionally, the course emphasizes boarding schools because of the detrimental effects they had on American Indian families and communities. Also included are a list of questions to coasider when researching family history, and the author's own family history. (LP)

This report represents a project required by the Americans for Indian Opportunity Ambassador Program. The project involved the preservation of Mohave culture for the Mohave tribe, one of four tribes of the Colorado River Indian Tribes reservation. Preservation requires equal access to information as well as the freedom to disseminate information to tribal members. Although there was a fully-funded community tribal archive and museum filled with documents and objects, Mohave tribal members did not have access to this information. In essence, those in control of the information (government) have political power because they can define the issue, set the rules of discussion, and decide who may participate in the discussion within the tribal community. However, the author's affiliation with the Smithsonian and fellowship in the Department of Anthropology at the National Museum of Natural History resulted in publication of the "Mohave Tribal Catalog," which cataloged, photographed, and allowed immediate and accurate access to cultural materials. Additionally, the training and access to other resources made possible by the Smithsonian allowed the author to expand efforts to encompass other major Mohave collections in the United States and Europe. As more and more cultural information was sent back to the community, the community museum began to loosen its restrictions on information access. Cultural preservation efforts have ignited a renewed interest in Mohave culture and history among tribal members. Appendixes include an educational code calling for instruction in tribal culture, resolutions concerning the recognition of the Colorado River Indian Reservation, and the by-laws of the Colorado River Indian Tribes Mohave Elders Committee. (LP) vation, and the by-laws of the Colorado Ri Indian Tribes Mohave Elders Committee. (LP)

An overview of the history of rural school consolidation in north central lows reveals that by 1994, 9

of the 10 high schools in towns of less than 500 in
1940 had closed, and 3 of the 5 high schools in
sowns with populations of 500-999 had closed.
However, all three towns with a high school to
the research of 271 in 1950, to 419 in 1970, and to 359

in 1990. This study examined whether a greater
percentage of incorporated towns in lows with a
high school had a population increase, compared to
towns without a high school suring the same decades. During 1930-50, rural areas lost population,
but the state gained and the number of places with
high schools did not change. During 1950-70, opoulation trends were the same, but a greater number of
places lost their high schools to consolidation. During 1970-90, the state lost population, and the number of communities without a high school continued
to increase. Data analysis revealed that half the
communities with a kigh school gained a significant
amount (5 percent or more) of population of sater when compared to all the towns losing oppulation during the same time frame,
three-fourths of communities without a high school loses population
faster when compared to all the towns losing oppulation during the same time period. Contains seven
references. (LP)

This guide offers Spanish-speaking parents ways in which they can help their children learn about science at home and in the community. Science is a way of looking at the world. It uses everyday techniques such as observation and classification to give us information about things and how they work. Advice to parents that want to support their children's acientific learning includes letting children take the initiative, making time for science activities, encouraging children to talk about their observations and thoughts, showing children how they can find the answers to their questions, displaying enthusiasm for learning, being prepared for the teachable moment, and taking asfety precautions. Themes and activities are suggested that demonstrate physical or chemical change, organization, measurement, classification, cause and effect, and structure and function. An outline provides information on children's exploratory behaviors and thinking skills at ages 3-5, 6-8, and 9-12. Lists of simple activities provide opportunities to learn about animals, the weather, energy and conservation, earth and space, plants, and physical and chemical properties. Contains a list of 5 additional resources. (SV)

Identifiers—"Native Americans
This guide aims to assist the faculty member who
wishes to integrate Native American materials into
core courses of the curriculum. The first section is
a bibliography of over 350 entries, primarily books
and journal articles, arranged in the following categories: Native American bibliographies and general
sources, history, economics, spirituality, music and
dance, art, education, politics, and women. Other
sections of the guide contain the following: (1) a list
of approximately 80 films and videos on Native
Americans, as well as sources for films, videos,
slides, and photographs; (2) addresses for tribal
councilis; (3) course outlines, syllabi, and resources
for a core course in political acience that integrates
Native American materials, as well as courses on
California's Native Americans, Plains Indian culREE JUN 1995

ture, American Indian belief systems, American Indian education, the contemporary American Indian, and American Indian culture; (4) addresses and brief descriptions of 45 Native American groups and associations and related institutions; (5) federal government agencies concerned with Native Americans; (6) a list of 35 Native American periodicals; and (7) national museums with Native American materials. This resource guide was developed to inform rural health care administrators of the federal Bureau of Health Professions (BHPr) grant, loan, and scholarship programs. These programs are intended to foster rural staff recruitment, retention, and training; increase career opportunities for minorities and disadvantaged populationa, and encourage rural health education. The objective of these BHPr programs is to further the development of affiliations between health service programs in rural, underserved areas and health professions training programs. BHPr programs fall into four general areas: promoting primary care education; expanding the capacity of nursing and allied health professions education and practice; increasing the numbers of health care providers for underserved populations. Fact sheets on individual programs include specific purpose, methods, program priorities, resources, and program contact for inquiries. A final section briefly describes five health training models or examples where health professions training programs have linked with rural health professions training

Identifiers—"Economic Impact Studies, "South Plains College TX, Texas (Hockley County), Texas (Lubbock County)
This case study examines the impacts of South Plains College (SPC) (Levelland, Texas) on the local rural economy of Hockley County in which it is situated, as well as on the economy of neighboring, more metropolitan Lubbock County. The study addressed both business volume and employment impacts. Direct business volume impact was derived from four sources: the institution, employees, students, and visitors. A business volume multiplier of 1.5 was used for the local economy and 1.9 for the nonlocal economy. Direct and indirect expenditures attributable to SPC increased business volume in Hockley County by \$21 million in fiscal year 1994, and the total employment impact on the local economy was \$17 jobs. For the nonlocal economy of Lubbock County, total expenditures were also increased by about \$21 million and the employment impact was about 500 jobs. The study finds that SPC makes a considerable impact on both local and nonlocal economies in terms of increased business volume and employment. Findings are used to speculate on the economic and educational losses that would result from the absence of SPC. This study's inclusion of impacts on the nonlocal economy provides higher education institutions with a new method for demonstrating institutional benefits to regional economics. Contains 17 references. (RAH)

ED 379 125 RC 019 955 A Program To Promote the Loarning of His Plahing and Trapping Skills in Wisconsin. Wisconsin State Dept. of Natural Resources

son.

Report No.—IE161-94

Lensifiers—"Fishing, "Hunting, Trapping, Wisconsin

Identifiers—"Fishing, "Hunting, Trapping, Wisconsin This report describes efforts of the Wisconsin Department of Natural Resources to promote the teaching of hunting, fishing, and trapping skills. It is part of a three-pronged approach to assure the future of these activities in the state that will also include scientific management of fish and game resources and an analysis of factors and issues relating to public interest and Department interactions. This report deals only with the skills element. The Department's internal "Skills Team" used public participation to develop the following five program areas for initial implementation: (1) support sporting club efforts to teach skills (2) increase opportunities to use Department lands for skills training activities; (3) improve skills training opportunities outreach to youth; (4) provide an information clearinghouse to publicize club events and skills training opportunities; and (5) increase the visibility of hunting, fishing, and trapping as recreation. The program entails major partnerships with organizations, businesses, and individuals interested in assuring the future of these outdoor activities. Surveys and other public feedback indicated that, while the public schools are probably not the best places to teach hunting, fishing, and trapping skills, the teaching of scientifically sound resource management and resource use should be supported. It is anticipated that program activities will be adjusted to improve effectiveness and ensure efficiency of state fund use and volunteer efforts. (RAH)

vancement, Technological Literacy, "Telecommunications, Telephone Communications, Telephone Communications Systems Identifiers—"Technological Infrastructure
Applications of telecommunications technologies in rural businesses, schools, health care institutions, and government agencies can help make these institutions more efficient and effective, overcome problems of rural isolation, and diversify rural economies. This report considers some of the issues surrounding these possibilities and discusses the challenges raised by two requirements for such benefits to accrue the need for a rural public telecommunications infrastructure that is capable of supporting advanced equipment and services at reasonable prices; and the need for communities to make informed decisions about the planning, purchase, implementation, and evaluation of new information technologies. Four primary goals are recommended: (1) a rural service delivery system comparable to the urban infrastructure in quality, availability, and cost; (2) adequate preparation of rural communities to plan for, implement, and evaluate new services and equipment; (3) access by rural communities to adequate capital financing and other sources of funding for equipment and services; and (4) telecommunications-related development strategies that are integrated with the larger economic development strategies of the community and region. More specific suggestions are also delineated. The report calls for a coordinated effort by telecommunications policy makers, the telecommunications industry, and economic development professionals to help achieve these goals. (RAH)

This paper examines the programmatic, organizational, and administrative changes in West Virginia" 55 school districts resulting from legislatively mandated reductions in personnel between school years 1987-88 and 1993-94. Research involved analyzing enrollment, personnel, and district deficit dats, surveying superintendents and directors of Regional Education Service Agencies; interviewing state program administrators; and comparing information from school years 1987-88 and 1993-94. The study found that: (1) school districts failed to reduce staff at the same rate as required by the school aid formula, resulting in deficits, particularly in rural school districts; (2) the net enrollment cap on professional educators in the school aid formula was detrimental to the required minimum of 50 professional instructional personnel per 1,000 students in adjusted enrollment; (3) other sections of WV

Code influencing the number of personnel that must be employed were in direct conflict with the school aid formula; (4) the work load was being redistributed to remaining personnel, but districts were not deciding which activities were to be eliminated; (5) the average number of students per school, 341, was higher in school year 1993-94 than it was in 1987-88, but still lower than the number of students per facility recommended by the School Building Authority; (6) there were fewer district level and school level administrators; (7) facility maintenance was suffering due to the large reduction of maintenance personnel; (3) the emphasis in school year 1993-94 on the basics (reading, mathematics, science, language arts, and social studies) was greater than in 1987-88; (9) reductions were made in the number of teachers and course offerings, however, namin 1967-98; (9) reductions were made in the number of teachers and course offerings, however, there were few changes in extracurricular offerings; and (10) the number of junior high schools and ele-mentary schools decreased, while the number of middle schools increased by 50 percent. Contains 55 references, 38 data tables and figures, and survey questionnaires. (LP)

International Relations, "Mexicans, Political Issues, "Public Policy, Social Services, "Undocumented Immigrants Identifiers—"California, Mexico, United States Both the current immigration debate and immigration tatel have changed in recent years and require changes in thinking about immigration and the architecture of U.S. immigration laws. In California, which receives about a third of all immigrants, voters and state leaders have shifted from viewing immigration as a net benefit to focusing on the costs of immigration to taxpayers. Contributing to such changing attitudes are the following changes in immigration: (1) a rapid increase in immigration over the last decade; (2) decline in the educational level of immigrants relative to the U.S. population of female immigrants; and (3) increased geographic concentration of immigrants in California, Florida, New York, Illinois, and Texas. In addition, the receiving environment is undergoing such changes as slowing employment growth due to worldwide economic change, the inability or unwillingness of all levels of government gridlock, and growing income and wage disparities. These concurrent changes have rekindled latent concerns about the costs of sustained large scale immigrants on education, which also represents the largest component of state budgets and a significant portion of local budgets. Five principles are outlined to form a new framework for guiding immigration policies. (SV)

While national debates focus on rising immigration and its impact, current data on immigrants and
how they affect the national life are limited. To
determine the feasibility of conducting a national
survey of immigrants, a pilot project surveyed Salvadorans and Filipinos in Los Angeles in 1991. This
report addresses key methodological issues in conducting a large-scale immigrant survey by describing the design, implementation, and field results of
the Los Angeles Community Survey. The survey
had two phases: neighborhood screening, and the
main interview covering immigration status; employment experiences, wages, and skills; needs for
and use of public services; tax contributions; family
composition and economic transfers among family
members; use and ability level of English and native
language; and educational expectations and aspirations of immigrants and their children. Findings
produced several tentative conclusions with important policy implications. The relative success of immigration impact is shaped by eligibility criteria.
Second, U.S. Iswa offer many alternative success of immigration impact is shaped by eligibility criteria.
Second, U.S. Iswa offer many alternative success of immigration impact status than with their income,
family size, and other factors. Finally, filing of federal tax returns was strongly related to immigration
status. A final chapter discusses types of policy
questions that survey data can answer, and makes
recommendations for survey procedures. Appendices contain accenent screening and interview questionnaires. onnaire is in English, Spanish and Togo-(One ques

This book examines predominantly rural regions of the United States that lag behind the rest of the country in income, employment, access to services, and measures of education and health. Case studies of nine regions examine historical background; current economic and social conditions (including demography, educational attainment, and occupational structure); outmigration; effects of government policies; and local attempts at economic development. A final chapter summarines relevant social-science theories, particularly dependency and world-systems models, and discusses public policy prescriptions that might improve rural opportunity. Chapters are: (1) "Forgotten Places: Foor Rural Regions in the United States" (Thomas A. Lyson, William W. Fulk); (2) "Uneven Development in Appalachia" (Dwight Billings, Ann Tickamyer); (3) "The Reported and Unreported Missouri Ozarka: Adaptive Strategies of the People Left Behind" (Rex R. Campbell, John C. Spencer, Ravindra G. Amonker); (4) "Life in the Forgotten South: The Black Beit" (William W. Falk, Clarence R. Talley, Bruce H. Rankin); (5) "The Mississippi Delta: Change or Continued Trouble" (Stanley Hylsaud, Michael Timberiake); (6) "Industrial Development and Persistent Poverty in the Lower Rio Grands Valley" (Rogelio Saenz, Marie Ballejos); (7) "The Forgotten of Northern New England" (A. E. Luloff, Mark Nord); (8) "Ontonagon: A Remote Corner of Michigan's Upper Peninsula" (Harry K. Schwarzweiler, Sue-Wen Lean); (9) "The Failure of Sustained-Yield Forestry and the Decline of the Finnel-Shirt Frontier" (concerning Pacific Northwest timber towns) (Michael Hibbard, James Elias); (10) "In the Shadow of Urban Growth: Bifurcation in Rural California Communities" (Ted K. Bradshaw); and (11) "Forgotten Places Redux" (William W. Falk, Thomas A. Lyson). This book co

cial Education, Teacher Education Identifiers—*Individuals with Disabilities Education Act
This appendix to the 14th annual report on implementation of the Individuals with Disabilities Education Act contains reports on progress in addressing the needs of two special populations: migrant students with disabilities and Native Pacific Basin and Native Hawaiian students with disabilities. Migrant students with disabilities tend to have additional disadvantages that complicate service delivery, including poverty, limited English proficiency, residence in rural areas where services are limited, disruptions to service delivery and needs assessment due to mobility, lack of parental involvement, and shortages of qualified teachers and other personnel. Recommendations for improving service delivery to this population include development of appropriate teacher education programs, expanded data collection, development of assessment instruments for language-minority limited-English-proficient students with disabilities, improving

communication between sending and receiving school districts, reassessment of the Migrant Student Record Transfer System, interagency cooperation, and inclusion of bilingual migrant statimembers. Native Pacific Basin students with disabilities also have additional disadvantages: geographic isolation, language and cultural differences, very limited financial resources, and shortages of trained educators. Issues related to cultural and injustic differences are also relevant for Native Hawaiians. Interagency cooperation in the provision of services and innovative approaches to programming have shown some promise in the Pacific region. However, additional data and research are needed. The two reports contain 65 references. Data tables detail numbers and percentages of students receiving special education services, by disability. (SV)

Identifiers—Bureau of Indian Affairs Schools, *Individuals with Disabilities Education Act, *Native Americans
As one of a series of papers on the unique needs of special populations with disabilities, this chapter of the 16th annual report on the implementation of the Individuals with Disabilities Education Act (IDEA) reviews the literature on provision of services to Native American students with disabilities frequently have other characteristics that complicate service delivery, including poverty, residence on reservations or in other rural areas where services and resources are limited, limited proficiency in standard American English, and cultural differences that affect schooling. The first major section of this report describes numbers and characteristics of Native American students with disabilities, including preschoolers and school-aged children in public and Bureau of Indian Affairs schools. The second section outlines educational programs for all Native American students and those that specifically target Native Americans with disabilities, and describes funding of special education services under part B and part H of IDEA. Section 3 discusses the provision of appropriate special education services for Native American students within the framework specified by IDEA. Major areas discussed include identification and assessment, student placement, linguistic and cultural issues in curriculum development and instruction, and recruitment and training of pernonnel (particularly Native American spersonnel). This report contains 46 references. (SV)

The purpose of this study is to investigate science achievement of Australian students and how this achievement can vary from school to school. The proposition that gender and socioeconomic inequises in Australia are the result of school systems designed to reproduce an unequal social order is be examined with reference both to current sociological literature and methodological techniques which account for the hierarchical nature of students nested in schools. Additionally, student-level and school-level variables are investigated for their ability to explain gender and socioeconomic differences in science achievement, as well as general student variability. Even after adjusting for the students individual characteristics and home backgrounds, as well as the context of the school, there were significant gender and socioeconomic differences in science achievement across Australian schools. The importance of variability in science achievement between schools is shown in this study, with specific reference to how this variability can be attributed to the school system. Contains 54 references and an appendix that describes student and school level variables. (Author/MDH)

Descriptors—"Cognitive Development, Cognitive Processes, Concept Formation, Elementary Education, Elementary School Students, Foreign
Countries, Grade 2, Grade 5, "Hypothesis Testing, Research Methodology, Science Activities, "Science Education, "Scientific Methodology Identifiers—"Experimental Control were addressed with three tasks in a longitudinal study. In all three tasks, understanding of experimental control were askessed by production measures (children were asked to test potential causal relations in a multivariable situation) and by choice/evaluation measures (children were asked to toose or evaluate tests made by hypothetical others). Tasks involved the rudder position on an airplane, the effect of the diameter of a spring on how far it stretches, and the determination of tree sickness. Children in Grades 2 to 5 produced experimental tests and chose/evaluated tests made by hypothetical others for those tasks. Cross-task and longitudinal analyses suggested that whereas the understanding of experimental control increased substantially between Grades 2 and 4, using this understanding of experimental control lice tests lagged behind. On the basis of an analysis of some of the sources of individual differences, a training condition that facilitated the active representation and mental combination of variable dimensions was tested. Substantial tests production improvement after training suggests that children's failure to produce controlled experiments a rises from their failure to actively represent the problem space, rather than from a fundamental lack of understanding of the logic of experimental control. Labor Market Ex
The economic returns of taking math and science

courses in high school are estimated for women who do not go on to college and for women entrepreneurs. A human capital model is used to estimate returns for respondents drawn from the National Longitudinal Survey's New Youth Cohort. Wage rates in 1990 of women who were ages 14-21 in 1979 were related to courses in math and science that were taken in high school, as recorded on a respondent's transcript and coded in standard year-long units. Little direct effect was found for the influence of high school curriculum in subsequent wage rates, either for women or for men. For women, courses in science and math did, however, significantly improve the probability that they would gain postsecondary training or go on to college. These indirect effects argue for a multi-equation model that estimates effects for women of all educational levels. Even when considering women of all educational levels, the study did not show any significant effect of science and math courses on the earnings of the self-employed. (SW)

Descriptors—Elementary Secondary Education, Higher Education, Science Curriculum, Science Education, Science Education History It is believed that science will become a major part of the curriculum for students in all grades due partly to the increased awareness of the relationship between science and society. This and other reasons have led to an interest by education since Jefferson in 1779 identified what he felt was the purpose of a democratic education. This book provides an in-depth look into the many goals of education that science has tried to schieve since its entry into the curriculum. The chapters are: (1) "Science and Democracy: Emerging Trends of Faith"; (2) "Science in the New Republic: Faculty, Family, and the Failure of Idealism"; (3) "The Age of Jackson and After, Part 1: Popular imagery and Public Reformers"; (4) "The Age of Jackson and After, Part 2: Professionalization of Science and the Role of Higher Education"; (5) "Science as "Culture": Education and Modernism in the Late 19th Century"; (6) "Science and the Progressives: Standards and Standard Bearers in the Age of Reformism"; (7) "What Bearing It May Have: Legacies of Progressiviam in the Early 20th Century"; (6) "The Postwar Era: The Return of Academism and the Sputnik Revolution"; (9) "New Voices and Old Limits: Reformism in the Late 1960"; and (10) "Troubled Symbolisms: Science and the Curriculum at the Century's End." The Global Change Instruction Program was designed by college professors to fill a need for interdisciplinary materials on the emerging science of
global change. This instructional module introduces
the basic features and classifications of clouds and
cloud cover, and explains how clouds form, what
they are made of, what roles they play in determining climate, and how they both cause and are affected by climate changes. The materials are
designed for undergraduate students lacking in advanced training in mathematics and the technical
aspects of science. The module is divided into two
main sections covering clouds and cloud formation,
and clouds and climate; a conclusion; six questions
and projects; three appendices, a glossary; and 20
additional reading materials. Section I provides text
and diagrams of cloud classification and occurrence,
cloud composition, and the underlying physics of
cloud formation. Similarly, section II covers
changes in Earth's climate from clouds and from
carbon dioxide, and cloud-climate feedbacks. Appendices describe cloud patterns on other planets,
the energy of clouds, and an activity that involves
forming clouds in a bottle. (LZ)

Education, scientific Literacy, "reacher Education One of the major goals of science reform today is that of scientific literacy for all students. In recent years there has been an increased awareness of the need to incorporate science firmly throughout the elementary curriculum to insure that this goal of scientific literacy is met. This book offers a new vision for preparing prospective teachers of grades K-6 in science content and pedagogy. The chapters are: chapter 1, Improving Science Education: A Continuing Challenge; chapter 2, How Well Are Elementary Teachers Being Prepared in Science?; chapter 3, The Qualities of an Effective Teacher of Science; chapter 4, New Vision; chapter 5, Developing Science Content Knowledge; chapter 6, Learning How To Teach Science; and chapter 7, Designing an Effective Preservice Program for Science. The book concludes with recommendations. (ZWH)

Questionnaires, "Teaching Methoda Identifiers—Mathematics Education Research, "Reform Efforts, Scotland
This report describes an experiment to provide an inservice program involving problem solving and inquiry, in line with the new Scottish National Guidelines in mathematics, that would have a lasting effect on teachers. The program featured two stages: (1) In the first year teachers were involved in a pair of workshops, were visited at their individual schools by the tutor, and were assigned various projects, and (2) In the second year contact with the teachers was extended via electronic mail. Results showed that teachers can continue to benefit for long periods of time from a short period of out-of-school in-service if some kind of interest network is set up and maintained both by themselves and by the tutor. Chapters include: "How Do You Make the Effects of Inservice Last," "Developing Professional skills," "The Visits," "Communications," "New Research Stage," "The Children's Questionnaire," "The Children's Own Assessment," "The Challenges," and "Closing the Classroom Door." An appendix contains letters from the tutor to the teachers; an explanation of the game, Strategy 31; sample challenges; children's question-naire format; questions for early and upper primary; children's solution for Leapfrog; and the Ten Face Game. This book provides teachers with strategies to engage students actively in learning and focuses on the mathematics and science curricula for the middle and high school years. The strategies selected facilitate connections between the familiar and the unfamiliar. This method promotes learning that students find relevant. The 14 strategies have been grouped into three sections: (1) Activating Prior Knowledge (question of the day, bumper stickers, and poople search); (2) Multiple Intelligences (Venn diagrams, ranking boxes, mind map, induction, listen-read-sketch-draft, multipass, know-wonder-learn, metaphors, and games); and (3) Reflections (sterm and journals). Each chapter contains an introduction, procedures, and examples for use in mathematics and science classrooms. Contains 15 references. (MKR)

Descriptora—"Educational Philosophy, Elementary Secondary Education, "Existentialism, Mathematica Curriculum, "Mathematics Instruction, "Realism Identifiers—"Experimentalism, "Idealism There are selected philosophies in the teaching of mathematics that can provide guidance to the teacher in developing the curriculum. This paper discusses four philosophies of teaching mathematics. (1) Idealism stresses that the pupil lives in an idea-centered mathematical world, but not an objective real world. Abstract content is prized more highly than concrete and semi-concrete representations. (2) Realism emphasizes that a person can know the real world in whole or in part as it really is. With pupils attaining precisely measurable stated objectives in mathematics, they become more and more knowledgeable of the real world as it ruly is. (3) Experimentalism emphasizes pupils' learning that is useful and utilitarism. Within a given problem area, mathematics is used to solve selected problems. (4) Existentialism stresses individual choices made by a pupil in selecting sequential tasks and experiences in mathematics. The pupil is the chooser. The tasks may involve problem solving as well as other kinds of tasks. Use of diverse philosophies of education to provide for individual differences should assist each pupil to learn as much mathematics as possible. (MKR)

Identifiers—Trial State Assessment (NAEP)
This paper uses data from the 1990 National Assessment of Educational Progress (NAEP) Trial
State Assessment to describe educational opportunities for students in eighth-grade mathematics in
1990. The first section of the paper summarizes the
methodology used here and in the 1990 NAEP Trial
State Assessment. The second section summarizes
findings of the study. The final section discusses
implications of the findings for national educational
policy and highlights a follow-up study using data
from the 1992 NAEP Trial State Assessment. Overall, results showed that a majority of eighth-grade

students receive mathematics instruction in tradi-tional classrooms; are assigned to classrooms based on their ability; receive between 2.5 and 4 hours of on their shility; receive between 2.5 and 4 hours of mathematics instruction by teachers who place heavy emphasis on numbers, operations, facts, and concepts; are more likely to do problems from textbooks than to do reports or problems on mathematics; and few regularly use calculators or computers. Purther, it appeared that eighth-grade mathematics, and few regularly use calculators or computers. Purther, it appeared that eighth-grade mathematics who have participated in at least 16 hours of in-service training in mathematics or the teaching of mathematics in the last year are more likely to report using non-traditional methods. Appendices include a listing of states participating in the 1990 NAEP Trial State Assessment and sources of supplementary data. Contains 10 references. (MKR)

This document describes a database of information for those who want to lears more about current efforts to redesign assessment to match changing goals for students and instruction. The database contains descriptive information on alternative assessments in science and mathematics that cover all grade levels, levels of assessment (classroom to national), and purposes. This document contains the following information: (1) content of the database, including definitions; (2) information about how to use the database, including hardware and software requirements, and how to load, search, and print information from the database; (3) the form used to collect information on the assessments in the database; (4) a sample evaluation form that can be used to review and analyze the assessments in the database; (5) summary descriptive information on the assessments in the database; (6) samples of reports that can be printed from the database; and (7) an index and annotated bibliography of the 189 entries in the database. Hands on Science, Reform Efforts
This report describes a three-part effort by the
Florida Postsecondary Education Planning Commission to identify some of the current outstanding
efforts to improve science and mathematics at the
postsecondary level and to explore ideas on how
these positive practices can be expanded. Site visits

itive practices can be expanded. Site visits selected postsecondary institutions

(Chipola Community College, Florida Atlantic University, and Rollins College) show how these institutions have implemented strategies for improving science and mathematics on their campuses. Findings, based on the site visits and reviews of existing programs, include: (1) improvement is most effective when supported by an institution-wide commitment; (2) courses must be restructured to reflect a more active hands-on approach to learning that reflects real-world applications; (3) faculty members should be hired who reflect the new approaches to teaching in these areas; (4) faculty initiatives to develop collaborative efforts with elementary and high achool students and teachers to improve science and mathematics learning should be encouraged; and (3) institutions that improve the retention and graduation rates of women and minorities majoring and graduating in the fields of science, mathematics, and technology-related fields should be rewarded with additional funding. Appendices include an institution nomination form and a summary of exemplary programs. Contains seven references. (MKR)

This document reports on a small-group teaching experiment whose goal was to understand how fourth- and sixth-grade children develop concepts of common and decimal fractions. Both the Grade 6 and the Grade 4/5 children were taught common and decimal fractions through discussion and by using manipulatives, beginning with basic concepts of common fractions are initially interpreted as parts of a whole, using region models; (2) Grade 6 students seemed to find manipulatives less and seemed more interested in completing as many questions as they could without recourse to manipulatives; (3) students were able to relate common and decimal fractions; (4) most students could develop fraction and decimal concepts, learn the associated operations meaningfully, and perform satisfactorily on end-of-unit tests; and (5) teachers felt they had learned much from their involvement in the project, including: the need for clarification of roles of researcher and teacher, importance of student interviews, usefulness of journals and student-constructed questions, and judicious use of worksheets. Appendices contain reports of lessons in Grade 4 and Grade 6, project evaluation by teachers and researchers, presand post-test questions, interview questions and transcripts, and worksheets. Contains 14 references. (MKR)

This project measured the impact of a short series of Family Math programs in elementary grades on student and parent attitudes toward mathematics,

ETE JUN 1995

student performance in mathematics, and teacher behavior using control (1993, n=89; 1994, n=234) and experimental (1993, n=101; 1994, n=211) student comparison groups and supplemented by parent and teacher interviews. Only two of the analyses showed statistical significance: (1) Students in the experimental group who had prior Family Math experience showed higher gains on standardized mathematics performance measures than other groups, and (2) Parents who attended Pamily Math reported increased involvement with their children's schools. Parent interviews indicated strongly favorable attitudes toward Family Math and had high praise for the quality of the program, although parent attitude questionnaires showed no significant gains in either parents' or students' self-confidence. Teacher interviews indicated enthusiastic support for Family Math and substantial modification of teaching methods, as well as improved understandings about mathematics. Appendices include: outlines of the first meeting, student background and attitude questionnaires, parent questionnaires in both Engilah and Spanish, and parent Family Math evaluation forms. (MKR)

This book addresses different types of thinking, including critical, creative, and analytical, and presents a variety of problem-solving strategies, along with spocific ways they can be taught to students. The main emphases of the book are thinking and mathematics, problem solving, and the application of computational skills. The problem-solving model and guided thinking activities, in the form of case studies, can be used to supplement most mathematics programs. Chapters include: "Getting Ready for Problem Solving," "Getting Started by Investigating the Problem," "Understanding Problem Solving Strategies: Problem Solving Activities," and "Moving On with Problem Solving: Guided Thinking Activities." A list of recommended children's books, problem-solving books, and professional books is included. (MKR)

Learning science is complex and difficult for

tion, Scientific Concepts, "Undergraduate Study Identifiers—"Science Achievement
Learning science is complex and difficult for many students and their understanding of science concepts and processes may be inaccurate or lacking. In an effort to improve the science achievement of underprepared students enrolled in a general science course, an integrative instructional model, "Dimensions of Learning" was used. Since acquiring and integrating knowledge (Dimension 3) are very important, these components of the model were emphasized. Selected strategies of these two components were used to teach an interdisciplinary science unit on the chemical basis of life for a 4-week period. The control group received the same science content instruction as the experimental group. The study, conducted at an historically black university, investigated whether the two components of the Dimensions of Learning improve the science achievement of the underprepared college students (in = 27). No statistically significant difference in the science achievement of these students was found at 0.05 level, however an effect size of 0.69 SD indicated that students benefited from the selected strategies of the learning model. The results are encouraging since these strategies could easily be used for improving undergraduate science instruction. Contains the test, a student data card, and 1 references. (Author/ZWH)

Evaluation, Teaching Methods, "Videotspe Re-cordings Identifiers—Alternative Assessment This paper gives a description of a videotape used with inservice teachers as a model for demonstrat-ing the clinical interviewing technique. It describes what is seen on the tape, as well as the child's and interviewer's comments and reactions. It also de-scribes the plan and purpose of the interviewer's questions and outlines the process that transpires during an in-service experience in which a video-taped clinical interview is analyzed. The interview

discussed in this paper is an interview with a first-grader about the meaning of equals, plus, and minus signs. The paper concludes with several interviewing tips: (1) Don't stop too soon; probe for more information; (2) Pollow up an answer with a "why" question; (3) Validate your assumptions about the child's thinking; (4) Ask the child for a concrete example of what he or she has just said; (5) Do not generalize or come to conclusions too quickly; test your hypothesis with a different example; (6) Do not put words in the child's mouth; (7) Challenge answers whether they are right or wrong; (8) Try to understand how the child connects school math with informal strategies; and (9) Focus on contradictory or illogical statements. Contains 14 references. (MKR)

This document is a report of an intensive study of
the K-12 mathematics and science programs in Milwaukee (Wisconsin) public schools (n=40) based
on classroom observations, interviews, surveys, and
focus group discussions. Results showed that students want practical experiences, less teacher talk,
and more student talk. Teacher interviews indicated
that staff development needs are greatest in practical instructional methods, integrated curriculum,
and use of technology. Principals interviewed believed that barriers to effective instruction include
time constraints, few resources, and reduced central
office support for principals. Observations of 190
mathematics and science classes showed that (1)
About half of the observed classes at all levels were
traditional in format; (2) Only about five percent of
the teachers made any attempt to connect lessons to
real life; (3) Computers were rarely used at any
level; (4) Calculators were seldom used in elementary classes and in only about one-third of the high
school classes; (5) Race and ethnic but not gender
inequities were found in advanced mathematics and
science classes encouraged student interaction regardless of race, ethnicity, or
gender; (7) High school science classes had the most
opportunity for stude

Identifiers—*Environmental Literacy
The purpose of this study is to examine multiple influences on tweifth-grade environmental knowledge for a national probability sample of high school students. A longitudinal model was developed and tested incorporating background factors (socioeconomic status and gender) and intervening variables (internal locus of control, level of science class, and informal science education). The variables were placed in the model such that the developmental process of environmental knowledge from tenth-grade to tweithh-grade could be examined. Results revealed that environmental knowledge is the complex result of several diverse variables working collectively. All of the variables in the model made significant contributions (in terms of direct and indirect effects) to environmental knowledge. Op particular interest was the influence of internal locus of control on tweithh-grade environmental knowledge. Aside from the baseline measure, tenth-grade knowledge, internal locus of control had the strongest direct influence on tweith-grade environmental knowledge. This finding suggests that individuals with an internal locus of control seem to be motivated to obtain more environmental knowledge for the motivated to obtain more environmental knowledge. vated to obtain more environmental knowledge than those students with an external locus of con-trol. Descriptors—High Schools, "High School Students, "Knowledge Level, National Surveys, "Performance Factors
Identifiers—"Environmental Literacy
The objectives of this study are to assess the current environmental knowledge base in a national probability sample of American high school students, and examine the distribution of environmental knowledge across several variables which have been found to be related to environmental knowledge in previous research (e.g. education and gender). Tenth-grade and 12th-grade environmental knowledge. A majority of students were able to recognize basic facts concerning environmental knowledge. A majority of students were able to recognize basic facts concerning environmental problems; however, most students could not apply their knowledge in order to comprehend the consequences or potential solutions related to the problems. Students also demonstrated extremely little growth in environmental knowledge from 10th-grade to 12th-grade. Parental level of education, quantity of high school science courses, and gender (in favor of males) all were found to be significantly related to the students' levels of environmental knowledge from 10th-grade. Educational implications and recommendations are discussed in terms of the results of the study. Includes the survey questionnaire. (Author/LZ)

Descriptors—Causal Models, "Environmental Education, Grade 12, High Schools, "High School Seniors, "Knowledge Level, National Surveys, "Performance Factors Identifiers—"Environmental Literacy
The paper presents a model comprised of variables which are hypothesized to contribute to environmental knowledge in high school students. The model assumes that environmental knowledge in high school is a function of background factors (socioeconomic status and gender) which are in place

before high school and intervening factors which mediate the effects of these background factors (locus of control, highest level of science class taken, and informal science activities). The sample consists of a national probability sample made up of approximately 2,900 high school students who are participating in the Longitudinal Study of American Youth. Bivariate analysis was used to examine the relationships between environmental knowledge and independent variables. Multiple regression procedures were used to analyze direct and indirect relationships among independent and dependent variables. Socioeconomic status, being male, and internal locus of control were all positively related to environmental knowledge. As expected, the level of science and amount of informal science exposure were also positively related to environmental knowledge. Implications for environmental education and recommendations for future models and research in this area are given. (LZ)

This document consists of a study unit and an accompanying teacher's guide prepared to assist teachers and community groups in discussing some of the legal and constitutional issues raised by the verdict in the Rodney King beating case. The study unit's first section, "Trial and Verdict," examines such issues as the public perceptions of the state criminal trial, the prosecution's burden of proof, the use of reasonable force, and the verdict in the case. Section 2, "Aftermath," explores aspects of the incident including the second, federal trial of the defendants, the concept of double jeopardy, and the role of plea bargaining. Student activities underscore many of the principles and ideas that the King beating and trials raise. Activities include questions for discussion, role playing scenarios, and policy snalyses. The document concludes with a bibliography of sources, including governmental records, newspapers, periodicals, media resources, curriculum resources, and other items relevant to the Rodney King incident and the issues that it raises. In the teacher's guide the major instructional techniques utilized in the materials included: (1) reading and directed discussion, (2) video presentation and directed discussion, (3) interactive activities, (4) policy questions, and preparing resource volunteers, and a list of sources. Identifiers—"Topic Selection
The media have a lot to do with how people think
and what people think about. The line between pop-

ular culture and news has virtually disappeared, giving rise to what some have labeled "infotainment." At the same time, "fake news" in the form of publicity that promoters provide to media outlets under the guise of legitimate news stories has become more common. If the media immerse people in a sea of images and sensation, can critical thinking survive? In the contemporary culture, the media present information as if everything has equal significance. Furthermore, news outlets present information in disjointed, soemingly unrelated bits. The framing of the news, the context in which the news appears, also bears examination. For instance, news reports tend to present stories about poverty as stories about individuals. The result is that citizens blame individuals for poverty, rather than blaming the system. A final problem involves emphasis. News reports tend to focus on violence, which tends to increase disproportionately public fear of violence. Teachers can promote students' critical thinking by challenging media assumptions, and by demonstrating how the media can trivialize public policy issues. Under these circumstances, American society should be more modest than to assume that the United States is the best informed and, therefore, the most democratic country in the world. (SG)

Identifiers—Hunterdon Central Regional High School District NJ, Newark City School System NJ

Four teachers, two from a rural high school and two from an urban one, spent a year trying to get students to examine similarities and differences between the two schools. The exchange program involved students from Malcolm X Shabazz High School of Newark, New Jersey and a group from rural New Jersey's Hunterdon Central High. Small groups of students paid visits to each other's schools. The theme for the first year of the project was "equity." Students from both schools took part in small group discussions during the visits, then returned to the large group to share reactions. The students discovered that they shared attitudes about some subjects (single parent households, working women) and began to question stereotypes about each other. Such activities help students learn to trust, to work together to solve problems, and to develop critical thinking skills. At the conclusion of the program, plans were underway to continue and expand it. (SG) Four teachers, two from a rural high school and

This document explores, from a Dutch perspective, the role of the performing arts in education in developing nations. In particular, the analysis focuses on Zambia. Introductory sections of the report touch on the connections among culture, education, and performance, as well as the role of avant-garde and popular theater, the theme of alienation, and the anthropology of theater. A historical section addresses the use of theater in development communication, popular theater and social change, the

performing arts in African indigenous education, and the historical development of Zambian national theater. A section entitled "Theatre for Development" deals with the performing arts in national development, theater for development in India and Bangladesh, and the role of the performing arts in changing women's roles. "Education and Training" is the title of a section that encompasses the formalizing of expressive skills training and implementing the anthropology of theater. A section on policy examines the Dutch role in international performing arts education and research, an international popular theater meeting in Zambia, and the empowerment of development support communication via theater for development. The document also includes notes, appendices containing acronyms and definitions. Contains approximately 20 pages of references. (SG) erences. (SG)

Education, Social Studies Identifiers—"Secrecy
This document, a curriculum guide, grew out of a symposium on the role of secrecy in U.S. foreign policy. The curriculum examines ways in which citizens get information about the government and how government secrecy influences that information. Students analyze covert U.S. involvement in such places as Iran, Guatemala, and Cuba, and consider the raunifications of the secret methods the government has used to further U.S. goals. Pollowing an introduction, the guide offers units on: (1) "Getting Started"; (2) "Rights and Responsibilities"; (3) "Secrecy and Covert Action in Recent Years"; (4) "The Growth of the National Security State"; (3) "Interference with Foreign Governments"; (6) "Secrecy and National Security"; (7) "Checks and Balances"; and (8) "The Limits of Covert Action." The document also includes a timeline, an indication of suggested grade levels for readings, a glossary, and a bibliography. Many of the individual readings present portions of primary source insterials for student consideration. Contains 57 references. (SC)

Identifiers—"New York, "United States Commution
This book provides a detailed account of the role
of the state of New York in the history and development of the United States Constitution. The document consists of some 68 essays, in addition to a
foreword, editors' introduction, and chronology of
bicentennial dates. Part 1, "Origins of Constitutionalism in New York," addresses such subjects as the
Dutch influence in New York, the John Peter
Zenger case, and the origins of the state of New
York itself. Part 2 deals with "New York and the
Making of the Constitution, 1787-1788." It touches
on the Federalist Papers, the issues behind the drive
for a new plan of government, and even the manner

in which the state celebrated ratification of the U.S. Constitution. Part 3, "New York Participants in the Making of the Constitution, 1787-1789," describes the roles of such notable personalities as jurist Egbert Benson, New York Governor George Clinton, Alexander Hamilton, and John Jay in developing the Constitution. It also includes essays on the first ladies of New York State during the Constitutions to American Constitutional Development." The section recounts the critical roles played by leading New Yorkers including Asron Burr, Suasn B. Anthony, Judge Learned Hand, and President Pranklin Roosevelt. (SG)

tence, Pantomime, "Problem Solving, "Social Problems
Drama is a means to develop imagination and empathy. Simulated experiences can affect profoundly one's judgment and understanding, addinginaights and expanding the frame of reference. The name game is a good beginning exercise, especially if participants do not know one another. Each player states his or her name and a favorite object that begins with the same letter as the name. In the "mirroring" game, players try to imitate each other's movements. Players may then take turns pretending an object is some new, imaginary item, or finding new ways to use a common item. They may participate in pantomime. To explore the development of character, players may assume varying poses in costume. The players may pantomime an activity, such as packing a bag, while portraying various ages. Having "packed," players may then act out train station encounters, while creating their own dialogues. Given a newspaper photograph, players can imitate the picture and accompanying text, then diacuss their feelings about the subject matter. Finally, players may discuss some social issue and identify various people the issue affects, them act out scenes involving those people. Such activities encourage critical thinking, problem solving, decision making, and originality. Players' enjoyment of problem solving may then carry over to other areas of work and study. (SC)

Education, Higher Education, *Instructional Improvement, Sex, *Sex Bias, *Sex Differences,
Teacher Attitudes, *Teacher Student Relation-

Teacher Attitudes, "Teacher Student Relationship
This document examines the concept of gender
bias communication in the classroom and how educators can avoid it. Gender bias communication is
a set of behaviors that reflect bias or stereotyping,
but which is not against the law. In the classroom,
a teacher may treat male and female students differently without even realizing it. For instance, a
teacher may make eye contact with males more
than females, or ignore females while responding to
males. Verbally, the instructor may ask higher order
questions of males, or respond more often to males'
comments. Gender bias communication manifests
itself in less teacher attention to, lower scores for,
and greater criticism of, female students. In the long
term, such bias may result in less academic fields,
and lower salaries. It is necessary for educators to be
aware of and to work to overcome gender bias in the
classroom. Society encourages bias in advertising, in
literature, and even in schoolbooks. Teachers must
take care to avoid bias through such methods as
asking for student evaluation of teaching techniques
and requesting classroom observation by colleaques. The document includes a teacher self-eval-

uation questionnaire, guidelines for classroom ob-servation, suggestions for audio self-evaluation, and a student perception questionnaire. Contains 12 ref-

This document, a teacher's manual, was published as part of the state of Massachusetts' observance of the bicentennial of the United States Constitution. The manual accompanies a videotape on the topic. Together, the materials can help educators identify the people, places, and pictures that they can use to underscore the significance of the Bill of Rights. While middle and high school teachers are the primary focus of the manual, it also offers activities and resources for use in elementary instruction. Materials are adaptable for various age levels and are reproducible. The manual includes an introduction, a Bill of Rights timeline, a brief guide to four major issues that the videotape highlights, a set of nine learning activities, and listings of resource materials and organizations. An appendix presents the Bill of Rights and 16 other constitutional amendments. Contains 22 references. (SG)

This document presents the findings of research
concerning female friendship as literature portrays
it. Literal sisterhood is not the focus of the report,
nor is cross gender friendship. The examination rejects the suggestion that homosexuality is at the root
of same sex friendship. The document touches on
the emities that may arise between female friends.
It becomes clear that the treatment of women
friends in literature evolves over time, from the
works of Jane Austen and Sarah Orne Jewett to
Joyce Carol Oates and Toni Morrison. Many works,
even some psychological studies and leading novels,
purport to address the issues of friendship among
women. Betrayal is a common theme in literature
dealing with women friends; the concept of competition among women, even among those who are
friends, does not seem sufficient to explain it. The
theme invites further research. A reading list includes 13 primary and 14 secondary sources and
nine other articles and books. (SG)

This paper reports findings of a study examining the appreciation of editorial cartoons as a function of personal characteristics rather than group membership. The variables examined were self-consciousness and the ability to utilize humor as a

coping mechanism. Appreciation of editorial cartoons during the 1992 presidential campaign was measured among college students. It was expected that self-consciousness would be related to the appreciation of editorial cartoons reflecting on the candidates and campaign themes. High self-consciousness was expected to be related to endorsement of ideas easily defensible in the college population. The capacity to utilize humor as a coping strategy was expected to be related positively to overall appreciation of editorial cartoons. The participants were 80 volunteers from introductory psychology classes at a midwestern university. The subjects completed an initial stage of assessment when they completed a survey containing the self-consciousness scale and the coping humor scale. Then the subjects rated a series of cartoons for level of franniness on a 7-point scale. Analysis of the appreciation scores showed that a significant main effect for self-consciousness was obtained. Considering the coping with humor scores, high scorers showed greater humor appreciation than low scorers. This finding supports the expectation that persons disposed to the utilization of humor in coping situations would appreciate editorial cartoons to a greater extent than low scorers on this dimension. Results appeared to reflect a tendency among high self-consciousness individuals to show views perceived as acceptable on the college campus during the 1992 presidential campaign. Contains 16 references. (DK)

This unit is part of a continuing series on current foreign policy issues. This unit draws students into a debate on Russia's identity. Unlike previous units of this series, this one is not written from the U.S. perspective. Rather, students are asked to see the world through Russian eyes and to contemplate Russian choices in the areas of economic development, political organization, and foreign policy. At the core of the unit are three distinct directions, or futures, for Russia in the coming years. Each future is grounded in a clearly defined philosophy about Russia's place in the world and offers broad guidelines on fundamental public policy issues in Russia. By exploring a spectrum of alternatives, students gain a deeper understanding of the values and assumptions underlying Russia's ongoing political turnoil. The background reading prepares students to assess Russia's policy choices. Part 1 surveys four key periods of reform in Russian history, ranging from the reign of Peter the Great to the Gorbachevera. Students are called upon to weigh the implications of past reform efforts for Russia's current situation, and also to appreciate how Russians view their history. Part 2 reviews the momentous changes that

This report is intended to serve as the basis of the World Beatly support to the everyment of Turkey.

Science Research, "Social Services Identifiers—"Turkey
This report is intended to serve as the basis of the World Bank's support to the government of Turkey in the implementation of its policies to enhance the participation of women in the economic development process. The report provides background information on the situation of women in Turkey, including legal and health issues, and examines government strategies to incorporate women into national policies and programs. The main focus of the report is on increasing and raising the quality of women's participation in the labor force. To this end, the report gives particular attention to enhancing women's labor skills and income earning potential through education, technical training, and credit; and to opening their access to higher paying jobs in industry and agriculture. Turkey can benefit significantly in terms of increased productivity, enhanced family welfare, and reduced population growth by focusing more on the development potential of its women. The report advances three general propositions: (1) investments in women will promote economic development. Because of the critical role women play in their family's health and nutrition, and in the education of children, the benefits from investment in women's development tend to be spread more widely throughout society and across generations; (2) women contribute far more to the economy and to the family than is reflected in official statistics. Recognizing this will help policymakers in making informed decisions on resource allocation; and (3) easing the cultural and traditional constraints on women's productivity would lead to increased productivity and incomes. Includes numerous tables. Contains approximately 200 references. (DK)

This theme issue explores the changes in Iowa's environment. When Native Americans lived in Iowa hundreds of years ago, the land was rich in tall

grasslands, fertile soil, wildlife, wetlands, and unpoliuted waters. When European-American pioneers settled low in 1833, they changed the environment in order to survive. The first article in this issue discusses recycling. Another article describes the wildlife that used to be pientiful in Iowa, the loss of some species, and the reintroduction of others. Articles are devoted to pesticides, heirloom seeds, and bird watchers. More extensive articles describe Iowa wetlands, Iowa's flood history, erosion, and recycling. A learning activity on making compost is included along with a quiz on compost materials. Iowa's prairie history is explored in another article. Sections discuss breaking the prairie, prairie fires, and prairies today. Other learning activities include a word find, a word scramble, and cartoon, all dealing with the environment. A short story about recycling is included. The last article describes the activities of different youngsters in celebrating Earth Day. A list of four books is offered as additional reading. Four pamphlets available from government aspencies or private organizations are included. (DK)

Skinner (B F)
John Dewey is known as the greatest and the most
representative of U.S. philosophers. His philosophy,
influenced by and developed during a period of
great expansion in U.S. history, and great upheaval
in U.S. social life, is characterized by a common
sense, extroverted pragmatism. Sigmund Freud, in a
tronic twist of fate, has been an important source for
a reaffirmation of the inner life, of the importance
of personal selfhood in a mass acciety. The philosophical bases of Freudian psychology, along with a
variety of psychoanalytic therapies, have provided
the extroverted with just what is missing in Dewey
himself, namely a substitute for religious conceptions of the person, or in the case of religious humanism, a comfortably pragmatic approach to
mainstream religion. Dewey and Freud, along with
B. F. Skinner, in fact represent the three major bases
or preconceptions of U.S. social thought today.
They are enduring influential figures collectively
known as humanists among their admirers and secular humanists among their severe critics. Dewey and
Freud also represent a severe schism in Western
thought. Dewey's modern human is a pragmatic and
sociable optimist whose activist attitude toward
problem solving remains highly attractive in all nations and cultures undergoing industrialization and
technological advancement. Freud's human, in contrast, knows there is a severe psychic price to pay for
uprooting the human being from traditional patterns
of family and community life. This paper considers
the major differences that divided Freud and
Dewey. Contains 10 references. (Author/DK)

This study discusses China's experience in factating the UNESCO APPEAL goals of education the UNESCO APPEAL goals of educations.

for all by: (1) schieving universal primary education; (2) eradicating illiteracy; and (3) providing continuing education in support of the two preceding goals by the year 2000. China plans to establish a training facility in each province to coordinate activities so that a literacy education network will be developed. Bradication of illiteracy and post-literacy continuing education are still a formidable task. At the time of this study there were 220 million illiterates and semi-lititerates aged 12 years and shove in China. Because of this, China remains one of the largest illiterate countries in the world. From 1982-87 the number of illiterates fell by 3,360,000 each year. Even with this rate of progress, China will still have 170 million illiterates in the year 2000. According to 1986 statistics, there were more that 820,000 primary schools in China with a total enrollment of 313,820,000 pupils. The enrollment rate for school age children was 96.4 percent. The graduation rate was 94.7 percent. Of the 2,000 counties, 78 percent had reached a 95 percent enrollment rate for school age children. After examination and recognition by the appropriate authorities, 1,052 counties, or 52 percent of the total number, had realized the universalization of primary education. From 1981 to 1985 more that 100 million peasants participated in different courses. At the time of this study, there were 3,600 technical and vocational schools for peasants at the county level. This study discusses Indonesia's experience in facilitating the UNESCO APPEAL goals of education for all by: (1) achieving universal primary education, (2) eradicating illiteracy: and (3) providing continuing education in support of the two preceding goals by the year 2000. In 1960 approximately 75 percent of the population of Indonesia aged 15-54 years was illiterate. By 1980 the rate had been reduced to 28.9 percent. It was estimated that by 1990 only 6.6 percent. It was estimated that be 1990 only 6.6 percent. It was estimated that be reduced to 28.9 percent. It was estimated that be 1990 only 6.6 percent. It was estimated the enrollment at the primary level had reached 84.6 percent. In 2000 it is estimated to be 99.67 percent. The apovernment will continue to provide literacy education integrated with income generating activities. The priority target group is the age group 15-44 years of age. If as planned, these people were made literate by the end of 1990, the program would shift its attention to people of 45 years of age and above. As regards the universalization of primary education, the policy is to further primary education of skills training and apprenticeship programs to enable those who have dropped out of school to take some form of school equivalency program. By the year 2000 people aged 15 years will have had a minimum of 9 years of schooling. The Education for All program is based on the existing institutions or organizations.

This study guide was developed for teachers and students participating in the Peace Corps World Wise Schools program. The primary purpose of the study guide series is to enhance each class's correspondence with its Peace Corps Volunteer and to help students gain a greater understanding of regions and cultures different from their own. The specific purpose of this guide on Lesotho is to support these aims through a close-up study of "The Mountain Kingdom." A developing nation surrounded by an industrialized power, Lesotho is both an anomaly among nations and, at the same time, a symbol of the geographical and cultural dynamics at work in almost every land. Study of Lesotho reveals with particular clarity the way physical geography has shaped, preserved, and transformed local human culture. The intent of this study guide is to direct student attention to that interplay. The topic units of this guide have been grouped by three academic levels: (1) grades 3-5; (2) grades 6-5; and (3) grades 10-12. The units within each level have been developed along the five fundamental themes of geography. The lesson material within each topic is arranged in five sub-sections. In each topic unit, the Focus section briefly summarizes the subject(s) of the lesson(s). The Resource section lists related worksheets, handouts, and maps. The Background section supplies additional information about the topic. The Activities action details a variety of Lesotho-related exercises for students. The final Estension section suggests ways to bring these topic activities home for students by linking the study of Lesotho to life in the United States. (Author/DK)

Descriptors— *Cultural Awareness, Cultural Pluralism, Curriculum Development, Educational Objectives, Educational Philosophy, Educational Research, Higher Education, Humanism, *Interdisciplinary Approach, *Multicultural Education

Cultural diversity and cultural plurality are considered today to be the backbone and passion of many multicultural education programs in the United States. Idiosyncratic and parcochial needs of specific racial, ethnic, and other self-interest groups are studied as distinctive entities. In some cases, they are treated uniquely in what has been characterized as cross-cultural education. Mainstream multicultural programs are not viewed within the context of social and human experiences whose outcomes enrich and solvance the totality of existing values in a cultural plurality. Mono-cultural, bi-cultural, and cross-cultural programs each represent one perspective on a multicultural continuum. In contrast, a humanistic cultural learning experience embraces a commitment to the universality of human needs and beliefs that transcend color, race, gender, age, and ideological boundaries. An interdisciplinary approach among liberal arts, the humanities, natural sciences, life and social sciences should confer to students a basic knowledge in all of these areas within the context of a multicultural education. It should promote understanding of and respect for human experiences within particular eco-systems and divergent cultures in time and space; develop bejectivity and critical judgment as well as the need for continuing studies and observation. Finally, multicultural education should develop a commitment to the preservation should develop a commitment to the preservation of human rights for all, irr

This paper gives an overview of "The Schooled Mind: Do the Arts Make a Difference? An Empirical Evaluation of the Hamilton Fairfield SPECTRA+ is an education reform, school renewal approach involving all students in the arts on a daily basis. The primary mission of SPECTRA+ is to improve education for children and to improve children through renewed education utilizing daily involvement in quality arts experiences. Five major components comprise the SPECTRA+ approach: (1) teacher training/professional development; (2) teaching the arts as individual entities; (3) integration, immersion, imhasion of the arts throughout the curriculum; (4) artists in residence; and (3) evaluation. The evaluation is a major component of SPECTRA+ and provides data and results of SPECTRA+ that meet stringent research parameters. This study measured pre-test and post-test results after one year of the program. The testing involved 615 students in grades 1, 3, 4 (pre-test) and 2, 4,5 (post-test). Four schools of similar demographics were involved in the evaluation study. The 5 variables selected for the study were: (1) academic achievement; (2) self-esteem; (3) locus of control; (4) creative thinking; and (5) appreciation of the arts. The full study includes four chapters: (1) introduction, the history and philosophy of SPECTRA+ and arts education in general; (2) methodology, an explanation of the how and why of the evaluation design; (3) results, the findings of this study; and (4) recommendations, the evaluator's discussion of results and his recommendations. This is the first time that analysis and presentation of data from an evaluation study provides support for arguments to include the arts at a significant level in the curriculum of the elementary school. This bibliography was designed to assist psychology instructors in incorporating active learning strategies into their courses. The document contains articles that describe specific techniques that should belp students to become more involved in learning about psychology than traditional lecture methods allow. The bibliography was prepared by reviewing articles published in "Teaching of Psychology" between 1978 and 1992. Articles are organized into categories according to the type of active learning technique described. The first category, computers, has 24 entries. The third and largest category, demonstrations and class activities, consists of 104 entries. The fourth category, discussions and debates, includes 15 articles. The fifth category, fieldwork, includes 17 entries. The first category, discussions and debates, includes 15 articles. The first category, fieldwork, includes 17 entries. The sixth category, fieldwork, includes 17 entries. The sixth category, fieldwork, includes 17 entries. The sixth category, fieldwork, includes 18 entries. The sixth category, projects, has 42 items. The twelfth category, role play, has 12 articles. The flourteenth and final category, writing, includes 38 entries. (DK)

This paper represents the initial stage of a project established to describe and understand the rational and processes of certain educational systems in Israel and other countries, and to spread the acquired knowledge as a useful practical contribution. The problem in the study is to understand the conditions prevailing and the methods to be used in attempting to raise the educational level of those countries. The project faced certain obstacles, firstly, in its theoretical basis, since the general topic of comparative education has not yet acquired a full conceptual and methodological outline, and secondly, in implementation, since the governments of the countries surveyed are the potentially interested parties. Particular attention must therefore be paid to the political dimension of the research and advisory activities. The purpose of this initial stage has been to answer two preliminary questions: (1) What are the criteria which will enable one to locate the countries with the highest rate of success in education? and (2) which are the four countries having the highest ducational level to be subsequently investigated. The paper discusses comparative education and methods and problems in the sres. The survey process

This paper reports on a program to develop a com-

Identifiers—"Israel

This paper reports on a program to develop a comprehensive overall strategy of educational research that deals with the state of education in Israel. Four dimensions or sets of demands on the schools are discussed: (1) civilizational demands of transmission of heritage and culture; (2) social demands for good citizenship, productive workers, up to date skills, and perpetuation of civil society; (3) parental demands for the shillity to make a living, perpetuation of their way of life, and happiness; and (4) individual student demands for happiness, self expression, and the shillity to make a living and fit in. All these demands find expression in the educational system through the mediation of the professional educators responsible for the day to day working of the system: classroom teachers, principal.

pals, and senior professionals. Israel's education system is ranked as nursery, elementary, secondary schools, and terciary (or university, teachers, state religious, independent, and vocational colleges). While in terms of variety of options Israel's education system ranks very high, there is considerable dissatisfaction with the system as it is operating. That dissatisfaction has expressed itself in connection with a number of critical issues. They include the problems of a common core curriculum that will unite the various ideological trends and subtrends, how minorities are treated within the system, the problem of the gap between disadvantaged or culturally deprived children and those who are not, problems of equalization, questions of what is taught and how effectively it is learned, and to what extent supplementary education is needed. Based on intensive interviews and observations in the servations of the servations of

ondary Education, Foreign Countries, Farent Arititudes, Student Attitudes, Teacher Attitudes Identifiers—"Israel
Based on intensive interviews and observations in a scientifically selected sample of over 100 Israeli schools, this study presents a detailed picture of the characteristics of school curricula and cultures, and the attitudes and expectations of students, teachers, principals, and parents with regard to curriculum and school culture in the different kinds of schools in Israel. The findings of this study are documented in 190 tables and charts. The treatment of the educational issue is not easy, in part because every educational system must respond to four sets of demands whose importance is given different weight by different segments of the body politic. The four sets of demands are civilizational, social, parental, and individual student. Each is represented by a specific referent. This report presents a comprehensive study of the nature of the Israeli public educational system in the 1990s. This study aims to identify and describe the uniformity and diversity of school culture and curriculum in the Israeli educations system today. It investigates three major questions. (1) To what extent does there exist a common basic curriculum in the Israeli school system today, and what are its characteristics?; (2) What distinctive subcultures are apparent in the Israeli educational system today? How does the curriculum reflect these distinctive subcultures?; and (3) Who controls curriculum subcision making and development in the system today? The conceptualization of this study is guided by two sociological perspectives, the institutional perspective and the perspective and the perspective of symbolic interaction, which have become important frameworks for analyzing the culture and curriculum of educational systems. tion, Student Characteristics

This paper presents a study attempting to identify and evaluate high school activities that impact instrumental student outcome. High school music activities and their impact on student instrumental outcome from a variety of perspectives were examined. There is a subtle difference between musical independence and musical achievement. Musical achievement represents the mastery of any academic skill related to music, but musical independence is related directly to the actual production and performance of music. The link between knowledge acquisition and knowledge use on performance is the key. Music knowledge may exist without musical independence may not exist without musical independence may not exist without music knowledge. The research at the secondary level on musical independence found identifiable and measurable significant differences between students and programs identified as average and as outstanding instrumental music programs. The student portion of the project noted a positive relationship between high school music activities, and such as marching contests, concert festival, solo ensemble, solos, other ensembles, and such activities, and the student's musical independence. The band director segment examined the grading procedures that influence students' musical such scivities, and the student's musical independence and high school activities that impacted it were studied from the postsecondary perspective as well. The findings indicated that participation in all-state band, solo ensemble, concert festival, private lessons, and church or community choir had a positive impact on the students musical independence. The sons, and church or community choir had a positive impact on the students musical independence. The sons, and church or community choir had a positive impact on the students musical independence. The sons, and church or community choir had a positive impact on the students musical independence. The

A volume in the Scholastic Homework Reference
Series, this document provides fourth to sixth grade
students and their parents with the information they
need to complete U.S. history assignments. With
the help of Dial-A-Teacher, which has operated a
telephone helpline since 1979, this American history reference guide presents easy-to-understand
answers to students' most frequently asked questions. This source offers a full range of information
directly related to the fourth through sixth grade
U.S. History curriculum. Divided into nine parts,
part 1 looks at North America before 1775- Part 2
covers the American Revolution (1775-1783). Part
3 provides information about the birth of a new
nation (1783-1800). Part 4 outlines the expansion
west (1800-1900). Part 5 covers the divided nation
(1820-1865). Part 6 deals with the Civil War
(1861-1865). Part 6 deals with the Civil War
(1861-1865). Part 7 provides material about Reconstruction and the birth of Civil Rights (1865-1877).
Part 8 outlines the era of industrialization
(1830-1900). Part 9 covers the 20th century and the
United States as a world leader. The volume concludes with two appendices. Appendix A contains a
time line of events since World War II. Appendix B
has information about the American government,
copies of the Amendments to the Constitution and
the Declaration of Independence, and a list of U.S.
Presidents. The Scholastic Homework Reference
Series is a set of unique reference resources that
provide ready information to answer commonly
saked homework questions in a variety of subjects.

Identifiers—*Bangladesh
Bangladesh is currently suffering from a number of debilitating weaknesses in its education system.
Seventy percent of all children are enrolled in primary school, but 75% of these children do not reach
grade five. Puthermore, with absentee rates of 50%
for both students and teachers, it is estimated that
35% of children who attend school are receiving no
education, and 35% more are receiving less than 500
hours of instruction. The government of Bangladesh, the World Bank, NGO's and other donors, are
working to address the access, quality, equity, and
efficiency problems that plague the primary school
system, but the needs of the over 34,000,000 illiterate people between the ages of 11 and 35 must be
addressed. To this the government has proposed a
set of five target programs for different groups. For
instance, the program for 7-10 year olds would provide a two- to three-year course that would focus on
basic education. These plans cannot be implemented without the help of outside groups offering
funding and recommendations. (NK)

ment, Agricultural Resources, Women in Development
Based on desk reviews and/or field studies of 102
projects related to women, this report synthesizes the results of A.L.D. experience since 1973 in targeting women in development (WID) activities. The major finding is that mainstream projects that ensure women's participation in accordance with their roles within the project's baseline situation are more likely to schieve their aims than projects that do not. A review of the relationship of gender variables to the achievement of socioeconomic goals found that understanding gender factors in agricultural production is crucial to successful technology transfer. Also crucial at the level of socioeconomic impact is an understanding of the various sources of and control over income and of gender roles in consumption. Ten practical suggestions are made to improve gender analysis techniques, delivery of resources to women, and tracking of women's participation in project strivities. A conclusion review of the various types of women's projects finds that: (1) mainstream project with "gender sensitive" designs are the most effective at meeting WID objectives; (2) women-only components in larger projects can be effective, although they may lead to tokenism if gender differences are ignored; and (3) women-only projects tend to be small in scope and costly in stalf time, and are best suited for the delivery of training. Comparison, Elementary Secondary Education, Family (Sociological Unit), "Family Influence, Foreign Countries, Instructional Materials, Outcomes of Education, Public Schools, Rural Urban Differences, Supplies Identifiers—"Peru Trom the mid-1930s to the 1960s, the government of Peru undertook a major expansion of public education, increasing the number of schools, requiring primary schools that offered an incomplete cycle to add grades, and increasing school inputs (principally teachers and textbooks). The effects of Peru's educational policies, and the effect of family background and community characteristics on the schooling level of a sample of adults was examined. Data on males and females were analyzed aeparately by birth cohort, using a sample of 5,644 females and 5,421 males aged 20 to 59. The study found: (1) the government's policy to expand the schools played a major role in raising education levels and narrowing the gap between rural and urban residents, and males and females; (2) the impact of parents' years of schooling and occupations on the educational levels of their children lessened over time as the supply of schools expanded throughout the country; (3) the relative effect of parents' education differs for sons' and daughters' schooling; (4) primary schools expanded rapidly even in rural areas; (5) urban residence at the age of 13 remained an important determinant of educational stainment because of the great disparity between urban and rural areas in availability of secondary schools; (6) and finally the availability of material school inputs, such as textbooks and deaks at the primary level, had a large positive effect on final school levels. Contains 39 references. (Author/JJ)

When and how to integrate girls and women into Agency for International Development (A.I.D.) projects in basic education and vocational training is the focus of this manual. The volume generally follows the format developed in the Topical Reference Guide series produced by A.I.D.'s Center for Development Information and Evaluation (CDIE). The manual also is influenced by the medical model, in which diagnosis and treatment are determined and carried out by answering a series of questions. The two sections of the document treat first basic education then vocational training projects in relation to the five emphasis areas of A.I.D.'s support to education: (1) construction and renovation of schools and classrooms; (2) provision of equipment and supplies; (3) teacher training; (4) curriculum design; and (5) administration and management. A list of questions that evaluators should ask in order to disaggregate a project's gender effect and guide-lines for collecting data on gender factors during the project design stage are provided. This constitutional casebook is the outcome of the P.A.T.C.H. Law Program of the Northport-East Northport Union Free School District in New York. The casebook provides students and teachers in grades 7, 8, 11, and 12 with a summary review of the 22 cases mentioned in the New York State Regents' 11th grade "U.S. History and Government" syllabus and an additional 29 cases that support a better understanding of U.S. history and government. Summary charts outline the syllabus and include the constitutional cases mentioned in it as well as additional cases that enrich students' knowledge. Among the cases that enrich students' knowledge. Among the cases the enrich students' knowledge. Among the Cases that enrich students' knowledge. Among the Cases reviewed are landmark decisions such as Marbury v. Madison, McCulloch v. Maryland, Dred Scott v. Sanford, Piessy v. Ferguson, Brown v. Board of Education of Topeka, Mapp v. Ohio, and Gideon v. Wainwright. For each case, the casebook lists the citation number, the judicial concepts involved, the facts of the case, the legal issues, and the court's opinion. The appendices include a pre- and post-test, a glossary of constitutional terms, and the U.S. Constitution. (JD)

The eight units in this volume are designed for use by an art teacher/specialist. Thematic ideas are presented, while skills, techniques, and materials are not dictated. The lessons encourage students to compare and contrast cultures, understand their own cultural experiences, and explore differences and commonalities among cultures. The materials guide students to make art works based on contemporary experiences rather than imitative art of another culture. The eight units are structured to include: (1) "Student Notes," which give a broad view of the arts of the region under study; (2) "Questions Related to Student Notes," which serve as models for teacher developed question sheets, examination or assignments; (3) "Vocabulary"; (3) "Questions Related to Student Notes," which serve as models for teacher developed question and their own lives. Unit 1, Introduction, addresses aesthetic questions concerning the definition and mature of art. Unit 2, Africa, includes student notes on "The Mask and Sculpture Traditions of Africa," and "The Influence of African Art on Western Art. Lesson plans cover topics: "The Relief Sculptures of the Benin". "Clothes Inspired by African Designs"; "African Rulers, Kingdoms and Empires of the Benin" in Clothes Inspired by African Designs"; "African Rulers, Kingdoms and Empires of the Benin" in Clothes Inspired by African Designs"; "African Rulers, Kingdoms and Empires of the Benin" in Clothes Inspired by African Designs"; "African Pales Sculpture Traditions of Egyptian

Unit 4, the Middle East, includes notes on the "Development of Islamic Architecture in the Middle East." and "Middle Eastern Architecture." Lesson plans are: "Illustrating "The Arabian Nights"; "Geometric Patterns in Islamic Art"; and "Dream Palace-Islamic Architecture." Unit 5, Latin America, gives notes on "Pre-Columbian Art and Civilizations in Mexico, Central and Southern America" and "Modern Art." Lesson plans are: "Creating a Personal Visual Diary" and "Art as Political Comment (Political Cartoons)." Unit 6, India, gives notes on "India"; "Hinduism"; and "Buddhism." Lesson plans are: "Puppets-The Ramayana" and "Symbolic Sculpture." Unit 7, China, presents notes on "The Arts of China." Lesson plans are: "Sayings and Proverbs", "Circular Visual Diary"; and "Good Luck Symbolism." Unit 8, Japan, discusses "The Arts of Japan," and offers lesson plans: "Environmental Issues and the Haiku"; "Surrealism and Japanese Music", and "Illustrations Inspired by the Tanabats Folk Tale." Each unit includes several black and white illustrations. The work concludes with a 92-item bibliography and information about ordering Global Art Slide Sets. (MM)

The purpose of this paper is to consider what relevant clinical applications can be generated from a thorough review and critique of the theoretical and empirical literature pertaining to cross-cultural value orientations. The Kluckhohn and Strodtbeck (1961) theory of value orientations and their Value Schedule was presented. The 3 elements of value orientations are the cognitive, the sticitized research presented by those people who, claimed that value orientations strongly influence both social and personality systems, followed Kluckhohn and Strodtbeck's theory and provided remarkably similar and clearly elucidated summaries of that theory. The critique of those studies indicated numerous methodological and some statistical weaknesses that undermine the reliability, validity, and in some cases the generalizability of the results and conclusions obtained. Until the reliability and validity of value orientations and instruments can be firmly established, the potential benefits, for example cross-cultural values data increases the general social science knowledge base, can offer our society, the science of psychology, and the professions of clinical and counseling psychology a great deal. It is an overture simed at sharing ideas and REE JUN 1998

experiences with all concerned for the promotion of peace and international understanding at home and abroad. It is possible to teach international understanding by emphasizing the removal of the sources of violence, conflict, and misunderstandings, the old patterns, and in their place creating a conducive environment for teaching peace and understanding by introducing new patterns. The spirit of education for international understanding urges people to appreciate their differences and to search and identify the common thread that ties them together enabling them to live and interact peacefully. This investigation consulted textbooks and curriculum only. Most of the books were from social studies, language, and civics classes at the primary and secondary school level. Ethiopia has made a great effort to advance international understanding and peace. Ethiopia has mediated internal conflicts between sister African countries of Sudan, Somalia, Morocco, and the Saharawi Republic (former Spaniah Sahara). Ethiopia incorporates its foreign policy principles into the social studies curriculum. National objectives for international understanding are discussed, as are ways that Ethiopian society, business, and government support and promote peace and international cooperation. This study explores the Philippine experience in values development. The primary goal of providing values education at all three levels of the school system in the Philippines is the development of a person committed to building a free, democratic, peaceful, and progressive nation. The program hopes to develop Filipinos who possess the following values and traits: (1) self actualization, people imbued with a sense of human dignity; (2) a sense of responsibility for community and environment, self-discipline; (3) productivity, contributory to the economic security and development of the family and nation; (4) a deep sense of nationalism, commitment to the progress of the nation and to global solidarity; and (5) an abiding faith in God and spirituality. General guidelines specify that the program must: (1) be oriented towards the whole learner; (2) consider the unique role of the family in personal development and integration into society and the nation; and (3) recognize and emphasize the role of teachers who themselves must possess a proper sense of values and respect for the person of the student. Values development is discussed from the viewpoints of learning theorists or behaviorists, cognitive dev

Identifiers—"Poland
This study explores the Polish experience in values education. Between the years 1944 and 1989
Polish education was often state controlled with the sole purpose of subjugating education to Marxist-Leninist ideology. Over the years the communist party's dictates varied in intensity. Despite the party's efforts to prescribe ethics, certain values remained uncontaminated by communist oriented decision making. While it is difficult to substantiate this with objective research findings, evidence comes from the teachers themselves, especially teachers in the humanities and social sciences, who could observe and monitor values in Polish schools. Three values survived the government's ideologic pressure: (1) knowledge; (2) patriotism; and (3) western civilization. All three of these ideas remained deeply rooted in the minds of both teachers and parents. Four reasons contribute to explaining why patriotism remained an important principle; (1) Polish pre-war schooling followed an early 19th century approach that viewed education as the path toward liberation for subjugated nations; (2) in the majority of families, parents encouraged this attitude; (3) the Catholic Church, a very influential institution in Poland, supported patriotic education; and (4) the communist authorities were unwilling to suppress patriotic education because they were afraid to go against popular attitudes. The study suggests that the new focus for Poland's schools should be mutual understanding. Specific programs and curricula are discussed. Contains nine references. (DK)

This ERIC digest discusses the use of diasenting
U.S. Supreme Court decisions in teaching about
U.S. constitutional history, for most of its history,
the U.S. Supreme Court has issued a single opinion
indicating its decision in a case. The Court disposes
of each case it reviews by majority rule (either affirming or reversing) and provides a rationale for its
decision. The disposition and rationale are both critical elements of the Court's decision. In providing
reasons for its decision, the Court may offer constitutional interpretations that have a significant impact on U.S. law and society. In cases where some
justices do not agree completely with the Court's
decision, they may write or join concurring and dissenting opinions. In "General policy. Unlike
the reasons for their decisions based on their understanding of law, history, and policy. Unlike the Court's
decision for their views. Justices offer reasons for their decisions based on their understanding of law, history, and policy. Unlike the Court's
majority opinions, dissents have no legal force.
They can, however, encourage federal legislation to
reverse or limit the Court's decision. They may influence the Court in future decisions. This ERIC
digest focuses on four exceptional cases, in which

dissents have attained landmark status in U.S. legal history in that they influenced subsequent reversals by the Court or have come to articulate revised opinions of the Court. (Author/DK)

This document consists of the first 16 volumes (47 issues) of a serial devoted to law-related education (LRE) that offers background information on a widerange of legal issues as well as teaching strategies for LRE. Issues of the magazine focus on the law as it affects schools and young people, with articles on school discipline, juvenile justice, the legal rights of students, youth at risk, and drugs in the schools. Many themes in constitutional law with special emphasis on the First and Fourth Amendments, the Civil Rights Amendments, the separation of powers, the constitutional framework for declaring war, and the Rehnquist Court are featured. Some issues take a global perspective with articles on law in world cultures and international law. Special areas of the law including intellectual property, family law, privacy rights, and corrections are outlined in other issues. The material covers themes as they relate to the law such as sports, religion, discrimination, justice, ethics, and democracy. Each issue proposes teaching methods that involve class discussions, collaborative learning, mock trials, map exercises, and resource people. Many of the lesson plans include student handouts such as background sheets, cartoons, puzzles, and worksheets. (JD)

Lee Canter's Assertive Discipline method was studied using a survey of 72 high school teachers' attitudes. Assertive Discipline calls for firm but fair rules, negative consequences for inappropriate behavior, and positive consequences for inappropriate behavior, and positive consequences for positive behavior, and set by the teacher. After a lengthy literature review, the survey is discussed. Sixtycight percent of respondents agreed or strongity agreed that they felt it necessary to use methods other than Assertive Discipline in the classroom management and were eager to try a student-involved classroom management process. At the same time however, 73 percent disagreed with allowing students to help set rules and consequences in the classroom. Teachers felt that conflict resolution and the democratic process were important in classroom management. Results indicated that teachers would not favor and might not obey a packaged discipline program. The paper concludes that teachers would oot favor and might not obey a packaged di

be allowed to choose a classroom management pro-cess that suits the teacher's style, students, and sub-ject to be taught, and that students should be encouraged to be active members of classroom man-agement and the discipline process. Appendices provide a list of classroom rules, a classroom man-agement survey, teacher comments, survey data, and a consent letter. (Contains 37 references.)

This research hypothesized that preformal-operational children (before age 11) can improve their ability to write persuasive essays at an age earlier than Jean Plaget's developmental stage model would predict. A Vygotskian social interactionist approach, which claims that adult intervention can help children achieve what may have seemed beyond their abilities, was used. Fourth and sixth graders (n=153) wrote two persuasive essays, with 3 weeks of instruction consisted of daily 45-minute lessons for 3 weeks, involving brainstorming, supporting, conferencing, and editing on different topics. The essays were evaluated on the basis of "claims," "data," and "warrants." Students in the experimental group on the whole performed better than those in the comparison group. Girls performed better across all three aspects than did boys. Of the three measures, "warrants" seemed to be the most difficult. The experimental treatment was questionable for boys on this trait, as performance of fourth grade comparison group boys was higher than that of experimental group boys. The study concludes that formal operations are not a necessary precondition for writing persuasive essays; a Vygotskian approach to the teaching of writing is supported; girls acquire formal operations sooner than boys; and girls have superior verbal abilities that allow them to perform generally better than boys at writing tasks. Plans, "Stress Management, Student Responsibility

Plans, *Stress Management, Student Responsibility
The purpose of this project was to develop, implement, and evaluate a simple, teacher-friendly, environmentally-based anxiety reduction intervention for fourth-grade students. Review of related literature indicates that children are often victims of stress due to academic and sociological variables which exist within the school environment. Specifically, researchers have found that fourth-grade students encounter increased academic pressures which may put them at greater risk for stress. The purpose of this project was to develop, implement, and evaluate a simple, teacher-friendly, environmentally based anxiety reduction intervention for fourth-grade students. The intervention, titled Project SESAME (Student Environmental Stewardship Anxiety Management Exercises), contains activities which focus on teaching students about anxiety reduction within the context of environmental stewardship (accepting personal responsibility for environmental protection). The effects of the intervention on 113 students were evaluated by using the Spielberger State-Trait Anxiety Inventory

for Children. Results indicated that there may have been a change in student state/trait discrimination capabilities. This outcome may be significant in that stress management interventions for children may need to focus on training participants to distinguish between varied forms of anxiety before the interven-tion in order that the intervention be effectively tion in order that the intervention of enectively implemented and carried to a successful completion. Appended to the document are: (1) originals for overhead transparencies containing information about the intervention and its outcomes; and (2) six lesson plans, including objectives and learning activities. (Contains 20 references.) (Author/JDD)

Identifiers—Chicago Public Schools IL
A review of research traces the history and development of staff development and inservice teacher education during the 20th century. Current research suggests that if teachers were to consider staff development as one of their most important responsibilities, they would have a profound influence on the direction their school would take in preparing for the challenges of the 21st century. This study of 36 Chicago (Illinois) public school teachers was undertaken, therefore, to determine their assessment of the agenda and organization of staff development programs as suggested in the current research. The survey addressed: topics, preplanning, planning, implementation, evaluation, and maintenance. Data showed that teachers felt that topics should include student discipline, parental participation, at-risk students, and classroom behavior management. In regard to preplanning/establishing a committee, 40 percent felt that their major concerns were not recognized. In regards to planning staff development, fo3 percent felt that they had no input in planning staff development meetings. About half felt that goals and objectives had been written clearly and appropriate leaders selected, but that a system for evaluating the training had not been established. The majority felt that ample opportunities were provided for active involvement and practice of techniques, new techniques or skills were introduced, and participants had an opportunity to ask questice. vided for active involvement and practice of tech-niques, new techniques or skills were introduced, and participants had an opportunity to ask ques-tions. Less than half reported that follow-up ses-sions within the school were held to discuss implementation of the techniques and that incen-tives were provided for employing new techniques. The paper concludes that teachers want to take a more active role in preplanning, planning, and im-plementing their own staff development programs, and that programming needs to be restructured to and that programming needs to be restructureflect this. This practicum was designed to retrain preschool personnel on the importance of cultural diversity and the teacher's role in developing and implementing a multicultural curriculum. Faculty meetings and workshops were organized to present a cultural awareness curriculum to preschool staff and discuss the teacher's role in executing the curriculum Teachers participated in role-playing sessions on

fostering respect for and understanding of diverse cultures, and they participated in developing and evaluating the culturally diverse curriculum. Monthly themes included: ancestors, food, clothing, games, shelter, holidays, transportation, and weather. Learning activities for each of these themes are presented, such as cooking with rice and corn, including chopsticks and woks in kitchen play centers, building igioos, and making hats and vests from different countries. Teachers who participated became aware of their attitudes toward multiculturalism and increased their knowledge of the importance of multicultural curriculum. Children involved in the cultural awareness program developed an understanding and respect for other people. Appendixes include a checklist of culturally diverse classroom materials, assessment instruments, and curriculum outlines. (Contains 29 references.) (JDD)

This paper describes activities of Morehead State University (Kentucky) to support public schools in adjusting to state-mandated educational reforms in curriculum, instruction, assessment, support for children and their families, shared decision-making, and paradigm shifts from Skinnerian behaviorism concepts to social constructivism. Activities included: (1) assessing needs of educators; (2) providing a workshop on outcome-based education in response to identified needs; (3) providing training on performance-based assessment; (4) providing training on the Curriculum Transformations Document; (5) workshops on writing and scoring open response items to help students be successful with the Kentucky Instructional Results Information System; and (6) rewriting of preservice syllabi to include reform precepts, such as manipulative math, hands on science, and writing as a process. Results of an attitudinal survey of Morehead student teachers in the spring of 1994 found that respondents wish to include parents and students in decisions about school programs, but professionals should have a greater voice, and respondents believe that all students can learn, and most at high levels. This optimism may be the most predictive indicator of these student teachers being successful teachers in effective schools. Part of that optimism is viewed as the result of influence and opportunity for female leadership at Morehead, school districts, and Kentucky's department of education. Three tables contain survey information. (JDD)

Student teachers' perceptions of corporal punishment were measured in an open-ended survey involving 37 student teachers. Twenty-four of the student teachers indicated that the use of corporal punishment in the schools is useful and justifiable.
Several suggested that the threat of corporal punish-

ment, even if never used, is a legitimate method to deter students from inappropriate behavior. Many of the corporal punishment advocates felt that children need to know that in life there are often negative consequences to inappropriate behaviors. Other student teachers suggested specific guidelines, such as allowing only a school principal to administer corporal punishment, and notifying students' parents prior to a paddling. Thirteen respondents opposed the use of corporal punishment, based on their opinion that it does not eliminate causes for disruptive behavior, that it causes students to become rebellious, that it does not provide a positive learning environment, that it seems to be ineffective because the same children have recurring incidences of spanking, and that it leads children to believe that violence is a legitimate means to solve problems. Descriptors—*Educational Environment, Elementary Education, *Elementary School Teachers, *Institutional Characteristics, Junior High Schools, *Secondary School Teachers, Sex Differences, Suburban Schools, *Teacher Attitudes, Teaching Experience A study was done to determine teachers' perceptions of the characteristics of a good school climate. A questionnaire, "Teacher Perception Scale" was given to all 150 teachers in a school district, consisting of four elementary schools and one junior high school, in the south suburban area of Chicago (Illinois). Fifty-one randomly slected questionnaires were studied. The majority of teachers agreed that the characteristics of favorable school climate, such as respect, trust, nurturing and caring, high morale, and academic development, are present in their schools. Eighty-two percent liked the school in which they work. Sixty-six percent trusted the people with whom they work. Eighty-four percent of the teachers agreed that they know a lot about the school in which they work. Sixty-six percent trusted the people with whom they work. Eyenty percent felt that they were a part of the school in which they work. Teacher comments supported the questionnaire items concerning teachers' perceptions of school climate. Results are analyzed by gender and years of teaching experience. The study concludes that respondents have an attitudinal receptiveness to improving the organization in which they work, and therefore school districts should move forward in school reform efforts. Identifiers—"University of Missouri Kanass City The use of portfolio assessment by composition instructors in the Department of English at the University of Missouri-Kanass City is described. Based on a survey of instructors, conducted in the spring of 1994, the paper examines: (1) who determines what goes into the portfolio, (2) how students are assessed throughout the term, (3) features looked for when reviewing student papers, (4) frequency of student conferences, (5) grading techniques, (6) differences in teaching or in student responses due to use of portfolios, and (7) advantages and disadvantages of portfolio assessment. The teachers felt that students became less dependent on the teacher and more self-reliant about writing. Advantages included students not worrying about grades, teachers seeing improvements in students' work, students taking responsibility for their own work, and students applying what they have learned. Disadvantages included the paperload at the end of the semester, the chance that teachers may evade their responsibility to evaluate

students' work throughout the term, and the worry teachers have that they may be accused of grade inflation. (JDD)

Descriptors—Elementary Secondary Education, Institutional Characteristics, "Outcomes of Education, Research Needs, Research Problems, Self Concept, "Self Efficacy, "Teacher Characteristics," Teacher Effectiveness
After analysis of 88 studies of the antecedents and consequences of teacher efficacy, it was found that personal attributes and organizational characteristics were associated with higher teacher efficacy. There was consistent evidence that teacher efficacy influences teacher and student outcomes. Higher efficacy was associated with being female, the teacher's attribution of student success and failure to forces within their control, elementary level teaching rather than middle and high school teaching, students who are relatively orderly and of higher ability, schools characterized by low stress, leadership responsive to teacher needs, the use of teaching techniques which are more challenging and difficult, teachers' willingness to implement innovative programs, developmental clausroom management practices, and enhanced student mastery of cognitive and affective goals. Deficiencies of past research include inattention to within-individual differences and a failure to conduct rigorous intervention studies. It is proposed that future research focus on the use of teacher efficacy as a construct in school improvement research. (Contains 113 references.) (Author/JDD)

Students, Teacher Influence, "Teacher Role, "Teacher Student Relationship, "Time Management Identifiers—"Teacher Power
An ethnographic study of three public elementary school classrooms explored how teachers organized time and space and through this organization attempted to construct classroom power relationships. The study involved intensive observation of classroom interactions in two fifth-grade classes and one first-grade classroom and close analysis of videotapes of two of the classrooms. The videotapes were used for stimulated-recall interviews with two of the teachers; an in-depth interview was conducted with the third teacher. All the teachers were white women, two with 20 years experience and one with 5 years experience. The first fifth-grade classroom was arranged so that students faith-grade classroom was arranged so that students forded the students. The classrooms also differed in the amount of time that the teachers devoted to highly structured, activities. Yet it was clear that in every case the arrangements the teacher had made were consonant with her beliefs shout how children can best learn, and therefore were enactments of her agenda to control student actions in order to facilitate student learning. The study showed clearly that teachers have an institutional role that allows them to make contributions to power relationships through their organizations.

tion of time and space. The amount of structure built into the learning activities available in the classroom also shapes power relationships effectively. Nevertheless, students find ways to resist teacher control, to create "seams" in environments and activities, and to use those "seams" to make their own contributions to power relationships. "Maryland School Performance Assessment Program
This document offers many of the insights and comments of Maryland elementary school teachers who scored the 1992 Maryland School Performance Assessment Program (MSPAP) tests. The MSPAP covers reading, writing, social studies, mathematics, and science and is administered to students in grades 3, 5, and 8. The document contains the teachers' most salient observations and suggestions organized by content area and grade level. Some comments crossed content area or grade level lines, and were, therefore, gathered in a separate section. Wherever possible the grade level which the teacher scored is indicated in parentheses. Examples from a section containing comments that applied across grades and content areas included the following (1) students need work on paraphrasing; (2) students often did not provide critical, specific responses to the question "why"; (3) many students often listed specific details when asked to list main ideas; (5) students had great difficulty analyzing how they did something and/or why certain strategies were useful; (6) many students did not read the complete question before responding; (7) many students did not know how to read a test question; and (8) many students did not know how to express their thoughts

on paper. An appendix contains a copy of the form that solicited teachers' comments. (JB)

"Maryland School Performance Assessment Program
This document offers many of the insights and comments of Maryland elementary school teachers who scored the 1993 Maryland School Performance Assessment Program (MSPAP) tests. The MSPAP covers reading, writing, social studies, mathematics, and science and is administered to Maryland students in grades 3, 5, and 8. Comments and observations are organized by content areas in two sections: "Perceptions" (impressions respondents would like to share with other teachers about student performance); and "Actions" (what the teacher anticipates doing differently based on his/her impressions from scoring the tests). Each entry is followed by grade level, in parentheses, identifying the grade level responses that were scored by the teacher who provided the comment. However, most comments are relevant to teachers across grade levels. Some general perceptions included: understanding multi-task directions was problematic; children need to be taught to be more specific and to think; and many students were nervous or frightened. Some general students were nervous or frightened. Some general actions teachers intended to take based on their experience scoring tests were to seek opportunities for students to discuss and evaluate situations and arrive at conclusions, to teach test-taking skills, and to get a list of outcomes MSPAP is measuring. An appendix contains a copy of the form that solicited teacher's comments. (JB)

This report contains a compilation of information

mand, Teaching Experience
Identifiers—"Idaho
This report contains a compilation of information
about elementary and secondary education employment in Idaho with a focus on current supply and
demand and teacher preparation and certification.
Data were gathered from all Idaho districts through
a survey and from 1993-94 Idaho Basic Education
Data System (IBEDS) reports. Information provided by Idaho's colleges and universities which
prepare teachers was also included. A section on
teacher supply and demand covers vacancy trends,
applicants, ethnicity of teachers and students, shortage patterns, teacher recruitment and retention, and
teacher characteristics. A section on teacher preparation and certification in the state covers certification trends and student enrollment. A section
devoted to nontraditional teacher certification in
Idaho looks at the use of letter of authorization certification, consultant specialist certification, teacher
trainee certification (alternate route), and approved
misassignment. A final section offers a summary
and discussion of the data. Among the findings in
this section are the following: (1) student enroll-

ment appears to be increasing faster than teacher education workforce increases; (2) inquiries about teaching in Idaho increased during the 1993-94 achool year; and (3) special education and pupil personnel services are types of vacancies that prove persistently difficult to fill. Appendixes contain extensive tables of data. (JB)

This report presents themes in the integration of intercultural civics instruction into elementary and intercultural civics instruction into elementary and secondary curricula, themes that emerged as points of disagreement and discussion at a teacher training seminar held in Romania. Following an opening section that describes the seminar's format and aims, a second section reviews the discussions of the definition of civics education. The third and fourth sections report discussions of the epistemological and pedagogical status of civics education and its aims. The fifth section discusses the content of civics education in terms of basic knowledge, skills, and values. Section 6 looks at means and methods. cation in terms of basic knowledge, skills, and values. Section 6 looks at means and methods,
especially media education. Section 7 explores
methods of evaluation and testing and the points of
discussion and disagreement that surrounded this
issue. Section 8 discusses the teacher's role, and
Section 9 describes the sometimes heated debates
on intercultural and European dimensions of civics
education. The final section covers some problems
for civics education in Central and Eastern Europe
in the aftermath of totalitarian governments and the
establishment of democracies. Four appendizes
contain the workshop's introductory speech by
Bmil Paun, Ministry of Education; workshop reports; the seminar program; and a list of participants. (JB)

Identifiers—"Goals 2000, "National Education Goals 1990, Reform Efforts
The National Education Goals were adopted by the nation's governors in 1990. The March 1994 enactment of the "Goals 2000: Educate America Act" made the National Education Goals federal policy and the guiding principles for a fundamental restructuring of the public education system. These goals have created a climate of education reform that demands improved professional development for educators in elementary and secondary education. Ongoing professional development aligned with changes in curriculum, instruction, and assessment is emerging as an important component of national reform efforts. However, professional de-

velopment has been given relatively short shrift by state and local education reformers. Teachers must have time, encouragement, and opportunity to rethink teaching strategies, to learn new subject matter, and to stay current on the latest research in their field. New approaches should link professional development programs to state reforms, fulfill teachers' need and desire to grow professionally, be an ongoing and integral part of school operations, help educators overcome isolation, and be designed at the achool building or district level. States that want to assess current policies and programs should examine legal and professional definitions of professional development, funding, links with visions for systemic reform, incentives, sponsorship and service providers, research on effects, planning and coordination, and professional development "good practice." Persistent questions and issues include finding time and funding, building public support, the role of state education agencies and other organizations, the role of higher education, addressing the needs of children, and the role of technology. Identifiers—Multicultural Materials
This book is a guide to infusing multicultural education into the classroom at the elementary and secondary levels. It includes curriculum strategies and extensive resources for immediate application. Section I presents activities to introduce teachers, students, and parents to the concepts of multicultural education. This section includes a discussion of definitions of multicultural education and strategies for engaging students in the multicultural idea. Section 2, on curriculum, language arts, social studies, and the arts. This section describes how many teaching strategies and student projects evolved from an original activity, through student interest and exploration of topics and themes in newspapers, works of literature, current events, community resources, and students' backgrounds. Section 3 provides resources, including detailed outlines of activities and strategies, that encourage teachers to put together their own programs and solicit parent input. In particular, this section includes worksheets, teaching modules, parent participation forms, and an extensive resource list of multicultural literature anthologies, multicultural bibliographies, professional books and articles, and other resources (periodicals, videos, and centers). Identifiers—"New York (Albany)
This publication reports on a seminar held over five days which brought together teachers and administrators from the Albany (New York) area schools and colleges and universities to discuss teacher preparation and professional development. Opening sections introduce the seminar, list participants, and detail the six procedural steps that the seminar followed. An introductory essay describes some initial conversations and ideas as the event began, and an important emerging vision of teacher education as a systematic program of life-long professional development in the teaching profession with initial emphasis on practices, skills, and theory and progressively broader and deeper experiences appropriate to teachers' evolving assignments. The next section makes recommendations to improve and enrich the initial training devoted to the preparation of teachers. The recommendations include recognition of a common core of professional knowledge, expansion beyond the traditional 4-year program, linking foundations to practice, and promotion of communication and cooperation among preparing institutions. A section on ideas for the internship phase of training included a series of coordinated steps for colleges and universities responsible for placement and supervision. A section on professional practice covers teacher development as an ongoing process. Final sections include a brief Afterword and an easay by Nelson Armlin "Reflections on the Profession of Teaching." (JB)

This report presents the results of a study of the effects of Washington State's Professional Growth Option (PGO), a state regulation that requires schools districts to plan and implement programs for teacher professional development. Section 1 describes the study which was conducted by teachers who interviewed 23 teachers representing different school systems. Each was interviewed three times over the course of the 1992-93 school year. Four of the districts represented had participated in state-funded pilot projects and had experimented with PGO's for 6 years. The other districts were in their first, second, or third year of the new system. The study also included interviews with the teacher's supervising principals. Section 2 profiles the 23 teachers, their attributes, their school districts, new teacher evaluation policies adopted by their districts, their professional growth goals under the new PGO, the resources available to them, challenges encountered while working on their goals, and their perceptions of the impact of the new system on students and themselves. Section 3 offers case studies of five educators which convey the richness of the professional growth experience. Section 4 presents data on how the principals perceive the PGO. Section 5 offers recommendations for growth. (JB)

This study sought to identify a set of factors that teacher candidates perceived to have influenced their decisions to become teachers and then to determine the family and personal characteristics of the candidates that might be associated with these perceived influences. The subjects were 377 teacher candidates commencing the teacher preparation program of a large midwestern university in the spring term of 1991. As part of orientation to the required entry course, candidates chose from among 16 influences or reasons which they felt may have led to their decision to become teachers. Candidates also provided personal and family characteristics information on various instruments. Results found that six of the eight reasons most frequently cited for becoming teachers were associated with the influences of other people or experiences with people: liking children, former teachers, prior experience with children, parents, havorable work achedule, and love of a subject field. The results also indicated that presence of teachers in the family, birth order in the family, education and income of parents, candidate gender, interactions with youth, enjoyment of learning, and former teachers were all among the factors influencing the decision to teach. Includes a discussion of implications for recruitment. (Contains 31 references.) (JB)

Identifiers—Dewey (John), Pavlov (Ivan Petrovich)
This paper, in exploring the context for liberal education and the ideas of John Dewey, illustrates the difference between training and inquiry and offers ideas about how the two depend on each other in practice. The paper describes proficiency as a direct result of quality training, which establishes routinized habits. This discussion also explores the limits of such habits when habits from training become unequal to the demands of a particular situation. Here, the paper argues, an education in inquiry allows for departure from training to respond to new circumstances. Further, the paper agues, the strategies of both training and inquiry are necessary to the kind of understanding of education that Dewey tried to illustrate in his works. The paper goes on to illustrate how debates on the correct way to combine these two approaches to pedagogy have, in the past, and in recent times, been framed. In concluding, the paper advocates not a dominance of one approach over the other nor a synthesis of the two but a continual, progressive, dynamic cycling between the two pedagogies. The difficulty of working with and understanding both approaches lies in opening oneself to the paradox inherent in the attempt to understand. Contains 19 references. (JB)

The teachers' school was an "International School" serving children of the wealthy and the educated who lived nearby. The course was designed so that the form and content of the course were congruent and the students could experience democratically organized debate and evaluation. The course goal was to read two recent texts on democratic education and to examine participants' beliefs and practices to see whether they assisted or impeded the formation of persons able to participants to the entire course led to three conclusions: (1) teachers are not comfortable evaluating their peers, even when anonymity was assured; (2) teachers face a profound struggle in democratizing their workplace as expressed in final essays where participants reported that the course had made them more sware of their limited autonomy some of which they conceded was self-imposed; and (3) that the crafting of a philosophy of education can be justified on different grounds: vocational, professional, and collegial. Change Identifiers—Hate, Political Correctness, Politically Correct Communication, "Tolerance This essay argues that some proponents of multicultural education (ME) appear to teach intolerance of certain kinds of speech. The essay argues, in support, the down-playing of tolerance in ME as cultural respect, accommodation, and harmony are stronger candidates as virtues. The essay goes on to point out that ME does not teach cultural neutrality. In fact, ME must teach students to be intolerant of any cultural group that actively seeks to dominate all of society. These presumed limits on tolerance have led advocates to prevent and interfere with hate speech and other forms of cultural disrespect. Three difficulties with this approach, the essay asserts, are that: (1) it is difficult to discern the intentions of a speaker which is very important in the judgment of offensive speech; (2) despite the innocent intention of a speaker, listeners might be offended and enhanced sensitivity to cultural disrespect might antagonize a situation that is already agistated; (3) some cultural groups may have some language of cultural disrespect as one of its features and thus teaching ME may involve teaching disrespect of some cultural groups in society. The essay concludes by stating that tolerance may be sscribed only to moral beings, that is, voluntary agents engaged in interpersonal action. It then recommends that if the proponents of ME reflected on the conceptual connection between tolerance and moral agency, they ultimately would see that students must learn to tolerate all cultural features compatible with moral agency and learn not to tolerate any that are incompatible with moral agency (Contains 11 references.) Higher Education, 'Human Services, Individual

Power, Institutional Administration, "Organizational Change, Power Structure

Identifiers—Foucault (Michel), "Identity (Psychological), Identity Formation, Immunology, "Reform Efforts, West Virginia

This paper examines and analyzes a Human Services reform initiative in West Virginia and shows how various components responded to the reform particularly in identity construction. The analysis used an immunological metaphor within a Foucauldian understanding of power and knowledge. The study gathered data through participant and observer interaction with the ongoing reform effort including interviews, document analysis, attendance at meetings, and work compiling an assessment of the local region. The study analysis looked at the strategies by which the reform was working to be accepted as "Self" by the system and then how the acceptance of the reform acted to identify and give identity to the clients as both "Self" and "Other." Among the conclusions were: (1) due to emphases on collaboration and local decision making the reform initiative was in the process of being incorporated into the existing system; and (2) the client seame a semi-component of the system under which he both conditioned and was conditioned by it. From the Foucauldian and immunological perspective the incursion of power on the construction of the client's self seemed almost overwhelming. Some changes were advocated including making the power relations between the client and other components more equivalent and recognizing the many ways in which the client's identity is fostered by the system. Identifiers—Columbus Public Schools OH

The Instructional Assistant Program, funded by the Ohio Disadvantaged Pupil Program Fund, provides educational support for underachieving pupils by training instructional assistants to provide direct instructional service to selected pupils in the classroom setting. Emphasis was placed on activities which would increase oral and written language and reading skills needed to be successful in school. Teachers involved with the program are assigned an assistant for one-half day and provide direct supervision for the assistant. The assistants attend inservice training sessions and are provided with supplementary materials and instructional activities. Pupil census information indicated that the program served 2,266 kindergartners during the 1992-93 school year for an average of 2.7 hours of instruction per week. The average number of pupils served per teacher was 18.8, and the average number of days pupils were served was 80.4 days. Program objectives, which concerned student awareness of early concepts about print, teachers' perception that the instructional assistants' services improved pupils' reading and language arts, and meaningful training sessions for instructional assistants, were met. Appendices include: early development checklist scoring sheet; classroom teacher survey; general inservice evaluation form; instructional assistants, were met. Appendices include: early development checklist scoring sheet; classroom teacher survey; general inservice evaluation form; instructional assistants was seasoned as a calendar worksheet for computing days of pupil service. Relationship, "Program Implementation, Qualitative Research, "Secondary School Teachers, Teamwork Identifiers—"Community Identity, Ohio (South) This study looked at the experience of four high school teachers as they worked to develop a collegial community by implementing the "Connections" program. The teachers were on the faculty at Cedar City High School in southern Ohio where their subjects were, respectively, English, Social Studies, and Physical Science; one teacher was in special education. Connections was a three-period block encompassing the subject areas of English, World History, and Physical Science. The four teachers' goal was also to develop a community identity through the program. Data collection followed a qualitative case study design which included observations, interviews, and document analysis. The study used the story form to follow the year's implementation and the teachers' common participation in that story as a foundation for their identity. The progress of the year saw the gradual development of a separation with one member of the team. The study concludes that by the end of the year each teacher's commitment to Connections was defined in terms of his or her belief in a core Connections value: ensuring student success. It appeared that both shared interests and democratic processes of deliberation and critique were necessary to sustain the communities required for change. (Contains 22 references.) (JB)

ality Factor Questionnaire, University of Akron OH In a study of the personalities of preservice teachers, Cattell's 16 Personality Factor (PF) Questionnaire was administered to 2,225 applicants to the College of Education of the University of Akron (Ohio). Data were analyzed by gender and by year of application (Year 1, 2, or 3). Results indicated that at the primary factor level, personality factors were found to be stable across time and gender. Results of discriminant analysis revealed statistically significant differences in the primary factor profiles between males and females, but further analysis determined that the differences were not practically significant. Data were analyzed for specific personality traits, such as anxiety, independence, extraversion, superego strength, imaginativeness, and uncontrolled imaginativeness and found to be very similar across time and gender. These results support the use of a single factor structure for both genders. The paper concludes that men and women applying to the teacher education program share similar personality structures, and the personalities of cohorts of preservice teachers appear to be stable from year to year. This volume collects 100 short essays written from 1937 to the present on the study of education and the training of teachers. The essays appear in the order in which they were originally written because they deal with issues and events that occurred at the time they were written. They embrace a range of themes including the art of teaching, the human sciences, multiculturalism, egalitarianism, postmodernism, and particularly the study of education itself. Throughout, the aim is to recall the university to its true mission: to seek knowledge and pass it on, to teach as well as to research, each process stimulating the other. A balanced, discipline-based undergraduate education is advocated as opposed to a mix of electives common on many campuses. Throughout, there is a focus on the large problems facing education and a critique is offered of achools of education which are held responsible for many of those problems. In particular, it is charged that schools of education which are held responsible for many of those problems. In particular, it is charged that schools of education which are held responsible for many of those problems. elementary and secondary public schools develop their physical education curricula and programs and formulate realistic goals. The document represents a change from past approaches and one early section details some examples of how this guide is different from previous guides. Among these differences are a change from a curriculum driven by team sports and participation in large game play to a broad integrated curriculum that focuses on individual cognitive, psychomotor, and affective development. The guide includes pages on: definitions, overall goals for physical education, curricular frameworks, curricular alignment, an exit performance standards matrix, and mission and vision statements. The guidelines and framework are presented in three sections. The first is for kindergarten through 4th grade, the second for 5th through 8th grade, and the third for 9th through 12th grade. Each section includes grade benchmarks for the last grade in that section. For 12th grade there are exit performance standards. A final section lists 10 brief position statements. (JB)

This document is the sixth annual, legislatively mandated report on the human nutrition research and education activities of the United States Department of Agriculture for fiscal year 1992 in which directions and highlights are emphasized. The report contains six sections. Section 1 is an introduction. Section 2 covers human nutrition research activities. This section notes new research findings during 1992. Overall human nutrition research and education activities continued to be linked with the nutritive value of foods, human nutritional needs, the kinds and amounts of foods that Americans consume relative to their needs, and the strategies for improving diets and the food supply. Section 3 describes nutrition education and information programs which include the Cooperative Extension Service and the Food and Nutrition Service, a federal funding source for nutrition education that serves a variety of programs. Section 4 contains information on funding levels for 1986-93. The total amount of financial support from the Department increased from \$60.7 million in 1986 to \$76.1 million in 1992, an increase of 25 percent. Section 5 describes not for mutritional status. Identifiers—"Africa, Africa (South), Africa (West), United States
This paper argues that traditional African dance can develop fitness and health particularly for those interested in both health and African culture. A discussion of fitness concludes that this quality enables the body to perform physical activities with greater efficiency and that all the qualities commonly found in notions of fitness are found in tradi-

tional African dance. A description of African traditional dance characterizes it as dance passed down over generations particularly in West and South Africa. It often mimics daily life, animals, or natural phenomena, or it has tribal or rimulatitic aspects. A discussion of African dance and fitness argues that this form improves emotional well-being by relieving stress, improves social skills by providing a chance to interact with people, offers intellectual stimulation by providing new movement information to be analyzed, and promotes spirituality by providing a relationship with nature and the environment through movement. A conclusion states that those who participate in traditional African dance classes and activities find them interesting and satisfying. These qualities make it an effective way to achieve aerobic fitness thereby improving health and quality of life. (JB)

Identifiers—"Scotland (Glasgow)
Two programs on drug, sloohol, and sex education in two Glasgow (Scotland) high schools were evaluated to assess their effectiveness. One was a drugs and alcohol education program at City High School and the other a sexual health program at Cydeside High School. Both schools drew from a local population that included a significant number of poorer, less educated families. The drug and alcohol program included two formats, a standard 10-week course delivered by a Personal and Science Development teacher and an alternative program designed to help young people make informed decisions about any potential use of drugs. The evaluation compared participants' views on the two different courses. The sexual health program had particular focus on pregnancies among local young women whr were thought to be leaving school and the alternative drug program very relevant; those in the sexual health program felt the course had provided information on research methodology, program content, and research team members. A study of the general working conditions, financial status, performance opportunities, funding, and work practices of choreographers in New York City, Chicago (Illinois), San Francisco (California), and Washington, D.C. was conducted in order to develop benchmark statistics. These statistics focus on the national choreographer population and document the difficulties under which these artists work. Completed mail questionnaires from more than 500 choreographers and telephone interviews with over 200 more provided the primary data. Study findings revealed a disparity between choreographers' high educational attainments and their low income levels. The survey also found that choreographers' income was 34 percent below the median for women professionals in 1989 (about 73 percent of respondents were women). Average income from choreography for men was twice that for women: the gender differential was 48 percent. Other findings included the following: (1) 81 percent turned to choreography from carreers as dancers; (2) 55 percent described their work as experimental/modern; (3) about 1,800 works had been composed by 479 respondents identified 4 major problems: documentation of work, finding dancers, management, and personal and career advancement issues. Appendixes contain information on participants and authors and a copy of the survey. (18)

Identifiers—"Virginia (Blacksburg)

The Blacksburg (Virginia) municipal government's worksite exercise program, developed in response to rising health insurance premiums, was evaluated to determine its effect on health care costs and employee absenteeism. Thirty-two employees who participated in the program for 4.5 years were compared to 32 nonparticipating employees. The program design offered a management contribution toward a monthly fee to a local fitness club or payment of an annual \$5 fee and the promise by employees to exercise on their own. Participants could engage in any exercise that would allow them to reach a target heart rate zone. The program also included annual fitness and health acreening and free health education classes. Data analysis revealed: (1) there were no significant differences between participant and nonparticipant characteristics; (2) participants did not use significantly fewer sick hours or health care dollars than did nonparticipants; (3) after an initial increase in both variables the year after the program began, reductions were seen for participants in the following years; and (4) focus groups conducted with non-participants disclosed that most employees know exercise is beneficial but nonparticipation was due to lack of time to exercise. Findings of this research suggest that health care costs and absenteeism can be reduced over time by implementing worksite exercise programs. Worksite exercise programs might need to be marketed to older, male, lower paid workers in lower job classifications since these groups tend not to join as readily as workers who are younger, female, and higher paid. Identifiers—Kent State University OH
Although student populations of public schools are becoming increasingly diverse, the teacher population has remained relatively homogeneous, and
many teachers do not have sufficient knowledge of
or experience with other cultural groups to deal with
differences in the classroom. Gay men and lesbians
comprise one such cultural group. A survey of 42
prospective teachers enrolled in the Human Diversity in Education course at Kent (Ohio) State University measured general stitudes toward
homosexuality, knowledge, educator-specific attitudes, and anticipated educator behavior. The prospecific teachers identified themselves as being
"predominantly heterosexual." Results indicated
that the group held slightly homophobic general attitudes and educator-specific attitudes. The group also exhibited a general lack of knowledge about
homosexuality. The high percentages of incorrect
responses on items alluding to stereotypes regarding
gay men and lesbians suggest that misinformation is
prevalent. The group also exhibited unwillingness to
address gay and lesbian issues adequately in the
context of school or to behave in ways that are
supportive to gays and lesbians care adequately in the
context of school or to behave in ways that are
supportive to gays and lesbians. Carefully planned
and implemented formal instruction may be helpful
in changing negative attitudes toward diversity in
sexual orientation. Succ

cation, Measurement Techniques, National Curriculum, *Policy Formation, *Student Evaluation
Identifiers—*Goals 2000, *National Education Standards Improvement Council
The National Education Standards and Improvement Council (NESIC) was established in the Goals 2000: Educate America Act. One of NESIC's duties is to identify areas in which specific educational standards ought to be developed. Several complex issues arise in carrying out this duty, such as: the need for standards in such non-content areas as student performance, definition and measurement of standards, accommodation of variability and individualization, one or multiple performance standards, the voluntary nature of the standards, and standards as a de facto national curriculum. Another basic duty of NESIC is to certify voluntary national content standards and voluntary student performance standards. A number of questions arise here as well, such as what subjects should be included, the place of education of feelings and emotions, development of attitudes as tolerance or taking risks, inclusion of family life and health education, and the role of community service. In the area of opportunity-to-learn standards, there are uncertainties regarding what is "fair." what is "restricting" to State and local control of curriculum, and what will protect teachers' professional autonomy. Also needed is a clear articulation by NESIC of how assessment and content are to be aligned, along with strong measures to maintain that alignment. (Contains 11 endnotes.) (JDD)

This case study examines a 2-year faculty-centered professional development program for high school teachers. The program, which used a Fonfire approach (Wigginton, 1986) and was based on Deweysn principles (Dewey, 1983), involved having the teachers initiate, pursue, and share self-selected, independent group learning projects. Inservice ses-

sions were facilitated by two professors from an affiliated university, with the goals of building a sense
of community among faculty and engaging teachers
as learners in a cooperative learning experience built
upon democratic principles. Study groups were
formed. Groups gathered materials, read, discussed,
consulted leaders in the field, and visited other
schools and then reported their findings to other
faculty. Interviews with 13 teachers and 3 administrators and analysis of inservice evaluation data revealed that: most faculty had positive feelings about
the inservice programs, collegiality and professional
respect had increased, and new information was being applied in the classroom. Most teachers enjoyed
becoming learners again and felt their projects
would bring about positive change. The inservice
program supported John Dewey's theories that the
primary factor contributing to growth is the quality
of the experience for its own sake and for further
growth and future experience, and that interaction
and continuity must occur. (JDD)

Teachers, Surveys, "Teacher Attitudes, "Team Teaching Identifiers—"Carolina PALS, North Carolina Carolina PALS (Programmed Alternative Learning for Students) is a program designed to meet the educational, social, and emotional needs of students with mild disabilities in grades 3-10, by having one special education teacher and one regular teacher share teaching in the regular classroom. In 1992-93, the program operated in 50 schools, reaching 856 special education students and 4,502 regular education students. A survey of 179 teachers concerning the effectiveness of the PALS program examined student outcomes, implementation, team teaching, and program administration. Teachers felt that the PALS program had positive effects on student outcomes, both academically and socially. Teachers who volunteered to participate in PALS had more positive feelings toward it than teachers who were assigned to participate. Most teachers were also positive about the team teaching model. Special education teachers were generally more positive about program administration than regular teachers. One third of respondents believed that the number of students in the PALS class was increased because there were two teachers. Most teachers were agained about having sufficient planning time for PALS. Appendixes provide a copy of the survey form and survey data.

This paper offers a commentary, by a representative of the Association of Independent Liberal Arts Colleges for Teacher Education, on the Holmes Group publication (1995) titled "Tomorrow's Schools of Education, "The Holmes Group is applauded for producing a much-needed, candid as-

seasment of schools of education. The issue of marginal institutional practices can no longer be sweptunder the carpet, as schools of education use consistent, traditional, status quo, "tired" practices and offer preservice training that is irrelevant to the nature and demands of teaching. The hope of renewing schools comes from use of critical social analytic methods that will lead to the moral sensibility to move forward. Schools of education need to instill in future teachers a critical voice working for school renewal. A systematic dialogue leading to coherence of purpose and direction is needed. Adherence to National Council for the Accreditation of Teacher Education standards and Interstate New Teacher Assessment and Support Consortium principles would be a positive step. The reward systems in both research and teaching institutions need to be changed to encourage collaboration between college faculty and practitioners in professional development schools. Alliances with external groups, such as the National Education Association, should be broadened. (Contains 23 references.) (JDD)

A survey of 121 principals and other administrators gathered data concerning their opinion of Year 1 and 2 teachers who had graduated from the Primary Programme of the Christchurch College of Education in New Zealand in 1991 and 1992. The survey addressed planning skills; management skills; relationship skills; resources and curriculum skills, and personal qualities. Data revealed a high level of satisfaction in the performance of the beginning teachers. Particularly high degrees of satisfaction were reported in the areas of planning, management, relationships, evaluation, and personal qualities. Areas of concern included resources and curriculum skills. The types of positions held by the Year 1 and 2 teachers included permanent, re-

liever, long-term reliever, government-subsidized, and part-time. The figures show an alarming drop over 2 years in the number of graduates who began their teaching career in a permanent position.

Title VII, "New York City Board of Education
Project Unity was a project funded by the Elementary and Secondary Education Act Title VII in its third and final year of operation in 1993-94. The project provided instruction to teachers of students with limited English proficiency in both special and general education classes in New York City public schools. Teachers participated in an initial 2-hour plenary session followed by a seminar series. The initial seminar focused on the selection and development of a collaborative model for each school and a presentation that linked language and culture.
Other seminars were devoted to such topics as a school-based model for different levels of language proficiency, serving bilingual students through mainstreaming, curriculum and instructional adaptations, individualizing instruction, multicultural awareness, and interrelationships between general and special education teachers. Subsequent to each seminar, the teachers shared information about their community, school, and students and created an action plan for their individual school. Project staff made field visits to teachers to discuss problems, plans, and progress. This evaluation report describes the project and indicates that the project form servers of meetings, copies of survey forms, and an outline for a professional development collaborative model. (JDD)

Teacher roles in contemporary American and hould be more closely.

Ocorg), Schlesermacher (Friedrich), Von Humboldt (Wilhelm)
Teacher roles in contemporary American achools
should be more closely aligned to hermeneutics as
the study of meaning (interpretation/understanding). A marriage between Platonic notions of interpretation and the quest for meaning with the
interpretive theories of Friedrich Schleiermacher,
Wilhelm von Humboldt, Wilhelm Dilthey, and
Hans-Georg Gadamer is suggested. Schleiermacher
argues that understanding cannot focus primarily on
parts (words) without considering the effect the
parts may have on the whole (ideas). In addition,
von Humboldt contended that meaning is coproduced by the speaker and listener and is woven with
cultural threads. He also believed that historians
must unite separate historical components into a
unified aggregate. For Dilthey, the task of hermeneutics, and interpreters, is to unite the past with the
present through reconstruction. Gadamer explored
REE RIN 1995

the notion of how language forms the boundaries of understanding and interpretation. Teachers can apply hermeneutics in the classroom by changing their role from depositors of information to intellectual interpreters of information. Rather than being supplied with texts and goals and being required to apply "correct interpretations" of them, teachers would involve students in the construction of meaning around ideas which generate from within their experiences. The history of Western social thought may be examined by focusing on the linkage between dominant legitimating ideologies and various institutional structures of the social formation. As society moves in the direction of postindustrialism, the development of a constructivist, rather than deconstructive, form of postmodernism is needed. Postmodernists should attempt to striculate a vision of possibility which connects past, present, and future, mediated by recognition of changing political-economic conditions, so that adoption of strategies of cognitive flexibility, situational snalysis, multiple role identification, and ongoing adaptability are represented as civic virtues and the tools for economic success. Postmodernism is grounded in the identification of differences and critical examination of the basis upon which difference is determined. Teachers can create classroom conditions under which issues of cultural difference are analyzed. School leaders need to become educated in the process and practices of cultural politics, in order to insulate teachers need to become educated in the process and practices of cultural politics, in order to insulate teachers and students from political discord that may interfere with core instructional functions. Educators are urged to use postmodernist tools of discourse and critical analysis, continue the search for alterative communities and connectedness, and participate in the ongoing political struggle to fashion social meanings under which all might prosper. This study examined the impact of "moonlighting" on student teaching and the student teachers, final evaluations. A survey of 250 student teachers at a large midwestern university found that 49 percent received supplementary income while they were student teaching. Elementary education and special education student teachers worked an average of 15 hours a week, while secondary education student teachers averaged 20 hours a week. The major reason for "moonlighting" was economic necessity. Twenty-eight percent of the student teachers carned less than \$100 per month, with approximately 20 percent of respondents in each of the following categories: \$100 to \$199, \$200 to \$299, and \$300 to \$499 monthly. Eighty-six percent of respondents reported that "moonlighting" did not affect their student teaching, Forty percent done the student teaching as B. Sixy-four percent of respondents reported that "moonlighting" did not affect their student teaching, Forty percent thought that student teaching caused extra stress and anxiety. Results are compared with findings of a 1992 study by R. Alley and M. Ballenger. Recommendations for further research are offered. (JDD)

Descriptors—*Classroom Techniques, *Cooperative Learning. Education, Higher Education, Enstructional Effectiveness, *Tescher Role, Teaching Methods

This book provides specific strategies for the classroom teacher beginning to use cooperative learning or improving the use of cooperative learning. It explains conceptually what cooperative learning is and what makes it work. Cooperative learning is presented as a technique that helps raise the achievement of all students; helps build positive relationahips among students; and gives students experiences necessary for healthy social, psychological, and cognitive development. Cooperative learning replaces the mass-production, competitive organizational structure of most classrooms and schools with a team-based, high-performance organizational structure. In most classrooms, it is recommended that cooperative learning be used 60 to 80 percent of the time. The teacher's role in implementing cooperative learning includes: (1) pre-instructional decisions (selecting instructional materials and objectives, assigning students to groups, arranging the classroom, and assigning roles); (2) taskwork and teamwork (explaining the academic task, structuring positive interdependence, and specifying desired behaviors); (3) executing the cooperative lesson, which includes monitoring students' behavior and providing closure; and (4) post-lesson activities (evaluating the quality and quantity of learning, and analyzing group effectiveness). Identifiers—Research About Teacher Education Froject
The Research About Teacher Education (RATE) project is an ongoing data collection effort to establish a reliable database about institutions of higher education where teachers are prepared, and about the faculty, students, and programs at these institutions. This RATE study is based on a survey of 91 heads of schools, colleges, and departments of education (SCDEs) and 388 teacher education faculty, and on institutional data concerning 91 schools of education. The study investigated changes in the responsibilities of teacher education methods faculty over time, relationships with P-12 schools, relationship of preservice programs to school reform, education heads' perceptions of SCDE contributions to reform in P-12 schools, progress in teacher education reform, and institutional arrangements to enable collaboration. The study found that about 80 percent of faculty and 80 percent of deans were enable collaboration. The study found that about 80 percent of faculty and 80 percent of deans were involved in P-12 schools on a regular basis. Most of that time was spent on traditional functions such as supervising student teachers and providing achool-based professional development. There appeared to be considerable initiative taken in SCDEs to pursue these relationships. The majority of faculty and deans reported an increased willingness to engage in cooperative ventures with schools over the past 5 years. The lack of resources to support initiatives in P-12 schools was acknowledged. Most relationships with P-12 schools tended to be negotiated on an individual faculty basis. Appendices list participating institutions and members of the RATE Research Team. (JDD)

This collection of papers describes efforts of the
Westchester Teacher Education Group (WTEG) to
incorporate multicultural concepts into teacher
preparation courses. Part I gives an overview of the
WTEG and the activities of its task force on diversity and the family, in three papers: "The Westchester Teacher Education Group: History and
Purpose" (Shirley L. Mow); "Supporting and Coordinating Partnerships for Change" (Barbars C.
Frecouf); and "Infusing a Multicultural Perspective
into Selected Preservice Courses: A Conceptual
Framework" (Ana Maria Villegas and Beatriz Chu
Clewell). Part II presents revised preservice teacher
education syllabit that reflect ways in which multicultural diversity can be integrated into foundations
courses, methods courses, and specialized courses.
The papers in Part II include: "Models of Personal
and Social Growth" (Neil Garofano); "Languaga
and Literacy" (Mary Hebron); "Global Perspectives: Teaching Diverse Students" (Rita Silverman
and Mary M. Williams); "Educational Psychology"
(Steve Steffens); "Curriculum Development in Elementary School Subject Areas: Reading" (Joan M.
Black); "Developmental Reading: Methods and
Materials" (Sylvis Black); "Learning and Teaching
in Primary and Elementary Grades: Social Studies"
(Terry Ciochelli); "Reading Methods" (Ruben Hernandez); "Methods and Materials of the Social
Studies Curriculum" (Mary Hughes); "Learning
Programs for Young Children & Practicum" (Virginis A. Salamone); "Social Welfare as a Social Institution" (Marguerite M. Coke); "Social Science
Research" (Nilda E. Hernandez); and "The Impact
of Prejudice on Minority Groups in America" (Sheldon Marcus). Appendices provide a list of task force
participants' names and addresses, a display of the
project structure, and a list of 79 seminar readings/information packets. (Most papers contain references.) (JDD)

tion Curriculum Identifiers—Carnegie Council on Adolescent Development, *Illinois According to the Carnegie Council on Adolescent Development, young adolescents are felt to be far more at risk for self-destructive behaviors than ever before, and middle grades schools are failing to meet students' needs. As part of a plan for restructuring middle grades education, Illinois has created a middle school endorsement added to elementary or secondary teacher certification and has created a model for integrating health, education, one of the university courses designed to meet requirements model for integrating health, education, and social services into middle level education. One of the university courses designed to meet requirements for the middle school endorsement involves inservice and preservice teachers in learning about basic issues in eight developmentally appropriate areas and embedding those issues within each subject of the regular curriculum. The eight areas include self-esteem, peer relationships, gangs and violence, loss (including death and dying), nutrition, sexual activity, alcohol/drugs/tobacco, and communicable diseases. For each topic, a representative from a community or social service agency presents critical information, and teams of class members devise interdisciplinary units. Appendices to this paper list groups involved in the restructuring process, health data about students in grades 5 through 8, and a table of contents from a guide to the middle school endorsement course described. Contains five references. (JDD)

This report presents federally mandated evalua-

This report presents federally mandated evalua-tions and needs assessments conducted by the Texas Nutrition Education and Training (NET) program during Federal Fiscal Year 1994. General program performance of NET reflected an increase in the number of children in Texas and expansion in NET program activities. Needs assessment data col-

lected from 443 public schools and 41 private schools indicated that nutrition knowledge was, in general, below 70 percent acceptable levels for all populations, and food choices and nutrition practices needed improvement. NETs outreach to food service managers and administrators, teachers, and day care providers is achieved through: workshops developed by NET and delivered by contract trainers; circulation of a NET library collection; development and distribution of instructional and promotional materials on nutrition and food service management; presentations, exhibits, and publications on nutrition education, food service management, and program evaluation; and coordination with related publicly supported programs within Texas. Activities in each of these areas are reported, along with recommendations. An appendix contains evaluation instruments used in NET program outreach. (JDD) reach. (JDD)

"Heart Disorders, Nutrition, Obesity, Physical Health Identifiers—"Cholesterol
This fact sheet on blood cholesterol examines the connection between cholesterol and heart disease, lists risk factors for heart disease that can and cannot be controlled, points out who can benefit from lowering blood cholesterol, distinguishes between blood and dietary cholesterol, describes low density lipoprotein and high density lipoprotein types of cholesterol, reviews factors that affect blood cholesterol, and urges adults to have their blood cholesterol, and urges adults to have their blood cholesterol checked. Guidelines are presented for heart-healthy living, such as choosing foods low in total fat and saturated fat, choosing foods high in starch and fiber, maintaining a healthy weight, and being more physically active. Buying tips and preparation tips are offered for various types of food. Other guidelines discuss using food labels, eating out the heart healthy way, making physical activity part of one's routine, and losing weight sensibly. A question and answer section offers guidance on such concerns as cholesterol levels in children, triglycerides, and impact of blood cholesterol on longevity. Three tables list: (1) saturated fat, total fat, tohlesterol, calories, and sodium for some basic foods; (2) food label claims; and (3) recommended amounts of saturated and total fat based on calorie consumption. This report reviews the role of school-based health centers (SBHCs) in expanding children's access to health care, and examines financial and other obstacles SBHCs must overcome. The report is based on a literature review; interviews with officials; and case studies conducted at eight SBHCs in California, New Mexico, and New York. The study

found that state, local, and private funds supply most of the financing for centers; several federal programs (primarily Medicaid and the Maternal and Child Health Block Grant program) supplement these funds. SBHCs were found to offer children easier access to needed health services by bringing providers to the children, furnishing free or low-cost services, and supplying the atmosphere of trust and confidentiality adolescents need. SBHCs do not, however, provide all health services required by students and cannot reach adolescents who have dropped out of school. Major concerns for SBHCs include a lack of stable financing, recruitment and retention of appropriately trained nurse practitioners and physician assistants, controversy over providing reproductive health services, and difficulty in obtaining guidance on establishing SBHCs or solving problems at existing centers. Research measuring the impact of SBHCs on health and education outcomes is sparse. An appendix contains descripoutcomes is sparse. An appendix cont tions of the SBHCs studied. (JDD)

Linguistics, "Modernism, Semantics, "Teaching Models Identifiers—"Conversation, "Postmodernism This conference presentation is offered as a prolegomenon, or introduction, to a paper and research project. The issues of whether prolegomenon, or introduction, to a paper and research project. The issues of whether prolegomens are modernist explanatory devices and whether postmodern teaching," initiated through the metaphor of conversations. The idea of conversations epitomizes postmodernity, as they are based in language; relational to persons, locations, and times; interpretive; and open-ended. Groups of persons engaged in conversations about teaching and teaching reform are recorded as they talk about their work. What teaching looks like depends on the conception of teaching from which any teacher begins. Themes and concepts from these recordings frame the analysis (modernism) and disrupt it, pushing and interrupting boundaries (postmodernism). Various analyses of teaching have explored structural, linguistic or semantic, epistemological, and ethical dimensions. These modernist analyses utilize attention to language and to particular forms of logical inquiry to explain the meaning of teaching. Three other concepts characterizing modernist analysis include lucidity, progress, and emancipation. Postmodern teaching is characterized by the contingencies of situation, position, and relation; dissonance; fallibility; trony; and humility. (Contains 25 references.) (JDD)

ties, Physical Activity Level, Physical Health Identifiers—Cholesterol
This booklet offers advice for adults who want to lower their blood cholesterol level. The first section, "What You Need To Know about High Blood Cholesterol," discusses blood cholesterol and why it matters, what cholesterol numbers mean, and what affects blood cholesterol levels. Section 2, "What You Need To Do To Lower Blood Cholesterol," presents guidelines on choosing foods low in saturated fat, total fat, and cholesterol; choosing foods

high in starch and fiber; being more physically active; and losing weight. Two heart-healthy dieta containing varying amounts of saturated fat and cholesterol are provided. The third section, "How To Change Your Bating Habits and Be More Physically Active," tells how to buy and prepare foods, how to eat healthily when in restaurants or at social events, how to fit physical activity into daily routines, and what to look for in choosing a weight loss program. Tables list the saturated fat, cholesterol, total fat, calories from fat, total calories and sodium content in foods, show serving sizes for meat and cheese, give information on different types of physical activity and food label claims. University
The College of Education and Human Services at
Western Illinois University has established a model
to prepare teachers with technical expertise and
new methodologies for using educational resources,
in order to enable students to use audio, video, computer, telecommunications, distance learning, and
interactive multimedia technologies as essential
tools for teaching and learning. The project, made
possible by a \$500,000 grant from Ameritech Corporation, has involved: (1) development of a Professional Development School relationship with a
Springfield (Illinois) public school district linked by
distance learning technologies; (2) design of a
teacher education curriculum focusing on instructional design, interactive multimedia, distance
learning, instructional video, telecommunications,
and computer applications; (3) linking these advanced technologies to teaching strategies through
cooperative learning, electronic field trips, and
other techniques; (4) integration of technology into
the teacher education curriculum; (5) training
teacher education faculty to model use of information technologies; and (6) acquisition of technology
resources for faculty and students. Lessons learned
from developing the project are outlined. Appendixes present as achematic representation of a multimedia lab floor plan and lists of equipment. (TDD)

Identifiers—"Australia
This paper describes major characteristics of Australia and its education system, including changes in
the structure of higher education as former Colleges
of Advanced Education, where most teacher education in Australia had been conducted, amalgamated
with existing universities or became new universities. Preservice teacher education models are de-

scribed, including integrated, concurrent, and end-on models. Elements of restructuring and innovation in Australian teacher education are discussed, focusing on: teacher supply and demand; teacher quality; formation of the New South Wales Teacher Education Council; formation of the Australian Council of Deans of Education; reviews conducted by the Australia Department of Employment, Education & Training; faculty reviews; quality suditis; accreditation of teacher education courses; and licensing or registration. The paper concludes that increasing pressures are being placed on teacher education due to a perceived oversupply of teachers, the low status of teacher education within universities, and a crescendo of external review and criticism. The way forward seems to include closer partnerships among universities, schools, education systems, unions, and teacher professional organizations, and balancing participation in the political process with the need to retain a degree of distance and autonomy. Appendixes include a list of Australian universities and a list of Australian professional educational associations and their 1995 conferences. (Contains 28 references.) (JDD) nces.) (JDD)

ity Management Identifiers—"Continuous Quality Improvement,
"Reform Efforts
Shared decision making (SDM) as an element of educational reform promises enhanced quality outcomes and appeals to educators who see virtue in the idea of people coming together to plan what is best for themselves and their students. Analyses have shown, however, that school councils implementing SDM rarely tackle operational classroom decisions or school decisions that impact on the classroom. The case can be made that hospital reform or restructuring contains several elements that are identical to elements that are central to contemporary reform is an effort to create more flexible, responsive organizations that achieve better results. Both hospitals and schools now employ strategies to involve parents and families to assist in their efforts. Both institutions have tried to become more personal places, more client-centered, more interdisciplinary, and more decentralized. While CQI has been viewed by some physicians as an stack on their profession, a movement to improve patient care by local creation (as opposed to commercially or medical speciality board-prepared) of standardized best practice care plans (called critical paths) has been more acceptable to physicians and concurrently achieves CQI goals. This critical path approach could be used to reorient educational reform. (Contains 56 references.) (JDD)

ceptions of the importance for instructional supervisors to possess content knowledge in the content areas that they supervise. Questionnaires were completed by 120 teachers from two elementary, one middle, and one high school, and follow-up interviews were conducted with 20 respondents. Teachers strongly supported the premise that supervisors should be content specialists in the content areas they observe. Out of six supervisory services, teachers ranked feedback about the effectiveness of instruction in relation to content as the most important service. Teachers felt that supervisors with content knowledge gave improved help and feedback, knew what instructional strategies to suggest based on content, gave fairer evaluations of a teacher's clasaroom performance, had up-to-date knowledge of trends and issues in the content area, and elicited greater respect from teachers, and supported the best interest of the content area when programmatic changes are made and funds are allocated. Teachers' perceptions changed according to the instructional supervision method used (nominal, prescriptive, or reflective). Multi-subject certificated teachers had a higher percentage of agreement with supervisors' need for content knowledge than did single-subject certificated teachers. Experienced teachers desired instructional supervisory content knowledge more than novice teachers. Experience teachers desired instructional supervisory practice are outlined. The supervision questionnaire and an interview protocol are appended. (Contains 19 references.) (JDD)

Two elementary schools of identical structure, facilities, number of faculty, and student characteristics serve as feeder schools to the junior high school. Site 1's sixth grade uses an instructional organization. Two elementary schools of identical structure, facilities, number of faculty, and student characteristics serve as feeder schools to the junior high school. Site 1's sixth grade uses an instructional team approach, while Site 2 remains in self-contained classrooms. Results of having 171 seventh-grade students complete the Rosenberg Self-Esteem Scale and another eight-tiem instrument delineating factors related to the transition experience indicated a few differences between students in teamed and nonteamed classrooms. Students from teamed settings demonstrated a stronger affiliation in school activities, fewer concerns about the transition to junior high, and anticipation of being involved in fewer activities in junior high. Concerns of both groups centered around being late, having difficulty with lockers, getting lost, and being ill-treated by others. No statistic

The Department of Curriculum and Instruction at Central Missouri, Warrensburg, Missouri, has designed an experience for student teachers in elementary schools to prepare them for reflective thinking in their own classrooms. Student teachers conduct action research by reflecting on what they do in the classroom, identifying effective practices, and implementing positive change strategies. Action research papers (n=515) written over the past 4 years were examined to determine the breadth and variety of topics that student teachers are researching. A table lists the variety of concept areas researched, and 10 subsequent tables list topic areas in some of the major concept areas such as academic achievement, behavior management, mathematics, and reading. It is felt that the variety of research selections shows that the student teachers are finding issues in their own classrooms that interest them and they are willing to put forth the effort to find out alternative ways of approaching the issues. Individual faculty advisors may find a redundancy in the topics of their advisees, but this may be more faculty influence than student selection. The benefits of the process of action research are shown by comments subsequently made by the student teachers in their first years of teaching. Eleven tables, which make up most of the paper, detail the action research projects. Contains nine references. (JDD) references. (JDD)

tion, Preservice Teacher Education, "Special Needs Students, "Student Teacher Attitudes, Surveys, Universities Identifiers—"Preservice Teachers A survey instrument was developed to examine preservice teachers' understanding of classroom issues related to exceptional needs and cultural diversity. The instrument was administered to 832 preservice teachers at universities in Alabama, Michigan, Montana, New York, and Washington at 3 levels (beginning, middle, and end of program). Data are displayed in 18 tables showing responses by state and number of methods courses for exceptional needs, by state and methods courses for exceptional needs, by state and methods courses for cultural diversity, and for all states by methods courses. Preservice teachers generally agreed that students with learning disabilities took more time to master skills, disagreed that it was easier to work with gifted students, agreed that special needs students should be evaluated differently than regular students, preferred to teach in a school setting similar to that in which they grew up, knew about ways to encourage parents from multicultural backgrounds to participate in the educational process, and felt comfortable with infusing multicultural material into their teaching. The paper concludes that preservice teachers indicate that they basically understand the issues. There was not much change in responses when looking at the beginning or end of programs, differences generally occurred in the middle portions of programs. The survey instrument is appended. "School Restructuring, "Teacher Participation," Teacher Role, Team Teaching, Teamwork The Teachers Network created The Teachers Voice Initiative to bring teachers together and empower them to create their vision of the future of education. This book presents the perspectives of participating teachers, who report on their experiences as agents of change and designers of curriculum. Papers include: "Teacher Leadership for Creating Innovative Schools" (Linda Darling-Hammond); "Where Does Change Begin? Change Starts in the Classroom Encher" (Joyce Kent); "What Happens When Teachers Open Their Classroom Doors and Let the World In! Learning Will Never Be the Same" (Nancy Powell); "Weekend Writer's Brief-case" (Lynn Cherkasky-Davis); "How Teachers Are Forming Teams To Create Change" (Aifred T. Ludwig); "Is Anybody Listening" (Priscilla Franks and Mary McGirr); "BEST [Building an Educational Support Team] Reform" (Patricia McHugh); "Envisioning the Puture...A Process for Change" (Carol M. Bantz); "The School-Based Management Team" (Deanne Delehanty); "Account of a School in the Throes of Restructuring" (Joyce Kent); "Middle School Reform: The DeVeaux Plan" (Mary R. Zaye); "Reaching Out to the Community" (Doris Oriffin); "Koffee Klatches" (Robert Liftig and Raymond Pace), "The Callileo Family Project" (Charles Hibbard and others); "Beginnings, A Homegrown Recipe for Creating a School-within-a-School at Chapel Hill High School" (Judith D. Jones); "Teacher-Designed Schools" (Lynn Cherkasky-Davis); "Charter Schools: Innovations in Educational Reform" (Todd Ullah); and "Assessing Our Reform Efforts" (Lealie Tarbet). Four case studies are presented. Team Teaching at the Walt Disney School (Chicago, Illinois), by Lynette Hill. A bibliography of 30 school change resources and a list of 22 organizations and networks supporting school change are provided. (JDD)

Reform Efforts

Reform Efforts
This annual report presents information on the Oklahoma Educational Indicators Program, a system developed in accord with the Oklahoma Education Reform Act of 1990 to assess public schools and school districts. This report provides data in tabular form related to test results and other outcomes, as well as student and teacher information, for each public school site. District and state reports, separately published, present information at those levels. The Oklahoma student enrollment of 594,338 in 1993 represents a 3.7% increase over 1990. These students are served by 39.920 full-time. 594,338 in 1993 represents a 3.7% increase over 1990. These students are served by 39,920 full-time equivalent staff. There has been an increase in test scores over 1990 in all grades taking the lowa Tests of Basic Skills and the Tests of Achievement and Proficiency. While scores on the American College Test were slightly below national averages, scores on the Scholastic Aptitude Test were well above the national average and higher than those of 1990. The 1993 report reflects the new cost accounting system in Oklahoma. Ten tables present school indicators. Six appendixes provide supplemental information. (SLD)

This curriculum review presents and comments

School Curriculum, "State Programs Identifiers." Oklahoma
This curriculum review presents and comments on state and county trends in the curriculum offerings of Oklahoma secondary schools. For comparison, it provides the secondary level curriculum offered by each secondary school in the state. Vocational education offerings are not included. The state mandates four units of English, two of mathematics, one of American History, one-half unit of Oklahoma history, two units of science, one-half unit of world history, and ten units of other course work. Local boards of education have chosen to enact additional graduation requirements, and schools offer a number of courses beyond these. The number of courses that are offered 59.6 units, while Tillman County, at the other end of the scale, offered 25.5 units. Three charts and two tables present statewide summaries. Units for each school are presented in tabular form (465 tables). (SLD)

Reform Efforts
 The 1992-93 school year was the third complete
year under the mandates of the Oklahoma school
reform act initiated in 1989, which established the
Oklahoma Educational Indicators Program. This report identifies progress or change that has occurred
in a variety of educational areas since the inception
of reforms in every school district in Oklahoma.
Indicators used fall into the two groups of results
and context. Among results are standardized
achievement test scores and student attendance
rates. Contextual information is shown in a historical fashion in the two basic categories of student
information and teacher information. Since the reform initiative began, state-level standardized
achievement test results have grown significantly,
particularly in the lower grades. The state dropout
rate has declined slightly, although the state attendance rate has also shown a slight decline since
1990. Scores in the American College Test increased alightly. The student enrollment has grown,
and its ethnic composition has changed, with a corresponding increase in the number of teachers.
School indicators are presented for elementary districts (130 tables) and independent districts (430
tables). (SLD)

Identifiers—"Educational Indicators, "Oklahoma, Reform Efforts
This report is a graphic presentation of teacher and student information, revenue and expenditure data, test results, and other student outcomes for each public school district. The indicators in the district report reflect the increased student enrollment (594,326) and staff (38,290) in 1993, as well as the new cost accounting system used by the Oklahoma Department of Education. Achievement test accres have generally increased, while dropouts have declined slightly since 1990. A separate page for each district shows indicators in the following major categories: (1) teacher characteristics; (2) student outcomes; (3) student achievement; (4) student characteristics; (3) revenue sources; (6) areas of expenditure; and (7) revenues and expenditures on a per-pupil basis. Information is given in tabular form for 568 school districts. (SLD)

In response to a recommendation that the Office of Educational Research and Development (OERI) adopt consensus panels such as those used by the National Institutes of Health and the Food and Drug Administration, this paper tries to represent the range of consensus panel applications and to identify the major considerations for OERI application. A pyramid of consensus strategies is possible, with a broad base of many systematic decision-mak-

ing strategies (such as group discussions or syntheses of reviewer comments) and a top point with a few model consensus panel approaches that require extensive participant agreement and rigorous examination of the evidence. It is noted that there is merit in the recommendation to use consensus development processes, but it is recommended that OERI ty the consensus panel strategy of the National Academy of Science report only on a trial basis because effective features of consensus panels in health research probably cannot be transferred to educational research and practice. Strengths and weaknesses of consensus strategies in general and of specific strategies are discussed. Seven appendixes consider methodology and various types of consensus approach, and provide supplemental information. Four attachments provide additional details. Identifiers—Continuous Performance Test, "Raggio Evaluation of Attention Deficit Disorder The Raggio Evaluation of Attention Deficit Disorder (READD) is an objective measure for the diagnosis and management of attention deficit disorder (ADD) in children. Extensive research has been conducted on its clinical and psychometric properties, as described in Chapter 3, "Development and Standardization." The READD is a microcomputer edition of the Continuous Performance Test (CPT), a test that has shown promise as a measure of attention, concentration, and impulsivity. Part of the success of READD in diagnosing ADD is related to the teaching of the task, which allows for unlimited teaching sequences. The clinical diagnosis is derived from the child's performance on the READD version of the CPT, with behavioral history from parents, rating scales from the teacher, and other psychoeducational testing. How to administer the READD is described, and its technical characteristics are outlined. Studies are cited that have supported the reliability and predictive validities of the READD. An appendix presents 24 tables of normative data. (Contains 22 references.) (SLD)

Validity
A major argument against evaluation of teacher

Validity
A major argument against evaluation of teacher
performance by students pertains to the instruments
being used. Colleges conduct instructional evaluation using instruments they devise, borrow, adopt,
or adapt from other institutions. Whether these instruments are tested for content validity is unknown. This study determined how evaluation
questions were presented in a sample of 200 evaluation instruments collected from 414 schools of education. Analysis of the evaluation questions
indicated that there are questions of validity in
many of the evaluation instruments used by these

colleges. No particular instrument is accepted by all colleges and universities, and few tests of validity have been performed for instruments in use. Flawed responses were skewed, ambiguous, or unclear, or else they did not correspond with the evaluation question. Some 58% of instruments were found to contain such flaws. Six tables and nine figures present study findings. (Contains 29 references.) (SLD)

Identifiers—Apple Classrooms of Tomorrow, *Large Scale Writing Assessment, *Writing What You Read
The "Writing What You Read" (WWYR) rubric was designed for large-scale assessments, and differs from most narrative rubrics in its narrative-specific content and its developmental framework. The rubric contains five analytic subscales for theme, character, setting, plot, and communication, and a sixth holistic scale for overall effectiveness. Evidence of validity was gathered for the WWYR scoring rubric through comparison with an established narrative rubric that has been demonstrated to be sound. The comparison rubric, derived from comparative studies of student writing competence, is a holistic/analytic scheme used annually in California. Five raters reviewed narrative samples collected from an elementary school participating in the Apple Classrooms of Tomorrow project. Both rubrics were generally used consistently by raters. Results suggest that at least three subscales of WWYR can be used reliably and meaningfully in large-scale sassesment as long as each narrative is rated by two raters. Evidence is lacking for the technical soundness of the other scales, and findings further suggest that REE JUN 1995

subscale judgments may not provide a technically sound profile of students' strengths and weaknesses. One figure and 12 tables present study findings. (Contains 23 references.) (SLD)

Ensuring that new forms of assessment are fair and valid for language minority students is essential for research on assessing the performance of Latino language minority elementary school students engaged in a cooperative learning language arts curriculum in Spanish and English. Strategies for developing performance assessments are described, and results from a preliminary study implementing these strategies as part of the curriculum for 39 bi-lingual and monolingual third graders are presented. The research shows how the design of individual-interaction and goals for cooperative learning catabilished by the teacher. How analysis of children's interaction in cooperative learning can show "in situ" classroom assessments among the children that help validate interpretation of performance is also described. Three appendixes contain study questions, charts of change, and transcript conventions. (Contains 11 references.) (Author/SLD)

Descriptors—*Analysis of Covariance, Comparative Analysis, *Matrices, Monte Carlo Methods, *Multivariate Analysis, *Mostutesas (Statistica), Selection, Simulation, Statistical Studies Identifiers—Omnibus Tests, *Power (Statistica), Selection, Simulation, Statistical Studies Identifiers—Omnibus Tests, *Power (Statistica), Selection (1976, 1979) suggests the Pillabardett trace (V) as an omnibus multivariate analysis of variance (MANOVA) test statistic for its superior robustness to heterogeneous variances. J. Stevens (1979, 1980) contends that the robustness of V, Wilk's lambds (W) and the Hotelling-Lawley trace (T) are similar, and that their power functions are highly sensitive to slight covariance inequalities. Yet under conditions of diffuse noncentrality structures, V is a clear choice. A Monte Carlo simulation of V, W, and T as omnibus tests under conditions of covariance heterogeneity and variance homogeneity investigates the robustness of each test. Conditions of concentrated covariance and noncentrality structure were imposed to compare power. Results indicate that the assumption of homogeneous variance-covariance materies in the form of covariance inequalities does not affect the robustness of V, W, or T, while T is slightly more powerful under such conditions. Five tables are included. (Contains 14 references.) (Author/SLD)

Identifiers—National Science Foundation
In 1993 the National Science Foundation approved the funding of a 5-year program to enhance science education within a large school district in the southern United States. The initial grant funded training for 34 mentors and identified 7 primary goals and 31 activities toward those goals. During the project, two teachers in each elementary school were trained as science mentors, who are to diffuse the proposed innovations throughout the school district. This report is part of a multi-year, multi-phase evaluation in its formative stage. The science mentors and five science specialists completed a question team suggests the following recommendations:

(1) appointment of a program director; (2) improving district support through promotion and publicity; and (3) amending the scheduling and content of monthly meetings to meet teacher needs more closely. (Contains 6 references.) (SLD)

Identifiers—Alternative Assessment, Louisiana In 1993 the National Science Foundation awarded a Louisiana Parish a grant to fund a program to enhance science education in the elementary school in the school district. Two teachers in each elementary school were to be trained as science ementors or lead teachers receiving instruction in physical science content, hands-on science programs, and training in alternative assessment. These teachers should disseminate this information in their schools. An evaluation of the summer training on from theirs of the content of the summer training on their training on the content dimensions of science were very positive, and posttest acores indicated increased knowledge. Teacher attitudes about the program were generally positive, but some recommendations were made for program improvement based on teacher response. These include greater emphasis on alternative assessment training, and additional training on some teaching methods and strategies. Seven appendixes list goals, contain the questionnaire, and provide information about the code structure and frequencies for strengths and weaknesses, along with posttest results. Critical thinking has been identified as essential to development of the professional nursing role. A process, "cognitive reengineering," has been created to facilitate critical thinking skill development in RNs. The process is derived from adult learning principles, techniques of consciousness-raising, and transformational theory. Its basic components include examination, disassembly, transformation and reassembly of assumptions, beliefs, and perspectives using personal experience, historical research, nursing trends, and auraing issues as content for exploration. Essential environmental conditions include mechanisms to engage the student, a knowledgeable facilitator, models, and peer support. Conceptual mapping is a tool which can be used to assess student development. (An attachment presents the theoretical and conceptual basis for the paper.) (Contains 16 references.) (Author)

Identifiers—*Conation, Performance Based Evaluation

The term "conative" is used to describe constructs that span both motivational and volitional aspects of human behavior, distinguished from constructs that emphasize cognition and affection. Among the conative constructs are achievement strivings, beliefs about self-esteem and self-efficacy, interests and attitudes about learning, volitional aspects, and constructs related to self-regulation and mindfulness. This pilot research project was conducted to gain familiarity with various instruments used to measure conative constructs and to gain preliminary understanding of interrelationships among the conative constructs measured by the instruments. Sixty college students completed measures of approaches to learning and studying, mindfulness, action versus state orientation. On the whole, these measures demonstrated reasonably good psychometric properties and represented a good preliminary approach to research on the constive constructs. Of particular interest was the high correlation between mindfulness and the deep approach. (Contains 24 references.) (SLD)

Identifiers—*Performance Based Evaluation, *Vermont
Since 1988 the Vermont Department of Education has been developing an innovative statewide performance assessment program. In 1990, the RAND Corporation began evaluating the Vermont assessment program, focusing specifically on the portfolio component of its assessment system. This report presents results from the evaluation in the 1992-93 school year. It presents results of interviews of principals in a random stratified sample of nearly 80 Vermont schools, questionnaires completed by mathematics teachers statewide, and analyses of the reliability of portfolio scores. Questionnaires indicate that teachers perceive the program as causing substantial change in instruction that are consistent with program goals. Teachers also indicate that the program mposes substantial burdens on them, and that variations in program implementation are sufficient to jeopardize comparative interpretations of test results. In 1993 there was improvement in score reliability in mathematics but not in writing, although reliability remained too low for many uses. Overall, 1993 results show appreciable but inconsistent progress. Eventy-six tables present evaluation findings. Appendixes contain an additional seven tables of correlations and a discussion of scores. (Contains 8 references.) (SLD)

A Comparison of Testlet Reliability for Polytomous Scoring Methods.

Pub Date—Apr 93

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (Atlants, GA, April 12-16, 1993).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MFD/PC01 Plus Postage.

Descriptors—Comparative Analysis, "Item Response Theory, "Measurement Techniques, "Reading Tests, "Scoring, Test Construction, Test Items, "Test Reliability, Thinking Skills Identifiers—Max Alpha Scoring, Number Right Scoring, "Polytomous Scoring, "Testlets Among the measurement techniques receiving greater attention is the context-dependent item set or testlet. The context-dependent item set consists of a scenario and related test questions. This item format is generally believed to be able to tap higher level thinking. Unfortunately, this item form leads to inter-item dependence within item sets and inflated reliability estimates when items are treated as unrelated. In this study alternative ways to score item sets (number right and max-alpha scoring) are examined with respect to classical reliability and item response theory (IRT) information using both dichotomous and polytomous scoring models. Responses of 2,817 examinees to 17 items in a reading test served as the data set. The results are consistent with previous research showing inflated reliability estimates when context-dependent item sets are treated as stand-alone items. The evidence suggests that the testlet structure of the measure must be taken into account in determining test statistics and examinee scores. (Contains 32 references, 1 table, and 3 figures.) Teaching Thinking across the Curriculum with the
Concept Attainment Model.

Pub Date—23 Jul 94

Note—209.

Pub Type— Reports - Descriptive (141)

EDRS Price - MP01/PC01 Plus Postage.

Descriptors—*Concept Formation, *Deduction,
Definitions, Educational Assessment, Elementary
Secondary Education, *Induction, *Interdisciplinary Approach, Models, Student Evaluation,

"Teaching Methods, *Thinking Skills

The Concept Attainment Model is described as a
teaching approach that helps students develop akills
for inductive and deductive thinking while learning
subject matter in any field in a constructive and
meaningful way. A definition and overview of the
model are presented, with guidelines for using the
concept-attainment approach to design and deliver
instruction and to evaluate student learning of subject matter and thinking akills. The model is an instructional approach in which teachers guide
students to derive an abstract, generic idea induc-

tively using pattern recognition and categorizing skills, and then help them deductively apply the concept in new situations. The theory of concepts of Jerome Bruner is the source of the model, which was transformed into a teaching model by B. Joyce and M. Weil (1972, 1980, 1986). Planning for teaching with the concept attainment model involves: (1) identifying a significant and definable concept; (2) analyzing its essential and defining features; and (3) designing exemplars from which the concept can be derived. The model offers teachers a method for teaching thinking across the curriculum using the subject matter of disciplines they teach. Five figures illustrate the discussion. (Contains 10 references.) (SLD) (SLD)

TX
During the 1993-94 school year, the Office of Research and Evaluation of the Austin Independent School District (AISD) (Texas) conducted a districtwide evaluation of instructional technology. The evaluation consisted first of an accurate count of all computers in AISD schools, and then of an in-depth evaluation of the integrated learning systems of the Computer Curriculum Corporation (CCC) and Jostens Learning. The over 11,000 computers in the Austin schools are more than twice the amount present 3 years ago. Of these, 39% are considered old. This amounts to six students for every one computer in the district. Gains in student achievement have not been significant enough to declare either of the integrated learning systems effective, but the gains made at some schools warrant their continued use. Better communication and training are needed to encourage use of laser disc

technology and to ensure the effectiveness of the integrated learning systems. The district should add computers and plan to replace outdated models. Eighteen figures and two tables present evaluation findings. Four attachments provide supplemental information, including the principal questionnaire. (Contains 7 references.) (SLD)

Education, Science Instruction, Student Attitudes, Teacher Attitudes, "Technological Advancement Identifiers—"Austin Independent School District TX, "National Science Foundation The Science Academy of Austin (Texas) was given a 4-year National Science Foundation (NSF) grant beginning in 1990-91. This evaluation report covers the third year of implementation. The grant provides a vehicle for linking the public and private sectors in Austin with the school system, providing in-depth partnerships for creating a thinking curriculum with two major goals: improving teaching skills with technology tools and increasing student learning and performance through holistic, interdisciplinary approaches. In the evaluated year, NSF funds provided staff development, student involvement in outreach activities in elementary schools, development of a groundwater curriculum for high school students, development of new private and public sector partnerships, followup on previous development, and additional staff. Evaluation suggested positive attitudes on the parts of teachers and students and useful curriculum changes. Recommendations are offered for program continuation. Ten figures illustrate the evaluation findings. (Contains 7 references.) (SLD)

Identifiers—"Austin Independent School District TX
The Office of Research and Evaluation of the Austin Independent School District TX annually collects dropout statistics for grades 7 through 12. This report contains various summaries and more detailed breakdowns for rates from 1985-86 to 1992-93. The class of 1993 had a 4-year dropout rate of 23.3%, the lowest rate in the last 5 years. Except for the class of 1993, this is consistent with previous decreasing trends. The annual dropout rate for grades 7 and 8 has been decreasing since 1984-85, reaching 3.7% in 1992-93. Hispanics have the highest dropout rate of any ethnic group in Austin's schools. The annual high school rate increased in 1992-93 for the first time since 1987-88. The class of 1994 has a 3-year dropout rate of 19.3%, which is higher than the 3-year rate for the class of 1993. While the long-term dropout rate improved, the annual rate remained above 6% and did not improve in 1992-93, meaning that most of the district's schools are at the clearly unacceptable rate of the Texas Education Agency's Academic Excellence Indicator System. Eighteen figures, and 4 attach-RIE JUN 1995

Critical thinking in the fine arts is defined as a
reasonable and reflective thinking that is focused on
what to believe and to do in relation to the fine arts.
It is a process designed to help students develop
awareness, appreciation, and understanding as they
think clearly and critically about the arts and learn
to express their ideas in a logical and concise maner. Methods used to teach critical thinking in the
fine arts are: (1) homework almost daily; (2) testing
through essays, objective tests, and short-answer
questions; (3) writing assignment; (4) critical thinking exercises; and (5) group problem-solving. Examples of assignments and test items are presented,
along with writing standards for the different reviews and critiques required. (SLD)

naire
This study explored personality variables measured by the 16 Personality Factor (16PF) test and their relevance to success, as defined by the final course grade, in college calculus courses with 94 students. Two personality variables were significant predictors of success as determined by the final course grade. A Statistical Analysis System multiple regression procedure found Factor G of the test (conscientious, conforming, moralistic, staid, rule-bound) to be a significant predictor of success. Factor G can be considered a measure of persistence and perseverance. The relevance of Factor A was less clear, but it was statistically significant in the multiple regression. Three tables illustrate statistical findings. (Contains 7 references.) (SLD)

mat
Identifiers—*Raach Model
The quality of fit between the data and the measurement model is fundamental to any discussion of results. Fit has been the subject of inquiry since as early as the 1920s. Most early explorations concentrated on assessing global fit or subset fits on fixed length, traditional paper and pencil tests given as a single unit. The detection of aberrant response patterns in the new computer adaptive format is vital to the continued establishment of confident, quality

measures. It would appear that detection strategies emphasizing the effectiveness of the targeting process are more important indicators of aberration during review than are traditional fit statistics. In fact, the targeting issue becomes a fit issue. For the investigations described, three simulated examinee records were selected, and each simulated examinee took a computer adaptive test of previously Rasch calibrated items. This exploratory study suggests that both regression and standardized measure change approaches may be viable techniques for the detection of response alteration patterns that are questionable. The educational importance of misfit is discussed. Three tables and five figures present aimulation results. (Contains 18 references.) (SLD)

Many private schools administer some type of standardized test to prospective students in an astempt to assess the student's potential for success in high school. The test results are used to assist the school in deciding whether to accept the student or to assist in the placement of the student in the appropriate curriculum level. This study examined the relationship between the composite scores of the Scholastic Testing Service High School Placement Test (HSFT), American College Test (ACT), and the final high school grade point average (GPA) for all Central Catholic High School Students (Toledo, Ohio) in the class of 1993 (GPA for 321 students, ACT for 264). Results indicated significantly high correlations between HSPT composite scores and GPA as well as HSPT composite scores and GPA. The conclusion is that there exists a strong positive relationship between HSPT composite scores, ACT scores, Likewisc, the results showed significant correlation between ACT composite scores and GPA. The conclusion is that there exists a strong positive relationship between HSPT composite scores, ACT scores, and GPA for Central Catholic students. One table lists cases and standard devisitions for variables. (Contains 5 references.) (Author)

This article summarizes the performance of 52 college students who completed a one-credit class for the reduction of test anxiety. The anxiety reduction program uses a variety of study skills and behavioral strategies to improve school performance. The 8-to-10 week class is taught in small groups of from 2 to 6 students. Content focuses on: (1) understanding anxiety; (2) effective time management; (3) managing the moment of crisis; (4) active reading and memory; (5) healthy living habits; (6) test-taking strategies; and (7) rational thinking. Purticipants demonstrated slightly higher grade averages and improved course completion. Personal comments from the students suggested that some of them had experienced great changes in attitude toward school and life in general. (Contains 6 references.) (SLD)

Identifiers—Amount of Invested Mental Effort,

"Mental Effort
The search for techniques to increase the effort
that learners invest in video-based instruction has
been hindered by the limitations of the instruments
used to assess the construct of mental effort. Several
researchers have noted the confusion of terms in the
field that refer to the cognitive resources devoted to
processing the stimulus. In this paper, relevant litersture in communications, education, psychology,
and human factors engineering are reviewed to
identify techniques that have been used successfully
to assess mental effort. Methods of assessing the
construct of mental effort fall into three main ester
gories: opinion measures, dual tasks techniques, and
physiological measures. The most promising methods are described, and studies which have applied
these methods are summarized. The relationship between assessments of mental effort and achievement scores are discussed. A table charts the
sensitivity of measures of the three types. (Contains
44 references.) (Author/SLD)

The Dallas School Accountability Program is Ac-

Identifiers—*Dallas Independent School District TX
The Dallas School Accountability Program is described, and a step-by-step method for determining how well a school performs relative to other schools is presented. The Dallas program is a two-part program. Beginning with criterion-based improvement plans, goal levels are set by determining the discrepancy between the actual and desired levels of student accomplishment and projecting these levels over a 5-year period so that actual and desired levels become the same. Norm-referenced expectations are also established. The school effectiveness methodology defines a school's effectiveness as being associated with exceptional measured performance above or below that which would be expected across the district. Procedures involve regression analysis to compute prediction equations by grade level or by school for each outcome variable independent of school identification and then using these equations within schools to obtain mean gains over expectations. A major feature of the approach involves asigning relative weights to each of the outcomes. An 11-step methodology is detailed. An attachment describes the school performance improvement awards for 1993-94. (Contains 14 references.) (SLD)

chology)
Identifiers—*MAC FAC Model, *Retrieval (Memory), Similarity (Concept)
A model of similarity-based retrieval is presented that attempts to capture these seemingly contradictory psychological phenomena: (1) structural commonalities are weighed more heavily than surface commonalities in soundness or similarity judgments (when both members are present); (2) superficial similarity is more important in retrieval from long-term memory than is structural similarity; and yet (3) purely structural (analogical) remindings are sometimes experienced. The model, called MAC/FAC (for "many are called, but few are chosen") consists of a first stage (MAC) that uses a computationally cheap, nonstructured matcher to filter candidates from a pool of memory items. Structured representations are redundantly encoded as "content vectors," whose dot product yields an estimate of how well the corresponding structural representatent vectors," whose dot product yields an estimate of how well the corresponding structural representations will match. The second stage (FAC) uses the Structure-Mapping Engine to compute a true structural match between the probe and output from the first stage. MAC/FAC has been fully implemented and tested on dozens of examples, and is shown to be capable of modeling patterns of access in psychological data. The relationship to other models of memory is discussed. Seven figures and 19 tables. (Contains 128 references.) (Author/SLD)

This report presents detailed tabulations of data on school enrollment of the civilian noninstitutional population in October 1993. It also includes a summary time series of data collected since the beginning of the survey in 1946. Data cover enrollment in "regular school" from nursery school through college and professional schools. Data are shown by the following characteristics: (1) age; (2) sex; (3) race; (4) Hispanic origin; (3) mariat status; (6) family status; (7) family income; (8) education of the householder; (9) labor force status; (10) metropolitan residence; (11) region; and (12) mother's labor force status and education (for preprimary enrollment). Also shown are level and grade of school, public or private schools, full or part-time attendance, and two-year or four-year college. Vocational school enrollment is shown separately. In October 1993 about 65.4 million persons were enrolled in 1992 but over 6 million more than were enrolled a decade earlier. Elementary school enrollment at 13.7 million, with high school enrollment at 13.7 million, and a similar number enrolled in college. Included is a U.S. Department of Commerce News press release that discusses changes in school enrollment levels of the nation's race and Hispanic origin groups. Four figures and eight text tables present population characteristics. Nineteen detailed tables and 15 tables in an appendix present additional information. (SLD)

of Educational Development, Scholastic Aptitude Test
The goal of the district assessment program of the Des Moines (Iowa) school district is to provide information which improves teaching and increase learning. Students participate in a number of assessment activities, including norm-referenced, standardized tests, college entrance examinations, Advanced Placement Tests, the district's performance-based composition assessment, and criterion-referenced, objectives-based subject matter tests. On the average, however, students spend less than one percent of their time taking district assessments. District data sets are prepared and made available in manageable files. Test results, which are provided to stakeholders in various ways, indicate that Iowa students have done well on the Iowa Tests of Basic Skills and the Iowa Tests of Educational Development. Scores on the American College Test and the Scholastic Aptitude Test have been above national means. Evidence from the district's writing evaluation indicates that student achievement is improving, but results from the criterion-referenced objectives-based assessments are mixed. Issues to be resolved in the future are discussed. Nine figures and 17 text tables, with 26 tables in 7 appendixes, portray district characteristics and assessment results. (SLD) portray distr sults. Descriptors—Academic Achievement, Comparative Analysis, Definitions, "Educational Assessment, Educational Theories, "Evaluation Methods, Foreign Countries, "Measurement Techniques, National Competency Tests, "Standards, Testing, "Test Use Identifiers—Europe, "Performance Based Evaluation, Situated Learning, "Standard Setting This article explores issues involved in using assessments as a means of defining standards and encouraging efforts to meet them. It compares the European examination system with the present American testing system. It also considers issues that must be faced in defining learning domains in ways that do not encourage narrowly focused training on specific assessment items. Performance assessment is designed for a different set of social functions than is traditional American testing, and is grounded in different epistemological assumptions. A great deal of practical work is going into the design of new assessments for the new needs of education, but there is relatively little reflection on the theoretical aspects of the development of new assessments. Performance assessment cannot develop on solid ground without more explicit theories of situated cognition than are now available. A cognitive theory of accomplishment is needed for new forms of assessment. (SLD)

ing Data
This paper investigates methods that avoid using
multiple groups to represent the missing data patterns in covariance structure modeling, attempting
instead to do a single-group analysis where the only
action the analyst has to take is to indicate that data action the analyst has to take is to indicate that data is missing. A new covariance structure approach developed by B. Muthen and G. Arminger is used. The approach draws on Bayesian theory and is a full-information estimator as is maximum-likelihood estimation. The proposed methodology is described briefly, and tests of its performance on simulated data in a Monte Carlo study under various forms of missing data are reviewed. This easy-to-use approach results in good properties for the parameter estimates. The technique is not, however, yet available in covariance structure software. Two tables are included. (Contains 6 references.) (SLD)

Descriptors—Change, Error of Measurement, Learning, *Longitudinal Studies, Mathematics Tests, Models, *Psychometrics, Sampling Identifiers—*Latent Variables, *Multilevel Analysis, Variance (Statistical)

The modeling of longitudinal and multilevel data using a latent variable framework is reviewed. Particular emphasis is placed on growth modeling. Examples are discussed where repeated observations are made on students sampled within classrooms and schools. The concept of a latent variable is a convenient way to represent statistical variation not only in conventional psychometric terms with respect to constructs measured with error, but also in the context of models with random coefficients and variance components. These features are explored. The random coefficient feature is shown to be a useful way to study change and growth over time, while the variance component feature is shown to correctly reflect common cluster sampling procedures. Four tables and four figures are included. (Contains 19 references.) (Author/SLD)

tion from synthesis of small scale research projects, from standardized tests, and from national surveys. There are also efforts underway to design an indicator system that would track progress with regard to cognitive outcomes and literacy. A group appointed by the National Education Goals Panel has recommended that a new assessment system be created for higher education modeled on the existing one for elementary and secondary education, the National Assessment of Educational Progress. Some preliminary work has been done in identifying indicators of good practice. The question is now whether efforts to secure better information can reach consensus in the higher education community. An important element of any indicator system must be the academic performance of college graduates in some set of content and skill disciplines. Consensus around skills, centering on communications, critical thinking, and problem solving, is more likely than consensus on content knowledge. A number of example tasks are presented as potential measurement techniques. Twenty-three figures illustrate the discussion. (SLD)

Identifiers—*Louis Feinstein Public Service Program, *Sharon Public Schools MA, Youth Community Service

munity Service
Incorporating community service into the education of public school students in the United States
is becoming a national trend and an important research topic. The implementation of the Louis Feinstein Public Service Program in Sharon Public
Schools in Massachusetts was evaluated. A structured interview approach was used to gain information about the different constituencies affected or
involved through 47 interviews with staff, students,
parents, and community members. Seventeen infor-

mal interviews were also held. The implementation of the Feinstein program in the Sharon public schools was found outstanding in that it dramatically incressed the amount and type of community service programs, initiating a major restructuring of curriculum and instruction. The teaching and learning environment has improved because of the success of particular classroom programs, the support of staff and administration, the effective work of the coordinator, and student and community response. Recommendations for program improvement are included. An appendix contains the survey questionnaire and supporting information. (SLD)

This study was designed to collect and then to compare various educators' perceptions (N=484) of the effectiveness of selected standardized testing program management practices in their schools. It was found that these educators perceived their schools' performance of testing-related practices to be more effective than the schools' overall performance in meeting other district responsibilities. Testing practices rated highest were use of quality tests and materials, maintenance of pupil records, and use of understandable scores and reports. Testing practices rated lowest were use of test results to evaluate instruction, availability of written policies, and use of publisher instructional guides accompanying achievement batteries. Comparatively, the teachers' ratings of the effectiveness of their schools' testing practices tended to be lower than were the administrators's ratings, and the testing directors' ratings of their testing practices tended to be lower than were the principals' and the supervisors' ratings, (Contains 12 references, 4 tables, and 4 figures.) Whether common standards exist among the national standards for kindergarten through grade 12

Setting
Whether common standards exist among the national standards for kindergarten through grade 12 mathematics, science, and civics and government was studied. Common standards were explored among "Curriculum and Evaluation Standards for School Mathematics," produced by the National Council of Teachers of Mathematics, the "National Science Education Standards," drafted by the National Science Education Standards and Assessment, and the "National Standards for Civics and Government," proposed by the Center for Civic Education. Through qualitative analyses of each of the publications and supporting literature, a set of eight K-12 exit outcomes was synthesized. How the national standards correlate with these outcomes is discussed, and fundamental evaluation standards are suggested to accompany the exit outcomes. These exit outcomes, like the national standards, focus on essential skills, abilities, and

behaviors, to participate and communicate effec-tively within and among the disciplines and to make use of technological advances to facilitate learning. A 10-item annotated bibliography is attached. (SLD)

Identifiers—"School Improvement Model

The School Improvement Model of teacher performance evaluation is described, and its development is traced. Original work in the late 1960s in Naperville (Illinois) and subsequent work by Iowa State University and several cooperating school districts led to the development of a model of teacher evaluation that included multiple appraisers, student feedback about teachers, formative and summative steps, a modified clinical supervision cycle, and a written agreement for improved performance in the next cycle. The model has been developed and refined in actual practice in a series of school districts and consorffs since 1978. It features both curriculum assessment and feedback. Goals and standards are established, and teachers are enabled to use both in teaching. Checks on student performance are used not only for grading and evaluation of students but to describe individual learning difficuities through feedback and to prescribe specific remediation and reteaching procedures. Current work with a microcomputer-based system is proving demanding but worthwhile in pursuit of the Goals 2000 objectives. On et table and four figures illustrate the discussion. People's beliefs about the origins of their health, sometimes referred to as health locus of control, have been shown to influence a variety of important behaviors, including the propensity to engage in effective health maintenance activities, and the willingness to seek and follow medical advice. The purpose of the present study was to explore the nature, i.e., the structure of the health locus of control Scales. The sample size (609 college students) was sufficiently large to allow the use of confirmatory maximum-likelihood factor analyses. The robustness of construct validity findings across various matrices of inter-item association was also investigated. Results suggest that the development of larger and more diverse item pools measuring more constructs might be useful in further exploring the structure of health loc

Quality Performance Accreditation (QPA), as mandated by the Kansas State Board of Education, requires achools to document student learning through multiple assessment strate-developed assessments in reading, writing, mathematics, and science. The Kansas National Education Association has joined other National Education Association Association affiliates in studying state efforts in assessment and accountability. Their study is supported by the state and the Mid-Continent Regional Educational Laboratory. The impact of QPA and state assessments on Kansas teachers is being investigated through a study of the efforts of six pairs of teachers who have met and used video conferencing to explore the impacts of assessment. This first year's report makes clear the teachers' understanding that assessment is, above all, a process. Teachers are recognizing their need for further training, and are acknowledging that alternative assessments are giving them valuable additional tools for improvement, but are in themselves no panacea. An appendix includes application materials and site information. Materials from six study stees are also attached. (Contains 59 references.) (SLD)

pation, Research Methodology, *Response Rates (Questionnaires), Responses, *Teaching (Occupation)

The influence of survey return rate and sources of information other than the survey on the teaching employment rate (as calculated) in the year following completion of a teacher preparation program were studied. A second objective was to investigate the tendency to respond for these individuals. A total of 291 individuals formed the target population for the study following graduates of a teaching internahip. Thirty-four percent responded to the initial survey, and 69.8% were teaching. The second mailing increased the response rate to 51%, and the cumulative percentage teaching of 71.7%. The third request brought the response rate to 57% and the teaching rate. Adding information from other sources brought coverage to 93%, and the percentage teaching to 75.5%. A spring survey yielded similar results for nonrespondents. From a statistical point of view, early returns did not differ significantly from those achieved by subsequent efforts. Results also suggest that deciding to participate in a survey is highly dependent on the inclination of the individual. Two tables present study findings. (Contains 26 references.) (SLD)

*Undergraduate Students Identifiers—*Fractals, *Rey Osterrieth Complex Figure Test
The complexity (fractal dimension value) of responses to the Rey-Osterrieth Complex Figure Test (ROCFT) between 10 undergraduate students with learning disabilities and a comparison group of 10 students without learning disabilities were compared. The fractal value of responses was assessed under three conditions (copy, immediate, and delay) by means of a box-counting algorithm. There were significant differences between the two groups across response conditions and a significant difference between the two groups across response conditions and as significant difference between the two groups across response conditions and as tignificant difference between the copy condition and the two memory conditions. The results of this study suggest that the fractal dimension is an effective metric for differentiating students with and without learning disabilities. The results also suggest that students with learning disabilities lack effective planning and organizational strategies that result in lower copy scores on the ROCFT. Descriptors—Comparative Analysis, Directories,

"Evaluation Methods, Evaluators, "Financial Support, Followup Studies, Program Descriptors—

tions, Program Development, Program Evaluation, "Program Termination, Qualitative Research, "Training This paper presents the findings of a qualitative followup survey of a sample of programs listed in the 1986 "Directory of Evaluation Training Programs." Four programs listed in the directory are no longer considered evaluation training, and five, originally similar, are still going strong. A sampling strategy was used to compare the discontinued programs with the continuing programs through discussions with program administrators. Comparison indicated that several areas are important in program continuation. To begin with, two programs no longer listed were actually in operation with only minimal change, a finding that suggests that the present directory may underestimate the number of viable programs. The perceived importance of the program is vital to its continuation. Faculty members and their diverse interests are keys to continuing a program. Grant funding can be a help in getting started, but it can be risky if it does not eventually result in program institutionalization and ongoing support. Student recruitment is a necessity for program continuation. Overall, existing evaluation training programs seem to be meeting the challenges of training more and better evaluators. An appendix describes the nine programs. (Contains 18 references.) (Author/SLD)

Setting standards on performance measures is discussed in the context of the State Collaborative on Assessment and Student Standards (SCASS) initiative supported by the Council of Chief State School Offices. The usual item-based methods for standard setting, the methods developed by Nedelaky (1954), Angoff (1971), and Ebel (1972), were developed for use with large numbers of multiple choice items of a unidimensional nature with item scores contributing to a summative scale. They have little or no value when applied to performance items, where scores typically do not measure a single construct, and there are often multiple scores for each exercise. One approach that is being considered for performance standard setting is judgmental policy capturing, a general procedure designed to describe statistically the unique information processing stratcharcterize all raters. Pilot tests have supported the utility of this approach. Another approach is that of the dominant profile procedure, in which a standard setting panel first states and then redefines policies as they attempt consensus about successful scores. SCASS efforts will consider both these approaches and their generalizability. A handout is attached. (Contains 3 references.) (SLD)

Descriptors—*College Students, Females, Goodness of Fit, *Health, Higher Education, Males,
*Measurement Techniques, Models, *Physical
Fitness, *Reliability, Validity
Identifiers—*Confirmatory Factor Analysis, *Exploratory Factor Analysis
Twenty-one variables believed to be important in-

dicators of health related physical fitness were measured on male and female college students between 1991 and 1993 (n = 433). Exploratory and confirmatory factor analytic techniques were used in an attempt to derive important components of physical fitness. The exploratory factor analysis identified five important factors of collegiate physical fitness. (1) strength and endurance; (2) body composition; (3) heart rate; (4) blood pressure; and (5) flexibility. For the confirmatory factor analysis, an a priori model similar to that developed by Marsh (1992) and one similar to the American College of Sports Medicine (ACSM) were tested in which body composition, body girth, muscular strength and endurance, cardiorespiratory fitness, flexibility, blood pressure, and cardiac functioning were hypothesized as important fitness parameters. Results of the confirmatory factor analysis indicate that neither the ACSM nor Marsh's model provided good fits for these students. Reliability estimates were high but poor validity and goodness of fit indices were found. This indicates that common fitness measure-found. This indicates that common fitness measure-found. This indicates that common fitness measure-ment techniques may be inadequate when assessing college students' fitness levels. (Contains 11 references and 3 tables.) (SLD)

Coaching, Test Construction, "Testting, Test Interpretation, "Test Use, Test Wiseness
The realities of inappropriate and sometimes
unethical testing practices must be confronted to
make sure that current assessments are as reliable
and effective as possible. While this paper does not
attempt to provide practical guidelines for ethical
and appropriate testing, it does draw a picture of
appropriate and ethical testing practices. All persons involved in testing programs should try to
maintain their focus on the fundamental reasons for
testing which is the education of the students being
assessed. It is vital that the selected test be appropriate for specific purposes and intended populations,
and that all intended and possible unintended uses
be considered. Because preparing students to take
the test is the source of many problems with assesment, a continuum of appropriate test preparation
practices is suggested. Issues that must be considered
in administering the test are reviewed, from
disclosure through improper use and interpretation
and test bias. (Contains 27 references.) (SLD)

Identifiers—"Curriculum Differentiation
This report contains tabular summaries based on data collected from the Survey of High School Curricular Options. The national survey was conducted in response to the growing controversy over the implications that curriculum differentiation, or tracking, has for American school children. The ta-

bles present statistics on the policies and practices of public secondary schools (schools containing grades 10 through 12) regarding curricular options. A national sample of 912 schools replied to the survey. Most are offering core curriculum courses differentisted in terms of content, quantity, or intensity of work, or expectations regarding independent work, but only 15% of schools identified themselves as having traditional tracking policies. Many schools report some student mobility among ability levels in mathematics and English after grade 10, but it frequently happens that the same students are assigned to highest-level ability courses in mathematics and English. Thirteen detailed tables contain survey findings. Four appendixes present supporting information and the questionnaire. (SLD)

Identifiers—Authentic Assessment, High Stakes Tests, 'Indicators, 'Monitoring, United Kingdom In 1979, Gene Giass suggested that it might not be possible to evaluate echools nor to create widely applicable research findings, but that the complexity of education was such that merely 'fire-fighting, 'establishing monitoring systems to alert about educational events, was the best approach. In the United Kingdom, monitoring systems are running in one form or another in over 1,000 schools. Two such systems, the A-Level Information System (ALIS) and the Year 11 Information System (YELLIS), are discussed. Both rest on tests and questionnaires administered in schools and the system of curriculum-embeddied high stakes authentic testing used in the United Kingdom. Experience with these systems a grandom is an example of the type of complex system that is likely

to lead to the development of self-reliant institu-tions fed by high quality statistics. Such a system is grounded in a research ethos rather than an evalua-tive stance. Five figures and two tables illustrate the discussion. (Contains 15 references.) (SLD)

Of concern to private and public schools in Russis is the evaluation of teachers and schools. The use of voluntary, nongovernmental peer evaluation using extant Western accreditation processes is one choice that is being used in several public and private schools in Russis. This system of peer evaluation and friendly criticism contrasts markedly with the traditional monolithic and generally negative evaluation in Russis. Economic factors hamper the adoption of Western evaluation methods, but they are being embraced to an increasing degree. The new format of school evaluation with result in an exchange of ideas related to performance expectations that has never existed before. Evaluators must get beyond the idea that "made in the U.S." is the standard for the whole world. The move to real "world class" standards receives an important boost from the evaluation exchange that is taking place in Russis today. (Contains 2 references.) (SLD)

Standard Setting on Performance Assessments: A Comparison between the Paper Selection Method and the Contrasting Groups Method.

Pub Date—Jun 94

Note—56p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—"Comparative Analysis, "Criteria, Educational Assessment, Elementary Secondary Education, "Svaluation Methods, Judges, Scores, Scoring, "Selection, "Statistical Distributions Identifiers—Contrasting Groups Method, National Assessment of Educational Progress, Paper Selection Method, "Performance Based Evaluation, Probabilistic Models, "Standard Setting Comparative results are presented for procedures recently appearing in literature related to standard setting on the National Assessment of Educational Progress—the paper selection method and the contrasting group method. For this comparison, a probabilistic model with normal distribution of performance and a six-point scale were assumed. The paper selection method (American College Testing) requires judges to conceptualize students that are just at the borderline between categories. Papers are selected from a set that represents all levels of performance students at the borderline would likely have produced. The standard is set at the mean of the scores assigned to those spapers as part of the regular scoring process. The contrasting groups method requires that teachers internalize the construct to be assessed, and then select students above and below the criterion of success. Papers for those students are scored, and a point between the two score distributions is selected as the standard. For the cases that were modeled, the paper-selection procedure provided better estimates of the standard and the percent above the standard than did the contrasting group procedure. Six tables and 13 figures (graphs) present details of the analyses. (Contains 9 references.) (SLD)

*Estimation (Mathematics), Item Banks, Item Response Theory, Mental Retardation, Simulation, Statistical Analysis, "Test Construction, Test Items Identifiers—Item Parameters, "Quebec Adaptive Behavior Scale
Multilog (Thissen, 1991) was used to estimate parameters of 225 items from the Quebec Adaptive Behavior Scale (QABS). A database containing actual data from 2,439 subjects was used for the parameterization procedures. The two-parameter-logistic model was used in estimating item parameters and in the testing strategy. MicroCAT (Assessment Systems Corporation, 1989) was then used to manage the item banks and Computerized Adaptive Testing (CAT) environment during a simulation run using data from a randomly selected sample of 200 subjects taken from the larger data base. The simulation of the QABS-CAT testing indicates that levels of ability can be estimated for each of the seven skill domains by using only 30% of the items of the conventional version. The numerous advantages of item response theory and CAT as applied to the assessment of adaptive behavior with regard to the changing definition of mental retardation (Luckasson et al., 1992) are discussed. (Author/SLD)

Identifiers—"Austin Independent School District TX, *Education Consolidation Improvement Act Chapter 2 Formula funds provide federal aid to states through the Elementary and Secondary Education Act (ESEA) of 1965 as amended in 1988 by PL 100-297. Funds can support programs for students at risk of failure or dropping out, or students for whom providing an education entails higher than average costs. Funds can also support programs for educational innovation, professional development, and a variety of supplemental and compensatory efforts. In 1993-94 the Austin Independent School District (Texas) received \$631,904, which included some funds from prior years. Funds were allocated for a number of initiatives. Administration of the Peabody Picture Vocabulary Text-Revised shows gains from pretest to posttest for kindergarten beneficiaries of Chapter 2 Formula funds. The Academic Decathlon and Spanish Academy supported by the funds benefitted students and promoted academic excellence. Library resources purchased through Chapter 2 were well received by librarians and administrators, and the recipients of program-funded professional development training reported themselves to be better prepared teachers. Recommendations are made for improved program evaluation and more parent participation efforts. Seventeen figures and one table summarize Chapter 2 activities and services. (SLD)

Weighting (Statistical)
Fit statistics provide a direct measure of assessment accuracy by analyzing the fit of measurement
models to an individual's (or group's) response pattern. Students that lose interest during the assessment, for example, will miss exercises that are
within their abilities. Such students will respond
correctly to some more difficult items and incorrectly to some less difficult items. Most assessment
programs, including the National Assessment of
Educational Progress (NAEP), currently either igmours such response anomalies or assume they do not
exist. The use of a weighted-total-fit-mean-square as
a measure of assessment assume they do not
exist. The use of a weighted-total-fit-mean-square as

Identifiers—"Projection Research, Smoothing Methods

This edition, the 24th report in a series begun in 1964, provides revisions of projections shown in the previous year's report. It includes statistics on elementary and secondary schools and institutions of higher education at the national level, projecting figures for enrollment, graduates, classroom teachers, and expenditures to the year 2005. Projections reflect the 1990 census, with the incorporation of 1992 estimates and latest assumptions about fertility rate, net immigration, and mortality rate. A methodology section describes models and assumptions used to develop the national projections. They are based on an age-specific enrollment rate model, exponential smoothing models, and econometric models. Most projections show three alternatives, with the first set (middle alternative) expected to bethe most likely projection and he low and high alternatives providing a reasonable range of outcomes. A chart provides a brief forecast ummary. National enrollment in elementary, secondary, and higher education is predicted to increase over the period, as are numbers of graduates, carned degrees conferred, numbers of classroom teachers, and expenditures. State figures are expected to vary in the forecast period. Data is presented in 70 figures and 52 tables, with an additional 37 tables in four technical appendixes discussing methodology. The report includes a glossary of data and statistical terms. (SLD)

tor Analysis, "Factor Structure, High Schools, "High School Students, "Personality Messures, Personality Traits Identifiers—"Second Order Effects, "Sinteen Personality Factor Questionnaire A review of the research into the second-order factor structure of the 16 Personality Factor Questionnaire (16 PF) indicates disagreement about the number and meaning of the second-order factors. However, repeated analyses of the second-order factor structure have consistently found fewer than the eight factors suggested by Catell (1973) and the Institute for Personality and Ability Testing (IPAT) (1972). This research extended knowledge in this area by investigating the second-order factor structure of the 16 PF and comparing the results to those found in previous studies. The sample consisted of 2,225 individuals who applied to the college of education of a large university who took the 16 PF as part of admissions requirements. Results yielded a four-factor solution, one of the smallest factor solutions yet obtained. These findings are more consistent with previously reported five-factor solutions and the five second-order factors common to five personality questionnaires than with the eight-factor solution of Catell and IPAT. Ten tables present study findings. (Contains 15 references.) (Author/SLD) thor/SLD)

Surveys, "Training Identifiers—"Utility Analysis
Managers and program sponsors are often unaware of possible alternatives to costly training evaluation procedures and do not have criteria for selecting alternatives. What is needed is an understanding of the various levels of evaluating training programs, feasible alternatives, and decision criteria for choosing the right system. It is proposed that Kirkpatrick's four levels of training evaluation, plus three enhancements be used: (1) Level 2 enhancement, perceptions of objective mastery; (2) Level 3 enhancement, perceptions of objective transfer; and (3) Level 4 enhancement, utility theory estimates. The first two alternatives involve using surveys and existing instructional objectives. The last alternative involves utility calculations based on the Schmidt, Hunter, and Pearlman (1982) model. Decisions about implementing training evaluation and the degree of sophistication should be based on the criteria of feasibility, propriety, utility, and accuracy. By mapping these criteria against the four-plus levels of evaluation, a decision matrix is obtained, and organizational trainers and educators are able to determine the appropriate degree of evaluation of their training programs. One figure presents the decision matrix. (Contains 15 references.) (Author/SLD)

and Development Centers, Statistics, Surveys, Tables (Data), Universities Institutions of higher education perform about half of the nation's basic research. Consequently, the level, distribution, and characteristics of federal academic support are of much interest to officials at all government levels and in nongovernmental sectors. Federal legislation requires that the National Science Foundation (NSF) determine the total amount of money for scientific and engineering research received by educational institutions and appropriate nonprofit organizations. NSF annually collects statistical data from the 15 federal agencies that account for virtually all support for science and engineering research and development at educational institutions. These data provide information that enables users to determine patterns of support over time and to compare patterns for individual institutions. Data are presented on total program support, total science and engineering support by nonprofit institutions and associated federally funded research and development support to nonprofit institutions and associated federally funded research and development centers. Data are presented in 52 tables. (SLD)

Identifiers—"Exploratory Factor Analysis, LIS-REL Computer Program, "Self Esteem Index (Brown and Alexander)

This study offers field estimates of the factor validity and internal consistency reliability of the Self-Esteem Index (SEI) using SEI data from 208 regular and special education students in grades 3, 4, and 5. Exploratory factor analytic results support the existence of four factors as anticipated; however, various inconsistencies are noted between the anticipated and actual factors with which particular items are associated. Likewise, confirmatory LIS-REL results indicate a somewhat poor fit of the data to the expected factor model. Alpha reliability results are somewhat more promising, with coefficients for the entire scale and the four anticipated subscales exceeding 0.80. Based on the findings, cautions are offered regarding use of the instrument in educational settings. Two tables are included (Contains 22 references.) (Author/SLD)

Three papers are presented that summarize current project findings from a study of the actual effects of introducing new forms of assessment at the classroom level. All focus on aspects of performance assessment as an alternative to traditional assessments. "Effects of Introducing Classroom Performance

mance Assessments on Student Learning" by Lorrie
A. Shepard, and others, examines effects of performance assessment on the learning of third graders
in 13 classrooms. "How Does my Teacher Know
What I Know? Third Graders' Perceptions of Math,
Reading, and Assessment" by Kathryn H. Davinroy, Carribeth L. Bliem, and Vicky Mayfield uses
interviews with students in the classrooms of the
larger study to explore student ideas and stitudes.
"How 'Messing About' with Performance Assessment in Mathematics Affects What Happens in
Classrooms" by Roberts J. Flexner reviews work
with the teachers of the study's classes. Eighteen
tables and six figures in the three papers present
study findings. (Contain 77 references in all.) (SLD)

Identifiers—*Discontinuity, Self Reference (Psychology), Sweden
This is the second paper in a series of three, the objective of which is to describe the fundamental discontinuities of human existence. Self-reference is explored in the first section of this paper, arguing that neither time-space nor developmental dimensions are adequate to explain the problem of self-reference. It is argued that self-reference might indeed be an uncognizable degree of freedom that governs human existence. The founding propositions of the discontinuity theory then state that human existence subexists as difference, time-space, development, and self-reference. The second section maintains that human existence can be modeled as discursive strings encompassing a context-agent enacting an agent enacting an objective, where the objective itself can be an agent enacting an objective, and so on. The general theory of discontinuity is described in section 2. Section 3 encompasses the specific theory of discontinuity that builds on the heritage of classic theories explored in part 1. The theory encompasses three different forms of development: (1) canalization, which includes systematizing, and (3) combination, which encompasses organizing. Nineteen figures illustrate the discussion. (Contains 18 references.) (SLD)

Descriptors—*Goodness of Fit, Heuristica, *Path Analysis, *Research Methodology, Statistical Analysis, *Structural Equation Models Identifiers—*Binomial Distribution

In this paper the binomial index of model fit is applied to four path-analytic or structural-equation models to demonstrate how this goodness-of-fit measure can be used and interpreted. In addition, the conclusions derived from the results of the binomial index of goodness of fit of the models, which were based on traditional goodness-of-fit indexes. The goodness-of-fit statements derived from the binomial index of model fit were not always in agreement with the conclusions drawn from the traditional goodness-of-fit measures. The binomial index of model fit is heuristically different from the more traditional goodness-of-fit measures. The binomial index of model fit is heuristically different from the more traditional goodness-of-fit measures, and its use will provide additional information to a researcher regarding the degree to which the data support the theoretical model. This is the fourth periodic report on the programs and plans of the National Center for Education Statistics (NCES). It describes current programs aimed at meeting the needs posed by the National Education Goals and other educational policies, the future plans for the agency, and its major publications. In addition to updating the descriptions of the traditional NCES standard data collections, such as the Common Core of Data and the Integrated Postsecondary Education Data System, this edition focuses on some new work at the Center. Some of the new programs described include the Beginning Postsecondary Student Longitudinal Study, the Fourth Followup of the High School and Beyond 1982 Study, the Early Childhood Longitudinal Study, the National Household Education Survey, and the Third International Mathematics and Science Study. The NCES issues about 100 publications cach year. Explanations of these publications and programs, and on the results of these efforts, is made available through the National Library of Education. This publication is the culmination of a major effort to help establish a common terminology, descriptions, and coding structure for course information at the secondary level of education. There had previously been no standard system for collecting, maintaining, reporting, and exchanging comparable information about student course taking patterns. The system was derived using material from five states. Two other states (Virginia and South Dakota) were chosen to test the proposed system. Study staff considered all courses within the course catalogs of selected school systems in these states, but concentrated on the four major academic subject areas (English/language arts, mathematics, science, and social studies) and the three vocational subject areas (English/language arts, mathematics, science, and social studies) and the three vocational subject areas swith the largest enrollments (business and office occupations, vocational and home economics, and agricultural occupations). The proposed system contains 632 courses in 29 subject areas. Every course has a title, description, and basic course title code. Additional fields allow for more detailed information. Examples are given, and subject fields and codes are histed. Seventeen tables present coding information. Appendixes contain numeric and alphabetic lists of codes and titles, as well as a list of participating agencies. (SLD)

This handbook represents a major effort to establish current and consistent terms, definitions and classification codes to maintain, collect, report, and exchange comparable information about persons who work in education institutions from early childhood through high school. The selection of data terms reflects the best judgment of many individuals about the data that are useful in making appropriate, cost-effective, and timely administrative, programmatic, and staffing decisions. It is not a data collection instrument, nor does it reflect any type of federal data maintenance requirements. The terms and definitions can be used at all levels of the education enterprise and in all types of agencies. If data are collected and maintained according to standard definitions, they can be aggregated more easily from the school level to higher levels with the assurance that data are indeed comparable. A staff member is defined as an individual who performs specified activities for any public or private education institution or agency that provides instructional or support services to students or staff at levels from early childhood through high school completion. "United States
This report is based on the Schools and Staffing
Survey (SASS) of 1987-88 and 1990-91 and is designed to provide a broad picture of private schools
in the United States. The SASS collects data on only
a sample of private schools, but collects a much
richer picture of each participating school than does
the Private School Universe Survey, a supplement
to the Common Core of Data. In 1990-91, the SASS
found that there were approximately 24,690 private
elementary and secondary schools is the United
States, serving an estimated 4,673,878 students in
kindergarten through grade 12. This suggests that
nearly one-quarter of the schools in the nation are
private, and that 1 out of every 10 students are in
private schools. Findings from the SASS are presented in sections on: (1) characteristics of private
schools as units; (2) characteristics of students; (3)
characteristics of teachers and principals; (4) educational goals of teachers and principals, their perceptions of school climate, and rates of graduation and
college attendance; and (5) descriptive profiles by
religious or other affiliation. Ten figures and 44 figures present survey findings. Two appendixes contain tables of standard errors and technical notes.

This report presents the findings of two phases of a study of Asian limited-English speaking middle school and high school students' experiences in sheltered classes as compared with mainstream classes in the School District of Philadelphia (Pennsylvania). The study involved focus group interviews conducted with 114 English as a Second Language (ESOL) Level 4 Asian students at the secondary school level, classroom observations and interviews conducted with 10 high school content area teachers who attended these sheltered classes. The findings from the student focus groups indicated that at least 66 percent of the middle school students and 90 percent of the middle school students

stream classes. Most of these students expressed a preference for classes with regular students and a desire to have taken regular classes when they were in ESOL Level 3. The findings from the teacher study revealed that sheltered class students received study revealed that sheltered class students received essentially the same curriculum as did their mainstream counterparts regardless of subject, and that most teachers in the sample modified their teaching to accommodate the needs of LEP students. However, few of these teachers used visual aids, propa, or audiovisual equipment; and even fewer engaged the students in hands-on activities or cooperative learning. Recommendations from the study point to the need for more intensive work with both sheltered and mainstream content area teachers in the use of techniques that are critically needed for LEP students, and are also appropriate for mainstream students. This document is composed of 5 separate volumes which represent case studies of 57 Asian Limited English Proficient (LEP) high school students who attended sheltered classes in the Philadelphia School District (Pennsylvania). Case studies, conducted in 1991-92, were part of a larger study of the student experience in sheltered classes in comparison with mainstream classes at four New Instructional Model High Schools. The case study in school I represented 5 Cambodian, 5 Vietnamese and 2 Chinese students who ranged in age from 16 to 20 years. The students who ranged in age from 16 to 20 years. The students sampled in school 2 ranged in age from 14 to 19 years and 10 came from Vietnam, 5 from Korea, 4 from Laos, 4 from Cambodia, 2 from China and 2 from India. The case study in school 3 was represented by 9 students from Vietnam, 1 from Korea, 1 from Cambodia, and 1 from Burma. Students ranged in age from 14 to 20 years. In school 4, students in the case study were 14 to 21 years old and 2 students were from Vietnam, 3 were from Cambodia and 1 was from China. Each student was observed by an evaluator for a school day, and structured follow-up interviews were conducted fire sch student and each student's English as a Second Language (ESL), mathematics, science, and history teachers. Most students in the sample felt more comfortable in sheltered classes, and believed that they would not have been able to cope with maintream classes. Students, teachers, and evaluators commented on the oral language difficulties students were experiencing at all four schools. Data support earlier findings about the instructional program that indicate that opportunities for developing oral language are limited in both ESL and sheltered classes because of the predominance of traditional teacher-centered instruction that tends

Identifiers—"Hawaii, Samoans, Student Engagement
An ethnographic study was conducted of the school experience of 33 Samoan students at a non-tracked urban college preparatory high school in Honolulu (Hawaii). Multiple sources of data were used, the most central being structured interviews with nine current students, their teachers, and their parents. Student friendships were of special interest as a means of examining student engagement. Samoan students in Hawaii are a definite minority, and they are frequently among the educationally and economically disadvantaged. Friendships and activities with friends were central to the school experience of these students, and many had an ethnically diverse group of friends. The central role of the school in these students (ives was apparent. Friends were usually in the same extracurricular activities. Helping, modeling, and networking were evident in reports of friendships. Two tables summarize survey findings. (Contains 19 references.) (SLD)

Teacher empowerment and parent participation
in school decision making have become dominant
themes in the current debate over school restructurin school decision making have become dominant themes in the current debate over school restructuring. The literature suggests that as teachers become empowered, they may tend to view parents more as clients of education rather than as partners, thereby introducing a potential conflict into the social interaction of teachers and parents. This study examines the interrelationships between teacher empowerment and parent participation in three different types of schools of choice. Data is drawn from a national sample of six Catholic, four single-focus magnet, and five multi-focus magnet public urban high schools in Chicago (Illinois), Washington, D.C., and Chattanooga (Tennessee). Three models of parent-teacher relations are hypothesized: (1) teacher professionalism; (2) parent empowerment; and (3) dual empowerment or partnership. Findings suggest that Catholic schools are closer to the development of a partnership model than either of the two types of public schools. Multi-focus magnet schools most nearly approximate a parent empowerment model. None of the types approximates a teacher professional model of teacher-parent relations. Six tables and an appendix portray some school characteristics. (Contains 104 references.) (Author/SLD)

Identifiers—Hispanic American Students, Kean College of New Jersey, Middle School Students, *Project Adelante, established in 1988 at Kean College of New Jersey, is sponsored by the New

Jersey Department of Higher Education, and is currently the only "College Bound" program targeting the Hispanic-American population. Adelante (onward" in Spanish) aims to improve the high school graduation rate of Hispanic students and increase their opportunities for college admission. A secondary goal is to increase the number of minority students who choose teaching as a profession. Adelante enrolls middle school and high school students in a program of scademic instruction, peer tutoring, field trips, career and personal counseling, mentoring by Hispanic professionals, and parental involvement. A year-long evaluation is reported, with data gathered from site visits, review of documents, participants surveys, and interviews with participants and staff. The program is found to foster student attitudes of academic success and to tailor instruction and counseling to student needs. Strong student satisfaction with the program is found. Some suggestions are made to improve this already effective program. An appendix contains a literature review on Hispanic-American dropout prevention by Emma Munoz-Duston. (Contains 25 references.) ties, Latinos, "San Diego County Department of Education CA
Untracking places previously low-achieving students (primarily from low-income and ethnic or language-minority backgrounds) in the same college preparatory academic program as high-achieving students. The Achievement via Individual Determination (AVID) program of the San Diego (California) schools shifts education policy for underachieving students to a rigorous curriculum with increased support for low-achieving students. The San Diego program has been extremely successful in preparing students for college. Forty-eight percent of the 248 students who completed 3 years of AVID enrolled in four-year colleges, 40 percent enrolled in two-year colleges, and the remaining 12 percent are working, traveling, or doing voluntary work. Parental income and education are not responsible for the impressive college enrollment figures, since students from the lowest income strata are enrolling in equal or higher proportion to those from higher income groups. The search for reasons for AVID's success indicates that teachers explicitly teach aspects of the implicit culture of the classroom and hidden curriculum of the school, and they mediate relationships among families, high schools, and colleges. AVID gives its students social and cultural capital. (Contains 43 references and 6 figures.) (Author/SLD)

Identifiers—African Americans, "Connecticut, Focus Groups

A state-wide survey of public attitudes about education in Connecticut conducted by Public Agenda, supplemented by focus groups and a survey of educators and community leaders, suggests that the Connecticut public is ambivalent about support for education and for proposals to integrate the schools. Resistance seems to stem from the public perception that educators and parents themselves have broken the contract with the public. The Connecticut public believes that the schools are failing to maintain a safe environment for children, that they are not doing a good job of teaching the basics, and that the schools are not stressing discipline and good work habits. They also think that parents are not fulfilling their responsibilities. The study focuses specifically on integration and the plight of inner-city schools, where the problems recognized throughout the state are seen as compounded by social problems. African Americans are more likely (87 percent) than Whites (67 percent) to endorse integration as a goal and a value, with Latinos between the two groups (81 percent), but there is general agreement about violence, crime, and drugs in the achools. Eighteen tables present survey findings. Contains an eight-item list of related Public Agenda publications. (SLD)

Gangs, *Peer Groups, Safety, *Urban Problems,
Urban Youth, Violence, Youth Clubs
This guide to coping with street gangs is aimed at
the young person who may be considering gang
membership or who is afraid of gang violence. Understanding gangs leads to the ability to cope with
the problems they pose. Part I explores "What
Gangs Are," explaining characteristics of gangs and
why young people join them. It is essential that
adolescents understand that despite the killings and
other violence, gang members bond with each other,
some considering the gang a substitute for the family they lack. Others join because they feel a need
of fit in and because a gang can strengthen a member's sense of group identity. Part 2 discusses coping
with gangs, suggesting some things one can do to be
aafe. The following are considered: (1) coping with
one's own emotions; (2) poverty; (3) broken families; (4) neighborhood problems; (5) the need to
belong; (6) gangs themselves; (7) threats and violence at school; (8) drugs and dealers; (9) violence
on the streets; (10) dealing with death; (11) family
members who are gang members; (12) leaving the
gang; and (13) the Guardian Angels as a possible
solution. An appendix lists resources and places to
get help, as well as 30 books and articles for additional reading. (SLD)

It is racism that has undermined the War on Poverty declared by Lyndon Johnson, and the country must come to terms with its history of racism if there is to be any hope of accomplishing welfare reform today. American social policy has continually foundered on issues of race. The antipoverty

efforts begun by the Johnson administration were never fully realized because they became entwined with the civil rights movement, and triggered a white backlash. The shift of emphasis from all the poor to those disadvantaged by racial and ethnic bias alienated some white working-class Americans. Recognizing the disenchantment of the white middle class, the Nixon administration began to cut back welfare reform. Among the discussions of equal employment opportunity and political influences, the exploration of the politics of motherhood is particularly interesting. By the end of the 1960s, child care policy had also become embroiled in the struggle for racial equality. Day care and aid to families with dependent children became associated with minority issues, to the eventual detriment of such programs. (Contains 31 references.) (SLD)

The essays in this collection stress that cultural diversity has always provided the real strength of America. It is argued that Western culture itself is founded on principles that favor a multicultural vision, and that America should reclaim its multiethnic and multilingual heritage. The greatness of America has always depended on the quality of its immigrants. In reality, there are no foreign languages in America, since the native languages of American citizens constitute virtually all the languages in the World of the Worlds of We': First-Person Pluralities in 'Us"; (2) "Taking the 'Foreign' Out of Foreign-Language Teaching"; (3) "Seeing with Another!: Our Search for Other Worlds"; (4) "Literati and Illiterati: Continuities in the Oral and Written

This collection presents the best of 8 years of "Rethinking Schools," an education reform journal created in Milwaukee (Wisconsin) in 1986 by teachers vitally concerned with educational change. This volume contains 29 essays by classroom teachers, as well as pieces by such national reform figures as Henry Louis Gates, Ir., Herbert Kohl, Bill Bigelow, Howard Zinn, Stan Karp, and Lisa Delpit. Topics include: (1) the theory of school reform (2) the implications of reform for the day-to-day classroom, (3) current controversies, and (4) the different roles reformers can play. Each section is followed by a list of relevant books and materials. Sections are: (1) "Multiculturalism and Antibias Education"; (2) "Rethinking the Curriculum" for Social Studies and Language Arix; (3) "Stratification in the Classroom: National Policy Concerns"; and (5) "Building a Community: Teachers, Students, and Parents." The program brings general education students into facilities that serve only special education students. This reverse mainstreaming allows academicallyable special education students the opportunity to take credit-bearing vocational courses, and both groups learn to relate in ways that promote interpersonal skills. In 1993-94, the project was located at three schools. Evaluation that year found that the co-mingling of the two populations was minimal within the instructional program for a variety of practical resons, but that blending of the two groups did occur in assemblies, field trips, intramurals, and leadership classes in which alternative high school students served as teacher assistants. The positive effects of

this socialization were noted in the recommenda-tions for program continuation, which stress cles-definition of goals, increased collaboration, and less restrictive atmosphere. An appendix summar-izes outcomes in table form. (SLD)

Identifiers—"Council for Unity NY

The Council for Unity began in 1975 in response to repeated incidents of interracial violence in a New York City high school. The program's primary goal has been to promote intergroup awareness, sensitivity, and cooperation among groups from diverse ethnic, racial, and religious groups and to reduce bias. The program currently operates in 15 high schools and 19 elementary and midlevel schools. The evaluation in 1993-94 focused on the high schools relying largely on survey data from 12 faculty advisers, 91 students, 22 alumni, 10 principals, and 15 teachers. Most survey respondents were very positive about the program. Students and alumni perceive program experiences to be valuable, and teachers agree. Administrators are concerned about ways to reach greater numbers of students. Respondents offered several suggestions for program improvement and outreach activities, including more networking among the school chapters involved and greater administrative support. Seven tables present evaluation findings. (Contains 5 references.) (SLD)

(PCEN) provides New York State funding for remediation in reading, writing, mathematics, science, and social studies for eligible high school students.

During summer 1993, 30,195 students took

PCEN-Inmed summer classes. About two percent overe enrolled in Project Outreach, a program for high school dropouts resuming their education and

and social studies for eligible high school students. During summer 1993, 30,195 students took PCEN-funded summer classes. About two percent overe enrolled in Project Outreach, a program for high school dropouts resuming their education and other high-risk students. The program met or exceeded its evaluation objectives. Overall, at least 79 percent of PCEN students with valid data passed at least one course, and 54 percent of those taking a Regents Competency Test passed the test; however, less than 30 percent passed the reading mathematics, and science tests. Fifty-seven percent of students in Project Outreach passed Regents examinations they took, and the passing rates for individual tests for these students were higher than those of other PCEN students. All Project Outreach students who took a Regents writing test passed it. The Office of Educational Research recommends that special statention be focused on increasing that percentage of students who pass Regents examinations in mathematics, reading, and science. Three tables present evaluation findings. (SLD)

School Graduates, High Schools, *High School
Students, Hispanic Americans, Limited English
Speaking, Longitudinal Studies, *Minority
Groups, Pacific Americans, *Urban Schools,
White Students
Identifiers—*New York City Board of Education
This report tracks the school-completion progress
of New York City students who entered ninth grade
in fall 1990 and were scheduled to graduate on time
in June 1994. The report indicates the percentages
of students (including those in special education)
who graduated, dropped out, and remained in
school for summer school or a fifth year in fall 1994.
After correction for transfers in and out of the system, the class of 1994 contained 63,130 students.
The dropout rate (without transfers) was 18.7 percent, and the total graduation rate (through June)
was 44.3 percent, with 37 percent still enrolled at
the end of the 1993-94 school year. A little over 14
percent were of limited English proficiency. Almost
one-third of the class was Hispanic American, and
just over 10 percent was Anian/Pacific Islanders.
Blacks made up just under 40 percent of students,
sand less than 20 percent were white. Substantially
higher percentages of Asian/Pacific Islander and
White students graduated within 4 years than did
Black or Hispanic students. While Blacks dropped
out at a rate comparable to the class as a whole,
Hispanics dropped out at a higher rate. Overall,
school completion findings show little change from
those for the class of 1993. Seven figures and six
tables present school completion figures. An appendix contains school-level analyses in table form.

A process description and preliminary evaluation are provided for the Weed and Seed initiative in Springfield (Illinois). This initiative involved local, state, and federal resources in projects that included (1) facility improvement, (2) drug prevention, (3) youth education and child care, (4) jobs and vocational training, (5) reaident initiatives, and (6) sports activities for youth. The initiative's short-term goal was to reduce cocaine distribution and related crime (pull the weeds) and to promote neighborhood revitalization through coordination of various resources in the target area (plant the seeds). Statistics regarding indictiments and convictions show the efficacy of weeding efforts. Offenders can be removed from a target area, but it requires quality investigation, effective case management, and committed prosecution. Seeding initiatives included 36 proposed projects, of which 26 were fully, and 3 partially, implemented. The 26 projects had an implementation success rate of 72 percent. These results were the more remarkable in that no "Weed and Seed" implementation funds were used in these projects. Nine tables present evaluation findings. Twenty appendixes provide supplemental and background information. (SLD)

This research report presents data showing that overcrowding in the New York City public schools is having significantly negative effects on instruction and learning in the system. The impact is particularly strong in schools that have a high proportion of students of low socioeconomic background, where overcrowding is sharply linked to lower achievement. In New York City, earollment growth has been quick and is occurring at all grade levels. Ninety-one of 111 high schools (82 percent) elevels. Ninety-one of 111 high schools (82 percent) were operating above their capacities. Data from the Board of Education document the overcrowding, and a study of four overcrowded schools (130 percent above utilization rate) with surveys of 213 teachers and 599 students, indicates attitudes toward school crowding. Both students and teachers feel deeply affected by overcrowding, with many considering it the most serious issue facing the schools. Both students and teachers feel overwhelmed, discouraged, and often diaguated. Four tables present study findings. (Contains 17 references.) (SLD)

cial Differences, Scientific Methodology, Social Class
Identifiers—"Bell Curve (Herrnstein and Murray)
Few books have generated as much controversy as the recently published "The Bell Curve: Intelligence and Class Structure in American Life." The tremendous polarization on the issue of the relationship between intelligence quotient (IQ) to race and social class, reinforced by the book, and the potential this book has for undermining social programs designed to help the poor and disenfranchised make it worthy of attention. It is a pseudo-scientific treatise that must be considered in the sociopolitical and philosophical contexts within which it is written. Evidence suggests that "The Bell Curve" is a philosophically skewed attempt at revising and reviving the idea that nature is more significant and important in determining intelligence and survivability than is nurture. The author analyzes the book's hypotheses, which are often convincingly presented, and considers its social policy implications for the disadvantaged and children's programs. Hermstein's and Murray's thesis of genetic inferiority and inherited cognitive deficiency is without scientific merit, and is contrary to the spirit of the American constitution. (Contains 27 references.) (SLD) Class

Descriptors—"Child Development, Cognitive Development, "Early Childhood Education, "Ecological Factors, Educational Change, Individual Differences, "Minority Groups, Poverty, "School Readiness, School Readiness Tests, Social Support Groups, Student Adjustment, Student Placement, Urban Schools, "Urban Youth Identifiers—America 2000, Ecological Paradigm
The school readiness goal of the America 2000 educational reform program admits that not all children start school ready to learn, but implies that with proper and adequate interventions, all children can start with the requisite cognitive and social adaptive skills that will enable them to learn. This paper discusses and analyzes critical skills related to the preparation and support of poor urban children in preschool and early school years. It is suggested that readiness does not reside in children as a fixed attribute, but is rather the result of the dynamic interaction between the child and the learning environment, in which each child's potential to succeed is mediated by significant adults and the supportive nature of the social and learning contexts in which children perform. The differences in support and environment faced by poor urban children are discussed, and the ways in which readiness is determined are reviewed. An ecological model of school readiness is proposed that suggests a dynamic process of reciprocal influence of several factors thinfluence children's school readiness. The model includes the six components: (1) individual potential; (2) the larger distal social context; (3) proximal social contexts; (4) developmental pathways; (5) readiness indicators; and (6) school progress and growth. One figure outlines the model. (Contains 23 references.) (SLD)

Descriptors—Case Studies, "Community Development, "Educational Change, Educational Environment, Educational Practices, Elementary Secondary Education, Longitudinal Studies, Professional Autonomy, "Professional Development, "School Restructuring, Teaching Methods, "Urban Schools, Work Environment Identifiers—"Professionalization of Teaching, "Teacher Empowerment Social, cultural, political, and organizational characteristics of urban schools that make them difficult settings for teachers are discussed. It is suggested that, while an emphasis on professional community would be beneficial for all students, it is particularly pressing for urban schools where other resources for school reform are limited. Teacher empowerment alone is not sufficient. For empowerment to work to the advantage of students and teachers, a shared commitment to a fundamental change of teaching practice requires the addition of a focus on the community. Part I discusses the examination of professional community that grew out of a longitudinal study of schools that are well along in the restructuring process. Part 2 of this document presents five case studies from high schools, middle schools, and an elementary school (kindergarten through 8th grade), one of which illustrates a achool where reform is not being implemented successfully. Part 3 reflects on the cases to provide further development of the framework and discusses what teachers and administrators can do to promote professional community. Four appendixes presents supplemental information, two tables, and three illustrative figures. (SLD)

tionship, Parent Participation, *Parents, Reading, Self Concept, *Skill Development, Writing (Composition)
Identifiers—*Education Consolidation Improvement Act Chapter 1, *New Jersey
This information booklet for parents answers some of the questions parents often ask about their children's participation in basic skills improvement programs. It suggests ways in which parents can support and reinforce the school's role and offers suggestions for parent involvement and ideas for at-home activities to support skill development. Children who live in eligible Chapter 1 attendance areas and whose test acores and other measures of achievement are below expectations for their grade levels are eligible for extra help in reading, writing, and mathematics. Money received from the federal government is used to support skills instruction and programs are administered by the State Department of Education. Parents can support the school's efforts by ensuring the child's physical and emotional well-being, and by encouraging learning and providing a supportive atmosphere. Developing a positive self-concept for the child is very important, and parents play a vital role. Activities for developing basic skills are outlined, centered in areas of oral communication, writing, reading, and mathematics. A checklist is provided for parents to rate their own participation in the schools. (SLD)

This digest reviews available data on Asians and Pacific Islanders (API) to assess their presence in the teaching profession. Although they are a rapidly expanding part of both the population and school enrollments, APIs constitute only one percent of all teachers, and are largely absent from teacher preparation programs, with their mean registration in such programs at about one percent. A national study conducted by the American Association of Colleges for Teacher Education (ACTE)/Metropolitan Life (1990) surveyed 472 students from 42 colleges of education on their teacher preparation experiences. Only 18 API students were included in the sample. Of those in teacher education programs, only one-hird aspired to Master's degrees, as compared to 41 percent of Hispanics, 54 percent of Blacks, and 70 percent of Whites. Data from the National Center for Education Statistics (NCES) in 1994 show that APIs also constitute only 1.5 percent of teacher education facility. APIs do receive doctorates in other non-education fields at disproportionately high rates. Understanding why APIs do not see teaching as an attractive profession, and the barriers that might prevent them from teaching is important for the effort to build a truly inclusive teaching force. Law Enforcement, Parent Education, Programs
This report reviews the facis underlying the de-bate about delinquency in the United States, focusing on evidence of how well various approaches to crime succeed in practice. Do youth programs such as family therapies and recreation initiatives actually make a cost-effective contribution to controlling crime? Research supports a strong foundation for identifying risk factors early in life, allowing programs to target underlying conditions that propel some youth to crime. Research does not suggest that tougher law enforcement and stricter sanctions are likely to reduce crime significantly. A number of youth-oriented prevention strategies have documented impressive results in reducing criminal, delinquent, and predelinquent behavior. Careful evaluation has supported the contributions of early childhood interventions in reducing criminal, delinquent, and predelinquent behavior. Careful evaluation has supported the contributions of early childhood interventions in reducing criminal, delinquent, and predelinquent behavior. Careful evaluation has supported the contributions of early childhood interventions in reducing reventual crime.

Several community-wide prevention efforts and rec
reaction programs such as midnight basketball have been demonstrated to be effective. Prevention through youth programs has been shown to work.

Project Achieve was designed to improve the attendance and academic performance of at-risk students. In 1993-94, the program was in the first year of its second 3-year cycle, and operated in 34 New York City public high schools. The program has focused on restructuring the standard grouping of grades into *houses,* small units that offer intensive education and integrated support services, and in developing a schoolwide management and planning capability. This report assesses the schoolwide teams and services to students in a sample of 10 schools. Houses, which averaged 250 students in 1993-94, were usually heterogeneous in student composition. Most house coordinators observed improved attendance and student responsiveness in school, and half saw an improvement in grades. All schools expanded and strengthened house-based support services for students. Most students interviewed expressed satisfaction with the house concept. Recommendations for improvement center on further reducing house size, increased staff development activities, and better student services. Two tables present program data, and an appendix lists participating schools. (SLD)

*Teacher Attitudes, Test Construction, Urban Schools
Effective-schools researchers have identified factors that are correlated with improved school schievement. School districts and state departments of education have applied this research to school improvement frameworks. This paper describes how Effective Schools Research was employed to develop a questionnaire to assess school staff perceptions of 7 effective school components in 16 high and low performing elementary schools in high poverty environments. The components were: (1) clear school mission; (2) frequent monitoring of student progress; (3) safe and orderly environments. (4) high expectations; (5) opportunity to learn and time on task; (6) instructional leadership; and (7) home/school relations. The difference in instructional staff ratings from high and low performing schools was statistically significant for each of the components. Recommendations are provided for the utilization of questionnaire results along with other data to provide a comprehensive needs assessment that would result in achool improvement. Three tables and two figures illustrate data. Appendixes list effective schools correlates, sample characteristics, and the survey. (Contains 5 references.) (Author/SLD)

Identifiers—Career Education Project, "New York City Board of Education
The Career Education Center (CEC) is an alternative high school educational program than began in 1989 to serve the needs of adolescents in New York City who are homeless, educationally disadvantaged, do not fit into a traditional high school setting, or who are awaiting foster care placement. The CEC supports these students, bolsters their self-esteem, and sets up alternative learning centers at host agencies to accommodate students. As of September 1993, CEC was serving approximately 1,300 students at 33 sites. Interviews at seven CEC sites with program staff and agency directors were the basis for the 1993-94 evaluation. Students at each site were also interviewed. Overall, the CEC program is found to be highly successful in serving the varied needs of these high-risk students. Classes are small in the CEC program, and teachers are able to assess students' strengths and weaknesses better and more quickly. Student programs are a major strength of the program, as is the smooth working collaboration among personnel. Improvements in student attendance, self-esteem, and academic achievement have been noted. One table and six figures present evaluation findings. (SLD)

Identifiers—Focus Groups, *Saint Paul Public Schools MN
This is a report of a 6-month study of race relations in three public schools in the Saint Paul (Minnesota) metropolitan area. The study is intended to be the first phase of an attempt to improve intergroup relations and the social climate in Saint Paul, Roseville, and South St. Paul schools. Based on 154 interviews, 10 focus groups, and a written question-naire completed by 1,576 students and 591 teachers, the study provides a composite portrait of intergroup relations and related issues in the 3 school districts. It cites program areas that should be developed as the beginning of a broad strategy to build more effective school communities. Teachers and students indicate that the schools are marked by deteriorating race relations, with high rates of racial harassment (54 percent of students are divided along race and class lines, and feel little sense of community. Recommendations for a new broad strategy call for better leadership, mobilization of school and community leaders, and development of program models that are presently effective on a smaller scale. Five graphs present study findings. Both student and teacher questionnaires are attached. (SLD)

Resegregation, Sett Concept, Story letting,

Teacher Attitudes, White Students
Identifiers—African Americans, Black Separatism,

*Kwanzas

The experiences of a white teacher in an integrated private kindergarten illustrate the consciousness of race that permeates our society. The doubt felt by many African Americans that African American children should attend predominantly white schools is explored, as are the doubts felt by an African American teacher who thinks she might be more useful in an all black school. The teacher incorporates stories of a slave named Kwanzas into the stories she tells the children. Telling stories is a way to explore the cultural heritage of all the children in the class. These anecdotes are a form of communication that is necessary to ensure that every child has a sense of self in the classroom. Parents and teachers must talk to each other about race as about other issues to begin to work toward community and kinship. (SLD)

A study on family structure and values among the poorest of all welfare recipients, homeless families found that not only has the traditional family structure broken down, but that there are stark contradictions between the reality of the lives of homeless women and the values they hold. The traditional family may actually be obsolete for this population. One finding is paramount, however, and that is that education is a strong predictor of the stability of family structure and of a family's ability to rise out of poverty and become independent. It will be useless to attempt to instill values through placement of children in orphanages or by placing financial sanctions on single mothers. Instead, it is important to develop viable policy options that enable families to stay intact and become self-sufficient. The reality is that poor single mothers still want to live independently and responsibly for their children. Education is the key to escaping welfare. The American Family Inns concept is endorsed as a way to keep families together and provide education for mothers and their children. Two figures and one table illustrate the discussion. Contains three references. (SLD)

ability, *Curriculum Development, Disadvantaged Youth, *Educational Change, Educational Finance, Educational Improvement, Elementary Secondary Education, Extended School Day, *Financial Support, Public Schools, *School Restructuring, *Urban Schools, Urban Youth Identifiers—*Action Plans, *Wisconsin Recommendations and an action plan for improving Wisconsin public schools' focus on teaching and learning, rather than on changes such as vouchers and privatization. Positive strategies designed to promote achievement are favored over punitive strategies or remedial actions. The action plan includes financial help to implement the recommendations. The major recommendations are: (1) classize reduction to 15 students per teacher through grade 5 and for core subjects through grade 8; (2) coordination of services with schools open until late evening hosting a variety of programs; (3) curriculum reform for academic achievement and preparation for life; and (4) staff development and accountability initiatives. These strategies are recommended for every school, but emphasis should be placed on schools in low-income or disadvantaged areas. Provisions are made for program evaluation and funding. (SLD)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the Thesaurus of ERIC Descriptors and the Identifier Authority List, are in word-by-word alphabetical order.

As shown in the examples below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection .

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education* (RIE). Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to this ED number and hence to its location in RIE.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index.

IR - Information and Technology

AA — ERIC Processing and Reference Facility
CE — Adult, Career, and Vocational Education
CG — Counseling and Student Services
CS — Reading, English, and Communication
EA — Educational Management
EC — Disabilities and Gifted Education
FL — Languages and Linguistics

JC — Community Colleges

RC — Rural Education and Small Schools
SE — Science, Mathematics, and Environmental Education
SO — Social Studies/Social Science Education
SP — Teaching and Teacher Education

HE — Higher Education TM — Assessment and Evaluation

UD - Urban Education

THESAURUS ADDITIONS AND **CHANGES**

The following additions and modifications have been made to the ERIC controlled vocabulary since July 1990. They are, therefore, not included in the main body of the 12th (1990) edition of the Thesaurus of ERIC Descriptors.

Aboriginal People
USE INDIGENOUS POPULATIONS

ACTIVE LEARNING Learning in which the learner is the prin-cipal driving force, with the instructor (if one is present) merely as facilitator of the process—among the many active learning approaches are experiential learning, cooperative learning, problem-solving exercises, writing tasks, speaking activities, class discussion, case-study methods, simulations, role playing, peer teaching, fieldwork, independent study, library assignments, computer-assisted instruction, and homework

ADMINISTRATOR BEHAVIOR Conduct of administrators in or out of job-related situations

Apr. 1993

AESTHETIC VALUES Oct. 1982 (Scope Note Changed) Objective or subjective principles and standards related to human preferences among, or assessments of, artistic forms and qualities (in music, literature, visual arts, etc.) or objects and events in nature—sometimes includes pre-cepts of nonperceptible (e.g., moral or intellectual) beauty

Branch of philosophy dealing with beauty, artistic expression, and psychological re-sponses to beauty and art UF Esthetics

APARTHEID (Scope Note Changed) Afrikaan word meaning "apartness," referring to the former system of racial segregation and political and economic discrimination officially practiced in the Republic of South Africa (and the territory of Namibia) after the 1948 election victory of the Afrikaaner Nationalist Party (note: Namibia achieved independence in Mar90, and South Africa abandoned the system under a new constitution and all-race elections in Apr94)

Tanks, bowls, or other containers in which aquatic organisms are housed and displayed

Architectural Programing (Del Mar94)
USE ARCHITECTURAL PROGRAMMING

(Scope Note Changed) Studies, usually interdisciplinary in approach, of such geographic areas as Asiatic Russia, Armenia, graphic areas as Asiatic Russia, Alinenia, Azerbaijan, Bangladesh, Bhutan, China, Georgia, India, Indonesia, Japan, Kazakhstan, Kirgizstan, Korea, Maldives, Mongolia, Nepal, Pakistan, the Philip-pines, Sri Lanka, Tajikistan, Turkmenistan, Uzbekistan, and the Southeast Asian subcontinent

AUGMENTATIVE AND ALTERNATIVE COMMUNICATION

Communication in which at least one part-ner is a user of a visual, tactile, or auditory system that either adds to or replaces normal speech and/or writing Alternative and Augmentative

Communication Alternative Communication Systems Augmentative Communication Systems

Authoring Aids (Programing) (Del Mar94)
USE AUTHORING AIDS (PROGRAMMING)

AUTHORITY CONTROL (INFORMATION)

The establishment and maintenance of consistent forms of terms, such as names, subjects, and titles, to be used as headings in bibliographic records UF Authority Files

USE AESTHETIC VALUES

BIOTECHNOLOGY Dec. 1992 The use of biological organisms, systems, or processes to make or modify products

Warm-blooded, egg-laying vertebrates of the class Aves, having feathers, wings, scaly legs, and a beak

BIRTH ORDER (Scope Note Added) (Note: for specificity, use the Descriptor "First Born" — see also the Identifiers "Second Born," "Middle Born," and "Last Born")

MTOWNS

Jul. 1993
Towns that have experienced rapid growth and often transition from rural to urban-BOOMTOWNS industrial life as a result of new economic activity, such as large-scale construction projects, new industry, or in-migration (note: includes private, social, and public consequences of rapid community growth) Boom Town Areas Rapid Growth Communities

BRITISH NATIONAL CURRICULUM A prescribed range of subjects to be studied by all British pupils between the ages of 5 and 16 (note: coordinate with Identifiers "England," "Wales," "Scotland," "North-ern Ireland," and/or "United Kingdom" as appropriate)

BURUSHASKI (Scope Note Added) Language of NW Kash-mir, not known to be related to any other

BUS DRIVERS (Note: for school bus drivers, coordinate with "School Buses")

CANADIAN STUDIES Interdisciplinary instruction and research concerned with Canada and the Canadian provinces and territories

CAREGIVER CHILD RELATIONSHIP (Note: if appropriate, coordinate with "Teacher Student Relationship" —for documents/articles about parents and children, use the more precise term "Parent Child Relationship")

CAREGIVER ROLE

Apr. 1993

Cell Biology USE CYTOLOGY

Cellular Molecular Biology **USE CYTOLOGY** and MOLECULAR BIOLOGY

(Scope Note Added) The Iroquoian lan-guage of the Cherokee tribe of American Indians CHEROKEE

CHEROKEE (TRIBE) An American Indian people formerly inhabiting the southern Appalachian moun-tains from the western Carolinas and eastern Tennessee to northern Georgia, with present-day populations in northeast Okla-homa and western North Carolina (also, dispersed kin) (note: for the Cherokee language, use "Cherokee"—for the geographic concept of Cherokee lands, use the Identifier "Cherokee Nation")

CHILD BEHAVIOR

Apr. 1993

Chippewa (Language) USE OJIBWA

("Chippewa, use Ojibwa" was removed)

CHIPPEWA (TRIBE) An American Indian people of the area around Lake Huron and Lake Superior, and westward to Saskatchewan and Montana (also, dispersed kin)—known primarily as Ojibwas II. Canada (Chippewa is a corruption of Ojibwa)

Anishinabe (Tribe) Ojibwa (Tribe) Oiibway (Tribe) Ojibwe (Tribe)

(Scope Note Added) The Muskogean language of the Choctaw tribe of American Indians

CHOCTAW (TRIBE) An American Indian people originally of Mississippi and Alabama, and presently of eastern Mississippi and southeastern Oklahoma (also, dispersed kin)

Classroom Climate
USE CLASSROOM ENVIRONMENT

Fine-grained soil material (consisting chiefly of hydrated silicates of aluminum) that is plastic when wet-has many uses in art and industry UF Clay Minerals

CLIMATE CHANGE Nonseasonal, semipermanent change in the physical environment of a region or the entirety of the earth, including fluctuations in temperature, precipitation, solar radiation, gas and suspended particle concentra-tions, and ocean levels (note: for worldwide climate change, coordinate with the Iden-tifier "Global Change" or use the narrower term "Global Warming")

Composition of various materials or objects, as for artistic and other creative COMMUNITY BASED INSTRUCTION (DISABILITIES)

Systematic training of people with disabili-ties in functional skills within the natural community setting where such skills are used, in order to ease/enhance transitions to independent living, community participation, and employment

Jul. 1966 COMPUTATIONAL LINGUISTICS (Scope Note Changed) Branch of linguis-tics concerned with the use of computers for the analysis and synthesis of language data-for example, in machine transcrip-tion, word frequency counts, and speech recognition and synthesis (note: do not confuse with "Natural Language Processing")

COMPUTER ANXIETY Fear or mistrust of computers and com-puter technology—includes apprehension about learning computer skills Computer Aversion

Computerphobia

COMPUTER ATTITUDES Jul. 1993 SN Attitudes toward or about computers and computer use

COMPUTER INTERFACES Nov. 1994 Connecting links between computers, be-Connecting links between computers, between computers and peripheral equipment, or between computers and users—hardware interfaces include plugs, sockets, and wires that carry electrical signals, software interfaces are the languages, codes, and messages used by recogning the computing the with used by programs to communicate with each other, and user interfaces are keyboards, mice, joy sticks, light pens, com-mand languages, menus, display screens, and other devices used for interactive communication between users and computers
UF Interface Devices (Computers)

COMPUTER MEDIATED COMMUNICATION

SN Interactive use of computers for electronic mail, computer conferences, electronic bul-letin boards, and online journals and databases (note: see also the Identifier "Telematics")

UF Computer Assisted Communication Computer Based Communication Computer Communication

COMPUTER SECURITY Nov. 1994 Measures taken to protect computer sys-tems (hardware, software, and data files) from accidental or malicious damage or destruction and from unauthorized access (note: see also the Identifiers "Computer Viruses" and "Data Security")

The process of evaluating and choosing COMPUTER SELECTION computer hardware and/or systems

CONSTRUCTIVISM (LEARNING) Viewpoint in learning theory which holds that individuals acquire knowledge by building it from innate capabilities interacting with the environment (note: see also the Identifier "Social Constructivism")

UF Constructionism (Education)

CORPORATIONS Businesses or other associations organized as legal entities, having rights and duties distinct from those of their individual members (note: see also the Identifiers "Multinational Corporations" and "Transnational Corporations")

COUNSELING PSYCHOLOGY Psychology relating to counseling—more specifically, psychology courses and learning experiences concerned with training counselors or counseling psychologists to assist persons to make adjustments and choices expecially in page 14 to assist choices, especially in regard to vocational, education, and personal matters

COUNTIES UNTIES
The principal, often geographically largest, areas into which states, territories, countries, etc., are divided for purposes of local government—in the U.S.A., administrative subdivisions of states

County Governmen USE COUNTIES and LOCAL GOVERNMENT

County History USE COUNTIES and LOCAL HISTORY

(Scope Note Added) Algonquian language of the Cree tribe of American Indians An American Indian people of subarctic Canada (British Columbia to Labrador) and the northern U.S. Plains (Montana and

North Dakota) (also, dispersed kin)

CULTURAL LITERACY Oct. 1993 Having sufficient common knowledge, i.e., educational background, experiences, basic skills, and training, to function competently in a given society (the greater the level of comprehension of the given society's habits, attitudes, history, etc., the higher the level of cultural literacy)

CULTURAI MAINTENANCE The effort to sustain a culture by asserting its way of life (the ideology, lifestyle, arts, language, etc.) and preserving its material embodiment (landscapes, architecture, and other artifacts)

Cultural Preservation Cultural Revitalization

CURRICULUM BASED ASSESSMENT Direct and frequent measurement of stu-dent performance on the classroom curriculum in order to ascertain student instructional needs — used principally for instructional decision making, the approach also supports screening, placement, and monitoring in special education (note: see also the Identifier "Curriculum Related Test-

Curriculum Based Measurement
Curriculum Referenced Assessment

The Siouan language of the Sioux tribe of American Indians (note: use "Sioux (Tribe)" for the Dakota people—use the Identifier "Siouan Languages" for the broad language family to which Dakota belongs)

A CONVERSION

Process of moving data from one format to another, e.g., from tape to disk, from one computer to another, from one application to another on the same computer. DATA CONVERSION to another on the same computer, from print to machine-readable form UF Conversion (Format)

DAY CARE EFFECTS Short- or long-term effects of day care placement on children's cognitive, social, emotional, and physical development and on relations between parents and children— also includes broader social consequences of day care attendance and availability

DECISION SUPPORT SYSTEMS Computer-based decision-making and plan-ning systems that enable users to predict the impact of decisions before they are

DEMONSTRATIONS (SCIENCE) Descriptions or explanations of scientific phenomena by means of experiments, examples, specimens, or practical applicaDEVELOPMENTAL DELAYS Gaps between developmental (mental or functional) age and chronological age—serious delays may eventually be diagnosed as specific developmental disabilities, while less severe delays may catch up over time with normal development and disappear (note: see also the Identifier "Language

Delayed"—prior to Jun94, "Developmen-tal Disabilities" was sometimes used to

index this concept) UF Delayed Development (Individuals)
Developmentally Delayed

Diesel Fuel USE DIESEL ENGINES and FUELS

Dietary Technicians USE DIETITIANS

USE DIETITIANS

DINOSAURS

Dec. 1992
SN Herbivorous or camivorous reptiles of the extinct orders Saurischia and Ornithischia from the Mesozoic era

DISCIPLINE BASED ART EDUCATION Oct. 1994 Art education that draws its content from the four foundational art disciplines of art production, art history, art criticism, and aesthetics, rather than emphasizing art production (studio experiences) alone

Disposition (Individuals) USE PERSONALITY

Dispositional Characteristics USE PERSONALITY TR. TRAITS

Diversity (Cultural) as an Observation or a Fact USE CULTURAL DIFFERENCES

Diversity (Cultural) as a Value
USE CULTURAL PLURALISM

DIVERSITY (INSTITUTIONAL) May 1993 The multiplicity of variables that embody an institution, including its policies and programs, organization, reputation, and staff client population characteristics (note: see also the Identifiers "Diversity (Faculty)," "Diversity (Student)," etc.)

DOWNLOADING The process of transferring or transmitting a file, program, software, data, character sets, etc., from a distant to a nearby computer, from a larger to a smaller computer, or from a computer to a peripheral device

Dysphasia USE APHASIA

Dysphoria
USE DEPRESSION (PSYCHOLOGY)

EARLY ADOLESCENTS SN Age group between, and overlapping with,
"Preadolescents" and "Adolescents" — approximately 11-15 years of age

UF Early Adolescence

Young Adolescents

EATING DISORDERS Jun. 1993 SN Gross disturbances in eating patterns UF Appetite Disorders

ECONOMETRICS
SN Application of mathematical and statistical techniques to economic analyses

ELECTROCHEMISTRY Branch of physical chemistry dealing with the interconversion of electrical and chemical energy

Alphanumeric data (with or without graphics) that can be stored on, and manipulated by, computers UF Machine Readable Text

EMOTIONAL ABUSE Jun. 1994 SN Continual belittling, threatening, blaming, ignoring, rejecting, or otherwise inflicting of psychological pain

UF Psychological Abuse

ENROLLMENT MANAGEMENT May 1993
SN A set of systematic, interrelated activities for controlling enrollment patterns—involves marketing, recruitment, admissions, pricing, and financial aid

ENVIRONMENTAL SCANNING May 1993 SN Assessing events and identifying trends, in the external environment, that portend challenges or opportunities—integral component of strategic planning

EVIDENCE (LEGAL)

Oct. 1994

SN Material, such as testimony, records, or objects, used in forming conclusions or judgments in legal matters—often presented to courts or juries during trials

EXCEPTIONAL PERSONS (1978 1994) Sep. 1994
SN Invalid term—used inconsistently in indexing—see "Disabilities" and/or "Gifted"
UF Exceptional (Atypical) (1966 1978)
Exceptional Children (1966 1978)
Exceptional Students (1966 1978)

FAMILY WORK RELATIONSHIP

SN Effect of work on the family and/or effect
of the family on work

UF Family Joh Relationship

UF Family Job Relationship Job Family Relationship Work Family Relationship

SN Principle of shared power between a central government and constituent unit governments—often prescribed by a written constitution (note: see also the Identifiers "Federalists" and "Federalist Papers")

FEMINIZATION OF POVERTY Jun. 1993 SN Trend towards disproportionately large numbers of women at or below poverty level

FETALALCOHOLSYNDROME

Jan. 1994
SN A medical condition resulting from material alcohol abuse during pregnancy—it is characterized by growth deficiency (low weight or short length), facial and other physical abnormalities, and central nervous system impairments (e.g., abnormal smallness of the head, hyperactivity, motor problems, and cognitive disabilities)

FIRST BORN

SN Children or adults born first among siblings (note: see also the Identifiers "Second Born," "Middle Born," and "Last Born")

UF Eldest Siblings Firstborns

FISCAL NEUTRALITY

SN Equity goal that the level of spending for public education may not be a function of local or school district wealth (note: occasionally refers as well to the notion of equal probability of college attendance across all incomes)

UF Wealth Neutrality

FOSSIL FUELS

Dec. 1992

SN Hydrocarbon fuels derived from the remains of former life

FOUND OBJECTS
Oct. 1994
SN Usually familiar and often freely available materials that are found, selected, and used in artwork, play activity, etc.
UF Found Materials

FREEDOM UF Liberty

Oct. 1994

Fuel Oil

Fuel Oil (former UF of "Fuels") USE FOSSIL FUELS and OIL GASOLINE Dec. 1999.
(former UF of "Fuels")

SN Mixture of liquid hydrocarbons used chiefly to fuel spark-ignited internal combustion engines

Gender Blas USE SEX BIAS

Gender Discrimination
USE SEX DISCRIMINATION

Gender Role (Sex) USE SEX ROLE

Gender Stereotypes
USE SEX STEREOTYPES

GENERAL MATHEMATICS

Dec. 1992

SN Mathematics courses, frequently of an introductory or remedial nature, that emphasize everyday computational operations and usually include practical applications—most commonly conducted for noncollege-bound secondary school students

GEOCHEMISTRY

Dec. 1992

SN Study of the chemistry of the earth (or a celestial body)

GEOGRAPHIC ISOLATION

May 1993

SN A condition characterized by remoteness, relative inaccessibility, and sparsity or small size of population (note: prior to May93, the Identifier "Isolation (Geographic)" was used to index this concept—see also the current Identifier "School District Isolation")

GLOBAL EDUCATION Nov. 1994
SN Learning/teaching activities across all grade levels that focus on the inter-relatedness of peoples, cultures, and nations—subfields include world geography, world history, and international relations

UF Global Studies Education World Studies Education

GLOBAL WARMING

SN Gradual increases in the earth's average temperatures (note: if appropriate, use the more specific term "Greenhouse Effect")

GREENHOUSE EFFECT

3n Global warming caused by atmospheric gases and particulates that trap heat and radiate it back to earth—of concern is possible runaway warming due to buildups of carbon dioxide and other gases through fossil fuel burning and deforestation

Group Decision Support Systems
USE DECISION SUPPORT SYSTEMS
and GROUP DYNAMICS

GUILT

May 1993

SN Emotional state produced by the knowledge of having committed a real or imagined ethical, moral, or religious offense—less commonly in educational literature, the fact of having committed a violation of law and, possibly, being liable for the penalties associated with that violation (note: see related Identifiers "Shame" and "Self Blame")

HABITATS

SN Places where animals or plants normally live (note: for human habitats, use "Housing," "Place of Residence," "Residential Patterns," etc.)

Handicap Discrimination (Del Mar94)
USE DISABILITY DISCRIMINATION

Handicap Identification (Del Mar94)
USE DISABILITY IDENTIFICATION

HAPPINESS

SN State of psychological well-being characterized by dominantly agreeable emotions ranging from contentment to intense joy UF Joy

HARMONY (MUSIC)

Oct. 1994

SN The simultaneous occurrence of musical notes or tones

HEALTH RELATED FITNESS Nov. 1994
SN Physical fitness related to basic functional health, in contrast to "skill-related" physical fitness or the ability to perform in sports

Heating Oils (former UF of "Fuels") USE FOSSIL FUELS and OIL

HOMOPHOBIA
Jun. 1993
SN Fear of or antipathy toward homosexuality and homosexuals
UF Anti Gay Bias
Homonegativism

HOPI

N (Scope Note Changed) The Uto-Aztecan language spoken by the Hopi tribe of American Indians

HOPI (TRIBE)

SN An American Indian people of northeastern Arizona (and dispersed kin)

UF Moqui (Tribe)

HYDROLOGY
SN Study of the occurrence, circulation, distribution, and properties of the water of the earth and its atmosphere

Ibe (Del Oct93) USE IGBO

IGBO Jul. 1966 SN (Scope Note Added) A Kwa language of Nigeria

IMMIGRATION
 SN The process in which people move to and permanently settle in a country other than their native one (note: for legal and other aspects, see also "Immigration..." Identifiers)

IN LOCO PARENTIS

Apr. 1993
SN A legal doctrine charging schools and higher education institutions with the authority and responsibility to supervise, regulate, care for, and protect students "in the place of the parent"

UF Loco Parentis

NCLUSIVE SCHOOLS

N Educational institutions/programs in which students with disabilities and other special needs are integrated fully into regular curricular and noncurricular activities—"inclusion" means successfully educating all students (whether with or without disabilities, disadvantages, etc.) together in the same schools and classrooms, while celebrating the resulting diversity, including various abilities and cultures

UF Full Inclusion Inclusion (Education) Inclusive Education

Indian Controlled Schools
USE AMERICAN INDIAN EDUCATION
and TRIBALLY CONTROLLED EDUCATION

INDIGENOUS POPULATIONS Mar. 1980 SN (Scope Note Changed) People born in a specific region, country, etc., or whose ancestry is connected therewith (note: when appropriate, coordinate with geographic Identifier(s), e.g., "Australia (Northern Territory)") INDIVIDUALIZED FAMILY SERVICE PLANS

SN Early intervention programs developed by multidisciplinary teams of health care and educational practitioners and the families of young children who have physical or mental disabilities or are at risk for such disabilities—each program or "plan" is written to provide for the individual child's developmental needs, the family's needs related to enhancing the child's develop-ment, and the early intervention services

UF Individual Family Service Plans

(Scope Note Added) (Note: since the mid-1980s, most industrial arts programs have INDUSTRIAL ARTS become technology education programs — see the Descriptor "Technology Educa-

INFANT CARE Nurturant care to meet the physical, mental, emotional, and social needs of young children from birth to about 24 months of age — encompasses a variety of care set-tings, such as day care centers, family day care homes, the child's own home, foster homes, hospitals, and other establishments

INFORMATION INDUSTRY SN All enterprise in the All enterprise involved in providing access to information, whether via traditional print media, electronic technologies, or

INFORMATION LITERACY SN The ability to The ability to access, evaluate, and use information from a variety of sources (note: use the more generic term "Information Skills," if appropriate)

INFORMATION POLICY Governing principles that serve as guide-lines or rules for decision-making and ac-tion in the area of information

BRMATION SKILLS

Sep. 1994
Basic to expert-level informational abilities, involved in finding information, and reading, analyzing, interpreting, applying, maintaining, and communicating it skillfully and appropriately (note: do not confuse with "Information Literacy") INFORMATION SKILLS

INSTRUMENTATION AND ORCHESTRATION

Study or use of the various musical instru ments-includes organizing instrumental groups, e.g., orchestras or bands, and com-posing instrumental music UF Orchestration (Music)

Insulation (Sound)
USE ACOUSTIC INSULATION

REGRATED LEARNING SYSTEMS Aug. 1994
Networked computers running broad-based curriculum software and a management system that tracks students' progress
Computer Based Integrated Learning Systems INTEGRATED LEARNING SYSTEMS

tems Integrated Instructional Systems (Com-

INTEGRATED SERVICES Collaboration among the education, health, and social service sectors to provide a school-based or school-linked comprehensive, coordinated continuum of preventive and prescriptive student and family ser-vices—usually for persons considered to be at-risk

Comprehensive Services (School Linked) Full Service Schools (Human Services) School Based Interagency Services School Linked Services

INTELLIGENT TUTORING SYSTEMS Sep. 1994 Computer-assisted instructional systems employing the principles of artificial intel-ligence to carry on dialogs with students and use student responses to assess learning UF ICAI

Intelligent CAI Systems
Intelligent Computer Assisted Instruction

INTERACTIVE TELEVISION Two-way television systems that allow interaction between the viewer and whatever is on the screen—used in education, teleconferencing, telebanking, teleshopping, electronic opinion polling, telebanking,

Interactive Cable Television
Interactive Satellite Television
Two Way Television

(Scope Note Changed) Action performed to direct or influence behavior (note: if possible, use "Crisis Intervention," "Early Intervention," "Perreferral Intervention," INTERVENTION or other, more precise terminology)

Invasion of Privacy USE PRIVACY

Mar. 1994 IROQUOIS (TRIBE) ODOIS (TRIBE)
An American Indian people comprising the
Iroquois Six Nations (Cayuga, Mohawk,
Oneida, Onondaga, Seneca, and Oneida, Onondaga, Seneca, and Tuscarora)—originally centered in New York, present-day Iroquois live primarily in New York, Wisconsin, Oklahoma, Ontario, and Quebec

Judicial System USE COURTS

KNOWLEDGE BASE FOR TEACHING Nov. 1994 SN Variable construct of skills and informa-tion considered desirable and important for prospective and experienced teachers to -categories include: subject content know-categories include: subject content knowledge, general pedagogical knowledge, curriculum knowledge, pedagogical con-tent knowledge, knowledge of learners and their characteristics, knowledge of educa-tional contexts, and knowledge of educa-tional purposes and values (note: do not confuse with "Teacher Competencies" or the Identifier "Teacher Knowledge") Teacher Education Knowledge "Deacher Studiestics"

UF Teacher Education Knowledge Base Teacher Knowledge Base Teaching Knowledge Base

KNOWLEDGE REPRESENTATION WLEDGE REPRESENTATION Aug. 1994
The encoding of knowledge in biological systems or computers (note: see also such Identifiers as "Knowledge Bases" and "Knowledge Engineering"

Laboratory Preschools
USE LABORATORY SCHOOLS
and PRESCHOOL EDUCATION

LABORATORY SCHOOLS (Scope Note Changed) Schools of pre-school, elementary, or secondary grades attached to universities or colleges for purposes of research and teacher training

LAKOTA Mar. 1994 SN The Siouan language of the Lakota tribe of American Indians

UF Lakhota Teton Dakota

Mar. 1994 LAKOTA (TRIBE) Largest and westernmost of the Sioux peoples, principally in South Dakota, Montana, and Manitoba (and dispersed kin) UF Teton Sioux (Tribe)

Language Handicaps (Del Mar94)
USE LANGUAGE IMPAIRMENTS

LANGUAGE PROCESSING

Aug. 1978
SN (Scope Note Changed) The cognitive processing of spoken or written language, ranging from the construction of spoken or written messages to the absraction of meanwritten messages to the abstraction of mean-ing from language—includes the computer-ized simulation of these processes (note: for the concept of using ordinary language to communicate with computers, use "Natu-ral Language Processing")

LATE ADOLESCENTS Age group between, and overlapping with, "Adolescents" and "Young Adults" — approximately 16-23 years of age

Late Adolescence Older Adolescents

LIBRARIAN TEACHER COOPERATION

Sep. 1994 Cooperative interaction between librarians and teachers

UF Teacher Librarian Cooperation

MACROECONOMICS Oct. 1994 Study of the overall aspects and workings of large economic systems, as of a nation

MATHEMATICAL APTITUDE Natural capacity or inclination for skillful performance of mathematical tasks Mathematics Aptitude

Quantitative Aptitude

Mbya Guarani USE GUARANI

Oct. 1994 A succession of single musical tones in some rhythmic scheme or pattern

METIS (PEOPLE) People in Canada and adjacent areas of the U.S. who are of mixed Native American and European ancestry

MICROECONOMICS Study of some portion of an economy such as individuals, a household, a company, an industry, or a sector

MICROWORLDS Computer-based learning tools that provide exploration and manipulation within analogical representations of some aspect of the natural world

UF Comptuer Based Microworlds Computer Microworlds

MISSISSIPPI BAND OF CHOCTAW American Indians of east central Mississippi who are descendants of Choctaw not removed to the Indian Territory (Okla-homa) in the 1830s

MIXED AGE GROUPING EDAGE GROUPING

Grouping children or students so that the chronological age span is greater than one year — the primary purpose is to maximize age-group interaction and cooperation (note: do not confuse with "Nongraded Instructional Grouping" or "Multigraded Classes," both typically including various ages but not accessed. ages, but not necessarily for the purpose of

uf Multiage Grouping

MODULAR ARITHMETIC OULAR ARITHMETIC

An arithmetic of a finite rather than an infinite set of numbers—the maximum integer (n) selected is known as the modulus, and the arithmetic is referred to as ius, and the arithmetic is referred to as "arithmetic modulo n"—any number greater than n is expressed as the remainder left after its division by n—sometimes called "clock arithmetic," because the clock provides an example (e.g., n=12)

UF Clock Arithmetic

Finite Arithmetic

MOLECULAR BIOLOGY Science dealing with the structure and func-tion of the molecules (e.g., proteins, nucleic acids, enzymes) that make up living organ-

Meter Oil USE LUBRICANTS and OIL

MULTIMEDIA MATERIALS Materials, frequently computer applica-tions, that combine some or all of text, sound, graphics, animation, and video into integrated packages

National Achievement Tests
USE NATIONAL COMPETENCY TESTS

NATIONAL CURRICULUM SN ABY CHITICAL Any curriculum adopted by a particular country that students of given ages or academic levels take in order to advance or graduate—may be voluntary or required (note: if appropriate, use the more specific term "British National Curriculum")

National Tests (of Achievement)
USE NATIONAL COMPETENCY TESTS

NATURAL GAS ("Natural Gases" was a former UF of "Fuels") SN A combustible mixture of hydrocarbon gases, usually found in sedimentary rocks and in association with petroleum deposits

NATURAL LANGUAGE PROCESSING Aug. 1994 Human communication with computers using natural languages, such as English and Japanese, rather than programming lan-guages, such as BASIC and PASCAL (note: do not confuse with "Computational Linguistics"-for other applications, see the Identifiers "Natural Language" and "Natural Languages") UF Natural Language Understanding Systems

NAVAJO (NATION) The largest American Indian tribe-cen-tered on the Navajo Reservation in northeast Arizona and adjacent areas of New Mexico and Utah

Oct. 1994 SN Failure to do what a reasonable, careful conscientious person is expected to do

Sep. 1994 NONMETROPOLITAN AREAS Geographic areas outside of cities and sub

Normalization (Handicapped) (Del Mar94) USE NORMALIZATION (DISABILITIES)

Quantitative Literacy

SN Familiarity with the use of numbers, or basic competence in mathematics UF Mathematical Literacy

OGLALA SIOUX (TRIBE) American Indian people constituting a sub-division of the Lakotas and located mainly in southwestern South Dakota (includes Any viscous, combustible, water-immis-cible liquid composed principally of hydro-carbons and obtained from the ground (note: for "Vegetable Oils" or "Animal Oils," use those Identifiers)

Crude Oil Mineral Oil Petroleum (Oil)

OJIBWA (Scope Note Added) Algonquian language spoken by North American Indians known as Chippewas in the U.S. and Ojibwas in Canada, and by Ottawas, Algonquins, and others (note: use Identifiers for dialects "Ottawa," "Algonquin," etc.)

ORAL TRADITION Aspects of a society's culture (e.g., history literature, cultural character) that are passed by mouth from generation to generation in ritual drama, songs, poetry, narratives, games, oratory, etc., rather than by written

Panjabi (Del Jul94) USE PUNJABI

Participatory Action Research USE ACTION RESEARCH and PARTICIPATORY RESEARCH

PARTNERSHIPS IN EDUCATION Collaborative arrangements and endeavors between and among schools and other entities (corporate enterprises, community agencies, student/parent/citizen groups, colleges, other schools, individuals, etc.) designed to share resources, achieve common goals, and foster educational achievement, improvement, and reform (note: see also the Identifiers "Coalitions" and Teacher Partnerships")

Academic Alliances Collaboratives (Education) Educational Partnerships Partners in Education Projects

Perceptual Handicaps (Del Mar94)
USE PERCEPTUAL IMPAIRMENTS

PERFORMANCE TECHNOLOGY Systematic design, analysis, selection, implementation, and evaluation of prodactivities to influence human and organizational performance UF Human Performance Technology

Petroleum (Oil and Gas) USE FOSSIL FUELS

PETROLOGY The branch of geology concerned with the origin, occurrence, structure, classification, and history of rocks

Petrography Rock Studies

PHYSICAL FITNESS TESTS Tests designed to measure one or more health-related fitness components, such as cardiorespiratory capacity, body composi-tion, muscular strength and endurance, and low back/hamstring flexibility

POLICY ANALYSIS Systematic study of the nature, rationale, cost, impact, effectiveness, implications, etc., of existing or alternative policies, using the theories and methodologies of relevant social science disciplines (note: use as a minor Descriptor for examples of this kind of study — use as a major Descriptor only as the subject of a document)

POLYGONS Closed plane (two-dimensional) figures formed by the line segments that connect three or more points not in a straight line (note: see also specific Identifiers, e.g., "Triangles," "Quadrilaterals") PORTFOLIO ASSESSMENT Dec. 1994 SN Systematic collection of a student's work samples, records of observation, test resamples, records of observation, test re-sults, etc., over a period of time for the purpose of evaluating student growth and achievement—used occasionally with populations other than students (note: prior to Dec94, "Portfolios (Background Mate-rials)" was used, usually with "Student Evalu-ation," to index this concept)

PRAISE
Apr. 1993
SN Expression of approval or favorable judg-

PRENATAL CARE Apr. 1993 SN Medical, educational, and social services provided or obtained during pregnancy UF Fetal Care

PRENATAL INFLUENCES (Scope Note Changed) Factors occurring between conception and birth and affecting the physical or mental development of an individual (note: use the more precise "Prenatal Care" if appropriate)

PREREFERRAL INTERVENTION Activities designed to increase classroom teachers' capacity to instruct and manage difficult-to-teach students, thereby reducing unnecessary and inappropriate special education referrals — often "brokered" by one or more support staff, such as a special educator or school psychologist

UF Prereferral Assessme

PRINTED MATERIALS

Dec. 1994

SN Communication media making use of paper
or a similar substance to inscribe text, illustrations, etc.
UF Print Media (Materials)
Printed Text

SN The process of making a picture or design from an impression of an engraved metal plate, wooden block, silkscreen stencil, lithographic stone, photographic negative,

UF Print Making Arts

PROFESSIONAL DEVELOPMENT SCHOOLS

Designated elementary or secondary schools that operate programs, generally charac-terized by college/school district collabora-tion, in three areas—teacher education and development, research and experimentation, and improvement of teaching and student learning (note: see also related Identifiers such as "Partner Schools," "Cen-ters of Pedagogy," "Professional Develop-ment Centers," and "Teacher Education

Academies")
UF Clinical Schools (Teacher Education)
Professional Practice Schools

PROFESSIONAL ISOLATION A condition of professional individuals or groups characterized by lack of communigroups cnaracterized by lack of communi-cation or interaction with colleagues, the relevant professional community, or re-lated professional organizations (note: prior to May93, the Identifier "Isolation (Pro-fessional)" was used to index this con-cept—see also the current Identifier "Teacher Isolation") Teacher Isolation")

USE PROGRAMMED INSTRUCTION

UF Melancholy

School Bus Drivers USE BUS DRIVERS and SCHOOL BUSES

SCHOOL DISTRICT WEALTH OOL DISTRICT WEALTH Oct. 1993
Primary measure of a school district's ability to pay the costs of education—calculated variously by states, etc., based on
property tax revenues, per student expenditures, median family income, and other

SCIENCE LIBRARIES NCE LIBRARIES
Aug. 1994
Libraries, library departments, library branches, etc., devoted to one or more scientific or technical areas Science and Technology Libraries Technical Libraries

SCIENCE PROCESS SKILLS Broadly transferable intellectual skills, appropriate to all scientific endeavors-in-11 basic process skills (e.g., observing, infer-ring, measuring communicating, classifyring, measuring communicating, classifying, predicting, using time-space relations, using numbers) and integrated process skills (e.g., controlling variables, defining operationally, formulating hypotheses, interpreting data, experimenting, formulating models) (note: see also the Identifier "Science A Process Approach" for a curriculum espousing the learning and use of these skills)

SCREEN DESIGN (COMPUTERS) The arrangement of the elements on a computer screen—includes the context, amount, and density of information presented and the manner of presentation, e.g., capital vs. lower case, interlinear spacing, line length, row or columnal format, etc. (note: prior to Aug94, "Screen Format" was the preferred Identifier for this concept)

Computer Display Design Display Layout (Computers)

SEARCH INTERMEDIARIES Individuals trained in database searching who perform online or other searches for

SELECTION TOOLS Items used to assist in selection activities, neems used to assist in selection activities, e.g., choosing reading materials, acquiring merchandise—most commonly refers to selection tools used by librarians, including such items as bibliographies, reviews, subject lists, and core collection lists Book Selection Aids

(Scope Note Changed) Acting or tending to harm or destroy oneself (note: for self-infliction of physical injury, use "Self Injurious Behavior") SELF DESTRUCTIVE BEHAVIOR

SELF INJURIOUS BEHAVIOR

Oct. 1993
SN Self-infliction of physical injury, through such behaviors as head banging, biting, scratching, hair pulling, punching, pinching, and gouging—may occur among normal populations, but with greater frequency, severity, and chronicity among the developmentally disabled

UF Head Banging

SELF MANAGEMENT Deliberate use of learned strategies to maintain or modify one's own attitudes and actions—such strategies include goal set-ting, self-monitoring, self-correcting, and self-solicitation of feedback Behavioral Self Management

Self Mutilation (Del Oct93)
USE SELF INJURIOUS BEHAVIOR

SEVERITY (OF DISABILITY) Extent of a mental, physical, or sensory impairment, from mild to severe (note: prior to Jun94, "Impairment Severity was the preferred Identifier for this concept) UF Impairment Severity

SICK CHILD CARE Day care alternatives for children who are ill and already involved in regular day care or school programs, including care in isolated areas of the child's own day care center/school, separate sick child care centers family day. ters, family day care homes open to sick children, and the child's own home by home health personnel or known adults (including parents under family leave poli-cies or otherwise)

UF Ill Child Care

SIOUX (TRIBE) An American Indian people mainly of the upper Mississippi area and the Great Plains (and dispersed kin) (note: use "Dakota" for the Sioux language—use the Identifier "Siouan Languages" for the broad language family to which Dakota belongs)

Site Based Management (Schools)
USE SCHOOL BASED MANAGEMENT

Small settlements of both residences and Smail settlements of both residences and businesses, often acting as trade and service centers for surrounding rural areas—largely urban in character, small towns are gener-ally distinguished by such qualities as ready access to local political figures and a closeknit sense of community, rather than de-fined by population size (frequently 2,500-10,000, but can be 25,000 or higher)

Sociology of Education
USE EDUCATIONAL SOCIOLOGY

SOLAR SYSTEM The sun and all the celestial bodies that revolve around it (including the planets and their moons, the asteroids, comets, and meteoroids)

Speech Handicaps (Del Mar94) USE SPEECH IMPAIRMENTS

SPEECH LANGUAGE PATHOLOGY The science and practice of screening, assessing, diagnosing, rehabilitating, and preventing disorders of speech, language, and related communication functions.

UF Speech and Language Pathology

Speech Pathology (Del Jun94)
USE SPEECH LANGUAGE PATHOLOGY

Self-luminous celestial bodies of hot gas held together by gravity—their energy is produced by nuclear-fusion reactions

STATE REGULATION State/provincial government control or influence based on legislation UF Provincial Regulation

STRATEGIC PLANNING Process of continuous planning for change, which assesses an organization's or program's internal and external environment, analyzes the implications of rel-evant trends, and identifies effective strategies for achieving a desired future state

UF Strategic Management

Studies in which data are gathered from students on their attitude. STUDENT SURVEYS students on their attitudes, interests, activities, characteristics, etc. (note: use a a minor Descriptor for examples of this kind of survey—use as a major Descriptor only as the subject of a document)

IDIO ART

Oct. 1994
Instruction and study concerned with the practice of drawing, painting, sculpture, printmaking, and other visual arts
Art Making (Instruction)
Art Production Curriculum
Art Studio Courses STUDIO ART

SUSTAINABLE DEVELOPMENT Development that meets the needs of the present without compromising the ability of future generations to meet their own needs (i.e., development that nurtures the economy and improves the quality of life without undermining the natural resources and environmental integrity on which they depend) (note: see also the Identifier "Sustainable Agriculture")

Taste (Aesthetics)
USE AESTHETIC VALUES

ECHER COMPETENCIES

Explicit, demonstrable knowledge and skills necessary for performing the role of teacher (note: if possible, use the more precise terms "Competency Based Teacher Education" and/or "Teacher Competency Testing") TEACHER COMPETENCIES

TEACHER COMPETENCY TESTING Jun. 1993
SN Measurement of the ability of teachers or
would-be teachers to demonstrate specific,
predetermined, and desirable pedagogical
techniques or subject-matter knowledge UF Teacher Testing (for Competency)

TECHNOLOGY EDUCATION General education programs concerned with the study of technology, the use of techni-cal means and processes to solve problems, and the impact of technology on individuals and society (note: since the mid-1980s, "Technology Education" has become the preferred name for "Industrial Arts" pro-

grams)
UF Industrial Technology Education Technological Education

Tempo (Cognition)
USE CONCEPTUAL TEMPO

TEMPO (MUSIC) Oct. 1994 The rate of speed at which a musical com-position is performed

THERMAL INSULATION Prevention of transfer of heat (by conduc-tion, convection, or radiation) from a hot area to a cold

UF Insulation (Heat)

TOTAL QUALITY MANAGEMENT AL QUALITY MANAGEMENT May 1994
Management approach to long-term success through customer satisfaction (based on concepts developed by W. Edwards Deming and Joseph M. Juran)—TOM involves all members of an organization in continuously improving processes, prod-ucts, and services

TRIANGULATION A research technique for increasing the validity of one's results by using multiple and diverse (at least three) collection methand diverse (at least three) collection methods or data sources, e.g., using both qualitative and quantitative measures or obtaining perspectives from several different groups—also, occasionally refers to a procedure used in surveying and navigation to determine distance (note: do not use for family triangulation—see the Identifier "Family Triangles" for that concept)

TRIBAL GOVERNMENT BAL GUVERNMENT Sep. 1994 Includes the modern government(s) of American Indian tribes and Canada/Alaska native villages, as well as traditional/con-temporary political institutions of tribal societies in general

TRIBALLY CONTROLLED EDUCATION

May 1993 Educational ideologies, philosophies, theories, and practices specified by a native tribal government or other forms of native sovereignty, as well as educational institu-tions managed by such authorities Contract Tribal Schools

Tribal Colleges Tribal Schools

Tupi Guarani USE GUARANI

USER FRIENDLY INTERFACE Any connection or link to a computer system that is easy to learn and use (note: prior to Sep94, the Identifier "User Cordial Interface" was used to index this concept)

Aug. 1994
Organizations or individuals that market and sell materials and/or services VENDORS

Insulting, intimidating, or excessively criti-cal statements (oral or written)

Visually Handicapped Mobility (Del Mar94)
USE VISUALLY IMPAIRED MOBILITY

VOLCANOES CANOES Nov. 1994
Vents in the crust of a planet or moon through which lava, steam, ash, etc., are expelled either continuously or at irregular intervals—also, the mountains or hills formed by emissions from such vents
Volcanology

WAIT TIME

N The duration of pauses separating utterances in a conversation, e.g., the time a teacher waits after asking a question and after receiving a response (note: use the Identifiers "Time Lag" for broader contexts and "Time Delay" for response prompting and fading with the disabled—see also the generic Identifier "Waiting")

UF Teacher Wait Time WAIT TIME

WEEDING (LIBRARY) Practice of discarding or transferring to storage excess copies, rarely used books, and materials considered no longer useful in the library

WETLANDS Low areas with shallow water or watersoaked soils (e.g., freshwater marshes, salt-water marshes, swamps, mud flats, bogs)

Bogs Fens Marshes Salt Marshes Swamps

WILDERNESS An environmental condition that is char-An environmental conduction that is characterized by a naturally developed life community undisturbed by human activity, often featuring remoteness, ruggedness, and sometimes potential dangers (note: coordinate with "Outdoor Activities" or "Outdoor Education" for experience or education relating to wilderness)

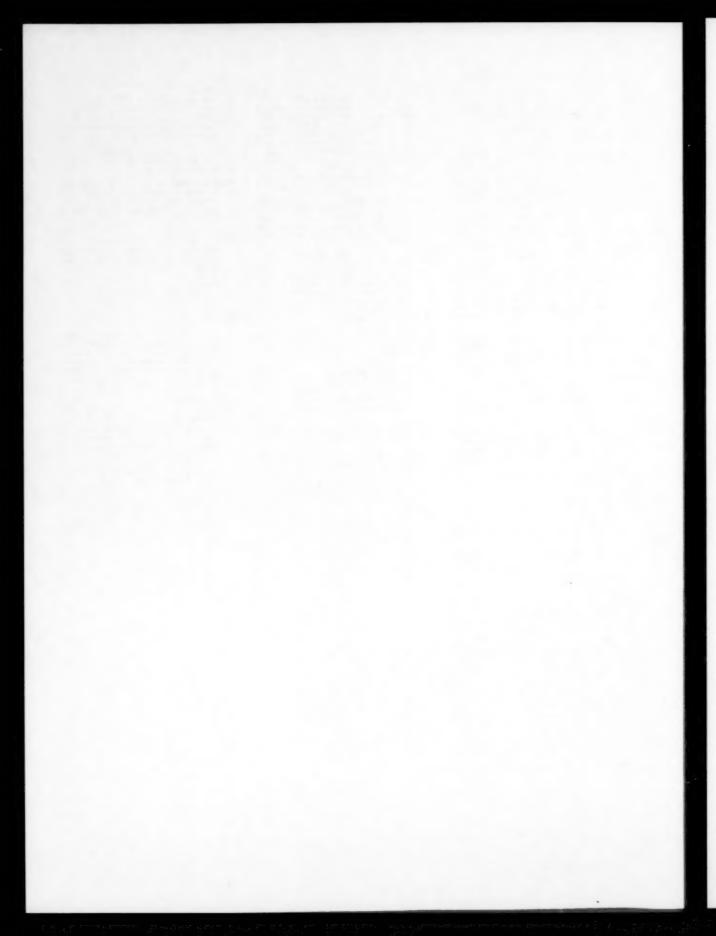

RKSTATIONS

Ang. 1994
Individual work areas equipped for performing a particular type of task—usually refers to terminals or microcomputers in a local area network, or to stand-alone microcomputer configurations that WORKSTATIONS crocomputer configurations that may in-clude such peripherals as printers and optical/

video disk systems
UF Computer Workstations
Work Stations (Home or Office)

ZUNI (TRIBE) (TRIBE)

Jan. 1994
An American Indian people of western New
Mexico (and dispersed kin) (note: use the
Identifiers "Zuni" for the Zuni language
and "Zuni (Pueblo)" for the Zuni Reservation in New Mexico)

Submitting Documents to ERIC

What Kinds of Documents to Send ERIC

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, supervisors, librarians, researchers, media specialists, counselors, and every other type of educator, as well as students and parents) that it must collect a wide variety of documentation in order to satisfy its users. Examples of the kinds of education-related materials collected are the following:

- · Research/Technical Reports
- Program/Project Descriptions
- · Opinion Papers, Essays, Position Papers
- Monographs, Treatises
- Speeches and Presentations
- Evaluation Studies
- · Feasibility Studies
- · State of the Art Studies
- Instructional Materials
- Syllabi
- · Teaching Guides
- Resource Guides
- Manuals
- Handbooks
- Curriculum Materials
- · Conference Papers
- Bibliographies
- · Legislation and Regulations
- · Texts, Questionnaires, Measurement Devices
- · Vocabularies, Dictionaries, Glossaries, Thesauri
- Statistical Compilations
- Taxonomies and Classifications
- Dissertations

ERIC does not accept non-print materials (such as films, filmstrips, videotapes, tapes, records, cassettes, etc.). However, if such material accompanies a printed text, ERIC may process the printed text and refer the user to the accompanying non-print components, as long as a source of availability for them can be cited.

A document does not have to be formally published to be entered into the ERIC database. In fact, ERIC seeks out the unpublished or "fugitive" material not usually available through conventional library channels.

Selection Criteria Employed by ERIC

QUALITY OF CONTENT

All documents received are evaluated by subject experts against the following kinds of quality criteria: contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness.

LEGIBILITY AND REPRODUCIBILITY

Documents may be type-set, typewritten, xeroxed, or otherwise duplicated. They must be legible and easily readable. Letters should be clearly formed and with sufficient contrast to the paper background to permit filming. Colored inks and colored papers can create serious reproduction problems. Standard 8½"x 11" size pages are preferred.

Two copies are desired, if possible: one for processing into the system and eventual filming, the other for retention and possible use by the appropriate Clearinghouse while processing is going on. However, single copies are acceptable.

REPRODUCTION RELEASE

For each document submitted, ERIC requires a formal signed Reproduction Release form indicating whether or not ERIC may reproduce the document. A copy of the Release Form appears as a separate page in each issue of this journal. Additional Release Forms may be copied as needed or obtained from the ERIC Facility or any ERIC Clearinghouse. Items for which releases are not granted, or other non-reproducible items, will be considered for announcement only if they are noteworthy education documents available from a clearly identified source, and only if this information accompanies the document in some form.

Items that are accepted, and for which permission to reproduce has been granted, will be made available by the ERIC Document Reproduction Service (EDRS).

Advantages of Having a Document in ERIC

Contributors of documents to ERIC can benefit in the following ways:

- Announcement—Documents accepted by ERIC are announced to some 2,000 organizations receiving the abstract journal Resources in Education (RIE).
- Publicity—Organizations that wish to sell their own documents in original copies can have this availability (together with address and price information) announced to users in RIE, thus serving to publicize their product. After the document is sold out at the original source, it is then still available through EDRS, if permission to reproduce has been granted to ERIC. (Original copy prices, while the supply lasts, are generally less, and are therefore more attractive to users, than EDRS on-demand duplication prices).
- Dissemination—Documents accepted by ERIC are reproduced on microfiche and distributed (at no cost to the contributor) to the more than 800 current subscribers to the ERIC microfiche collection.
- Retrievability—The bibliographic descriptions developed by ERIC are retrievable by the thousands of subscribers to the online database retrieval services (offered by commercial vendors such as BRS and DIALOG). In addition there are thousands of locations offering computer searches of ERIC based on either compact disk (CD-ROM) systems (offered by DIALOG, and SilverPlatter) or other local computer-based systems.
- Always "In Print"—The presence of a master microfiche
 at EDRS, from which copies can be made on an on-demand
 basis, means that ERIC documents are constantly available and never go "out of print." Persons requesting copies
 from an original source can always be referred to ERIC.
 This archival function relieves the source of a distribution
 burden and solves the availability problem when the
 source's supply has been exhausted.

In addition, submission of a document to ERIC reduces the overall likelihood of overlap, redundancy, and duplication of effort among users. It increases the probability that the results reported in the document will be available indefinitely and used in subsequent efforts.

To encourage submission of documents to the system, ERIC offers to send contributors notice of document disposition, giving the ED identification number (for ordering purposes) of those documents selected for RIE. Additionally, ERIC will send a complimentary microfiche to each contributor when the document is announced in RIE.

There are no fees to pay in submitting documents to ERIC, nor does ERIC pay any royalties for material it accepts. Other than a statement concerning permission to reproduce, there are no forms to complete.

Where to Send Documents

Documents usually enter the ERIC system through one of two ways:

They may be sent to the Clearinghouse most closely related to their subject matter. A list of the Clearinghouses and their addresses appears on the inside back cover of this issue. Material is expedited if it is directed to the attention of "Acquisitions."

If it is uncertain which Clearinghouse is appropriate, materials may be sent to the following address:

ERIC Processing and Reference Facility Acquisitions Department 1301 Piccard Drive, Suite 300 Rockville, Maryland 20850-4305

The ERIC Facility will forward all submissions to the appropriate ERIC Clearinghouse for consideration and, if selected, processing.

DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may wish to open a Deposit Account as follows:

Domestic Customers—By depositing a suggested minimum of \$200.00 or submitting an executed purchase order.

International Customers—By depositing a minimum of \$500.00 in U.S. Dollars drawn on a U.S. Bank.

STANDING ORDER SUBSCRIPTION ACCOUNTS

Subscription Orders for documents in the monthly issues of Resources in Education (RIE) are available on microfiche from EDRS. The microfiche are furnished on diazo film and without protective envelopes at \$0.130 per microfiche. If you prefer silver halide film, the cost is \$0.266 per microfiche, and each microfiche is inserted into an acid-free protective envelope. Prices are effective January 1, 1995 and are subject to change without notice. Shipping charges not included. A Standing Order Account may be opened by depositing \$2,500.00 or submitting an executed purchase order. All International Orders must be prepaid. The cost of each issue and shipping will be charged against the account. A monthly statement of the account will be furnished.

BACK COLLECTIONS

Back collections of documents in all issues of RIE since 1966 are available on microfiche at a unit price of \$0.153 per microfiche. The collections are furnished on diazo film without envelopes. Prices are good through December 31, 1995, and do not include shipping charges and applicable taxes. For pricing information, write or call toll-free 1-800-443-ERIC.

GENERAL INFORMATION

1. PAPER COPY (PC)

A Paper Copy is a xerographic reproduction, on paper, from microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.

Payment terms are NET THIRTY (30) DAYS by check or money order payable to EDRS in U.S. Dollars drawn on a U.S. Bank.

3. REPRODUCTION

Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

4. CLAIMS POLICY

All sales are final. EDRS will replace products returned within 6 months of delivery due solely to reproduction defects or incompleteness caused by EDRS.

HOW TO ORDER

Resources In Education (RIE)

Resources in Education (RIE) is a monthly abstract journal covering the document literature of education. It is published for the U.S. Department of Education by the U.S. Government Printing Office (GPO). RIE consists of twelve (12) monthly issues (each announcing over 1000 documents and indexing them by Subject, Institution, Personal Author, and Publication Type) and two (2) cumulative semiannual indexes (January-June, July-December). RIE is sold by GPO on subscription or as individual issues on-demand. Stock is retained for only approximately six months; issues older than that are generally not available from GPO. Orders from foreign sources cost 25% additional, as shown in the table below.

NOTE: The Semiannual Index to RIE is being discontinued; the last issue will be the volume for July-December 1994.

RIE Product	RIE Product						
(Master Stock No. 756-003-0	(Master Stock No. 756-003-00000-8)						
Subscription to Monthly Issues — Single Copy On-Demand	(12 issues)	\$56.00	\$70.00				
	(1 issue)	\$20.00	\$25.00				
Subscription to Semiannual Index — Single Index On-Demand	(2 issues)	\$30.00	\$37.50				
	(1 issue)	\$30.00	\$37.50

HAVE A COMPUTER?

LOOK AT ERICTAPESI

The Educational Resources Information Center (ERIC) database is available on magnetic tape in a variety of options. Under special authorization from the U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC database provides coverage of the significant literature in the field of educational resources. Report literature (announced in Resources in Education (RIE)) is covered from 1966 to date; journal article literature (announced in Current Index to Journals in Education (CIJE)) is covered from 1969. Monthly, quarterly, and annual updates are available for both RIE and CUE, so that the files may be kept current.

The basic files are available in the ERIC Format (IBM/OS variable length records). These files include the complete resume (document description, indexing, and abstract or annotation) of each document or journal article announced, in accession number order. A variety of peripheral files,

including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and virtually any segment of the master files is obtainable on Special Order.

The files may be purchased individually or on annual subscription. The files are written on new, high quality, 9-track tapes (600, 1200, or 2400-ft., as appropriate) at either 1600 or 6250 BPI and are guaranteed. Prices per tape reel start as low as \$75.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The Title Index provides access by document title. The Source Directory provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Crossreference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

ERICTOOLS are available individually and on annual subscription. Prices start from as low as \$20 for some individual documents.

* Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: ERICTAPES/ERICTOOLS, 1301 Piccard Drive, Suite 300, Rockville, Maryland 20850, (301) 258-5500

Toll-Free 800 Number Makes Education Information Accessible

ACCESS ERIC is your gateway to the Educational Resources Information Center (ERIC), a nationwide information service designed to make education literature readily accessible.

With its toll-free number, **1-800-LET-ERIC**, ACCESS ERIC makes it easy for you to locate and obtain education information. One call puts you in touch with information specialists who can answer questions about ERIC, refer you to subject-specific information sources, and provide education-related publications produced by ERIC.

Sponsored by the U.S. Department of Education, Office of Educational Research and Improvement, ERIC helps teachers, librarians, students, parents, researchers, and policymakers stay abreast of the most important developments in the education field. Through ERIC, you can access information on a wide range of subjects.

In addition, ACCESS ERIC recently introduced four reference and referral databases to guide you through the vast world of education information. These databases are also available as print directories.

- ERIC Digests Online--Synthesizes information for you and includes more than 470 full-text ERIC Digests (two-page summaries) on current topics in education.
- ERIC Information Service Providers--Lists nearly 1,000 agencies, such as libraries and information centers, that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, or subscribe to and collect ERIC hard-copy reference tools.
- Education-Related Information Centers--Helps you quickly locate agencies knowledgeable about your subject needs. Describes more than 200 resource centers that cover a broad range of education-related topics and provide user services, technical assistance, and information dissemination.
- Education-Related Conferences—Presents nearly 500 international, national, State, regional, and local education-related conferences covering the entire calendar year.

And, to help you stay up to date on a broad range of education-related issues, ACCESS ERIC offers <u>free</u> subscriptions to *The ERIC Review*. You can also order copies of *A Pocket Guide to ERIC* and other resources to help you access and use ERIC.

Gain entry to a world of education literature. For more information, call 1-800-LET-ERIC, Monday to Friday, 8:30 a.m.-5:30 p.m. (eastern time), or write:

ACCESS ERIC 1600 Research Boulevard Rockville, MD 20850

MAJOR VENDORS OF ERIC ONLINE SERVICES AND CD-ROM PRODUCTS

The ERIC database is one of the most widely used bibliographic databases in the world. Users from approximately 100 countries perform an estimated half million online or CD-ROM searches a year using a variety of available commercial systems (listed below).

Users wishing to search ERIC online need a computer terminal equipped with a modern that can link by telephone with the vendor's system. Those preferring stand-alone CD-ROM systems must have a computer equipped with a CD-ROM drive.

As an alternative to acquiring your own ERIC search capability, the *Directory of ERIC Information Service Providers* (available from any ERIC component) lists approximately 1000 organizations that perform ERIC searches on demand for users.

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in Resources in Education (RIE). They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for RIE; these information analysis products are also announced in Resources in Education.
